American Railroad Journal.

Saturday, April 20, 1867.

Stock Exchange and Money Market.

There has been a steady accumulation of loanable funds at this centre, during the past week. Most of the country exchanges have been in favor of this city, and the consequent influx of currency has been quite respectable. The available supply in private channels has been considerably augmented, and lenders have been more liberal of accommodation to responsible borrowers, leading to an encouraging modification of the ruling rates to five per cent. to the large dealers in the public funds, six per cent. to the leading Stock Exchange firms, and 6½@7½, generally 7 per cent. per annum, on prime short date commercial paper, for which latter there has been a decidedly more active inquiry through the more prominent discount houses. The demand for financial assistance from speculative sources has been less urgent, and there has been a consequent falling off in the loan and discount averages of the city banks, which have been less extensively drawn upon by the Treasury official, limiting the further reduction of the undrawn deposits to about a million dollars. The banks have gained handsomely in the legal tender line, partly through the flow of currency in this direction, and partly through the continuously liberal disbursements of the Sub-Treasury office, chiefly in redemption of maturing short date interest bearing obligations of the Government. The retirement, by purchase, or conversion into the new consolidated issue of the Five-twenties, of the first series of the Seven-thirties, which will mature in the coming month of August, is progressing at a rate exceeding a million dollars a day. The whole of this first issue, or all of it that can be prematurely reached by the Government, will doubtless be satisfactorily provided for by the time of the formal maturing of the notes. This will be a source of great relief and strength to the department, and cannot fail to foster popular confidence in the present judicious administration of the National finances. The city banks, in their last weekly exhibit, showed an increase $1,180,740 in the legal tender reserve, and $717,416 in the specie hoard, with a reduction of $4,367,849 in the loan item, $1,000,033 in the deposits, and $72,526 in the circulation, as compared with the footings of the preceding weekly statement. The specie reserve of the banks is now $8,856,229, against $11,035,129, same time last year. The city bank deposits are now $182,861,236, against $193,153,469 week ending April 14, 1866. The legal tender reserve amounts to $60,202,515, against $73,910,370 same time last year. The circulation now stands at $33,702,047, against $24,533,981 same time last year. The loans are now $250,102,178, against $244,009,849 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $87,655,577 a day, against a daily average of $88,639,197 the preceding week, and $76,641,197 the week ending with March 30th. The current week's exchanges average $101,592,438 a day.

The main changes in the Philadelphia Bank footings, last week, were as follows: Increase of loans, $235,545; increase of legal tender reserve, $305,662; increase of deposits, $1,031,088; decrease of specie, $118,094; and decrease of circulation, $5,778.

National Bank notes to the amount of $172,000 were issued last week, making the total issue to 1,664 banks thus far $302,508,756, against $282,555,440 at the close of the last fiscal year, June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $3,581,982, leaving, with the existing 1,647 banks, an actual circulation at this date, of $298,926,774. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,610,950; and for the public deposits, $38,930,950—making a total of $379,541,900. The Treasury Department, last week, redeemed and destroyed $395,000 of worn and mutilated fractional currency, and issued $317,000 worth of new.

The U. S. Sub-Treasury receipts, week ending with April 14, were $22,719,558, including $2,170,506 from customs duties; payments, $19,351,508; balance at the close of the week, $108,548,840, against $105,180,791, at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $6,147,025, and payments,

$4,607,040; on Tuesday, receipts, $3,561,536; payments, $2,146,930. The balance at the close of business on Tuesday stood at $111,503,431, against $105,625,416 a week previous.

The Government has issued bonds to various railroad companies to the amount of $12,920,000, or nearly thirteen millions of dollars, as follows: To the Union Pacific, main line, 303 miles, at $16,000 per mile, $4,880,000; to the eastern division of the same, 155 miles, at the same rate per mile, $2,480,000; to the central branch, 40 miles, at same rate, $640,000; to the Western Pacific, 20 miles, at same rate, $320,000; to 27¼ miles of the Central Pacific, at same rate, $436,000, and to 86¾ miles of the same, the Rocky Mountain region, at $48,000 per mile, $4,164,000.

Government derived a less liberal income from excises, with fair average income from customs, last week. The customs revenue keeps up remarkably well, considering the comparative, rather than absolute, dullness in the industrial and commercial lines. The excises will be more prolific in a few weeks, when the income and annual taxes for 1866 shall have become practically payable into the Treasury. The excises, last week, yielded $2,350,000, against $5,888,886, the preceding week; customs at the port of New York, $2,170,506, and at the outports, about $750,000 (in coin) more, making the grand total income for the week equal about $6,365,687 in currency, against disbursements of $4,458,417 on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $224,500,000.

The cable has proved very unreliable to the *bulls* in the Gold Market, since our last, as it has not conveyed hither from Europe any very alarming intelligence. On the contrary, all the information of an authentic nature which has been supplied by it has been, as a rule, of a pacific purport, and consequently decidedly adverse to the gold speculation. Hence, there has been far less activity in the market, and prices have been generally working downward, with irregular reactions, such as the spasmodic one of Wednesday, caused, in the main, by the circulation of reports, ostensibly by the cable, of impending and apprehended civil disturbances in the French capital, which reports were doubtless manufactured to serve the purposes of the inflationists of the Gold Board. The extremes this week have been 137⅝ at the commencement and 134 on Tuesday, followed by a rise on Wednesday to 135¾, and a subsequent reaction to 135@135⅛. The speculative inquiry has fallen of materially. The customs call has been moderate. The export drain has been utterly insignificant, contrary to the predictions of the *bull* element, in the early part of the month. The total imports of specie from Europe, and other foreign ports since Jan. 1, 1867, have been $489,800. The customs demand for Gold last week, averaged $361,251 a day; thus far, this week, it has been equal to $331,762 a day, or equal to a weekly aggregate of $1,990,572. The arrivals of specie from Europe, Havana and other foreign ports, during the past week were $12,460, and from California, $1,146,583. The total customs revenue of the Government, in coin, at this port since July 1, 1866, has been $100,083,182, against $107,860,623 same time in the preceding fiscal year. The total receipts of California gold at this port since July 1, 1866, have been $33,343,648, against $22,448,205 same time last year, showing an increase this year, of $10,895,443. The exports of specie from this port, last week, were only $65,763. The total outflow of specie from the port, thus far in the current fiscal year has been $23,851,292, against $17,785,698 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $72,000, making the total coin interest disbursements through the Government office, since July 1, 1866, $36,553,964, against $32,139,670 for the same time in the preceding fiscal year. The specie exports from San Francisco from Jan. 1, to March 13, 1867, reached $8,105,617, against $7,749,299 same time last year.

The total amount of gold certificates issued and redeemed by the Sub-Treasury, together with the balance unredeemed on the 13th of March is thus stated:

	Issued.	Redeemed.	Outstanding.
20s ...	$304,360	$191,700	$112,660
100s ...	5,038,800	3,492,300	1,546,500
500s ...	850,000	371,000	479,000
1,000s ...	24,367,000	20,750,000	3,617,000
1,500s ...	150,505,000	135,790,000	14,715,000
10,000s ...	5,000,000	5,000,000	.....
Total	$186,065,160	$165,595,000	$20,470,160

Foreign Exchange has been less buoyant, and the demand for it has been less active, yet quotations have not varied materially. Bankers' 60 day bills on London closed firmly on Wednesday at 109@109¼, and on Paris to 5.20@5.16¼; sight bills on London to 109⅞@110⅛; and on Paris to 5.16¼@5.13¾. The offerings of produce bills have been fair, since our last. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $4,458,700, making the total value of exports since July 1, 1866, $141,539,252, against $180,087,508 same time in the preceding fiscal year.

Government securities have been in good demand during most of the week at generally former prices. The main inquiry from home investors has been for the new issue of the Five-Twenties of 1865, and for the issue of 1864; while that from foreign buyers has been, of course, almost exclusively for the Five-Twenties of 1862, moderate shipments of which have been made to Europe, during the week. The compound interest notes have also been in request, partly for banking purposes, and have been quoted higher. U. S. sixes of 1867 closed here on Wednesday at 131¾; U. S. sixes of 1868, at 130; U. S. sixes of 1881, 109⅛@109¼; U. S. Five-twenties of 1862 at 109⅝@109¾; U. S. Five-twenties of 1865 at 108⅜@108½; U. S. Five-twenties of 1865, consolidated, 107⅛@107¼; U. S. Ten-forties at 97⅞@98, ex-coupon, and U. S. Seven-thirties at 105⅜@106⅛. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ¼@½ of 1 per cent. on these figures:

June, 1864.....118⅝	May, 1865 .....112¾
July, 1864.....118⅛	August, 1865....111¾
August, 1864....117⅝	September, 1865..111¼
October, 1864....115⅝	October, 1865....111
December, 1864..114⅝	

The new arrangements of the Stock Exchange for the sale of the public funds were formally inaugurated a week ago. The various issues of the national stocks have been regularly called in the newly organized board at from 10 a. m. to 2 p. m. At a meeting of this Government Exchange, held on Tuesday afternoon, a Committee on Membership was appointed, to whom all applications for admission previous to May 1 should be directed. Mr. Wm. M. Parks, No. 19 Broad street, is the Chairman.

The railway and miscellaneous share dealings have been on a less extensive scale, since our last, and despite the growing ease in money, prices have exhibited decidedly less buoyancy. At the same time, there has been no extraordinary pressure to realize, and toward the close, confidence in an early rally in the market has been gradually reviving.

The general markets have exhibited less animation, since our last. Business in domestic produce has been fair, chiefly in breadstuffs and provisions which have been variable in price, but which closed on Wednesday pretty firmly, as a rule. The Cotton trade has been spiritless, and holders have been discouraged by the continuous receipt of unfavorable market reports from Liverpool. One old and highly respectable firm (that of Messrs. John H. Brower & Co.) has been forced to succumb to the embarrassments resulting from the recent fall, and unmitigated depression in prices of this staple. Middling grades of cotton left off here on Wednesday tamely and rather heavily at 27@28½ cents per lb. as extremes. The stock of cotton now here is estimated at about 175,000 bales. The receipts at the port this week, have averaged nearly 2,350 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 521,000 bales, against exports of 385,000 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 1,605,000 bales against 1,708,197 bales same time last year; exports, 1,079,738 bales, against 1,144,710 bales same time last year; estimated stock at latest dates, 465,000 bales, against 453,000 bales same time last year. A moderate business has been transacted in the more desirable kinds of imported goods at about uniform prices for the principal articles. The demand for choice foreign dress goods has been more active and at rather more remunerative prices. The total imports of foreign dry goods, last week, were $1,407,926, and the total amount marketed $1,501,328. The value of foreign merchandise imported last week, was $5,059,841—making the grand total specie value of last week's imports of dry goods and merchandise, $6,467,267, and since July 1, 1866, $205,274,070, against $235,199,351 same time in the preceding fiscal year. The ocean freight market has been less active and with 556 vessels of all classes in port. For Liverpool we quote flour at 1s. 10½@2s. per bbl.; grain at 2¾@3½d. per bushel; cotton at 31/16@¼d. per lb.; and heavy goods at 12s. 6d.@20s. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	April 3.	April 10.	April 17.
Consols 91		90½	91
U. S. 5-20's of 1862....75		73¾	*71¼
U. S. 5-20's of 1865....73		71¾	*69½
Erie 39		37½	37¾
Ill. Central.....78¾		77¼	76¼

* Ex first of May coupon.

The New York exports, exclusive of specie, for the week ending April 16, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week.....	$6,267,431	$4,458,700
Prev. reported.....	66,941,941	55,474,157
Since January 1.....	$73,209,372	$57,932,857

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$2,003,467	$1,407,926
Gen. merchandise.....	3,757,374	5,059,341
Total for the week.....	$5,760,841	$6,467,267
Previously reported....	87,354,312	67,873,771
Since January 1.....	$93,115,153	$74,341,038

The commerce of New York from July 1st to date compares as follows:

	1865–'66.	1866–'67.
Imports merchandise.	$235,199,351	$205,274,070
Exports produce.....	180,087,508	141,539,252
Exports specie	17,785,698	23,851,292

The balance in the Sub-Treasury on Wednesday was $100,798,598.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Columbia and Port Deposit Railroad.

The stockholders of this company, at a meeting held recently, resolved to increase their capital stock to one million of dollars, and authorized the president to issue a first mortgage on the property and franchises of the company to the amount of two millions of dollars. The matter of putting the work under contract was also acted upon.

☞ The Secretary of the Interior has received a communication announcing the completion of the third section of twenty miles of the Central Branch of the Union Pacific Railroad, said branch being formerly known as the Atchison and Pike's Peak Railroad.

☞ The track of the Manassas Gap Railroad is being laid. It is expected that the road will be finished between Manassas Station and Piedmont by the 24th inst.

Railroad Earnings.—Weekly.

The earnings of the Grand Trunk Railway of Canada for the week ending Mar. 30th, 1867, were $125,860 00
Corresponding week of previous year. 115,354 00

Increase $10,506 00

The earnings of the Detroit and Milwaukee Railroad for the week ending April 11th, 1867, were $32,286 00
Corresponding week of 1866 ..... 32,957 00

Decrease $721 00

The earnings of the Chicago and Rock Island Railroad for the 1st week in April, 1867, were $75,707 00
Corresponding week of previous year .. 56,221 00

Increase $19,481 00

The earnings of the Western Union Railroad for the week ending April 7, 1867. ... $8,249 83
Corresponding week previous year 6,082 93

Increase $2.166 90

The earnings of the Michigan Central Railroad for the 1st week in Apr., 1867, were.. $81,628 16
Corresponding week of previous year .. 78,881 03

Increase $2,747 13

The earnings of the Chicago and Great Eastern Railway for 1st week in Apr. were ... $26,462 00
Same period last year 23,061 00

Increase in 1867 ..... $3,401 00

The earnings of the Chicago and Northwestern Railroad for 2d week in April, 1867 ... $178,296 00
Corresponding week previous year .. 140,953 00

Increase $37,343 00

The earnings of the Michigan Southern and Northern Indiana Road for the 2d week in April 1867, were $87,280 00
Corresponding week of 1866 ..... 101,539 00

Decrease $14,259 00

Journal of Railroad Law.

LIABILITY OF COMMON CARRIER MAY BE QUALIFIED BY SPECIAL CONTRACT—DECISION OF U. S. SUPREME COURT.

The case of York *vs.* The Illinois Central Railroad Company, which was lately decided by the Supreme Court of the United States, gives an authoritative exposition of the law regulating contracts which seek to limit the common law liability of common carriers. The Court decides that the common law liability of a common carrier for the safe carriage of goods may be limited and qualified by a special *contract* with the owner; provided such special contract do not attempt to cover losses by negligence or misconduct. Thus, where a contract for the transportation of *cotton* from Memphis to Boston was in the form of a bill of lading containing a clause exempting the carrier from liability from losses by *fire*, and the cotton was destroyed by fire, the exemption was held sufficient to protect the carrier, the fire not having been occasioned by any want of due care on his part.

Where a deposition is taken upon a commission, the general rule is that all objections to it of a formal character, and such as might have been obviated if urged on the examination of the witness, must be raised at such examination, or upon motion to suppress the deposition. It is too late to raise such objections for the first time at the trial. Thus, where a copy of a bill of lading was annexed to the answer of a witness, examined on a commission, and no objection was taken at the examination or by motion to suppress afterwards, it was held that the objection that the original was not produced, or its loss shown, came too late at the trial.

The facts of the case are these: Front & Son shipped at Memphis, on the Mississippi, a large quantity of cotton on board a steamer belonging to the Illinois Central Railroad Company, common carriers; which by the terms of the bill of lading was to be delivered at Boston, Mass., the consignees paying $4.75 per bale, "*fire* and the unavoidable dangers of the river *only excepted*." The bill of lading which referred to the cotton as shipped by Front & Son was signed in form; two copies being given to Front & Son, of which they retained one, forwarding the other to the York Company in New England, for whom the cotton was intended. In the course of the transit the cotton was destroyed by fire.

The company now sued the carriers in the Circuit Court of Illinois for damages. Front was examined on *a* commission, and having stated that his firm were but agents of the York Company, and that the shipment was made on *its* account as owner, proved the fact and contract of shipment, (which last he stated was in the form of a bill of lading,) and the value of the cotton. But he did not produce on his examination in chief any original or copy of the bill itself.

The carriers who wished to rest their case on the fire clause in the bill, inquired of him on cross interrogatories whether one or more of the bills had not been delivered to him, and directed him, if one had, to annex "the same or a certified and proved copy to his deposition, and to let the same be *properly identified by the commissioner in his return*." The witness answering that one of the bills had been delivered to him annexed "a true copy of it from his books." The fire clause appeared in it; though the witness stated that the cotton was shipped on the steamer before the bills were signed; that he had not examined the bills; that "his attention was not called to the fire clause," and that his firm had no authority to ship for their principals with that exemption.

On the trial, the plaintiff, *not having made objection during the execution of the commission nor by motion to suppress*, objected to the reading of the answers to the cross interrogatories which showed a *copy* of the bill; the ground of the objection being that the contract was shown to be in writing, and that no foundation had been laid for secondary evidence, either by notice to produce the original bill, or by evidence of its loss. But the Court overruled the objection. The defendant had judgment. On error four objections were made to it here.

1. Because it was doubtful whether as common carriers the defendants could exempt themselves from risks by fire.

2. Because if they could, still that Front & Son, who were really but agents of the York Company, could not give their assent to such exemption.

3. Because if they had given such assent no consideration had been paid by the company, in a reduced rate of fare or otherwise, for this restriction of the carrier's common law obligation.

4. Because the *copy* of the bill of lading, in the absence of notice to produce the original or proof of its loss, was improperly allowed to be read.

Mr. Justice Field delivered the opinion of the Court.

The right of a common carrier to limit his responsibility by special contract has long been the settled law of England. It was the subject of frequent adjudication in her Courts, and had there ceased to be a controverted point before the passage of the Carrier's Act of 1830.

In this country, it was at one time a subject of much controversy whether any such limitation could be permitted.

It was insisted that, exercising a public employment, the carrier owed duties at common law, from which public policy demanded that he should not be discharged even by express agreement with the owner of the goods delivered to him for transportation. This was the ground taken by Mr. Justice Cowen, of New York, in Cole *vs.* Goodwin; and, although what that learned judge said on this point was a mere *obiter*, as the question presented was not upon the effect of a special agreement, but of a general notice, it appears to have been adopted by a majority of the Court in the subsequent case of Gould *vs.* Hill. But from this doctrine that Court has since receded; and in a recent decision, the Court of Appeals of that State has affirmed the right of the carrier to stipulate for a limitation of his responsibility. The same rule prevails in Pennsylvania; it has been asserted in Ohio and Illinois, and it is believed, in a majority of the other States; and in the New Jersey Steam Navigation Co. *vs.* The Merchants' Bank, it received the sanction of this Court.

Nor do we perceive any good reason, on principle, why parties should not be permitted to contract for a limited responsibility. The transaction concerns them only; it involves simply rights of property; and the public can have no interest in requiring the responsibility of insurance to accompany the service of transportation in face of a special agreement for its relinquishment. By the special agreement the carrier becomes, with reference to the particular transaction, an ordinary bailee and private carrier for hire.

The law prescribes the duties and responsibilities of the common carrier. He exercises, in one sense, a public employment, and has duties to the public to perform. Though he may limit his services to the carriage of particular kinds of goods, and may prescribe regulations to protect himself against imposition and fraud, and fix a rate of charges proportionate to the magnitude of the risks he may have to encounter, he can make no discrimination between persons, or vary his charges from their condition or character. He is bound to accept all goods offered within the course of his employment, and is liable to an action in case of refusal. He is chargeable for all losses except such as may be occasioned by the act of God, or the public enemy. He insures against all accidents which result from human agency, although occurring without any fault or neglect on his part; and he cannot, by any mere act of his own, avoid the responsibility which the law thus imposes. He cannot screen himself from liability by any general or special notice, nor can he coerce the owner to yield assent to a limitation of responsibility by making exorbitant charges

when such assent is refused. The owner of the goods may rely upon this responsibility imposed by the common law, which can only be restricted and qualified when he expressly stipulates for the restriction and qualification.

But when such stipulation is made, and it does not cover losses from negligence or misconduct, we can perceive no just reason for refusing its recognition and enforcement. We do not understand that the counsel for the plaintiff in error questions that the law is as we have stated it to be. His positions are that the agents of the plaintiff at Memphis, who made the contract with the Illinois Central Railroad Company, were not authorized to stipulate for any limitation of responsibility on the part of that company; and that no consideration was given for the stipulation made.

The first of these positions is answered by the fact that it nowhere appears that the agents disclosed their agency when contracting for the transportation of the cotton. So far as the defendant could see, they were themselves the owners. The second position is answered by the fact, that there is no evidence that a consideration was not given for the stipulation made. The company, probably, had rates of charges proportioned to the risks they assumed from the nature of the goods carried, and the exception of losses by fire must necessarily have affected the compensation demanded. Be this as it may, the consideration expressed was sufficient to support the entire contract made.

The objection urged to the introduction of the copy of the bill of lading annexed to the deposition of the witness Front, was properly overruled. The deposition was taken upon a commission, and in such cases the general rule is, that all objections of a formal character, and such as might have been obviated if urged on the examination of the witness, must be raised at such examination, or upon motion to suppress the deposition. The rule may be different in some State Courts; but this rule is more likely than any other to prevent surprise and secure the ends of justice. There may be cases where the rule should be relaxed, as where the deposition is returned at so brief a period before the trial as to preclude a proper examination, and prevent a motion to suppress. In this case there was no occasion for any such relaxation of the rule, and had the objection been taken before the trial—either at the examination of the witness or on a motion to suppress—to the proof of the copy without producing the original or showing its loss, the opposite party would undoubtedly have secured the production of the original, if in existence, or if lost or destroyed, been prepared to account for its absence.

Judgment affirmed.

☞ General Boyle, President of the Evansville, Henderson and Nashville Railroad, states that sixty miles of the grading of that road has been completed, extending to the extensive coal mines in Hopkins county. $675,000 have been subscribed along the route, and Evansville will subscribe $300,000, indicating that the road will certainly be built.

☞ The Taunton, Mass., *Gazette* says a route is being surveyed for a railroad between Crane's Station and Hebronville.

Railroads and Canals of Pennsylvania.

We give in our present issue an abstract statement of the Annual Report of the Hon. J. F. Hartrauft, Auditor General of the State, for the year 1866, showing the length, cost, indebtedness, earnings, dividends, etc., etc., of all the steam and horse railroads and canals of the State, as far as reported to the Legislature. This State has now more miles of railroad in operation than any other State in the Union. There are in the State 102 railroads, of which 27 are either leased to or operated under contract by other companies. Five are in progress, viz: Connecting, Philadelphia, 7 miles; Enterprize; Lehigh and Lackawanna; Nesquehoning Valley, 13 miles; and the Perkiomin. Three have not reported, viz.: Alleghany Valley, Junction, and McCauley Mt. and Black Creek. There are also 26 horse railroads and 14 canals. Of the former, 19 are in Philadelphia, 4 in Pittsburg and Allegheny, 1 in Harrisburg, 1 in Williamsport and 1 in Wilkesbarre.

The returns of 78 steam railroads are given in the table referred to the, total length of which is 4,437 miles, costing for construction and equipment, the sum of $467,684,408 27. To operate these roads there are required 1,716 locomotives, 488 baggage and mail cars, 870 passenger cars, 19,803 freight cars, 27,059 coal cars. The roads have on them 1,837 bridges and 13,925 stations and depots. The capital stock of the railroads is $193,139,081 36, and the debts amount to $109,921,302 53. During 1866 the tonnage was the enormous amount of 490,025,998 tons and they carried 17,734,216 passengers. Their receipts were $70,990,749 44, whilst the expenses of all descriptions amounted to $41,032,146 93. On these steam roads in 1866 there were 324 persons killed and 451 injured by accidents. Of the killed, 13 were passengers, 151 employees of the companies, and 160 others. Of the injured, 66 were passengers, 267 employees and 118 others. The 26 horse railroads in the State have 189½ miles of roadway, costing $5,284,896 96 for construction and equipment. They are operated by 4,314 horses and 770 cars, and during 1866 carried 37,464,991 passengers. The receipts of the horse railroads were $3,410,544 85, and their expenses $2,418,624 18. During 1866 there were 9 persons killed and 23 injured on these roads. There are 804⅔ miles of canals in the State, and during 1866 their receipts were $3,608,527 92, and their expenses $1,544,801 97.

Richmond County Railroad.

A meeting was recently held at Richmond, S. I., "to organize the proposed road from Rossville to Port Richmond. Only $4,000 were subscribed. The name of the Company is the Richmond County Railroad and Ferry Co., formed for the purpose of constructing and operating a railroad from Ward's Point, through Rossville and Richmond, to Port Richmond, and thence upon and over the waters of the Kill von Kull, to Bergen Point, N. J. The organization shall be for 100 years; capital stock shall be $250,000, divided into 5,000 shares of $50 each. Its extreme length will be 14 miles, as nearly as may be. Springville is one of the places through which the proposed road shall pass. Clarence Delafield, Port Richmond; H. J. Corson, Springville; W. H. Geib, Richmond, and Israel Oakley, Rossville, were empowered to call a meeting together whenever they shall have obtained the requisite amount of subscriptions."

Plastic Slate Roofing.

We invite attention to the Advertisement of the Plastic Slate Roofing Joint Stock Co., in another column. The materials used in the formation of this article are slate stone and gluten or other vicious matter. Slate stone and coal tar are too well known to require a description. Associated in geology—perhaps originally combined—an affinity is found to exist, and the slate being pulverized and brought into contact, a union is formed which no power can dissolve. The materials used are both cheap and abundant. A mastic, it adapts itself to every shape and condition. Adhesive, it needs no nails or hooks to attach it. It is non-combustible; impervious to air or water; undecaying and indestructible. Neither heat nor cold can compel it to expand or contract. Steam cannot penetrate it. Fire will not burn it. Time and the elements only mature and perfect it. It has been used with great success at the depots and bridges of railroad companies; also for the arching of tunnels. It prevents moulding. It costs less than ordinary paint or cement of any kind.

Illinois Central Railroad.

The statement of this Company for the month ending March 31, 1867, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	7,489.66 for	$75,241 45
Acres Int. Fund Lands sold	757.24 for	11,547 54
Acres Free Lands sold	3,049.45 for	35,757 18
Total sales during month of March, 1867	11,296.35 for	$122,546 17
To which add Town Lot Sales		1,010 00
Total of all	11,296.35 for	$123,556 17
Cash collected in March		$167,642 56

TRAFFIC DEPARTMENT.

Receipts from Freight	$239,776 00
do. Passengers	132 217 85
do. Mails	6,358 33
do. Rent of Road	4,000 00
do. Other Sources	35,000 00
Total Receipts in March, 1867	$417,352 18
Total Receipts in March, 1866	$516,821 75

Pennsylvania Railroad.

An adjourned meeting of the stockholders of this company will be held in Philadelphia on the 30th inst., at which the act of Assembly, approved March 22, 1867, entitled "An act to repeal an act entitled 'A further supplement to the act incorporating the Pennsylvania Railroad Company, authorizing an increase of capital stock and to borrow money,' approved the 21st day of March, A. D. 1866, and also to authorize the Pennsylvania Railroad Company by this act to increase its capital stock, to issue bonds and to secure the same by mortgage," approved the 22d day of March, A. D. 1867, a proposed increase there under of the capital stock of this company by 300,000 shares, and the issue of the same from time to time by the Board of Directors, and the proposed exercise of the said Board of Directors, of the powers granted by the said act of issuing bonds and securing the same by mortgages for the purposes in the said act mentioned, and within the limits therein prescribed, will be submitted to the Stockholders for their action in the premises.

Eastern Shore Railroads.

As considerable has been said lately through the newspapers and by individuals about the proposed new railroads of the Eastern Shore of Maryland, and particularly that of Elkton and Massey's Cross Roads, for which a charter was granted by the last Legislature of this State, we have been at some pains to inquire, and have elicited the following facts, which have been furnished by parties professing to be thoroughly posted in the affair: From Elkton to Head of Sassafras is nineteen miles by public road, and would probably be a shorter distance by rail, and from the latter point to Masseys Cross Roads the distance is five miles. At this point the road would connect with the Kent County Railroad, which again connects at some point further down with the Queen Anne's Railroad; thus giving an unbroken rail to Baltimore or Philadelphia, *via* the Elkton junction, shortening the distance of travel from those middle counties of the Eastern Shore to Baltimore considerably; while the distance would be no greater than those points to Philadelphia by the proposed line of Eastern Shore roads than by the Delaware road.

The road is already graded from Elkton to the Bohemia River, which is thirteen miles, and our informant assures us that the Philadelphia, Wilmington and Baltimore Railroad Company are ready to construct it from Elkton to the old Frenchtown road, four miles.

The State of Maryland's appropriation to the road is $58,000, and considerable sums have been subscribed by individuals, together with the work which the Philadelphia, Wilmington and Baltimore Railroad Company propose to do, would amount to fully half the cost of the entire work. The damages of property owners would be nominal, as the greater part of such damages would be taken in stock. The prospects, we think, are very favorable toward building this important link to connect the Eastern Shore with Baltimore by a shorter, more convenient and less expensive route than the present Delaware road. If the matter were taken in hand properly by enterprising men, who would fairly represent the great advantages of the road to the State of Maryland, we think sufficient means could be raised in a short time in the city of Baltimore to complete the road. What men have we in Kent and Cecil who will display the requisite amount of enterprise to take hold and get the work under way? If once started, the great advantages of the road are so apparent that we hazard the prediction that it would soon be completed.—*Elkton Whig.*

The Erie Coal Trade.

It is stated that in the exportation of coal Erie ranks second in the United States. The amount of the export trade during the season of 1866, was 251,817 tons, of which about 25,000 tons was anthracite, and the remainder bituminous. The entire trade amounted to 377,990 tons. The soft or bituminous coal is obtained from Mercer, Lawrence and Beaver Counties, and is shipped *via* the Erie and Pittsburg Railroad and the Erie Canal to the docks in Erie, whence it is taken by vessels to the ports on the upper lakes—mostly to Chicago. The return freights are made up from the iron ores of Lake Superior. The freight and tolls on the canal during the season of 1866, were from $1 75 to $2 25 per ton, according to distance, and the tariff by the railway was about 2½ cents per ton mile, while lake freights for coal to Chicago ranged from $1 25 to $1 50 per ton. The port of Cleveland is the only competing point of any importance for the shipment of soft coal.

☞ The Wisconsin Legislature has passed the bill prohibiting the consolidation of the Milwaukee and St. Paul and the Milwaukee and Prairie du Chien Railroads with the Chicago and North western Railroad.

The Ohio River Ship Canal.

Both houses of Congress have passed a joint resolution providing for the necessary survey for a ship canal around the falls of the Ohio River. The resolution directs the Secretary to cause surveys, with plans and estimates of cost, to be made by an officer of the Engineer Corps, for a ship canal suitable for military, naval and commercial purposes, around the falls on the Indiana side, and to cause said officer also to estimate the expense of completing the Louisville and Portland Canal, on the Kentucky side, according to the present plan. The expenses of these surveys are to be defrayed from existing appropriations. The report will be laid before Congress next session for decision, whether the old canal shall be completed or a new one made.

Copper Falls Mining Co.

The prospects of this company are good. The mining expenses are light compared with the product, it being stated that their copper can be mined at 15 cents per pound, and the lowest estimate made being $8,000 per month. The assets of the company are: Supplies at mine $68,200—104 tons mineral $37,500; cash $4,350. Loaned $23,850; Arnold Mining Company $4,600; Ingot Copper in New York $3,500—amounting to $142,000. Liabilities due at mine $35,000; drafts in transitu $33,000; due Humboldt Mining Company $2,500. Balance assets over liabilities $71,500.

☞ A meeting of gentlemen was held at Dubuque, Iowa, last week, to take action on the project of building a bridge across the Mississippi at that city. Preliminary steps towards the formation of the Dubuque Bridge company were taken, and much enthusiasm in favor of the enterprise was manifested. Newton Chaping, of Chicago, estimated the probable cost of the bridge at $1,000,000. It must, under the act of Congress, be fifty feet above high water mark, if of continuous spans, and if a draw-bridge, forty feet. The Legislature of Illinois has consented to the building of the bridge, and that of Iowa will do so.

☞ The report of the Huron Mining Co., states the liabilities at $537,000, and its assets, including ingot copper and copper ore, and assessment $3 per share, $532,000. The real estate of the company is valued at $350,000; mining plant and machinery, $472,000. New machinery has just been placed in the mine, which will hereafter be worked at greater advantage.

☞ A mining company, owning eight square miles of the celebrated Pictou coal bed in Nova Scotia, has been organized in Brunswick, Me., Samuel R. Jackson is President, Charles Boutelle, Treasurer, both of Brunswick; and John L. Hodsdon, of Augusta, Secretary.

☞ We learn that the rates of toll and transportation *via* Lehigh Valley Railroad from Mauch Chunk to Easton have been fixed at 80 cents, and $1 22 from Easton to Elizabethport, making the rate from Mauch Chunk to Elizabethport $3 02. To Port Johnson the rate is $1 29 per ton.

☞ The gross receipts of the Baltimore City Passenger Railway Co. for the first quarter of the present year were $74,388 45.

☞ The Welland canal will be open for navigation on the 23d inst.

Cobourg and Marmora Railway.

We learn from a trustworthy source that the greatest activity now prevails along the Belmont portion of this new route. Forty men are engaged in providing material and framework for the wharf, on the River Trent, just above the Narrows. Gangs of men are to be found at intervals along the track, cutting out the roadway or preparing ties, while eighty men are at work at the ore bed removing the surface earth, and preparing the approach for the track to the deposit of ore. It is said that 400 men will be required permanently to work in getting out the ore, loading the cars, &c.; and as these men and their families will reside at the ore bed, the place will be one of considerable bustle and business during the approaching season. Already the adjacent property has been surveyed into village lots, an engraved plan of which is being prepared, and in which intending residents are already making investments.—*Peterborough Review.*

Interest and Dividends.

The Baltimore and Ohio Railroad Co. have declared a dividend of 4 per cent. on the stock of the Main Stem, payable on the 30th of April; also a dividend of five per cent. on the capital stock of the Washington Branch, payable on the 16th of April. Both dividends are payable at the Merchants' National Bank, Baltimore. The United States tax will be paid by the company.

The Concord Railroad Company have declared a dividend of five per cent., payable May 1, 1867, at Boston, Nashua, Concord and Manchester.

☞ The President has signed the joint resolution providing for the necessary surveys for a canal between Lake Erie and Lake Ontario, for military, naval and commercial purposes.

☞ The receipts of the Towsontown Passenger Railroad Company for the first quarter of the present year, less the Government tax, were $1,616 05.

☞ The first vessel through the Susquehanna and Tide Water Canal this season arrived at Baltimore on the 13th inst.

PLASTIC SLATE ROOFING

JOINT STOCK COMPANY.

OFFICE 157 (Room 19) BROADWAY,

NEW YORK.

W. C. POTTER, Vice Pres't.
J. M. ALLEN, Sec. and Treas. LICENSES GRANTED.

PLASTIC SLATE

FOR

Roofing & Other Purposes.

The process of reconstructing Slate Stone from a disintegrated state was

PATENTED FEBRUARY 21ST, 1865.

It is a combination of

Pulverized Slate and Viscous Matter,

(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.

As a Roofing Material it Stands Unrivalled.

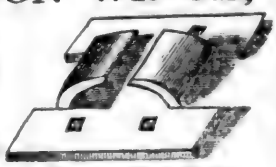
A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.

Frost does not Crack nor Heat Dissolve it.

The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and

Perfectly Fire-Proof,

It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.



IRON BRIDGES.

THE undersigned is prepared to Manufacture and Build in any part of the United States, at reasonable terms, Fink's Patent Iron Bridges, Peate and Lattice Bridges, Peate Girders for Fireproof Buildings, Iron Roofs, Bolts, etc. For plans and particulars apply to

C. J. SCHULTZ,
Cor. of Wayne St. & Duquesne Way,
PITTSBURGH, PA.

Letter-Box No. 1,393, P. O.

CORYDON WINCH,

Manufacturer of
RAILROAD
SPIKES
AND CHAIRS.

Also all kinds of Bridge, Boat, and Plate Spikes,
Canal St., near Second and Laurel,
PHILADELPHIA.

ASTONISHING!

PAINTS for Cars, Bridges, Roofs and Houses at ONE-THIRD the cost of lead; 100 lbs. will paint as much as 250 lbs. of lead, and wear better. Extract from a testimonial received from the U. S. Mint, "have used the PECORA CO'S BROWN PAINT where it is subject to the fumes of ACID and STEAM, and find it SUPERIOR to all others in protecting wood and metal." For joints it is superior to red lead. The floors and joints of bridges should all be painted with it as they are laid.

PECORA PAINT CO.,
150 N. 4th St., Philadelphia.

FOR SALE
3 LOCOMOTIVES,
4-81-2 GAUGE,

All thoroughly REBUILT by one of the best makers in the country, and ready for immediate use.

1—Cylinders 14x20, Link Motion, 4-56 in. Drivers connected, Copper Flues, Weight about 24 tons; 8 wheeled Tender, 1800 gallons.

This Engine has always worked admirably; Steams freely with dry or green wood, works and wears perfectly smooth; Well springed and brassed all around. Proportions every way suited to power. A good and stylish model, all in excellent order.

2—Cylinders 15x20, Link Motion, 4-54 in. Drivers connected, Copper Flues, weight about 23 tons, 8 wheeled tender, 1,800 gallons.

Is a smart smooth working Engine, suitable for any work; has a good record throughout.

3—Cylinders 15x20 Hook Motion, 4-64 in. Drivers connected, Copper Flues, weight about 24 tons; Tender, 8 wheeled.

Every way perfectly sound, well brassed and springed up. All in fine working condition.

These Engines will be sold VERY CHEAP to close a transaction, and are GREAT BARGAINS to any company wanting this sized Engine.

KASSON & CO.,
58 Beaver St., New York.

Thistle Mill Waste,

A new and Superior Article of WOOLEN Waste, combining the following

ADVANTAGES,

1st. It is 30 per cent. lighter than ordinary waste.
2d. It will absorb 25 per cent. more oil.
3d. Has greater elasticity and will wear longer.
4th. It is less liable to ignite.
5th. And has a value as old waste.

The use of Wool as an ANTI FRICTION material is too well known to require discussion.

This waste is manufactured expressly for use in packing Locomotive and Car Journal Boxes, and will be sold as low as the best Cotton Waste.

The old waste taken in exchange at a price—including weight of oil, dirt, &c.—which will reduce first cost over one-half.

Small Sample Bales furnished FREE for trial.

KASSON & CO.,
15tf **58 Beaver St., New York,**

SHIP FELT, CARPET FELT, BOILER FELT.

THE very superior Felt, manufactured by the Lowell Felting Mills, can now be furnished in quantities to suit purchasers, from the new and extensive mills now completed. Also, pipe, truss, upholstery and all other Felts. Apply to the branch office of the Company.

OFFICE ERIE RAILWAY COMPANY,
No. 187 West St., NEW YORK, April 1, 1867.

NOTICE IS HEREBY GIVEN of the intention of this Company to extend its First Mortgage Bonds, due July 1, 1867, for Thirty Years, at Seven per cent. per annum. These Bonds are a First Mortgage of $3,000,000 on the entire property of the Company, and the power to extend them is given by a statute of the State of New York, which provides that the Company may extend any or all its Mortgage Bonds, in the order of their respective priorities.

Proposals will be received up to the 15th of May next, at the General Office of the Company in the City of New York, for extending any portion of the issue, and parties, whether present holders or others, bidding the highest premium therefor will be entitled to extend said Bonds *pro rata*, on the amount of their bid, as the Bonds are presented by the holders.

On and after the 1st of July the Company will be prepared to extend, on the above terms, all such Bonds as the holders thereof may present for that purpose, at the office of the Company in the City of New York, and new sheets of Coupons for 30 years, with an indorsement thereon of a mutual agreement of such extension, will be issued and attached, with interest payable semi-annually as heretofore.

Persons whose bids may be accepted will have the option of extending Bonds in London, Frankfort, or Germany, on due notice to the Company, in manner to be hereafter determined, of the numbers of the Bonds to be extended in each place.

5t15 ROBERT H. BERDELL, President.

Pollock & Van Wagenen,

E. LYON,

470 GRAND STREET, NEW YORK,

MANUFACTURER of Patent Portable Hydraulic Jacks and Punches, for raising Heavy Weights, such as Locomotives, Boilers, Guns, Heavy Machinery, Wrecking Purposes, Putting together Water and Gas Pipes, Pushing off Cranks and Propellers, Pulling, Proving Chains and Ropes, Setting up Rigging, or Pulling Stumps, Punching Iron, Die-Sinking, etc. Improved Patent Hydraulic Jacks, that run out their entire length in a Horizontal or any other position. Send for Circular.

STEAM BOILERS.

The Harrison Boiler

HAS NO SUPERIOR AS A STEAM GENERATOR.

It is a Great Economizer in Fuel and is Absolutely Safe from Destructive Explosion.

It gives less trouble and occupies less space than ordinary boilers, and it is its own super-heater. It is easily enlarged to any requisite power, and has no limit of power to which it is adaptable, always maintaining its unit of strength.

☞ CIRCULARS SENT FREE, and information furnished, at

BRANCH OFFICE, 119 BROADWAY,
ROOMS 9 and 10. J. B. HYDE, Agent.

PROPOSALS FOR THE CONSTRUCTION OF THE SUMMIT DIVISION OF THE ILLINOIS AND MICHIGAN CANAL.

OFFICE OF THE BOARD OF PUBLIC WORKS,
CHICAGO, March 18th, 1867.

Sealed Proposals will be received by the Board of Public Works, at their office, until 11 a. m. Wednesday, May 1st, 1867, for the excavation necessary to deepen the Illinois and Michigan Canal, according to the plan adopted, from Chicago River to Summit Lock, No. two (2) a distance of twenty-six (26) miles.

Maps, profiles, specifications, &c., will be exhibited the office of the Board of Public Works in Chicago on and after April 15th until the day of letting.

There will be some two millions (2,000,000) cubic yards of earth excavation—some of it quite hard and embracing considerable detached rock—and about four hundred seventy thousand (470,000) cubic yards of stratified limestone.

The work must be prosecuted so as not to interfere with the use of the Canal during the season of navigation.

It is believed, however, that the most of the excavation, except the stratified rock, can be done with steam dredges without interfering with the navigation of the Canal, but the rock excavation will all have to be done between the close of navigation in the fall and the opening in the spring.

If a new line be adopted for any portion of the distance, operations thereon may be continued the whole year; and the navigation of the Canal will be suspended at least five months in each year unless otherwise mutually agreed by the Board and Contractors.

The whole of the work must be done on or before the end of the third season of the suspension of navigation.

A large amount of machinery will be required to excavate the work within the time required, consisting mainly of steam dredges, scows and cranes for the earth work, and drilling machines, pumping machinery and cranes for the rock.

Contractors will be required to commence work on the earth excavation within thirty days of the time of letting, and upon rock excavation by the first of November next.

The dredges, cranes and scows now in the Canal can be had at an appraised value which will be made known to bidders prior to the letting.

Parties contracting for the work will be required to provide all machinery, and to put up and remove all dams and all works of protection, and at their own expense to do all pumping, or whatever may be necessary to secure their work from water.

Proposals must be addressed to the Board of Public Works, endorsed "Proposal for Deepening Illinois and Michigan Canal," and be accompanied with the usual two hundred dollar ($200) bond, with surities, to be approved by the Board.

Contractors will bid, stating the price for which the work will be done on each of the different sections, and the work will be let as a whole or in part, and in such quantities as the Board shall determine.

The Board reserve the right to reject any and all bids, and no proposal will be accepted unless the party offering it shall give evidence satisfactory to the Board that he has the necessary skill, experience, energy, and ability for doing the work, is trustworthy, and has sufficient pecuniary resources.

The Board will require such security, as according to their judgment, will secure the doing of the work according to the contract.

New York, Saturday, April 27, 1867.

The Southwest Pacific Railroad.—Its Lands and its Bonds.

The Southwest Pacific Railroad is a road to connect St. Louis with the western boundary of Missouri, near the southwest corner of the State. As early as 1852 Congress granted, to aid the construction of the road, every alternate square mile of land for six miles on each side of its line. A company was formed to construct the road, and the State of Missouri, by an act approved March, 1857, guaranteed bonds issued for construction to the amount of $4,500,000, requiring the company to complete the road in four years, pay the interest on the bonds and hold the State harmless from her guaranty, or forfeit the road, lands and franchises. The road was completed to Rolla, 113 miles from St. Louis and 76 miles from Franklin where this road and the Pacific road running to Leavenworth diverge, at an expenditure upon its construction and equipment of nearly $5,000,000 in gold. At this point there was a failure to comply with the contract made with the State, and the road became forfeited and the State took undisputed possession.

Subsequently the State authorized the sale of the road, equipment, franchises and lands, and the execution of a clear title to the purchaser. Pursuant to the act authorizing such sale, in May, 1866, John C. Fremont made proposals for purchase, which having been considered most favorable to the accomplishment of the end desired by the State, *i. e.* the completion of the road, were accepted, and the road, with its equipment, lands and franchises, was sold and conveyed to him.

The Southwest Pacific Railroad Company, with a capital of $8,000,000, was formed shortly after this purchase and the title and rights acquired by Gen. Fremont, were conveyed and vested in the company. The company at once put under contract a section of its road, 13 miles in length, from Rolla to the Gasconade River, and this section is now (March, 1867,) completed. They have also under contract 54 miles beyond the Gasconade, which takes the road to Lebanon in Laclede County, 177 miles from St. Louis, and 20 miles at least of the 54 miles are to be done by the end of July. When the road is completed to Lebanon, the most difficult and expensive part of the construction is over, and from that point it is proposed to push the work to Springfield and the State line with great energy. From Lebanon to Springfield is 56 miles, and from Springfield to the State line 84 miles, making the whole road from St. Louis 317 miles, with navigable waters nowhere coming into competition with it.

THE COMPANY'S LANDS.

The counties the road passes through are St. Louis, Jefferson, Franklin, Crawford, Phelps, Maries, Laclede, Webster, Greene, Lawrence, Barry and Newton to the State line. Many of these counties are exceedingly rich in iron, coal and lead mines, and the lands of the company contain many of the very best of these mines, among them the famous Granby lead mines.

The Land Department of the company is thoroughly organized, and its lands are all platted, nearly all classified, some sold, and a large quantity ready for sale. The total amount of lands which the company acquired is one million and thirty-six thousand acres, and their classification and valuation are as follows:

1st. Lands of fully developed lead mines—minimum valuation $500 per acre.

2d. Lands containing lead mines not fully developed, but otherwise first class—minimum valuation, $300 per acre.

3d. Mineral lands of special value containing iron, coal, copper and lead—minimum valuation, $50 per acre.

4th. First class agricultural lands situated near towns and stations—minimum valuation, $20 per acre.

5th. Superior timber and agricultural lands located immediately on line of road—minimum valuation, $15 per acre.

6th. Superior agricultural and timber lands as good as 5th but not so near the line, minimum valuation, $8 per acre.

7th. Good agricultural and timber lands—minimum valuation, $5 per acre.

By the Act of Congress granting these lands, the company, at the completion of each section of 20 miles, become invested with and are able to make a clear title to the purchasers of the lands for twenty miles beyond the completed line.

For agricultural value in connection with salubrity of climate no part of the United States can surpass the region of Southwest Missouri. The Governor of Missouri, in his message to the Legislature, January, 1867, approving the sale of the Southwest Pacific, says:

"This I esteem the most important road in Missouri. It developes one of the best portions of the State, rich in agricultural land, in minerals and in water power; a large district of country which only wants means of communication with our great market places to make it one of the most populous portions of the State. This road will certainly, by extension and connections, within a few years, carry the largest portion of the commerce west of the Mississippi.

CONNECTION WITH ATLANTIC AND PACIFIC RAILROAD.

In the XXXIX Congress, subsequent to the organization of this company, the Atlantic and Pacific Railroad was chartered, to commence at Springfield and run *via* Albuquerque to the Pacific Ocean. This road has a land grant of every alternate section of land for 20 miles on each side of the road when passing through States and for 40 miles on each side when passing through territories, and the amount of land embraced in the grant is fifty-five millions of acres. A powerful company has been organized under this charter

with a capital of one hundred millions of dollars. As the Atlantic and Pacific connects at Springfield with the Southwest Pacific, and runs from Springfield to the western boundary of the State on the same general line, their interests in Missouri are identical, and measures have been taken, and are virtually completed, to unite the two roads, the Southwest Pacific to be the Missouri Division of the Atlantic and Pacific. This being done, the amount of lands for the part of the Southwest Pacific line from Springfield to the State border, 84 miles, is twenty sections, instead of six, for each mile of road. The United States Land Department having withdrawn from sale in Missouri the lands granted to the Atlantic and Pacific, the Southwest Pacific may be said already to have the benefit of this large land grant.

The Atlantic and Pacific Railroad being greatly shorter than any other to the Pacific, following along the valleys of streams, crossing no high mountains, passing south of the snow region, and having remarkably easy gradients will be the favorite route for the traveller and freighter. The territories of New Mexico and Arizona, through the heart of which this road passes, are well known as being fully as rich if not richer in the precious metals than any other of the territories, and New M exico is so increasing in population and business that the trade from the east, centering at Santa Fe alone, during six months last year, would have filled fifteen cars daily with freight. The road crosses the Colorado at the head of navigation, and so enters and traverses California as to secure all the local traffic and travel in the State south of San Francisco. At Fort Gibson, Indian Territory, at the head of navigation of the Arkansas River, this road will connect with the Little Rock and Memphis Railroad, and near this point also it will be crossed by the Leavenworth, Houston and Galveston Railroad which is being rapidly pushed forward. Other branches and connections are also projected, which will in time become part and parcel of this road, whose main line has the great advantage of allowing work to be commenced both ways, from the Arkansas and Colorado Rivers as well as at each end.

THE COMPANY'S BONDS.

The bonds of the company are first mortgage coupon bonds of $1,000 each, having 20 years to run and bearing interest at the rate of 7 per cent, per annum, payable semi-annually in New York. They are secured by a mortgage to Charles H. Ward, of Messrs. Ward & Co., and John P. Yelverton, of New York. Mr. William F. Aldrich, Secretary of the Union Trust Company of New York, has succeeded to the place of Mr. Yelverton recently deceased. This mortgage covers the road bed, track, rolling stock, two thirds of the lands and all the franchises and appurtenances of the company. The bonds are limited to $2,000,000 upon the lands, road, &c., to Rolla, 113 miles from St. Louis, and to $25,000 per mile as the work is completed, upon the lands, road, &c., beyond Rolla. The whole amount on the entire road when completed cannot exceed $7,250,000. In addition to the security of the mortgage, they are guaranteed, principal and interest, by the Atlantic and Pacific Railroad Company. As the road is already a well paying road, increasing rapidly in its receipts with every mile extended towards the rich and thriving southwest region, as the two thirds of the lands of the company conveyed to Trustees are in total valuation, $8,335,260, which is considerably more than the whole bonded debt that can be placed upon the entire road; and as every bond that is issued has the guaranty of the Atlantic and Pacific Railroad Company, it will be difficult to find railroad bonds standing on a better base of security.

The proceeds from sales of the lands conveyed to the Trustees are to be paid to the Trustees and applied by them to the redemption of the bonds so often as they have in their hands the sum of forty thousand dollars. In addition to this, the holders of any of the bonds have the right, by the terms of the mortgage, to take in payment of principal and interest at any time any of the parcels of the lands of the company, except the mineral lands, at the fixed schedule rates.

The one-third of the lands, not conveyed to the Trustees, is held to pay interest on the bonds and to aid in the construction and equipment of the road.

The rate at which these bonds are sold, when taken into consideration with the ample security they afford the investor, is extremely low and will undoubtedly render them a favorite with investors who desire the assurance of the prompt payment of their interest and the security of their principal. The present rate is 80 per cent., which is equivalent to 8¾ per cent. interest per annum and 25 per cent. addition to the principal at maturity. The rise in value of the company's lands before maturity of the bonds fully warrants them in making this liberal discount to first comers, and allowing them to share in the profits of the undertaking.

Messrs. WARD & Co., 54 Wall street, New York, are the sole agents for the sale of the bonds, and to them all orders and inquiries should be addressed.

The offices of the Southwest Pacific and the Atlantic and Pacific Railroad Companies are at 54 William street, New York.

Northern Central Railroad.

The earnings of this road for the fiscal year ending December 31, 1866, were as follows:

From freight		$1,869,293 50
" passengers		783,671 22

Canandaigua Division	108,861 55	167,275 92	*58,414 37
Totals	$4,042,125 58	2,874,152 10	1,167,973 48

* Loss.

Included in the above expenses is the sum of $127,314 85 classed as "extraordinary expenses, Elmira and Canandaigua R. R." Deducting this from the gross expenses, the net earnings from operations of the road will be $1,295,288 33. The report says:

Without making any reduction for extraordinary work done on the Main Line, the operating expenses of the entire road for the year has been 65.4 per cent. of the earnings, about the same as the previous year.

Owing to the increased length of line worked during a portion of the year, a correct comparison of the receipts and expenditures with those of last year cannot be accurately made. There has been a falling off of $356,497 05 in the receipts of the Main Line, $80,871 26 less than the amount received the previous year for transportation of troops. The tonnage has increased largely, but the rates have decreased. When a reduction in labor and material can be made to correspond with the reduction of charges, the condition of the road and its equipment is such that there will be no difficulty in reducing the working expenses below 60 per cent. of the earnings.

We have, in common with all the railroads of the country, suffered very much from the rapidity with which the iron rails wear out. The average life of a rail has diminished fully 50 per cent. during the last 10 years, they lasting now but about 3 years. This causes an expenditure in maintaining the road which tells severely upon the working expenses. We are not prepared to say that the railroad iron now manufactured in this country is inferior in quality, but in the increase of speed by our passenger trains, and the increase in weight of engines, together with the increased tonnage, may account for their rapid destruction.

Some of the principal railroads have been purchasing steel rails to a considerable extent. We purchased a small lot, 60 tons, in May last, and laid them on the heavy grade between Calvert Station and Bolton. So far they show no evidence of wear. If our means admitted, we would recommend the adoption of steel rails, as those now in use must be replaced. The Freedom Iron and Steel Company at Lewistown, Pa., and the Pennsylvania Steel Works at Harrisburg, and other rolling mills, we understand, will soon be prepared to furnish steel rails at, we suppose, so small an advance upon the price now paid for iron that there will be no doubt about the propriety of adopting them on our road.

The receipts of the Shamokin Division have increased $31,640 03, and the net earnings $14,385 66, leaving a surplus of $38,643 35 for the year after paying the rental.

The mortgage of $150,000, due on the first of October, 1863, has been paid, and the bonds destroyed.

The business coming from the Elmira and Williamsport Railroad being about equally divided between this road and the Pennsylvania Railroad, that company has lately entered into an arrangement with us by which the Elmira and Williamsport, and the leased lines north of that road are to be worked for the joint benefit of the two companies—they dividing with us equally any loss or gain that may arise out of our lease of those roads.

To meet the mortgages paid to the City of Baltimore, and for the purpose of purchasing an additional equipment as required, a new mortgage of $2,500,000 has been created, and $724,500 of those bonds sold.

During the year we have added 5 engines, 2 first class passenger, and 189 freight cars to the equipment at a cost of $278,217 39. We will require some additional coal cars during the year. The coal tonnage for the year has been 303,189 tons, an increase of 99,879 tons, all to local points. There has been a slight falling off in coal carried to Baltimore. We cannot expect any considerable increase to the through coal business until we have a suitable outlet to tide water. We have been, as authorized at your last meeting, nogotiating to some extent with the Columbia and Port Deposit Railroad Company, and there is now a strong probability that that road will be commenced at an early day and pushed forward to completion.

The coal tonnage of the Shamokin Division was 557,000 tons, an increase of 103,000 tons, and the coal tonnage of the Elmira Division, 99,000 tons, an increase of 30,000 tons.

As we anticipated in our last report, the through passenger business has diminished, the local passenger traffic has however increased, and we may expect it to continue to do so.

For some years it has been the policy of this company to charge whatever additional equipment was purchased and put upon the road to the ordinary working expenses, until we have an equipment now worth at a gold valuation $2,132,000, instead of $1,382,000 as represented upon our books, the difference amounting to $750,000; this with the $752,000 already to credit of profit and loss, shows a surplus fund of $1,500,000.

The road and equipment is in excellent condition.

The roads operated by this company are as follows:

	Miles.
Northern Central Railway	138
Wrightsville, York and Gettysburg	13
Shamokin Valley and Pottsville	28
Elmira and Williamsport	78
Chemung	22
Elmira, Jefferson and Canandaigua	47
Total	326

The number of passengers moved was 885,006, traveling an aggregate distance of 26,331,028 miles.

The total amount of freight transported was as follows:

	Tons.	Tons one mile.
Main Line	891,693	56,188,203
Wrightsville Branch	28,150	317,658
Shamokin Division	640.717	6,271,844
Elmira "	206,562	14,422,851
Chemung "	48,958	1,023,172
Canandaigua "	258,656	2,236,985
Totals	2,074,736	80,460,713

This shows an increase over the previous year of 623,579 tons; or, exclusive of the Chemung and Canandaigua Divisions, of 315,965 tons.

The coal tonnage of the Main Line was 303,189 tons—an increase of 99,879. In addition to which 39,429 tons of Anthracite, and 11,051 tons of Bituminous coal were transported for the use of the engines on the road, making the aggregate amount transported from mines, 353,669 tons.

The company have 93 locomotives; 57 are on the Main Line, 26 on Elmira and Canandaigua Divisions, and 10 on Shamokin Division.

The car equipment on Main Line and branches consists of 52 first class and 2 second class passenger cars, 21 baggage cars, 16 express cars, and 3,686 cars in freight and roadway service.

The engine mileage for the year was as follows: passenger, 683,938; freight, 994,159; distributing, 60,607—total, 1,738,704. Cost of repairs, including two new engines, $256,884 49, or 32.8 cents per mile run, including fuel and stores. This shows an increase in mileage of engines of 96,689; with a decrease in cost of repairs of $6,973 61.

The roadway and track have been fully maintained in the good order reported in 1865, the following materials having been used in the year 1866:

Divisions.	No. Cross ties.	No. of chairs.	Lbs. of spike.	Tons. new rails.	Tons. re-rol'd rails.
Baltimore	62,494	2,416	36,612	213	664
Wrightsville.	2,813	.....	3,028	..	.....
Susquehanna	36,119	4,900	10,465	..	603½
Shamokin	5,157	430	4,720	100	11
Elmira	22,887	2,416	34,901	178	240
Canandaigua	19,952	2,479	75,000	204	50½
	149,422	12,641	164,726	705	1,569

In addition to the above, 60 tons of steel rails have been laid on the heavy "North street grade," between Calvert Station and Bolton. During the ten months it has been in use, no perceptible wear is apparent, and there is every reason to suppose it will outwear five or six sets of iron rails.

There will be required during the current year on the Elmira and Canandaigua Divisions 1,000 tons of new iron rails, 5,000 wrought iron chairs, 41,000 cross ties, and 40,000 lbs. spike.

The company took possession of the Chemung and Canandaigua Divisions on the 1st of May, 1866, under contract with the Erie Railway Company of New York. A third rail was laid from Elmira to Watkins, 22 miles, by the Erie Railway, and the gauge of the road narrowed from Watkins to Canandaigua, 47 miles.

The receipts and expenditures of the company for the year ending December 31, 1866, were as follows:

RECEIPTS.

From earnings, as above		$4,042,125 58

Metropolitan Insurance Company.

We invite attention to the advertisement of this company in our present issue; and in connection with it publish entire the following circular of the President and directors to the stockholders of the company. It is dated New York, April 19th, 1867, and says:

You have been duly informed from time to time of the condition of the company, and are therefore aware of the recent application to the Legislature of this State for permission to reduce our capital—such a course being rendered necessary by the unprecedented losses of the past year.

We have now to inform you that the law asked for has passed the Legislature, and that under it we have been compelled to reduce our capital to three hundred thousand dollars.

The disappointment which you cannot but feel at this great and unexpected diminution of our assets can hardly equal our own as officers, directors, or stockholders.

We had earnestly hoped that the first of January, which found us in the possession of over $500,000 of net assets, would bring a respite from the flood of losses which had so seriously impaired our capital. But the end was not yet. The period that has since elapsed has seldom been exceeded for general destruction by fire. Some of our oldest, strongest and most fortunate cotemporaries have suffered more in the first months of this year than in any previous period of their history.

To us there seemed but one alternative to total destruction, and that was to abandon our agency business, and cancel our mercantile and manufacturing risks, except in the old cities. To this work we accordingly addressed ourselves with every energy we possessed. Meanwhile, the injury to our reputation, produced by the discovery of our vast losses, cut down our receipts, and thus greatly and almost instantly reduced our resources, though the progress of cancellation was necessarily so slow that we were compelled to meet the bulk of the losses of our previous large business, without the accruing current receipts at increased rates, which went far to sustain others in similar circumstances.

With these influences all against us, it is a source of profound congratulation that we are able to report thirty per cent. of our capital safe, and the greater part of our more hazardous business off our hands.

It will be natural for you to inquire why it was that we have suffered so severely, while others in similar business have escaped disasters as signal as ours.

We think this may be explained by a simple reference to the facts.

It is admitted that the last two years have been signalized by a more general and wide spread destruction by fire than any previous period known in this country. A number of our large cotemporaries had been doing an agency business, covering the whole Union, for many years, and by their enterprise and ability under the reign of moderate losses had accumulated large surplus funds and made their position strong and steadfast. It was our misfortune to increase our capital and push our business to a corresponding enlargement, just at the moment when the storm of fires was about to burst upon the country. We could not foresee it. No one foresaw it. By our efforts in the same direction in which our neighbors had so signally prospered, we increased our premiums to over two millions of dollars per annum, and in ordinary times this would have enabled us to make large dividends on our increased capital.

But the influences at work against us were beyond mortal control. The war had ceased and with it the enormous and unparalleled expenditures of the government, which had stimulated every branch of business to preternatural activity. With its cessation came a collapse, and that collapse overthrew tens of thousands of reckless adventurers, and tempted hundreds of thousands to essay any mode of escape from total destruction. The door of insurance stood invitingly open, and through it the defeated adventurers rushed in a ruthless crowd. Every where mercantile and manufacturing risks burned with a frequency and destructiveness till then unknown.

In spite of all this, however, we bore up bravely until the crowning disaster at Portland cut over 24 per cent. off our capital at a single blow. This was followed by a series of minor losses, which, by the first of November had seriously impaired our capital. If we could then have gone on, as our neighbors were able to do, keeping such proportion of our receipts as we preferred, and gradually weeding our business of the risks we had found unprofitable, we might then have saved five or six hundred thousand dollars of our capital. But to meet the losses without the income relied on to pay them, was more than our resources could bear, and we have therefore cause for gratitude that we have escaped so well.

With our new organization, with expenses greatly reduced, with our business adjusted to our reduced capital, and with credit which has never been impaired by the refusal to pay any just loss, we believe we shall yet be able to pay good dividends, and in time to repair in a great measure the grievous disasters of the past.

Very respectfully yours,

JAMES LORIMER GRAHAM, *President.*

ROBERT M. C. GRAHAM, *Vice President.*

W. R. WADSWORTH, *Secretary.*

STATEMENT.

Showing the financial condition of the Metropolitan Insurance Company on the first day of April, 1867:

Amount of cash on hand and in bank		$153,612 22
Amount of cash in hands of Agents and in course of transmission		20,000 00
Amount of U. S. 5-20 6 per cent. bonds		10,600 00
" compound int. notes		565 00
" 7 3/10 Treasury notes		158,392 50
Amount of miscellaneous securities		59,720 63
Amount of loans on bonds and mortgages, being first liens of record, on unincumbered real estate		244,824 00
Amount of loans on U. S., bank, and other stocks and bonds, payable on demand		60,697 05
Amount of other miscellaneous items		6,370 96
Amount due for fire premiums on policies issued at office		12,437 51
Amount due for marine premiums on policies issued at office		5,000 48
Amount of bills receivable for premiums on marine risks		34,408 38
Interest due and accrued, but not yet payable		13,234 52
		$779,863 25

LIABILITIES.

Losses reported, claimed, or in process of adjustment	$258,917 57

☞ The Atlantic and Pacific Telegraph Company is organized to build a telegraph line through this and other States to the Pacific. Charles E. Perry, of Albany, is to superintend the working of the line. The line from New York to Buffalo is contracted to be completed by the 1st of September next. E. H. Van Rleeck is the Contractor and General Superintendent of construction, Dr. Ketchum being Inspector.

☞ The receipts of the Camden and Atlantic Railroad for the year 1866 were $303,975, of which $212,005 were from passengers. The operating expenses were $174,105, and the interest charge was $123,588, leaving $6,281 of surplus. The rapid increase of population along this line of railway is steadily improving its condition. The capital and entire debt of the company is $2,244,200.

American Railroad Journal.

Saturday, April 27, 1867.

Stock Exchange and Money Market.

Money has become much more abundant in the open market, since our last, especially in private channels, while the demand for accommodation, whether for speculative or mercantile purposes, has fallen off, and the tendency of loan and discount rates has been in favor of borrowers. To the large dealers in the public funds, money has been freely offered at 4@5, and to the leading Stock Exchange firms, at 5@6 per cent. on call, At these figures, the wants of the street have not been sufficient to absorb the available supply, and lenders, in the absence of any other form of thoroughly secure and remunerative investment, have been using their balances in the purchase of the interest-bearing national obligations, giving the preference to the later issues of the Five-Twenties. Government has been disbursing freely, in redemption of the maturing Seven-Thirty, and Compound-Interest Notes, thus letting out of the Treasury, not only the current income from excises, but the proceeds of sales of the Five-Twenties of the latest 1865 issue, and of the equivalent of the daily customs revenue in coin. The city banks, as well as those of Philadelphia and Boston, have been gaining in their resources, and have been more disposed to meet the calls of their customers for pecuniary aid. Strictly prime short-date commercial paper has been in more favor both at bank, and and through the discount houses, at from 6@7 per cent. per annum. It has not been offered very freely in either channel. According to the last weekly exhibit of the city banks, the legal tender reserve, was increased, during the week, $3,894,401, and the deposits line, $1,229,020, while loans were reduced $2,540,447, and the circulation, $53,476. The specie reserve was diminished $1.233,694. The specie reserve of the banks is now $7,622,535, against $9,495,468, same time last year. The city bank deposits are now $184,090,256, against $196,808,578 week ending April 21, 1866. The legal tender reserve amounts to $64,096,916, against $77,602,688 same time last year. The circulation now stands at $33,648,571, against $24,845,857 same time last year. The loans are now $247,561,731, against $242,067,063 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $74,635,729 a day, against a daily average of $87,655,547 the preceding week, and $88,639,197 the week ending with April 6th. The current week's exchanges average about $18,000,000 a day.

The main changes in the Philadelphia Bank footings, last week, were as follows: Increase of loans, $377,673; increase of legal tender reserve, $393,889; increase of deposits, $992,897; decrease of specie, $58,090; and increase of circulation, $1,267.

National Bank notes to the amount of $49,700 were issued last week, making the total issue to 1,664 banks thus far $302,558,456, against $282,-555,440 at the close of the last fiscal year, June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $3,607,983, leaving, with the existing 1,647 banks, an actual circulation at this date, of $298,950,474. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,610,-950; and for the public deposits, $38,160,950—making a total of $378,771,900. The Treasury Department, last week, redeemed and destroyed $486,616 of worn and mutilated fractional currency, and issued $418,212 worth of new.

The U. S. Sub-Treasury receipts, week ending with April 20, were $18,329,824, including $2,092,-583 from customs duties; payments, $14,801,590; balance at the close of the week, $112,077,074, against $108,548,840, at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $5,497,026, and payments, $2,197,821; on Tuesday, receipts, $1,741,965; payments, $2,220,196. The balance at the close of business on Tuesday stood at $114,898,048, against $111,503,431 a week previous.

As the annual and income tax collections have not thus far fairly begun, under the new law of March 1867, the current public revenue from excises is light. The customs revenue is up to a fair average. The excises, last week, yielded $1,976,-942, against $2,350,000, the preceding week; customs at the port of New York, $2,092,583, and at the outports, about $700,000 (in coin) more, mak-

ing the grand total income for the week equal about $5,886,558 in currency, against disbursements of $2,394,942 on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $226,500,000.

Government derived an income of $1,724,729 from customs, at the port of San Francisco from Jan. 1, to March 28, 1867.

The total amount of gold certificates issued and redeemed by the U. S. Sub-Treasury, here together with the balance unredeemed on the 13th of March is thus stated:

	Issued.	Redeemed.	Outstanding.
20s ...	$307,800	$193,800	$114,000
100s ...	5,074,600	3,542,200	1,532,400
500s ...	884,000	401,000	483,000
1,000s ...	24,666,000	21,011,000	3,655,000
5,000s ...	152,045,000	136,680,000	15,365,000
10,000s ...	5,000,000	5,000,000	.....
Total.....	$187,977,400	$166,828,000	$21,149,400

The gold speculation has been comparatively lively, since our last, under the stimulating influence of the dexterously manipulated war rumors from Europe, which, thus far have been of an exceedingly vague form, and purport, but yet sufficiently alarming to awaken popular distrust in the immediate future workings of the foreign exchanges. The crafty operators in the Gold Exchange have diligently labored to foster this want of confidence, and have met with rather encouraging success. Though the average of the daily transactions in gold have not been unusually heavy, the fluctuations in price have been frequent and violent. The range has been from 135¼ at the opening of the week to 140¾ at the close, the dealings on Wednesday afternoon having been of the most decidedly *bullish* character. The total imports of specie from Europe, and other foreign ports since Jan. 1, 1867, have been $665,578. The customs demand for Gold last week, averaged $348,764 a day; thus far, this week, it has been equal to $292,338 a day, or equal to a weekly aggregate of $1,754,028. The arrivals of specie from Europe, Havana and other foreign ports, during the past week were $175,778, and from California, $1,117,918. The total customs revenue of the Government, in coin, at this port since July 1, 1866, has been $102,208,132, against $109,640,588 same time in the preceding fiscal year. The total receipts of California gold at this port since July 1, 1866, have been $34,461,566, against $23,270,065 same time last year, showing an increase this year, of $11,191,501. The exports of specie from this port, last week, were only $880,223. The total outflow of specie from the port, thus far in the current fiscal year has been $24,731,515, against $17,903,010 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $48,800, making the total coin interest disbursements through the Government office, since July 1, 1866, $36,602,764, against $32,174,839 for the same time in the preceding fiscal year. The specie exports from San Francisco from Jan. 1, to March 27, 1867, reached $8,982,636, against $8,973,750 same time last year.

There has been an increased call for foreign exchange, leading to some advance in prices, on, however, a well supplied market, especially in the way of produce bills. The Cotton interest has been well represented in this respect. Bankers' 60 day bills on London closed firmly on Wednesday at 109⅜@109⅝, and on Paris to 5.22½@5.15; sight bills on London to 110⅛@110⅜; and on Paris to 5.13¾@5.12½. The offerings of produce bills have been again fair, this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $4,473,844, making the total value of exports since July 1, 1866, $146,013,096, against $186,343,029 same time in the preceding fiscal year.

Government securities have been in much better demand, especially for home investment purposes, as indicated in our remarks on money, and prices have improved decidedly. The later issues of the Five-twenties have been the favorites with the public. The Seven-thirty and compound interest notes have been in good request. Government has been buying in the maturing issues of these notes, quite freely. It is mentioned, for the information of the holders of the maturing Seven-thirty notes of the August, 1864, issue, that if they fail to fund or sell their notes before the 15th of the coming month of August, the notes will then be paid off at par in lawful currency. If filed at the Treasury on or before the 15th August, as for funding, the holders can receive 5-20 bonds of the consolidated issue of 1865 at once; or, if they prefer, a new series of 5-20s, dating from 15th August, 1867, they will receive them as soon as they can be prepared and registered. It is not believed that such a class of bonds would prove as marketable or otherwise as desirable as the January and July consolidated series of 1865. But there is no purpose on the part of the Treasury to withhold them, if preferred, and this preference expressed on the maturity of the 7-30 per cents. Meanwhile every facility is afforded, in advance of the obligation to convert at that time, for funding the notes into the consolidated 5-20 registered or coupon stock of 1865. U. S. sixes of 1867 closed here on Wednesday at 132½; U. S. sixes of 1868, at 131; U. S. sixes of 1881, 109⅜@109½; U. S. Five-twenties of 1862 at 109¾@110; U. S. Five-twenties of 1865 at 108⅞@109; U. S. Five-twenties of 1865, consolidated, 107¼@107⅜; U. S. Ten-forties at 98⅝@98⅞, ex-coupon, and U. S. Seven-thirties at 105⅝@106¼. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ¼@½ of 1 per cent. on these figures:

June, 1864.....119	May, 1865 113
July, 1864.....118½	August, 1865....112
August, 1864....118	September, 1865..111½
October, 1864....117	October, 1865....111¼
December, 1864..116	

Railway and miscellaneous share property has been in only moderately active speculative request, since our last, at variable prices, though the later dealings on Wednesday were indicative of returning firmness and buoyancy in the market, notwithstanding the practical absence of the customary outside support to a speculative movement.

General business has been more active in the produce lines, and breadstuffs have improved in price, while provisions have been unsettled, and cotton much depressed. Middling grades of cotton left off here on Wednesday quite heavily at 24½@26 cents per lb. as extremes. The stock of cotton now here is estimated at about 135,000 bales. The receipts at the port this week, have averaged nearly 1,500 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 527,000 bales, against exports of 402,000 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 1,623,000 bales against 1,742,591 bales same time last year; exports, 1,125,605 bales, against 1,211,074 bales same time last year; estimated stock at latest dates, 435,000 bales, against 426,655 bales same time last year. At the auction sale of Scranton coal on Wednesday, 71,000 tons were disposed of at about the average of the previous monthly rates. Foreign merchandise has been somewhat brisker. Dry goods and groceries have been in more request. The total imports of foreign dry goods, last week, were $1,236,966, and the total amount marketed $1,512,873. The value of foreign merchandise imported last week, was $3,865,914—making the grand total specie value of last week's imports of dry goods and merchandise, $5,102,880, and since July 1, 1866, $210,376,950, against $242,823,755 same time in the preceding fiscal year. The ocean freight market has been more active and rather firmer, with 587 vessels of all classes in port. For Liverpool we quote flour at 1s. 10½@2s. per bbl.; grain at 8¾@4¼d. per bushel; cotton at ⅛@¼d. per lb.; and heavy goods at 10s.@20s. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

Metropolitan Insurance Co.

We invite the attention of our readers to the Advertisement of this company, in another column; and also to the Circular of the President and Directors to the stockholders, which will be found on page 492 of our present issue.

☞ Messrs. BRIDGES & LANE, Manufactures and Dealers in Railroad and Car Findings and Machinery of every description, have removed from No. 50, to No. 46 Courtlandt street, near Greenwich.

Chesapeake and Ohio Canal.

The bondholders of this company, in view of availing themselves of the late act of the Maryland Legislature, giving to them the nomination of the President and three Directors in the company, have met and elected J. Philip Roman and George W. Riggs to fill the vacancies in the trusteeship under the deed of trust. These trustees are now William W. Corcoran, George W. Riggs, J. Philip Roman, Byard Smith and Horatio Allen, who will have the appointment of the President and three Directors in the canal company.

Locomotive Building in Pittsburg.

The first locomotive built in Pittsburg was turned out a few days ago. It is a magnificent piece of workmanship, and was built for the Panhandle Railroad. The works are now fully under way and will be able to average about one locomotive per week. It seems a mystery that with the advantages for all kinds of machinery building that this city possesses, with the capital and railroads at her command she can at this day boast of but one locomotive works, and that scarcely in full operation. We ought to have the most and best locomotive and car shops of any section of the country. The heavy orders from the South for iron rails and other railway equipments, since the war, also indicates another branch of manufacture which carried out to the fullest extent would not supply the demand of all the markets we would necessarily monopolize.—*Pittsburg Chronicle.*

☞ The Chicago *Republican* publishes the following as the rates of freight East by the Pittsburg, Fort Wayne and Chicago Railroad, to the points named:

From Chicago to—	First class.	Second class.	Third class.	Fourth class.	Flour, per bbl.
Boston and Providence	$1 64	$1 10	55c.		$1 10
New York, all rail	1 54	1 00	50c.		1 00
Philadelphia, all rail	1 44	91	45c.		90
Baltimore, all rail	1 44	91	45c.		90
Pittsburg, all rail	80	60	30c.		60

The same authority adds that "rates are tending downward." Lake freights are weaker, and almost nominal. The charters were: To Buffalo, schooner G. C. Cooper, wheat from Milwaukee to Oswego at 13c.; schooner Naiad, corn, from this port to Buffalo, at 6¼c.

☞ The railway up Mount Washington is being constructed with great activity. The track iron is being transported to the base of the mountain, and teams and laborers are hard at work. A large and magnificent hotel will be built this Summer, and will be ready for the travel of next year.

Railroad Earnings.—Weekly.

The earnings of the Grand Trunk Railway of Canada for the week ending April 6th, 1867, were $144,663 00
Corresponding week of previous year. 135,723 00

Increase $8,940 00

The earnings of the Detroit and Milwaukee Railroad for the week ending April 18th, 1867, were $39,804 00
Corresponding week of 1866 ..... 37,715 00

Increase $2,089 00

The earnings of the Chicago and Rock Island Railroad for the 2d week in April, 1867, were $71,406 00
Corresponding week of previous year .. 64,574 00

Increase $6,832 00

The earnings of the Western Union Railroad for the week ending April 14, 1867. .. $9,008 33
Corresponding week previous year 11,897 70

Decrease $2 889 37

The earnings of the Michigan Central Railroad for the 2d week in Apr., 1867, were .. $84,206 00
Corresponding week of previous year .. 83,863 00

Increase $343 00

The earnings of the Chicago and Great Eastern Railway for 2d week in Apr. were ... $26,726 00
Same period last year 24,059 00

Increase in 1867 ..... $2,667 00

The earnings of the Chicago and Northwestern Railroad for 3d week in April, 1867 ... $164,737 88
Corresponding week previous year .. 145,966 05

Increase $18,771 83

The earnings of the Michigan Southern and Northern Indiana Road for the 3d week in April 1867, were $97,584 00
Corresponding week of 1866 ..... 98,632 00

Decrease $1,048 00

The earnings of the Marietta and Cincinnati Railroad the 2d week in April, 1867 ... $21,941 00
Corresponding week previous year 19,218 00

Increase $2,723 00

	1867.	1866.
Total this month to date.	$42,030 00	$42,263 00

Journal of Railroad Law.

RIGHT OF RAILROAD COMPANY TO MORTGAGE ROLLING STOCK USED ON A PARTICULAR PORTION OF ROAD.—INTERPRETATION OF SUCH A MORTGAGE.

The case of the LaCrosse and Milwaukee Railroad Company *vs.* St. Paul Railroad Company, lately decided by the Supreme Court of the United States, contains an exceedingly nice question, interesting to railroad companies. It appears from the case that the LaCrosse and Milwaukee Railroad Company was chartered by the Legislature of Wisconsin, to build a road across that State from Milwaukee to LaCrosse, and began to build at Milwaukee, proceeding westward. The Legislature also gave the company the right to mortgage, for the purpose of raising money, any particular division of their road separately. Under this provision of the statute, and for the purpose apparently of mortgaging them separately, the company divided the main road into two divisions, nearly equal in length, called the Eastern Division and the Western Division; the Eastern Division extending from Milwaukee to Portage City, ninety-five miles, and the Western from Portage to LaCrosse, one hundred and five miles. Upon *each* of these *divisions* of the road, as well also as upon the *entire* road, *and* upon the *rolling stock*, either of each division, *or* of the entire road, this exact matter of whether the rolling stock mortgaged did belong to the road as a *whole*, or to it in its *divided* character, being one of the questions of this suit, it gave certain mortgages.

The opinion of the court was written by Justice MILLER, who after disposing of some other questions in the case, proceeded to say. In reference to the road-bed which is covered by these various mortgages, there is no diversity of opinion, but in reference to the rolling stock, it is contended by appellees that these several mortgages were successive liens on all the rolling stock of the company, and by appellant that they are liens only on the rolling stock belonging to, or in some way identified with, that part of the road included in each mortgage respectively. At first blush it would seem that in a road used continuously as one road, there could be no such definite relation between any particular division of the road and any particular portion of the stock. But as it was competent for the company which owned all the road and all the stock, to assign certain stock to one division, and certain other stock to the other division, when the roads were divided for the purpose of making mortgages, we cannot assume as a fact that there was no such allotment of the rolling stock; but must look to the language of the mortgages themselves, to see if any such intention is expressed. If it is not, then obviously the other view prevails, and the mortgages are successive liens upon the whole stock.

The language in the descriptive part of the Palmer mortgage, and that in the corresponding part of the mortgage on the Western Division, when considered in reference to the rolling stock alone, may not be free from doubt as to its construction. But when we consider it in reference to the clear purpose of the parties to make the mortgages distinct, and different to everything else conveyed by them, we conclude that it was intended that the rolling stock covered by each mortgage was that which was properly appurtenant to each particular division of the road.

It is not so important that we be right in this, however, as we are satisfied that the District Court in the foreclosure suit decided this question; and as that decision is in full force and unreversed, it must conclude the parties to the present suit all of whom claim under the decree of the court.

The complainants in the original foreclosure suit made defendants of all the judgment creditors of the company who had liens subsequent to themselves, and made the Milwaukee and Minnesota Company defendant, who held under the subsequent mortgage to Barnes, with a view to cut off their equity of redemption; but they did not make defendants of Bronson and Soutter, who held a subsequent mortgage on the Eastern Division, and a subsequent lien on the rolling stock, which complainants would also desire to extinguish, if they had believed it covered the same rolling stock that theirs did. By omitting these mortgages they show their own construction that their mortgage, and that of Bronson and Soutter, did not cover the same stock; which could only be because it was appurtenant to the Eastern Division.

About the time that the foreclosure suit was commenced, a suit was instituted in the same court to foreclose the second or Bronson and Soutter mortgage on the Eastern Division; but the holders of the Palmer mortgage were not made defendants to either suit. The two suits progressed *pari passu* to a final degree; but while the Western Division went to sale, an appeal stayed proceedings in the Eastern Division case, and no sale has yet been made under that decree. Very shortly after these suits were commenced, the court made an order of reference in each of them to masters in chancery, who were the same masters in both cases. These references were for the purpose of ascertaining the amounts due on the bonds, the amounts due certain judgment creditors, and the amount of rolling stock on the whole road, and the amount included in each mortgage. The language of the order of reference on this latter point in the original suit in this case is as follows: "And it is further ordered that said masters ascertain and report the whole amount of rolling stock on the road, and that they specify the quantity thereof that is covered by this mortgage, also in the first and second mortgages respectively."

The reference in the other case is in language almost identical.

Now it is argued that the object of this order was to ascertain and settle the priorities between these different mortgages. No such inference can be made from its language, for it says nothing about priorities in date, or superiority of lien. There was no occasion or reason for ascertaining those priorities in that suit, for the respective parties were not before the court, and could not be bound by its decree. It would not even bind complainants, because there would be no mutuality in the estoppel. It is an impeachment of the legal attainments of the court, and of the counsel, to suppose that they would make a reference to a master to ascertain a fact which could have no influence on the suit, and if passed upon by the court, could affect nobody's interest in the slightest degree.

But the language of the order clearly implies a different thing. The object is to ascertain what is covered by one mortgage to the exclusion of the other; an object which had manifest pertinency to the duty which the court was called upon to discharge. The judge who made these orders delivered an opinion at the trial, in which he decides that the rolling stock of a railroad is a fixture; and if we suppose him to have considered that which was mortgaged to Palmer and to Bronson and to Soutter as a fixture on the Eastern Division, and that which was mortgaged to Bronson, Soutter and Knapp, as a fixture on the Western Division we have a clear idea of what he wished to ascertain, in view of the decrees he was to make in the two suits.

It is impossible in examining the reports to doubt that the commissioners understood that they were directed to ascertain what rolling stock was covered by each mortgage, in order that only such might be sold under the decree in that case, and that they reported that of all the rolling stock on the road, forty box cars alone were subject to the mortgage in the present case, and that all other stock was subject to the mortgage in the other suit.

At all events, they were directed to ascertain what was subject to the mortgage in this suit, and they reported the forty box cars, and did not report any more. This much is beyond dispute from the language of the report in this case.

We regard this as a judicial decision, that complainant's mortgage did not cover the rolling stock which was covered by the previous mortgage to Palmer, and that it only covered the forty box cars, and such proportion of the rolling stock purchased by the receiver as the net earnings of the Western Division bears to the net earnings of the Eastern Division. This order modifying and confirming the report of the masters settled the rights of the parties, and by that decision they must stand until it is reversed on appeal, or set aside by some direct proceeding for that purpose.

The final decree ordering the sale proceeds upon the same view of the rights of the parties. After ordering a sale of the property mortgaged, and copying the language given in the mortgage as descriptive of what was mortgaged, the decree adds:

"With forty box cars, &c., and such portion or share of the rolling stock purchased and procured by the receiver, costing $147,942 63, as the net revenues of the portion of the road covered by this mortgage bears to the balance or other end of the road, since the appointment of the receiver. The remaining rolling stock is subject to a prior mortgage."

That is to say, having decided that what is covered by the other two mortgages is not covered by this; it is not subject to sale in this suit.

The marshal, however, who was directed to make the sale instead of a master commissioner, did sell all the rolling stock, and that sale was confirmed by order of the District Court of May 5, 1863. It is too clear for argument, that a sale by the marshal, unauthorized by the decree, is without any validity. Does the order of the court confirming the sale make it valid?

Upon principle the question is by no means free from difficulty. We are clear that a sale without a decree to sustain it would be a nullity, and we doubt if a court can make it valid by a mere general order of confirmation. If, however, an issue had been made by exceptions or other proper pleading, as to the question whether any particular piece of property had been included in the *decree, or order of sale*, and the court had decided that it was so included, it might be an adjudication upon the construction of the decree which would bind the parties. Nothing of the kind occurred here. There is every reason, on the contrary, to believe that the court had no suspicion that the marshal had sold more than the decree authorized.

On the 7th of May, two days after the order of the confirmation, the Milwaukee and St. Paul Railway Company, presented their petition for the discharge of the receiver, and for possession of the property which they had purchased. The court thereupon made an order "that the receiver deliver over to said Milwaukee and St. Paul Railway Company the said road and appurtenances between Portage City and LaCrosse, *and the rolling stock and property specially described in the decree.*" The rolling stock specially described in the decree was the forty box cars, and the proportion of stock purchased by the receiver. The fact that this was ordered to be delivered to the purchasers, and no more, is almost conclusive of two things; first, that the judge understood his decree and previous rulings as we have interpreted them; and, second, that he had no idea that he had confirmed a sale of all the rolling stock on the road, to the purchasers at the sale. It is true that over a month later, he ordered the Eastern Division of the road and the remainder of the rolling stock into the possession of the same company. But this was done to enable them to run the whole road as a through route, on the principle of public policy, and that it was better for all parties concerned. This he declared in an opinion delivered at the time, and it is substantially indicated in the orders themselves.

In the light of these facts we cannot give to the order of confirmation in this case the effect of making valid the marshal's sale, however the rule might be on that subject in other cases. But we do not mean to intimate that in any case a sale by a marshal, or a master in chancery, can be valid, when there is no decree to support it. Cases in this court would seem to decide that it cannot.

The order of June 12th, 1863, delivering possession of this property to the Milwaukee and St. Paul Railway Company, has been declared by this court to be void for want of jurisdiction, and has been set aside by the court which made it. It therefore affords no support to defendants in this claim to the rolling stock in dispute. We have thus examined with care and patience the mortgage, and the various orders and decrees of the District Court, on which the claim of the Milwaukee and St. Paul Railway Company to the ownership of this property depends. There is in all of them some want of clearness and precision, including the mortgage itself. Before the court ordered this sale it should have made clear all these ambiguities. It evidently attempted to do so, and we think if it has not in all cases effected that purpose fully, it has furnished the criteria by which it can be done. And although the language of its orders is not always free from doubt, we have been able to satisfy ourselves of the court's intentions.

The title of appellant is clear on the record, unless it has been divested by these proceedings. We think that they do not confer title to the rolling stock on the Milwaukee and St. Paul Railway Company, nor divest the appellant, except as to the forty box cars, and the proportion of the stock purchased by the receiver, which the net earnings of the Western Division bore to the net earnings of the Eastern Division, and they also decide that the mortgage under which they claim, did not include any more.

Illinois River Improvement.

A bill has been passed by the Illinois Legislature, providing for the improvement of the Illinois River, by using the revenue hereafter to be received from the Illinois and Michigan Canal, in the construction of a large dam and lock at or near Peoria. It is believed this dam will make the river navigable by water for canal boats for seventy-five miles, and will be the means of great increase of revenue to the Illinois and Michigan Canal. The cost of this dam is estimated at $350,000. This canal has been navigable only for boats during a few months in the year, and yet its revenues have been constantly increasing from $87,890 in 1848, to $302,958 in 1866. This improvement by dam, it is believed, would double this revenue.

Missouri Iron Ore.

We learn that recent developments in Southwest Missouri show immense deposits of iron ore, consisting of the specular oxide and red and brown hematites, producing from 60 to 90 per cent. of pure and remarkably tenacious iron, and it is claimed that the iron deposit in that vicinity will exceed the total iron yielding resources of Pennsylvania.

The iron ore of Missouri, we are told, has been used in the furnaces along the Ohio with a result showing that a furnace capable of making twelve tons of pig iron per day, from ordinary ore, can with the same expense for coal turn out thirty-five tons per day from Missouri ore, and as to its superior tenacity, it is claimed that a trip hammer helve of this iron has been in constant use at the Meramec iron works for more than sixteen years. This may seem almost incredible to iron workers whose trip hammers need new helves as often as twice a year.

The cost of making iron of this ore, it is claimed, owing to its superior purity, will be much below the cost from the less pure ores now used, and Missouri iron men say that with coal from Pittsburgh and ore from the new deposits, they can make iron in Missouri and lay it down in this city for $28 per ton.

We understand that some of our men are already looking into this matter with a view to obtaining the ore as soon as proper arrangements can be made for mining and transportation.

The Southwest Pacific Railroad with a large land grant, is now being constructed through this region, and some of the most important of these deposits are reported to be on or near their line. They are now running trains 127 miles west of St. Louis, and it is expected that they will soon be in condition to afford transportation for the mineral wealth which abounds on their route.—*Pittsburgh Commercial.*

Tionesta Valley Railroad.

This road is likely to be built at once, and the most feasible route and connections will, it is thought, be with the Allegheny Valley Railroad, which will be rapidly extended north of the Tionesta. The road will be of immense importance to Pittsburg, commanding as it will the whole oil and lumber region of the Upper Allegheny and Tionesta Valley, and affording Pittsburg a direct and short route to Buffalo.

☞ John M. Robinson, Esq., has been elected President and Superintendent of the Seaboard and Roanoke Railroad Company. The Directors are: Moncure Robinson, Wm. L. Savage, Philadelphia; Walbro Fraver, George R. Vickers, Baltimore; Richard Walke, Norfolk; Judge D. A. Barnes, North Carolina.

☞ Both Houses of the Virginia Legislature have passed the bill to consolidate the Norfolk and Petersburg, the Southside, the Virginia and Tennessee, and the contemplated Cumberland Gap Railroads into a road to be called the Atlantic and Mississippi Railroad.

☞ The net receipts of the city of Cincinnati for the year ending March 1, 1867, were $2,738,735; the expenditures, $2,471,355, leaving a balance in the Treasury of $262,380. The debt of the city is $2,279,300, and the assets $10,389,663.

☞ The city of Bath, Me., has voted in favor of taking stock to the amount of $125,000 in the Knox and Lincoln Railroad.

Portland and Ogdensburg Railroad.

The line of this proposed road will strike off at Gorham or Buxton, and following the general course of the Saco River, pass through Cornish, Hiram, North Conway, N. H., and, still following the Saco, directly through the Crawford "Notch" in the White Mountains, thence down the valley of the Ammonoosuck some six or seven miles, where it would pass across to the head waters of the Johns River, following that river to its junction with the Connecticut at Dalton. In the passage from the Ammonoosuck to the Johns River there is no summit, nothing requiring a heavy grade. Crossing the Connecticut at Dalton, it would pass by Miles Pond in Vermont, to the valley of Moose River, and follow this river to St. Johnsbury, thence through Danville and Cabot to Montpelier, where a junction would be formed with the Vermont Central road which goes to Burlington on Lake Champlain, and to Rouse's Point at the north end of the lake, connecting at the latter point with the Ogdensburg road. By this route it is from Portland to Montpelier one hundred and sixty miles, while from the latter place to Boston by the present connections is two hundred and ten miles, making fifty miles advantage in favor of Portland. From St. Johnsbury to Portland by the proposed route is one hundred and fifteen miles, while to Boston the distance is two hundred and four miles. The road would pass within twelve miles of Franconia, and through the great uncut timber regions of the Granite State.—*Portland Press.*

Connecting Railroad.

The connecting railroad, seven miles long, from the Pennsylvania Railroad at West Philadelphia to the Philadelphia and Trenton Railroad at Frankford, will be opened to business on the 1st day of June, by which date a temporary depot, now in process of erection on the Pennsylvania Railroad Company's grounds at Market and Thirty first streets, will also be in readiness. It is the intention, we believe after June 1, to start all the New York passenger trains which have through connections West and South, from West Philadelphia, to which point cars bound for and from Pittsburg and Jersey City will be added to trains bound for and from Philadelphia and Pittsburg and for and from Philadelphia and Washington.

This arrangement will open a continuous steam-power route between Jersey City and Philadelphia, Pittsburg and Baltimore, which will be *common* between Jersey City and West Philadelphia, and which from the last named place will diverge West and South.

The connecting railroad will enable as good time to be made between Pittsburg and Jersey City *via* Philadelphia, as *via* Allentown, and will bring into use for all through travel East and West the whole mileage of the Pennsylvania Railroad, and also the whole mileage of the Camden and Amboy consolidated line.—*U. S. R. R. and Mining Register.*

☞ A meeting was recently held in Portland, Me., of the friends of the proposed new lines of railroad connecting that city with the West, one *via* Montpelier, Vt., to Ogdensburg, N. Y., and the other an extension of the Portland and Rochester Road. A majority of the speakers favored the extension of the Rochester line, but the new line had some able advocates. A committee was appointed to consult with the directors of the Rochester road.

☞ A party of New York gentlemen have organized as the "New York and Philadelphia Transportation Company," and have, it is said leased the Raritan and Delaware Bay Railroad for a term of 30 years, and will at once add new boats and rolling stock, to make this a first-class competing line as against the Camden and Amboy Railroad,

Interest and Dividends.

The Macon and Western Railroad Company have declared a dividend of four per cent., free of Government tax, payable on and after May 1st, 1867, at the National Bank of the Republic, New York.

The Nashua and Lowell Railroad Company have declared a dividend of 5 per cent., payable May 1.

The Vermont and Canada Railroad Company have declared a dividend of four per cent., less the Government tax, payable in stock at par on the 1st of June. The new stock to be issued by a vote of the stockholders at the special meeting held on the 22d of April, will be used in the payment of the dividend in even hundreds: fractions will be paid in cash. Vermont stockholders will be paid by the Treasurer at St. Albans. All others by Edward Blake, Esq., No. 39 Court street, Boston. Interest will cease on the 1st day of June, on the certificates of indebtedness issued by this company under date of February 10, 1864, and the same will be paid in stock at par on the 1st day of June, at the office of Edward Blake, Esq., 39 Court street, Boston. Fractions will be paid in cash.

The Hanover (Pa.) Branch Railroad Company has declared a dividend of 5 per cent. on the capital stock, clear of all taxes.

The City of St. Louis has effected a temporary loan of $600,000, to enable it to pay the interest on its bonds due in June, July and August, and also meet all other obligations.

Freight on Coal.

Our correspondent at Mauch Chunk sends us the following rates of the cost of a ton of coal by canals from Mauch Chunk to Philadelphia.

Lehigh Canal toll	$0 34
Delaware Division do. to Bristol	26
Towage from Bristol to Philadelphia	08
Freight	1 00
	$1 68

TO NEW YORK.

Lehigh Canal toll	$0 34
Delaware Division do. to outlet	26
Delaware and Raritan outlet to New Brunswick	30
Towage from New Brunswick to New York.	22
Freight	1 25
	$2 37

Franklin Copper Mine.

The product of this mine during the year 1866, was 1,638,994 pounds of ingot copper, valued at $475,079 81. The net profit for the year was $5,730 97. The assets Dec. 31st, were $201,581 32, and the liabilities, $123,585 73. The Directors say:—The mine is now in excellent condition, and no extraordinary expenditures are anticipated the present year. Indeed, it would seem that the Franklin is possessed of everything that any mine needs. All that is now required to work it at a profit, is a reduction of labor equal to the great decline in copper.

☞ The Virginia Legislature have passed the bill incorporating the Winchester and Strasburg Railroad Company. Also the bill disposing of the State's interest in the Alexandria, Loudoun and Hampshire Railroad. The bill relating to the Alexandria Canal and Railroad was also passed, allowing the construction of a railroad along the berme bank of the canal. The bill to extend the Danville Railroad so as to tap the Virginia and Tennessee Road near Wytheville, has passed the Senate, and awaits the action of the House.

Texas and New Orleans Railroad.

At a meeting of the stockholders of this company, held in New Orleans on the 18th inst., the following gentlemen were unanimously elected directors for the ensuing year: Messrs. J. H. Stauffer, Geo. Clark, New Orleans; T. W. Wason, Springfield, Mass., Charles M. Congreve and A. M. Gentry, Texas. At a subsequent meeting of the Directors on the 15th instant, for election of officers, the following gentlemen were unanimously elected: A. M. Gentry, of Texas, President; Geo. Clark, of New Orleans, Vice President, and W. R. Adams, of New Orleans, Secretary and Treasurer.

Frederick and Pennsylvania Line R. R.

We learn from the Frederick *Republic* that the Commissioners of this road held their first meeting at Woodsboro,' Md., on the 20th inst., and inaugurated measures for the opening of subscription books to the stock of the company. Much interest is felt in this enterprise in Carroll and Frederick counties. The route from Frederick to Woodsboro' will be almost an "air line," and the grades exceedingly easy to overcome. The topography of the country between those points is such as to make the cost of the road very light. Beyond Woodsboro' the cost will necessarily be greater, as the surface is more undulating, but as a through route, it is one of the most eligible in the State.

Tank Cars for Petroleum.

The Downer Oil Company received this week an invoice of oil, which arrived here in tank cars, the first we believe that ever came to this city. Each car has two tanks, holding some hundred gallons, and aside from the convenience of transportation, the leakage which is avoided, if oil was at a high rate, would be sufficient to pay the freight. The oil brought in these tanks was obtained at Oil Creek, Pennsylvania, and when first secured was placed in iron tanks, built upon the side of the railroad. The tank cars were filled in a very short space of time from these reservoirs, and then dispatched for Boston by the way of Erie, Pa., the New York Central, Western and Worcester Railroads, a distance of nine hundred miles. If the Marginal street Railroad was completed the Downer Oil Company could have run the cars into their Refinery and pumped the oil into their vats. —*Boston Journal.*

☞ The Woodbridge (N. J.) *Gazette* says: "The consolidated railroad companies are greatly increasing their wharf facilities at Jersey City, and have purchased a considerable amount of property at Perth Amboy, with the intention of connecting the two lines at that point by means of a permanent bridge across the Raritan. In case such should prove to be fact, the South Amboy boats will be discontinued, and all the Perth Amboy trains will run through on this road."

☞ Surveys are about to be made in the Notch of the White Mountains, with reference to building a railroad from Northern Vermont through the Notch, towards Portland, Me.

☞ The Natchitoches, La., *Times* says that the funds for the building of a railroad from that place to Ronquier's Point have been subscribed in New Orleans.

Erie and Pittsburg Railroad.

A bill has passed both Houses of the Pennsylvania Legislature authorizing the Erie and Pittsburg Railroad Company to extend their road to Pittsburg, by the Connoquenessing and Pine Creeks; or to connect with any other road now built, or to be built through that section. It appears that this company and the Pennsylvania Railroad Company have made an arrangement by which they will connect their roads in Butler County; probably in the valley of the Connoquenessing. This is a very important measure to the people of this section, and as the Pennsylvania Railroad Company was by previous legislation, authorized to extend their road to this county, this bill gives us additional assurance that the road will be made, thus affording the Erie Company an opportunity of having an independent route to Pittsburg. Railroad facilities through this county, and the counties east of us are calculated to develope our rich mineral resources, giving to the roads, centering at New Castle, an immense amount of freight, opening up a trade to and from the lakes, not realized at present by the most sanguine friends of such improvements. Furnaces and rolling mills will not be confined, as now, to the Shenango and Beaver Vallies; but, will be located along the entire line of the roads through Lawrence and Beaver Counties.—*New Castle Journal.*

Baltimore and Potomac Railroad.

We learn that the arrangements are complete for the speedy construction of this important highway. In a few days a large addition will be made to the force already employed, and it is expected that before the next regular session of Congress the main line will be completed as far as Upper Marlboro', and the branch from Collington to this city, giving us that long desired new route to Baltimore and the East. It has been alleged that the construction of the main line to Aquia Creek will be a damage to this city by its diversion of travel and traffic. But that is a very narrow view to take of it. This road opens up to speedy connection with Washington all the lower counties of Maryland, which are destined to become the dairy and vegetable farms that will supply our market, cheapen the cost of living, and thus invite the investment of capital in manufacturing enterprises in Washington. Travel must come to the capital, and trade will attend it if our business men offer equal advantages with other places. We have so often enlarged on the manifest advantages of a competing route to Baltimore that it is not now necessary to comment on them. But we have no doubt that, while benefiting this city immensely, this road will add vastly to the population of lower Maryland, and justly fulfil the expectation of the Legislature as to the increase of taxable property.—*Washington Intelligencer.*

Southern Pacific Railroad.

The San Diego correspondent of the *Alta California* says: "The Atlantic and Pacific (formerly the Southern Pacific) Railroad Company will soon make arrangements to break ground at this point, as their road which is now such a favorite and popular route with everybody (since it has been demonstrated that the more northern routes are not feasible,) must be rapidly completed to satisfy the wants of the trade, commerce and people of this coast." The Southwest Pacific Railroad of Missouri is the eastern division of this road, and the *Alta* says that trains will be run through to San Francisco over this route long before any other road is completed.

☞ The engineer of the Pocomoke and Wicomico Railroad is surveying and locating the route. It is expected that the workmen will be fairly engaged preparing the road bed within a week.

Pennsylvania State Tax.

The Legislature of this State, at its late session, passed an act abolishing State Tax on Personal Property, and in lieu thereof, impose a levy of $300,000, apportioned between the several counties according to population. As the State tax on Real Estate was abolished last year, there will be no State tax whatever to pay in future to the tax collectors, but the county tax will have to be increased to meet the quota of each county in the $300,000 State bonus, which will come back to the county again in the shape of appropriations for public shools. It is said that sufficient revenue to pay current expenses and interest is obtained from banks, railroad companies, and other incorporated institutions.

☞ The water was let into the Pennsylvania Canal on the 22d, between Middletown and Columbia. All the other connecting lines have been open for some time. Canal navigation, therefore, is now in complete order on the Susquehanna from Havre de Grace to all points on the upper canals.

☞ The York River (Va.) Railroad will be finished as far as the White House in the course of fifteen or twenty days. The schooner Pennsylvania, with 150 tons of railroad iron, arrived at Richmond on Tuesday from Baltimore. Some 400 tons more are expected in a few days.

☞ The Western (Mass.) Railroad Company commenced operating its double track, between Springfield and Russell, 16 miles, on the 15th inst. But 22 miles then remained to be built to complete the entire double track from Boston to Albany.

WE OFFER FOR SALE

ENGLISH RAILS

OF THE FOLLOWING BRANDS:

CRAWSHAY. LEVICK & CO.
GUEST & CO. RHYMNEY CO.
EBBW VALE CO. ABERDARE CO.
BAILEY, BROS. & CO.

Weighing 45, 50, 52, 54, 56, & 60 lbs. per lineal yard, Erie patterns, in port and to arrive, for cash, or a satisfactory credit.

If desired, parcels of Rails can be rolled to any required pattern, and shipped direct from England to any port in this country, at prices f. o. b., or ex-ship on arrival.

M. K. JESUP & COMP'Y,
84 Broadway.

A CIVIL ENGINEER, of 25 years' experience, offers his services to RAILROAD COMPANIES. Address "E. Le H.," care of the Editor of this paper, to whom, by permission, he refers.

CALEB H. MALIN. HANSON E. ATKINS. GEO. MALIN.

PLASTIC SLATE ROOFING
JOINT STOCK COMPANY.
OFFICE 157 (Room 19) BROADWAY,
NEW YORK.
W. C. POTTER, Vice Pres't.
J. M. ALLEN, Sec. and Treas. LICENSES GRANTED.

PLASTIC SLATE
FOR
Roofing & Other Purposes.

The process of reconstructing Slate Stone from a disintegrated state was
PATENTED FEBRUARY 21st, 1865.
It is a combination of
Pulverized Slate and Viscous Matter,
(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.

As a Roofing Material it Stands Unrivalled.

A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.

Frost does not Crack nor Heat Dissolve it.

The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and

Perfectly Fire-Proof,

It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

IRON BRIDGES.

THE undersigned is prepared to Manufacture and Build in any part of the United States, at reasonable terms, Fink's Patent Iron Bridges, Peate and Lattice Bridges, Peate Girders for Fireproof Buildings, Iron Roofs, Bolts, etc. For plans and particulars apply to

C. J. SCHULTZ,
Cor. of Wayne St. & Duquesne Way,
PITTSBURGH, PA.

Or Address
Letter-Box No. 1,393, P. O.

ASTONISHING!

PAINTS for Cars, Bridges, Roofs and Houses at ONE-THIRD the cost of lead; 100 lbs. will paint as much as 250 lbs. of lead, and wear better. Extract from a testimonial received from the U. S. Mint, "have used the PECORA CO.'S BROWN PAINT where it is subject to the fumes of ACID and STEAM, and find it SUPERIOR to all others in protecting wood and metal." For joints it is superior to red lead. The floors and joints of bridges should all be painted with it as they are laid.

PECORA PAINT CO.,
150 N. 4th St., Philadelphia.

FOR SALE

3 LOCOMOTIVES,
4-81-2 GAUGE,

All thoroughly REBUILT by one of the best makers in the country, and ready for immediate use.

1—Cylinders 14x20, Link Motion, 4-56 in. Drivers connected, Copper Flues, Weight about 24 tons; 8 wheeled Tender, 1800 gallons.

This Engine has always worked admirably; Steams freely with dry or green wood, works and wears perfectly smooth; Well springed and brassed all around. Proportions every way suited to power. A good and stylish model, all in excellent order.

2—Cylinders 15x20, Link Motion, 4-54 in. Drivers connected, Copper Flues, weight about 23 tons, 8 wheeled tender, 1,800 gallons.

Is a smart smooth working Engine, suitable for any work; has a good record throughout.

3—Cylinders 16x20 Hook Motion, 4-66 in. Drivers connected, Copper Flues, weight about 24 tons; Tender, 8 wheeled.

Every way perfectly sound, well brassed and springed up. All in fine working condition.

These Engines will be sold VERY CHEAP to close a transaction, and are GREAT BARGAINS to any company wanting this sized Engine.

KASSON & CO.,
58 Beaver St., New York.

Thistle Mill Waste,

A new and Superior Article of WOOLEN Waste, combining the following

ADVANTAGES,

1st. It is 20 per cent. lighter than ordinary waste.
2d. It will absorb 25 per cent. more oil.
3d. Has greater elasticity and will wear longer.
4th. It is less liable to ignite.
5th. And has a value as old waste.

The use of Wool as an ANTI FRICTION material is too well known to require discussion.

This waste is manufactured expressly for use in packing Locomotive and Car Journal Boxes, and will be sold as low as the best Cotton Waste.

The old waste taken in exchange at a price—including weight of oil, dirt, &c.—which will reduce first cost over one-half.

Small Sample Bales furnished FREE for trial.

KASSON & CO.,
15tf **58 Beaver St., New York,**

THE STEAM SIPHON PUMP

IS THE MOST SIMPLE, EFFECTIVE, AND DURable device for raising water by steam yet discovered It is an independent lift and force pump without piston, plunger, valves, or movable parts of any kind. With the STEAM SIPHON WATER STATION a Locomotive can raise water with its own steam, and fill its tender in the same time as from an ordinary tank, thus dispensing with tanks, pumping machinery, and men to attend them. It cannot get out of order, or freeze up, and is an efficient fire engine where steam power is employed, as at Machine Shops, Car Shops, Elevators, &c. For Circulars and other information address

STEAM SIPHON COMPANY,
48 Dey St., New York.

SHIP FELT, CARPET FELT, BOILER FELT.

THE very superior Felt, manufactured by the Lowell Felting Mills, can now be furnished in quantities to suit purchasers, from the new and extensive mills now completed. Also, pipe, truss, upholstery and all other Felts. Apply to the branch office of the Company.

☞ **EDW. F. DAVISON, 138 Pearl St.**

OFFICE ERIE RAILWAY COMPANY,
No. 187 West St., NEW YORK, April 1, 1867.

NOTICE IS HEREBY GIVEN of the intention of this Company to extend its First Mortgage Bonds, due July 1, 1867, for Thirty Years, at Seven per cent. per annum. These Bonds are a First Mortgage of $3,000,000 on the entire property of the Company, and the power to extend them is given by a statute of the State of New York, which provides that the Company may extend any or all its Mortgage Bonds, in the order of their respective priorities.

Proposals will be received up to the 15th of May next, at the General Office of the Company in the City of New York, for extending any portion of the issue, and parties, whether present holders or others, bidding the highest premium therefor will be entitled to extend said Bonds, *pro rata*, on the amount of their bid, as the Bonds are presented by the holders.

On and after the 1st of July the Company will be prepared to extend, on the above terms, all such Bonds as the holders thereof may present for that purpose, at the office of the Company in the City of New York, and new sheets of Coupons for 20 years, with an indorsement thereon of a mutual agreement of such extension, will be issued and attached, with interest payable semi-annually as heretofore.

Persons whose bids may be accepted will have the option of extending Bonds in London, Frankfort, or Germany, on due notice to the Company, in manner to be hereafter determined, of the numbers of the Bonds to be extended in each place.

PROPOSALS FOR THE CONSTRUCTION OF THE SUMMIT DIVISION OF THE ILLINOIS AND MICHIGAN CANAL.

OFFICE OF THE BOARD OF PUBLIC WORKS,
CHICAGO, March 18th, 1867.

Sealed Proposals will be received by the Board of Public Works, at their office, until 11 a. m. Wednesday, May 1st, 1867, for the excavation necessary to deepen the Illinois and Michigan Canal, according to the plan adopted, from Chicago River to Summit Lock, No. two (2) a distance of twenty-six (26) miles.

Maps, profiles, specifications, &c., will be exhibited at the office of the Board of Public Works in Chicago on and after April 15th until the day of letting.

There will be some two millions (2,000,000) cubic yards of earth excavation—some of it quite hard and embracing considerable detached rock—and about four hundred seventy thousand (470,000) cubic yards of stratified limestone.

The work must be prosecuted so as not to interfere with the use of the Canal during the season of navigation.

It is believed, however, that the most of the excavation, except the stratified rock, can be done with steam dredges without interfering with the navigation of the Canal, but the rock excavation will all have to be done between the close of navigation in the fall and the opening in the spring.

If a new line be adopted for any portion of the distance, operations thereon may be continued the whole year; and the navigation of the Canal will be suspended at least five months in each year unless otherwise mutually agreed by the Board and Contractors.

The whole of the work must be done on or before the end of the third season of the suspension of navigation.

A large amount of machinery will be required to excavate the work within the time required, consisting mainly of steam dredges, scows and cranes for the earth work, and drilling machines, pumping machinery and cranes for the rock.

Contractors will be required to commence work on the earth excavation within thirty days of the time of letting, and upon rock excavation by the first of November next.

The dredges, cranes and scows now in the Canal can be had at an appraised value which will be made known to bidders prior to the letting.

Parties contracting for the work will be required to provide all machinery, and to put up and remove all dams and all works of protection, and at their own expense to do all pumping, or whatever may be necessary to secure their work from water.

Proposals must be addressed to the Board of Public Works, endorsed "Proposal for Deepening Illinois and Michigan Canal," and be accompanied with the usual two hundred dollar ($200) bond, with surities, to be approved by the Board.

Contractors will bid, stating the price for which the work will be done on each of the different sections, and the work will be let as a whole or in part, and in such quantities as the Board shall determine.

The Board reserve the right to reject any and all bids, and no proposal will be accepted unless the party offering it shall give evidence satisfactory to the Board that he has the necessary skill, experience, energy, and ability for doing the work, is trustworthy, and has sufficient pecuniary resources.

The Board will require such security, as according to their judgment, will secure the doing of the work according to the contract.

American Railroad Journal.

New York, Saturday, May 4, 1867.

Camden and Amboy Railroad and Transportation Company.

The annual meeting of this company was held at Bordentown, N. J., on the 27th ult. The meeting was organized by the appointment of Ira C. Voorhees, Esq., of New Brunswick, as Chairman, and Dr. Pierson, of Trenton, as Secretary. The joint report of the Associated Companies (Delaware and Raritan Canal, Camden and Amboy Railroad and New Jersey Railroad and Transportation Companies,) as presented by Ashbel Welch, Esq., General President, was then read.

The report recites the terms of agreement of the consolidation of the companies, showing that the union of interests adds very largely to the aggregate value of the property, and secures to the public an amount of accommodation not otherwise possible. In exhibits annexed to the report, the affairs of the four companies, that are one in interest, are presented in a concise form.

The condensed balance sheet shows that the aggregate outstanding full paid stock of the four companies, not including the stock of any company held by itself or any of its partners, was, on the 1st of January last, in round numbers, $13,000,000. The part-paid stock or "scrip" of the old "Joint Companies" was nearly $2,000,000, on which nearly $500,000 was paid. Add to this $1,250,000 to be issued under the agreement by the New Jersey Railroad and Transportation Company, and the whole stock then issued, not including any held by either of the companies, will be very nearly $16,250,000, on which nearly $2,500,000 were payable.

The aggregate undivided earnings of all the companies were on the 1st of January a little over two and a quarter millions, of which just half a million of dollars will be credited to the New Jersey Railroad stockholders on the stock to be distributed among them, as just mentioned, and nearly two-thirds of a million more was used in paying the January dividends.

The aggregate debt of all the companies in round numbers, was about eleven and a quarter millions; so that including undivided earnings and payments on scrip, the total liabilities are very nearly twenty-seven millions.

A railroad twenty-five miles long between Pemberton and Hightstown is now being constructed by the people of that district, at a cost of $400,000. The companies are to operate this road, and pay interest on its cost, which is not included in the statement above mentioned. In conclusion, the General President says:

As our companies own the three direct avenues of traffic which connect the two great cities of this continent, and which form portions of the best routes from the commercial centre to the South and West—as by the variety of their works they are enabled to do each kind of business that offers in the most advantageous manner—it is clearly their policy fully to prepare for the increasing traffic; and so to perfect their works and the arrangements upon them, that the public can reasonably ask for nothing more, and that they may depend upon the superiority of their facilities alone for protection against competition.

The election of Directors was then proceeded with and the following gentlemen were re-elected: Edwin A. Stevens, Ashbel Welch, Joseph P. Bradley, Cambridge Livingston, John L. McKnight, Benj. Fish, Samuel Welsh.

From the annual report of the President of the company presented to the Legislature, we gather the following facts:

The capital stock paid in by the Camden and Amboy Railroad and Transportation Company was $1,500,000; added by authority of the Legislature, $3,500,000, making a total of $5,000,000. Dividends have been paid during the year 1866 on the capital stock of the Joint Company as follows: Ten per cent. in stock, and five per cent. in cash. The funded debts of the Joint Companies amount to $10,073,137.

The Camden and Amboy Railroad and Transportation Company is still under certain obligations to pay small annuities to persons who have been injured on the road.

The cost of the railroad and equipments is $10,099,000 97.

The receipts of the road for the year ending Dec. 31, 1866, were	$4,312,895 00
Expenses	3,801,732 45
Current net	$511,162 55

In a memorandum accompanying the report of the State Directors of the joint companies, Ashbel Welch, Esq., engineer of the railroad, states that the railroad from Camden to Amboy is 61.28 miles in length, of which 19.87 miles is double track. There are 32.08 miles of sidings and tracks at terminis, of which 1.31 miles have been laid during the past year. The main track is laid with rails weighing from 55 to 64 pounds per yard, of which 16.93 miles have been relaid during the last year with rails weighing 62 pounds per yard, re-rolled at Bethlehem.

From the Trenton Delaware Bridge to the junction with the New Jersey Railroad is double track, 23.04 miles laid with rails weighing from 60 to 62 pounds per yard. From Trenton to Bordentown are 6.14 miles of single track, laid with rails weighing from 45 to 64 pounds per yard. On the branch road 5.96 miles of track, old rails, have been replaced by new rails, weighing 62 pounds per yard, during the last year. There are on the branch road 1.80 miles of sidings, 0.60 of a mile of which has been laid during the past year.

Many of the rails procured during the war were of very inferior quality, and it has been necessary to replace them. Many more must be replaced during the present season.

The track and machinery of the road are i better condition than they have been for sever years.

Michigan Southern and Northern Indiana Railroad.

The following is a comparative statement of the earnings and expenses of this road for the fiscal years ending February 28, 1866 and 1867:

	1866.	1867.
From freight	$2,455,402 68	$2,681,900 16
" passengers	2,021,246 87	1,749,336 74
" mails	54,786 24	54,786 24
" express	101,556 19	120,316 65
" rents	19,024 63	19,780 83
" all other sources	34,428 41	47,072 24
	$4,686,445 02	$4,673,192 86
Expenses, viz:		
Repairs of roadway	$758,979 85	$617,590 52

Settlement guarantee on C., P. & C. Bonds	8,000 00	
Discount on $687,500 bonds sold	61,434 47	
Settlement stock yard claim, etc	18,597 72	
Increase in working supplies	109,503 25	
Increase in uncollected earnings, etc.	66,439 82	
Cash on hand	295,698 67	
Total, as above,	$1,306,412 40	

Compared with the previous year, the gross earnings of 1866–'67 show a decrease of $13,252 16, with an increase in expenses of $314,048 88—making the decrease in net earnings, $327,301 04. The report says:

An intimation having appeared in the last Annual Report, that a dividend might be paid during the year now closed, it is deemed proper to submit the following statement of the cash transactions, collated and condensed from the several tabular statements appended to this report; some smaller items and the direct coversions of bonds and guaranteed stock into common stock being omitted as unnecessary here.

The reason why no dividend was paid on the common stock will be apparent.

Receipts from gross earnings		$4,673,192 86
Less operating exp	$3,063,705 81	
Taxes	177,365 45	
New equipment, new track and bridges, (being mainly additions to the company's property)	260,938 67	
		$3,502,009 93
Balance		$1,171,182 93
Received for bonds sold		768,065 53
" common stock sold		71,200 00
Total cash receipts		$2,010,448 46
Disposed of as follows:		
Sinking fund contribution		$142,000 00
Paid New York floating debt and interest		321,394 75
Premiums on conversion guaranteed stock this year		82,270 20
Redemption of overdue bonds		38,000 00
Erie and Kalamazoo Rental		30,000 00
Interest on funded debt and dividends on guaranteed stock		726,228 86
Additions to depot property and other real estate		331,879 60
Old stock yard claim		17,866 67
Settlement of claims for back dividends on guaranteed stock		71,650 00
		$1,761,290 08

The amount of difference in the above totals is represented in the cash on hand.

It is also apparent, from the above statement, why the Western office could remit, during the year, no more than $750,000 to the Treasurer in New York.

The Board believes that the disposition thus made of the receipts was the best that could have been made for the interests of stockholders and the future value of their property.

It will be seen that the payment of the floating debt, the premium on converted guaranteed stock, the sinking fund and the overdue bonds paid off, absorbed the greater portion of the proceeds of the bonds sold.

The floating debt that existed at the beginning of the year represented so much of the expenditures for premiums on conversion of guaranteed stock into common stock as had not been paid from earnings. The payment of this, and the additional expenditures during the past year for premiums on guaranteed stock, free us from liability to pay so large a sum in future for that purpose. If all the guaranteed stock now outstanding were to come in for conversion, the total amount of premium would not equal one-half the amount paid during the past year as originating under that head.

The items for redemption of overdue bonds and additions to depot property, and the stock-yard claim, are also sums the greater portion of which will not be called for in the expenditures of the year now beginning. Therefore, these items, like the payments for premiums on guaranteed stock, may be properly classified as extraordinary expenditures.

Of the bonds referred to in our last Annual Report as on hand, seventy-three remain in possession of the company, as yet unsold. They being sinking fund bonds, it was not deemed advisable to sell them below par, and the market would not take them except at a discount.

In addition to the seventy-three bonds, we may anticipate the receipt of about the same amount from the sale of surplus real estate in Chicago.

The commissioners of the sinking fund have added 142 bonds to the fund during the year, and now hold 1,159 of the sinking fund bonds canceled and withdrawn from issue.

The settlement of the claims for back dividends on the guaranteed stock, by paying, as a compromise, 40 per cent. in common stock, was continued up to the 5th day of January last, and 1,793 shares were so settled and assented during the year. After the date named no settlements were made, and on the 28th of January last, the Supreme Court of Massachusetts rendered its decision in our favor and against the claimants of back dividends, in the suit therein pending. Since the rendition of that decision, no further compromise settlements have been made—settlements that had been made in the absence of any decision to guide us, and under the advice of counsel as an equitable compromise of a claim that had enlisted the opinions of many able lawyers in favor of its legality.

Also, the conversion of guaranteed stock, previously assented, into common stock, has been continued, and 3,020 shares have been converted during the year, and the stock cancelled.

The outstanding guaranteed stock is now reduced to 7,877 shares, of which 4,887 shares are assented and 2,990 shares unassented stock.

The rates of premium for conversion of guaranteed stock, which during the previous year had been 35 and 30 per cent., have been reduced during the past year to 25 per cent.

The foreign holders of $100,000 of the Cincinnati, Peru and Chicago Railroad bonds have not yet accepted the compromise accepted by others, and their suit for the alleged guarantee of their bonds is still pending.

The percentage of expenses, compared with earnings, shows an increase over the previous year; this will be accounted for by the following statement:

As indicated in the last Annual Report, it was, on the opening of the year, a matter of stern necessity that arrangements should be made to renew, in the then coming season, a very much larger proportion of the iron and ties in the track than would be ordinarily required in any one year. As the Board did not feel justified in neglecting so important a matter, it will be seen that the payments on account of these two items amount to $1,112,852 82, very largely exceeding the sums so appropriated in any previous year.

102.67 miles have been relaid with new and re-rolled iron, and 125.18 miles of old iron repaired.

131.11 miles of the road have been relaid with cross-ties, requiring in number 308,099.

While we do not anticipate that any future year will show so large an expenditure for these items as that just ended, still a heavy expense in this department will be rendered necessary for years to come.

During the year just closed we have been, at times, for want of cars, unable to move promptly the freight offered for transportation.

As the prospects for a full grain crop were never better than at the present time, it is believed that sound policy requires a large addition to our freight rolling stock in the coming year.

The cost of maintenance of Way has been: In year ending February 28, 1865, 17.7 per cent. of earnings. In 1866, 18.1 per cent. In 1867, 23.8 per cent.

The other operating expenses were as follows: In year ending February 28, 1865, 38.4 per cent. of earnings. In 1866, 42.4 per cent. In 1867, 41.8 per cent.

The total operating expenses to earnings, 1865, was 56.1 per cent. In 1866, 60.5 per cent. In 1867, 65.6 per cent.

The aggregate of expenses, apart from those

pertaining to the maintenance of way, shows a reduction from the sum total of same items in the previous year. Considering that the freight earnings constitute so much larger a proportion than usual of the whole receipts, this must be considered as indicating reasonable economy in the management.

Our trains have run 2,380,495 miles, or 199,880 miles more, still the fuel consumed is less in quantity, and in cost is $37,699 23 below the year preceding.

While the efficiency of Rolling Stock has been fully maintained, locomotive repairs show a decrease of $41,551 97, and car repairs a decrease of $2,632 59.

It was stated in the last Annual Report that preparations had then been made to commence, on the opening of Spring, the much needed improvements in Chicago. We have now to report that since that time there has been erected, (in common with the Chicago, Rock Island and Pacific Railroad Co.,) a passenger house and office building the first of which was so nearly completed as to allow its use for our trains December 18, 1866; the latter, it is expected, will be ready for occupancy in May next. While the cost has not been extravagant, we think the whole structure will bear comparison, both for convenience and beauty, with any similar buildings in this country, and will be an enduring monument to the good taste and skill of the architect, Mr. W. W. Boyington.

The territory occupied by the Station and streets on three sides has been raised to city grade, and the paving, (Nicholson,) which was interrupted by the early winter, will be finished as soon as the season will permit.

We have completed the purchase of the right of way, to enable us to remove our track from Clark street, as far south as Twelfth street, and have laid a double track from the passenger station over this line.

We have built in Chicago, solely at our own cost, for the exclusive use of this road, a brick freight house, with slate roof, 600 feet long by 51 feet in width. The block upon which it stands, as well as the street in its front, has been filled to grade, and the street has been paved.

In the matter of other permanent improvements, a large expenditure has been made in the substitution of stone structures in place of wooden bridging, for new stations, woodsheds, and other conveniences upon the line, as well as the increase in number and length of side-tracks, &c.

Most unfortunately for the interests of the inhabitants on our various lines, as well as for the business of this road, the wheat crop in Southern Michigan and Northern Indiana was, last season, an almost total failure; this has had the effect of materially lessening the earnings of the year just closed. The road has not only been deprived of the earnings which would have been derived from the crop itself, but the loss of the value of the grain has practically withdrawn just so much from the active industry of the country, to the injury of all branches of business. This cause has had an effect upon our passenger business, till, in the great deficiency in this department, we have only shared with the other roads in the stagnation of passenger movement growing out of the close of the war.

The "Red Line," alluded to in the last report, continues in successful operation. The "South Shore Line," a company of similar character running in connection with the Erie Railway, has been made up during the past winter. These organizations, owned and operated by the roads composing the lines, are believed to promote the true interests of the stockholders.

Under authority granted by the stockholders, arrangements have been made for a connection at Jackson with the Grand River Valley Railroad Company, (a company building a road northwest to Grand Rapids,) and to invest in their bonds annually 40 per cent. of the gross earnings on business destined to or coming from that line of road. As the new road will run through one of the finest agricultural districts of Michigan, and will bring to this company an accession of new traffic, and as this road will give the Grand River Valley Railroad an outlet both to the east and south, the arrangement is believed to be one of mutual advantage. We hope to see the line opened some thirty-six miles early in the coming summer.

The construction of the road of the Chicago, Cincinnati and Louisville Company, between Laporte and Peru has been delayed much beyond our expectations. We are now assured that the link which will complete our line between Chicago and Indianapolis, Cincinnati and Louisville, will be ready for business in all the present year.

The assets and liabilities of the company March 1, 1867, were as follows:

FLOATING CASH ASSETS.

Cash in New York	$197,126 79
" Toledo	98,571 88
Uncollected earnings	198,928 44
Freight overcharges due Co.	24,669 45
Bills receivable, Toledo	5,801 24
Individual accounts, Toledo	1,669 71
	$526,767 51

FLOATING CASH LIABILITIES.

Pay-rolls and vouchers, Toledo	$484,700 43

Military	10,008 02	
Storage		30,754 64
	$1,749,336 74	$2,681,900 16

The following is a comparative statement of the liabilities of the company February 28, 1866 and 1867:

	1866.	1867.
Common stock	$9,381,800 00	$9,813,500 00
Guaranteed stock	1,089,700 00	787,700 00
Funded debt	8,537,175 00	9,135,840 00
Pay-rolls and vouchers, Toledo	302,107 33	484,700 43
Bills payable	335,000 00	25,000 00
Unclaimed dividends and coupons	26,863 49	32,623 28
Total	$19,672,645 82	$20,279,363 71

The available assets, including supplies on hand, February 28, 1866 and 1867, compare as follows:

	1866.	1867.
Cash in New York	$17,836 58	$197,126 79
" Toledo	17,794 00	98,571 88
Uncollected earnings	140,055 58	198,928 44
Freight overcharges due Co	18,219 29	24,669 45
Bills receivable, Toledo	2,591 24	5,801 24
Individual accounts, Toledo	3,762 91	1,669 71
Supplies on hand	547,024 74	656,527 99
	$747,284 34	$1,183,295 50

The number of passengers carried eastward was 402,809; do., westward, 443,889—total, 846,698, of which 117,040 were through, and 729,658 way. Of the through passengers, 83,113 were 1st class, 18,595 2d class, and 15,332 3d class, yielding $734,004 87. Of the way passengers, 727,627 were 1st class, 1,463 2d class, and 568 3d class, yielding $1,005,323 85. The number of miles traveled by through passengers was 28,750,809; by way passengers, 28,773,085—total, 57,523,894; a decrease, as compared with the previous year, of 68,777 passengers, and of mileage, 11,954,493.

The number of tons of through freight moved eastward was 197,706; do., westward, 106,716—total, 304,432, yielding $1,352,371 20. Way freight moved eastward, 244,376; do., westward, 150,967—total, 395,343, yielding $1,298,774 32. Total tons through and way eastward, 442,082 yielding $1,544,711 31; do., westward, 257,683, yielding $1,106,434 21—the total tonnage being 699,765, against 569,340 the previous year, and the revenue therefrom, as above, (exclusive of storage,) $2,651,145 52; a gain, as compared with the previous year, of $240,212 85, or 9.96 per cent. Total mileage of freight, 107,085,732, viz: eastward, 68,945,072; westward, 38,139,660.

The equipment of the road consists of 101 locomotives; 62 1st class, and 10 2d class passenger cars, 2 sleeping, 23 baggage, 5 emigrant, 1 paymasters', 23 caboose, 22 drovers', 214 stock, 856 box, 287 platform and 3 wrecking cars.

Number of miles run by passenger trains, 863,897; by freight trains, 1,284,444; by wood and gravel trains, 237,852—total, 2,386,193, an increase, as compared the previous year, of 294,578. Cost of repairs per mile run 10.47 cents.

MEASURE OF DAMAGES FOR KILLING A HORSE.—EVIDENCE.

On the trial of the case of The Toledo and Wabash Railway Company *vs.* Smith, which was an action for damages for killing a horse, the plaintiff introduced a witness who stated that he was acquainted with the value of horses, but had never seen the horse in controversy. The witness was then asked, "What, on the 10th day of May, (the day of the killing,) was the average price of a horse fifteen or sixteen hands high, three or three and a half years old, and sound except the ring bone on the hind foot, which had been killed?" The Court held that it was error to permit the witness to answer the question; and further that the value of the horse at the time of his death was the measure of damages. But it was competent for the defendant to show the condition of the horse by witnesses who had seen him at any reasonable time before the killing, ranging within three months, and then after proving by other witnesses that his condition was unchanged, the former might testify to the value of the horse at the time of the killing, on the hypothesis that his condition was the same as when they saw him.

All the facts of the case are fully stated in the opinion of the Court which was written by

GREGORY, J.—Darwin Smith sued the railway company before a Justice of the peace for killing a horse on the track of its road, where it ought to have been but was not fenced. The appellant offered, before the Justice, to confess a judgment for $10, and costs of suit to the time of the offer.

This was declined by the appellee. Judgment by default before the Justice. The company appealed to the Circuit Court. Trial by jury. Verdict for the plaintiff for $60. Motion for a new trial overruled, and judgment. The evidence is in the record. Smith swears that he was the owner of the horse; that the horse was in pasture near the track of the railway company; that the fence was down, and had been for a period of about two weeks; that the horse was found dead about six feet from the track; that he did not see him struck, but saw him dead soon afterward; that he had no marks or wounds upon him only the hair was off, and there was hair along the track where he had been dragged; that the horse was worth $85; that he had the ring bone on the right hind leg, but that it was no injury to him; it would injure him for a long drive but not for common use; that he was not spavined; that when he bought him the ring bone was pretty bad, but that he had mostly cured him; that he had owned him some two months; that he was about three years old and sound, except the ring bone. That the pasture in which the horse was, contained eight or ten acres; that the fence was thrown down by high water; that the water remained up seven or eight days; that he was not a horse doctor; that no horse doctor had seen the horse, but that he had doctored the horse as he was told to by Dr. Strong.

Dr. Strong swears that he is a doctor, and a veterinary surgeon; that the horse he saw had ring bone on his hind leg; that he thought it was a damage to the horse of about $5; that he was worth $60; that the fence along the track of the railway had been down some two or three weeks, and was still down after the horse was killed, at least a day or two; that he saw the horse, and thinks he understands horses and their diseases; that he declined to state what medicine he used in curing ring bone—that was a secret of his own; that he never did anything to the horse himself, but told Smith what to do; that he did not particularly examine the extent of the ring bone when he saw the horse; that he told Smith how to use the remedy.

Mr. Day swore that he was in the livery business; that he never saw the horse in question. The plaintiff then asked the witness the following question: "What, on May 10th, 1864, was the average price of a horse fifteen or sixteen hands high, three or three and a half years old, sound except the ring bone on the hind foot, which had been killed?" The defendant objected to the question on the ground that it assumed facts not in evidence, and was too remote, the witness having never seen the horse, nor heard any description of him from which to inform the jury as to his value; but the Court overruled the objection, and allowed the witness to testify that the "horse might have been worth about the 10th of May last, from $60 to $80," to which the appellant excepted. This was the plaintiff's evidence.

The defendant then introduced Mr. Good, who swears that he saw the horse; that the ring bone was very bad; that he may have been worth $5, but he did not think him worth anything; that he was an employee of the defendant, and had had some difficulty with the plaintiff.

Mr. Larabee swears that he saw the horse at the sale, a month before his death; that the ring bone was a bad one. The defendant then asked the witness the following question: "What was the horse worth in market at the time of the sale to defendant, about a month before his death?" The plaintiff objected to the question, and the Court sustained the objection and refused to allow the witness to answer, to which the defendant excepted. This witness further testified, that Smith said to him that he paid eight or eight and a half dollars for the horse at the sale.

Mr. Cheney swears that he saw the horse the day of the sale, and again about a month before his death. That he had a ring bone, and a very bad one.

Mr. Sullivan swears that he saw the horse several times; that he had the ring bone badly in his hind foot; that it was grown out above the hoof all around, and looked red and raw; that the last time he saw him was three weeks before his death. The defendant then asked the following question: "What was his value at that time, three weeks before his death?" To which the plaintiff objected, and the Court refused to allow the question to be answered. The defendant excepted.

William Tate swears that he saw and examined the horse the Sunday before his death; that he was not then any better than he was when he first saw him on the day of the sale; that he could not trot; that he whipped him round a little, but he moved slowly and with great difficulty; that his hind foot above the hoof was all raw, a place as big as his two hands, and swelled out beyond the hoof; that on the other hind leg he had the blood spavin; that he never saw or heard of a horse with either of these diseases cured sound; that the horse, as he was the Sunday before his death, would not fetch in the market more than four or five dollars; that he thought if the horse had lived a while longer he would have lost his hoof; that a horse with ring bone or spavin might be mended some, but never cured sound; that a bad ring bone, as that was, cannot be cured. That he examined the horse in the pasture when Smith, the owner, was present; that he showed him the spavin then, and told him he did not think the horse worth anything; that he saw the horse shortly after he died; that he was lying ten or fifteen feet from the track of the railway; that he had no cuts or bruises on him; that the ring bone foot looked as bad as ever; that there was a severe thunder storm the night before, and the lightning was very sharp; that he did not know, but had his notion as to what killed him; that he did not see any hair on the railroad, nor any marks either on the track or on the horse to indicate that there had been any collision; that he examined particularly both the track and the horse; that there were at the time other horses in the same pasture; that he was an employee of the defendants.

William Meran swears that there were no marks on the horse of having been struck by the engine; that he examined him particularly immediately before his death, and he did not think with such a foot and leg as he had he was worth anything; that he saw some loose hair on the track a short distance from the horse, but no signs of a collision; that when the engine strikes an animal the marks both on the animal and on the track, are easily seen; that he is an employee of defendant.

Mr. Henderson swears that he saw the horse after he was dead; that the sore on his hind leg looked very raw, and was swelled up over his hoof; that in the condition the horse was with that ring bone, he was not worth $5; that he was no judge of the market value of horses; that he had never seen the horse living.

John Kearns swears that Smith, the plaintiff, told him the horse was spavined in the other leg, sometime before the death of the horse. This was the defendant's evidence. The plaintiff then recalled Dr. Strong, who in rebutting, testified that the rawness spoken of was produced by the medicine, and was a sign of healing. He declined, however, to state what medicine was used. He further testified that ring bone can be cured; that he had cured many of them. This was all the evidence given in the cause.

It is insisted that the verdict is not sustained by the evidence. It is difficult to see how the jury came to the conclusion they did, but as the Court below erred in overruling a motion for a new trial on another ground, we shall not reverse the judgment for this cause.

The Court committed an error in allowing the witness, Day, to answer the question propounded to him by the appellee. Paige *vs.* Hazard, 5 Hill's N. Y. R., 603.

The value of the horse at the time of his death was the measure of damages, and the Court below, therefore, committed no error in refusing to permit the appellant to prove his value at any other time. It was competent for the defendant to show the condition of the horse by witnesses who had seen him at any reasonable time prior to his death, ranging within three months, and then proving by other witnesses that his condition was unchanged, the former might testify to the value of the horse at the time of the injury complained of on this hypothesis.

The judgment is reversed with costs, and the cause remanded, with directions to grant a new trial, and for further proceedings.

American Railroad Journal.

Saturday, May 4, 1867.

Stock Exchange and Money Market.

The features of the Money Market are essentially as represented in our last. The supply of capital, especially of such as is seeking employment, in a temporary form, is rapidly gaining on the demand for accommodation, whether for use at the Stock Exchange, or by the dealers in the public funds; and consequently the tendency of rates is downward. To the Government house, the price is now almost uniformly four, and to the leading Stock firms, five to six per cent. on call. In the way of discounts, there has been some increase of business, particularly in prime short date paper, which has been in more favor at bank and through private channels at six to seven per cent. per annum. The influx of capital is indicated by the last city bank statement, which showed an increase of $3,584,085 in the deposit line, and of $3,823,435 in the legal tender reserve, with a decrease of $47,286 in the circulation. The specie reserve was reduced $218,231. The loans were augmented by only $175,650. The specie reserve of the banks is now $7,404,304, against $8,243,937 same time last year. The city bank deposits are now $187,674,341, against $202,718,575 week ending April 28, 1866. The legal tender reserve amounts to $67,920,351, against $80,589,022 same time last year. The circulation now stands at $33,601,285, against $25,377,280 same time last year. The loans are now $247,737,381, against $245,017,692 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $74,414,070 a day, against a daily average of $74,635,729 the preceding week, and $87,655,547 the week ending with April 13th. The current week's exchanges average about $86,875,000 a day.

The main changes in the Philadelphia Bank footings, last week, were as follows: Increase of loans, $279,510; increase of legal tender reserve, $155,605; increase of deposits, $414,390; decrease of specie, $105,718; and decrease of circulation, $9,113.

No National Bank notes were issued last week, leaving the total issue to 1,664 banks thus far, as given in our last, $302,558,456, against $282,555,440 at the close of the last fiscal year, June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $3,607,983, leaving, with the existing 1,647 banks, an actual circulation at this date, of $298,950,474. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,625,950; and for the public deposits, $38,960,950—making a total of $379,586,900. The Treasury Department, last week, redeemed and destroyed $295,800 of worn and mutilated fractional currency, and issued $286,600 worth of new.

The following is a comparative table showing the specie, legal tender, circulation, and deposits of the National Banks, Jan. 1, and April 1, 1867:

	Jan. 1.	April 1.
Specie	$10,634,972	$10,335,492
Lawful money	186,511,929	176,690,472
	$197,146,899	$187,025,964
Circulation	291,093,294	291,880,102
Deposits	582,405,607	540,571,580
	$873,498,901	$832,451,682
Reserve of 25 per cent.	218,374,725	208,112,920
Deficit	$21,227,826	$21,086,956

Included in the lawful money of April 1, ($176,690,472,) is included for compound interest notes $84,029,095, out of $139,028,630 outstanding April 1, 1867, as per debt statement.

The U. S. Sub-Treasury receipts, week ending with April 27, were $18,268,425, including $1,964,580 from customs duties; payments, $10,480,083; balance at the close of the week, $119,865,417, against $112,077,074, at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $2,150,839, and payments, $2,943,539; on Tuesday, receipts, $5,745,248; payments, $10,574,777. The balance at the close of business on Tuesday stood at $115,170,035, against $114,898,048 a week previous. The total receipts of the office in April, were $83,945,038; payments, $69,409,128.

Government revenues from excises and customs

are again gradually increasing, with the partial revival of activity in financial and commercial affairs. The excises, last week, yielded $2,608,206, against $1,976,942, the preceding week; customs at the port of New York, $1,964,580, and at the outports, about $650,000 (in coin) more, making the grand total income for the week equal about $6,203,253 in currency, against disbursements of $5,229,094 on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $229,000,000.

Government derived an income of $9,511,075 from customs, at this port in April, 1867, against $11,093,212 same month, last year.

The total amount of gold certificates issued and redeemed by the U. S. Sub-Treasury here, together with the balance unredeemed on the 27th of April, is thus stated:

	Issued.	Redeemed.	Outstanding.
20s ...	$307,800	$193,800	$114,000

Total	$187,977,400	$166,828,000	$21,149,400

The Gold speculation has been less rampant, since our last, and the price has receded from 142⅛ on Wednesday evening and Thursday morning of last week, to 134 on Tuesday of the current week. Subsequently, there was a temporary rally to 136½, followed by a reaction to 135. The final dealings on Wednesday were at 135⅝@135¾, on a moderately buoyant market. The significant peace news from Europe, received since Monday, has most effectually "taken the wind out of the sails" of the *bull* interest, which is quiet at present, in view of the impending liberal coin interest disbursements, on account of the Five-Twenty bondholders' claims. That customs and export demand has been restricted. The *Scotia* on Wednesday took out $100,000 for Liverpool. The total imports of specie from Europe, and other foreign ports since Jan. 1, 1867, have been $674,748. The customs demand for Gold last week, averaged $327,430 a day; thus far, this week, it has been equal to $442,549 a day, or equal to a weekly aggregate of $2,655,294. The arrivals of specie from Europe, Havana and other foreign ports, during the past week were $9,170, and from California, none. The total customs revenue of the Government, in coin, at this port since July 1, 1866, has been $105,500,000, against $111,915,727 same time in the preceding fiscal year. The total receipts of California gold at this port since July 1, 1866, have been $34,461,566, against $23,270,065 same time last year, showing an increase this year, of $11,191,501. The exports of specie from this port, last week, were only $710,397. The total outflow of specie from the port, thus far in the current fiscal year has been $25,694,917, against $18,166,149 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $55,000, making the total coin interest disbursements through the Government office, since July 1, 1866, $36,657,764, against $32,215,339 for the same time in the preceding fiscal year.

There has been less activity in foreign exchanges, without any very remarkable fluctuations in prices. The supply of prime bills has not been any way extensive, and the principal drawers of sterling drafts have been quite firm in their views, yielding very tardily and reluctantly, despite the depression in gold. Bankers' 60 day bills on London closed tamely on Wednesday at 109⅜@109½, and on Paris to 5.22½@5.15¾; sight bills on London to 110@110¼; and on Paris to 5.13¾@5.12½. The offerings of produce bills have been again less extensive, this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,314,702, making the total value of exports since July 1, 1866, $149,327,798, against $191,061,662 same time in the preceding fiscal year.

Government securities have been further advanced in price, by the increased calls from investment buyers for nearly all the interest bearing obligations, particularly for the Five-Twenties, which have been in very moderate supply. The Seven-Thirty notes of the various issues are in quick request, and those of the first, or August series, are being rapidly retired by the Treasury agents, either through conversions, or by direct purchases. The rapid funding of this temporary indebtedness of the Government is tending to foster the public confidence in the actual management of the national finances, notwithstanding the cavilings of the speculative theorists who have access to the columns of the daily press.

Within a year Secretary McCulloch has practically funded, over $271,000,000 of the floating debt of the nation, and this too, without any serious disturbance of the industrial and business interests of the country. U. S. sixes of 1867 closed here on Wednesday at 132½; U. S. sixes of 1868, at 131; U. S. sixes of 1881, 110½@110¾; U. S. Five-twenties of 1862, ex-May coupon, 107⅜@107⅝; U. S. Five-twenties of 1865 at 105¾@106; U. S. Five-twenties of 1865, consolidated, 107½@107⅝; U. S. Ten-forties at 99@99⅛, ex-coupon, and U. S. Seven-thirties at 105⅝@106¼. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

June, 1864	119⅛	May, 1865	113¼
July, 1864	118⅝	August, 1865	112¼
August, 1864	118¼	September, 1865	111¾
October, 1864	117⅞	October, 1865	111½
December, 1864	116⅛		

Washington advices state the 1st of May exhibit of the public debt will show a reduction in the debt to the extent of between $5,000,000 and $6,000,000. The receipts from Customs and Internal Revenue sources during the month amount to about $28,000,000; one-half of which, being for Customs, is in coin. The balance in the Treasury in coin is about $100,000,000, with $14,000,000 or more on gold certificates of deposit.

A decidedly brisk speculative movement has been developed in railway and miscellaneous share property, especially since Monday, which has carried up prices of the speculative favorites quite rapidly. The highest figures were reached on Wednesday. The latest dealings indicated a slight and, most likely, temporary, reaction from extreme rates.

General business has been pretty brisk, chiefly in the line of domestic produce. Breadstuffs have been much firmer, and in good request. Provisions have been in fair demand, closing rather in favor of sellers. Cotton opened quite actively at rapidly advancing prices, but closed heavily, and with a downward tendency. Middling grades of cotton left off here on Wednesday decidedly less buoyantly at 28@30 cents per lb. as extremes. The stock of cotton now here is estimated at about 37,000 bales. The receipts at the port this week, have averaged nearly 1,100 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 531,500 bales, against exports of 414,015 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 1,658,000 bales against 1,810,786 bales same time last year; exports, 1,177,500 bales, against 1,279,635 bales same time last year; estimated stock at latest dates, 420,000 bales, against 398,331 bales same time last year. In foreign merchandise, there has been less animation, and the dry goods' interest has suffered some depression. The total imports of foreign dry goods, last week, were $1,336,866, and the total amount marketed $1,465,576. The value of foreign merchandise imported last week, was $5,203,954—making the grand total specie value of last week's imports of dry goods and merchandise, $6,540,820, and since July 1, 1866, $216,917,770, against $249,063,390 same time in the preceding fiscal year. The ocean freight market has been moderately active and steady, with 598 vessels of all classes in port. For Liverpool we quote flour at 1s. 10½@2s. per bbl.; grain at 3¾@4d. per bushel; cotton at ⅛@$\frac{3}{16}$d. per lb.; and heavy goods at 10s.@20s. per ton, all by sailing vessel.

Portland and Rochester Railroad.

As stated elsewhere in this paper, the city of Portland, which has for some time been stirring on the question of greater railroad facilities with the West, has at last decided to loan its credit to the amount of $1,400,000 in support of the projects. The ends to be secured by the measure are:

1. The extension of the Portland and Rochester road from the Saco River to Alfred, a distance of fourteen miles.

2. A further extension of the same road to Rochester, as soon as the mayor and aldermen are satisfied of a sure connection with the Vermont Central through New Hampshire, thus opening a new route to the West by way of the Northern New Hampshire, and to New York by connections with other roads through Manchester, Nashua and Worcester.

3. A road is already provided for from Montpelier to Dalton on the Connecticut River in Vermont. The loan, it is expected, will secure a road to North Conway, New Hampshire, from Portland, and parties are thought to be ready to complete the line across the State of New Hampshire, thus making another through route to the West.

The Portland papers have urged the matter with all zeal, and are predicting the most magnificent advantages to their city as the result of the loan. They claim that the debt will be amply secured by mortgages on the proposed roads, and besides an unlimited amount of through trade with the West, which they hope to divert from Boston, there is much expected from a local business which the opening of new roads will develop.

☞ The Wilmington and Reading Railroad is now fully commenced, and the work will be pushed to an early completion. The bridge over the river at Birdsboro,' and about three miles of the road from that point, has been located, and will be placed under contract as soon as the engineers can prepare the specifications, &c.

☞ The question of running cars on Sunday has been submitted to the people of Baltimore, with the result of 11,039 votes in favor, and 9,056 against. The cars commence running on the 28th ult.

☞ Milford, Mass., has voted, to invest $50,000 in the branch road which is to meet the Boston, Hartford and Erie Railroad at Bellingham. Individuals in Milford have subscribed about $30,000 for the same object.

☞ Track laying on the Union Pacific Railroad re-commenced on the 29th ult. Iron for 40 miles is now at Omaha. Ties for 100 miles are at the end of the road. Grading will be done at the rate of two miles a day.

☞ The Connecticut amd Passumpsic Rivers Railroad has been completed to the Canadian line It was opened for travel on the 1st inst. The northern terminus is at Derby.

Railroad Earnings.--Weekly.

The earnings of the Grand Trunk Railway of Canada for the week ending April 13th, 1867, were $144,723 00
Corresponding week of previous year. 144,438 00

Increase..... $285 00

The earnings of the Marietta and Cincinnati Railroad the 3d week in April, 1867... $20,644 00
Corresponding week previous year.... 19,053 00

Increase..... $1,591 00

The earnings of the Western Union Railroad for the week ending April 21, 1867. .. $9,817 53
Corresponding week previous year.... 10,652 67

Decrease $835 14

The earnings of the Chicago and Rock Island Railroad for the 3d week in April, 1867, were $78,368 00
Corresponding week of previous year.. 64,265 00

Increase..... $14,103 00

The earnings of the Detroit and Milwaukee Railroad for the week ending April 25th, 1867, were $39,165 00
Corresponding week of 1866..... 33,590 00

Increase..... $5,575 00

The earnings of the Michigan Central Railroad for the 3d week in Apr., 1867, were .. $77,060 47
Corresponding week of previous year.. 80,107 33

Increase..... $3,046 86

The Elevated Railway.

At the session of the State Senate in 1866 a resolution was adopted, appointing Senators Andrews, Low and Cornell, Mayor Hoffman, the State Engineer, and Mr. Craven, the Engineer of the Croton Board, a special commission to report to the Senate the most advantageous and proper route for a railway or railways, suited to the rapid transportation of passengers from the upper to the lower portion of the City of New York, having in view the greatest practicable benefit and safety to the public, and the least loss and injury to property on or adjacent to said route or routes. A number of plans were examined, and many practical engineers were heard by the Commissioners in support of underground, surface and elevated railroads. After an examination of the subject laid before them the Commission made a report, in which they expressed the opinion that a surface railroad would not relieve the wants of New York. A resolution was passed that, in the opinion of the Commission, the best method of attaining the object contemplated would be by constructing underground railroads.

In speaking of elevated railroads the Commission reported as follows:

"Among the plans for an elevated railway in the streets, that presented by Mr. C. T. Harvey, civil engineer, appears to have been the most carefully prepared, the most free from engineering difficulties, involving the question of safety, and the least objectionable as to the application of the motive power."

Near the close of the last session of the Legislature a bill was passed, authorizing the construction of three lines of Elevated Railway in this city. This bill which has since received the sanction of the Governor provides for the formation of three companies, viz: the West Side and Yonkers, Broadway and Yonkers, and East Side and New Rochelle. The route of the first named company is to begin at the corner of Greenwich street and the Battery, running north on that street to Ninth avenue, and thence by the most eligible route to Kings Bridge, and to the village of Yonkers. In the upper portion of the city it may run through the centre of blocks of vacant lots by a purchase of the right of way in the usual manner. The second named company is formed to construct a single track railway on a similar plan on Broadway, commencing at the Battery and extending to Sixty-fourth street, and thence to Yonkers, parallel to the West Side line. The route of the third-named company to commence at the Battery, and to proceed thence through Pearl street, the New Bowery and the Bowery to Third avenue, and thence on between Third and Second avenues to the Harlem Bridge, and thence to the village of New Rochelle.

The structure is to be built in such a way as to partially cover the footpath, and the street for several feet out from the curbstones. It will be mainly composed of steel and iron, the track being supported by wrought-iron columns standing 25 feet apart, upon piers of peculiar construction, insuring solidity. The track itself will be of steel, and so constructed as to bear a test of five times the weight or strain to which it is at any time liable to be subjected, when passed over by cars. Stations for the reception and delivery of passengers are to be placed at regular intervals of of from fifteen hundred to two thousand five hundred feet apart. Rooms will be hired in the second story of buildings for that purpose. The stairways are to be within the buildings. Ornamental bridges, with transparent floors, are at certain distances to connect the track with the buildings wherein are to be the depots, or at points along the route where it is found impracticable to obtain depots in buildings, with stairways leading to the footpath underneath. The track is to be laid on a bed of India-rubber, by which it is claimed that much of the noise which might reasonably be expected can be prevented. The cars are to be drawn along the track with a steel wire rope half an inch in thickness, by steam power provided at certain fixed distances along the line. The estimated cost is from $300,000 to $500,000 per mile, and it is proposed to have eight depots to each mile. The companies are to be required to pay five per cent. of the earnings to the City treasury.

It has been supposed that this bill gives unrestricted power to the three companies named to erect the three roads on the routes indicated. On the contrary, it defines the powers conceded very closely, and subjects their exercise to certain provisions and restrictions. It provides that one-half mile shall be first constructed by the West side and Yonkers Railroad Company, for the purpose of testing the plan. After this half mile of road is built and ready for inspection it is to be examined by three Commissioners, two of whom shall be appointed by the Governor and one by City authorities. This Committee shall report their opinion as to its practicability, &c., and a copy of this report shall be sent to the Governor and the like to the City authorities. Should the report be favorable to the road, that is to say, pronouncing it not only as practicable, but in no way interfering with the comforts of the community, or dangerous to life upon it or below it, the Company shall then have the right to extend the road to Yonkers, with power to establish a ferry over Harlem River, the company of course having to treat for the use of property along its route in the same manner as other railroads. The construction of the East Side and New Rochelle, and Broadway and Yonkers roads will depend upon the success of the experimental half-mile, except that the last named project will first require the consent of the Common Council, as provided by an act passed some two years ago.

Massachusetts Railways in 1866.

We present below our annual statement, showing the results, in numerous details, of the operations of the Massachusetts Railway system during the past year. These details are deduced from the sworn statements made to the State Department, and are designed to show, among other matters, the comparative economy with which the work has been done on the different roads, in the mechanical and operative departments, and they show at the same time the value of the different roads as an investment. A comparative statement of the *whole system*, in gross amounts, for the past two years, may be seen in the following figures:

	1865.	1866.
Number of companies....	50	49
Length of roads, miles...	1,610	1,550
Aggregate capital.....	$78,075,405	$83,091,600
Amount paid in	65,565,482	68,952,168
Aggregate cost of roads..	72,175,091	79,466,774
Total revenue.....	18,974,914	21,205,527
Funded and floating debt	25,068,218	27,471,634
Surplus earnings on hand	5,562,436	6,019,227

The comparative results of *operation* in important details, for the past two years, may be found in the following carefully prepared abstract:

	1865.	1866.
Number of railways.....	37	37
Length of main lines....	1,304.3	1,351.3
Length of branches.....	196.1	199.6
Double track and sidings.	571.6	585.0
Cost of railways.....	$69,625,115	$77,019,246
Capital paid in.....	47,644,540	62,600,440
Funded debt.....	12,737,871	13,842,478
Floating debt	1,749,536	1,606,676
Total debt.....	14,517,047	15,486,954
Interest paid on debt....	1,091,855	881,300
Dividends paid	3,491,105	4,064,338
Surplus.....	5,438,255	5,931,168
Receipts from passengers	8,829,213	8,960,153
Receipts from freight....	7,719,875	8.951,496
Receipts from mails, &c.	699,589	782,975
Total receipts	17,458,928	19,241,513
Expense of road bed....	1,780,456	2,086,993
Expense of machinery ..	2,286,922	2,711,487
Other expenses.....	7,754,219	8,268,357
Total expenses	11,885,955	13,278,272
Net income	5,519,793	5,430,435
Per ct. of exp. to income.	68.1	69.0
Net income per ct. on cost	7.9	7.0
Miles run by pass. trains.	4,298,893	4,648,880
Miles run by freight trains	3,221,600	3,724,031
Miles run by other trains.	302,811	497,655
Total miles run.....	7,873,720	8,921,456
Receipts per mile run, cts.	221.8	215.6
Expenses p. m. run, cts..	151.0	148.8
Net income p. m. run, cts.	70.1	66.8
Cost of fuel p. m. run, cts.	21.9	20.3
Road rep'rs p. m. run, cts.	16.8	23.3
Engine rep'rs p.m. run, cts.	13.0	13.1
Car repairs p. m. run, cts.	16.1	16.8
Passengers carried.....	19,743,341	21,492,547
Passenger mileage.....	319,690,040	337,342,325
Tons of freight carried..	5,095,828	5,819,270
Tonnage mileage.....	186,986,450	229,351,021

The tabular results show a large increase of receipts over the previous year, amounting to $1,782,585, of which $1,231,621 was for freight. The total number of miles run shows a like increase of 1,047,736, the largest portion of which was for freight trains. This would seem to show that there is some increase of general business in the

State in despite of what is said to the contrary. The total receipts are pretty equally divided between freight and passenger traffic—near nine millions dollars of each. In spite of the large increase in receipts, the "net earnings per mile run" show a small decrease; but the net income on cost remains at seven per cent., which is a very good result. The number of tons of freight hauled per mile run is rather small, the average being 61.5; the average of the Western road is 69.7 tons. A reduction of the non-paying weight hauled in proportion to the paying load, is not only desirable but quite practicable. As long as it is the policy of the managers of the more successful companies not to make a large show of net income, but by expending a large portion of the current earnings in permanent improvements and extension of branches, these tables will show but an approximation of the real cost of doing the work. This policy, while it renders the companies financially strong, bears hard upon the public. It is gratifying to notice that those companies that treat the public with the most liberality in the matter of fares and accommodation, show a degree of prosperity fully equal to those which pursue an opposite policy. The statement as a whole shows the railway system of the State to have been quite successful in a financial point of view, and if the future is to be judged from the past, the railway is the best investment for capital open to the public.—*American Railway Times.*

Lehigh Valley Railroad Company.

About a month hence this company will open the mountain division of their line, between the Lehigh at Whitehaven and the Susquehanna at Wilkesbarre, a distance of thirty-one miles. The two Lehigh companies both cross the Nescopec water shed on parallel routes, and so continue to Solomon's Gap, in the Wilkesbarre or second mountain, whence they continue the descent in opposite directions on loop lines, one (the Lehigh Valley,) swinging away to the west, coming out on the face of the first mountain through Sugar Notch, the other (the Lehigh and Susquehanna,) swooping away east and disappearing between the two mountains, till it reaches the Laurel Run water gate, through which it emerges into view from the valley below, and into which it winds down the mountain side, elongation being essential on both lines to obtain a gradient easily workable with locomotive power. The elevation overcome in getting out of the Wyoming Valley is about 1,000 feet; and to move the coal up this elevation with economy, each of the two Lehigh companies has a system of three inclined planes operated with stationary power.

From the loop or passenger line of the Lehigh Valley Railroad Company, which from Solomon's Gap almost to Sugar Notch is on ground higher than the crest of the first mountain in front, there is an unobscured soul-inspiring panoramic view of the classic vale of Wyoming, which is destined to lasting fame, among the most magnificent of landscapes visible from car windows.

After the mountain link shall have extended the Lehigh Valley Railroad to Wilkesbarre, the Lehigh Valley Railroad Company will have in operation an unbroken line 102 miles long, reaching from its disgorging terminus at Phillipsburg (where the Central New Jersey, the Belvidere Delaware and the Morris and Essex Railroads jointly receive its coal tonnage consigned to the New York and eastern markets,) to the coal mines of the Wyoming Valley. In addition, the company own and operate 17½ miles of road from Penn Haven to Audenried, and also 40 miles of road between Black Creek and Mount Carmel, making altogether, 159½ miles of road; 68 miles are double track, and the length of sidings is about 70 miles.

Beyond Wilkesbarre the Lehigh Valley Railroad Company is working at different points, under a charter controlled by it and whereby it will possess a canal and a railroad in the North Branch Valley, from Wilkesbarre to New York State line, a distance of 105 miles.

The North Branch Valley—which long ago was a hobby with us—is the only *river route* between Western New York and Central Pennsylvania—between the Chesapeake and Delaware bays, and lakes Ontario and Erie. And from the Wyoming coal field, *by canal and by rail*, tonnage will be distributed throughout Western New York, and delivered at the harbors on the lakes, in such quantities as will make the North Branch enterprise a satisfactory investment, and enlarge the power and the influence of the Lehigh Valley Railroad Company, among the great carriers of the two great States.—*U. S. R. R. & Mining Register.*

Windsor and Annapolis (Nova Scotia) Railway.

The following is a summary of the arrangements made by the Nova Scotia delegates, while in England, for the construction of the railway from the Windsor terminus of the Nova Scotia Railway to Annapolis. The company agree to "construct the railway from a point to connect with the railway at or near the present station at Windsor, either to Annapolis or to Troop's Point, the length to be assumed at 85 miles." It is the intention of the company, however, to go to Annapolis. The works are to be fully completed and ready for traffic, on or before the first day of December, 1869. Every precaution is taken, as in previous agreements, to have the road thoroughly constructed. The rails are to be of good quality, and to be not less than forty-two pounds weight per yard; to be laid in longitudinal rectangular bearings; properly fastened with spikes and fished at the joints or with sleepers, and an arris cut longitudinal stringer, with a proportionably smaller pattern saddle rail as introduced on the Great Western Railway in England, or such other description of permanent way as may be accepted and approved by the Chief Engineer of the province. The company further agree to build over the River Avon, near Windsor, on the line, a good and sufficient bridge. This bridge the company have decided to build of iron. The Province, on the other hand, is to capitalize the subvention originally offered to the company, at the agreed sum of £188,600 stg., instead of the payment of the sum of £16,320 stg., per annum, Provincial bonds for the foregoing sum, bearing six per cent. interest, are to be delivered at par to the contractors; but they are only to be delivered, "according to the amounts from time to time" expended by the company, and according to a scale of prices to be agreed upon. The amount of such bonds shall never exceed 50 per cent. of the whole amount expended according to the certificates of the Provincial Engineer. The Government are also to pay "for the building and sustenance" of the Avon Bridge, the sum of £32,000. The company were to have commenced operations in the Windsor end of the line about the first of May. The landing pier at Annapolis will be contracted for forthwith, and completed during the present year.

☞ The Government Commissioners have accepted the seventh section of 30 miles of the Kansas Branch of the Union Pacific Railroad. This road is now completed to Salina, 50 miles west of Fort Riley, to which point freight and passenger trains will run May 1st. The amount of transportation done by this road for the United States Government for the month of March was $34,865, one-half of which was returned to the United States Treasury in accordance with the Pacific Railroad act.

Pennsylvania Railroad.

A meeting of the stockholders of this company was held in Philadelphia on the 29th ult., to receive the report of a special committee appointed by Mayor McMichael, chairman at the last annual meeting, for the purpose of investigating the management, condition, finances, policy, &c., of the corporation. The committee cordially and fully indorsed the policy of the present management, including its excellent system of East freight lines, which are peculiar to the Pennsylvania road, for the prompt and speedy transportation of through freights without breaking bulk, and also recommended an increase of capital to extend the works and usefulness of the company. The report is exceedingly gratifying to the stockholders, and was adopted by a vote of 127,630 shares for, and 2,319 against it, and resolutions were passed complimenting the officers for their ability and fidelity.

This action is in accordance with the law of the late session of the Pennsylvania Legislature, authorizing the company to increase its capital stock, and to borrow money to the amount of thirty millions of dollars—fifteen millions in stock and fifteen millions in bonds. The capital of the company at the beginning of this year was twenty millions, its mortgage debt about ten millions, with other liabilities to the amount of fifteen millions—in all a little over forty-five millions of dollars. The increase of stock will involve an issue of 300,000 shares.

New Feature in the Express Business.

We learn that the establishment of the Merchants' Union Express Company, and the advantages the merchants and manufacturers of the Middle and Western States have derived from it, not only in the reduction in the rate of charges, but in the superior facilities resulting from sharp competition, is inducing the merchants in other sections to organize similar companies to connect with the one now in operation.

A new company to cover the Southern States, connecting at New York and Cincinnati with the Merchants' Union, will soon be in operation.

A company is also soon to be organized in New England which will connect at New York with the Merchants' Union.

Stock for a similar company is being rapidly taken in Canada.

Each of the new companies will be organized on plans similar to that of the Merchants' Union, and will connect and act in co-operation with that company, which will virtually extend their lines, by the system of interchange of business over the entire Union and Canadas.

☞ The Quicksilver Mining Company of Pennsylvania, have conveyed to the Quicksilver Mining Company of New York the new Almaden Quicksilver Mine. The consideration expressed on the deed is $3,500,000.

☞ The city of Portland, Me., has decided to loan its credit for $700,000 each, to the proposed Portland, Rochester, and Ogdensburgh Road, on certain conditions regarding completion.

☞ The city of Evansville, Indiana, has subscribed a million of dollars to the Evansville, Henderson and Nashville Railroad. The hands are now at work on the road, and it is to be completed very soon.

The New Steamer City of Lawrence.

The Directors of the Norwich and New York Transportation Company have added another commodious steamer to their line, long a favorite with the travelling public. In her construction a new idea in Sound navigation has been introduced, and one that may in the future be extensively copied. It is that her main hull is built of wrought iron plates, fastened and braced after the manner of ocean-going steamships, instead of white oak, chestnut, &c., the exclusive materials heretofore used in the erection of this class of vessels. Her construction was an experiment, and will undoubtedly prove a successful one.

The City of Lawrence is 245 feet long, 40 feet breadth of beam, 11 feet depth of hold, draws, when loaded, 10½ feet of water, and is 1,702 tons burthen. She is fitted with 78 state rooms, all nicely furnished and so arranged that they are entered from alcoves, and can be thrown together by means of folding doors should family parties at any time so desire it. In addition to these state rooms are 250 well and conveniently arranged berths for cabin passengers. Meals are served on the European plan in the state room halls, a departure from the custom so long in vogue on Sound steamers of going "below" for something to eat.

The motive power of this steamer consists of a vertical beam engine, sixty-five inches in diameter by eleven feet stroke of piston. Steam is generated by two tubular boilers, twenty-seven feet long by ten feet diameter. Prior to these boilers being placed in the hold of the City of Lawrence they were subjected to a hydrostatic pressure of forty-seven pounds to the square inch; the maximum pressure they are allowed to carry by law is thirty-five pounds to the square inch. Her water wheels are thirty-five feet in diameter, and have thirty wooden buckets each.

In pumps, both feed, fire and hand, she is well supplied, and it is encouraging to note that in her security and provisions against fire she is better fitted than many Sound steamers. Her life boats, six in number, are supplied with a patent disengaging apparatus.

The hull and machinery of this vessel were constructed by Messrs. HARLAN, HOLLINGSWORTH & Co., Wilmington, Delaware.

Nova Scotia Railway.

The Report of the Chief Commissioner of Railways in Nova Scotia shows that up to the close of the financial year there had been expended on the extension from Truro to Picton, $1,000,571 46. The Commissioner anticipates a large traffic on this line when completed. With regard to the progress made in its construction, he says:

"The vigor with which the works on the Picton extension have been pushed on by Mr. Fleming, the contractor, reflects upon him the highest credit, and the more so, in consequence of the very unfavorable nature of the weather during almost the entire season. I may with great propriety add, that the work appears to have been done irrespective of expense, and the utmost pains taken to have the work performed in the most satisfactory manner. I here venture the opinion that the road, when completed, as to material and workmanship, will be one of the best, if not *the* best, in British North America, or on this Continent; and whatever might have been the misgivings of some, when the contract was first known to have been let to Mr. Fleming, I am satisfied that the result will fully vindicate the course adopted by the Government, by which the public will not only secure a *good* road, but the use thereof one year at least in advance of the time when it could have been completed under other circumstances."

Washington County Railroad.

A correspondent of the Baltimore *American*, writing from Hagerstown, Md., says:

A recent visit to Baltimore, and somewhat free intercourse with its merchants and citizens, revealed to me the fact that there is comparatively but little known concerning the building and early completion of the Washington County Railroad. This road, running from Hagerstown to a point on the Baltimore and Ohio Railroad, three miles east from Harper's Ferry, will make the distance to Baltimore but one hundred and two miles, or about fifty miles less than by the Northern Central and Cumberland Valley, and but ten or twelve more than by the proposed route for the Western Maryland. It traverses the richest section of the county, running its entire length within easy reach of the numerous mills along the Antietam, and opening up a ready way of shipment for the greater part of the grain grown in the county. Heretofore but little of the produce of this section found its way to Baltimore, because of the difficulties attendant on its shipment. It has been divided between New York (by direct railroad line) and Georgetown (by way of the Chester and Ohio Canal,) the trade of the county being mainly done in Philadelphia.

It is expected that the road will be completed in about four months, and the degree of advancement is such as to fully warrant a promised opening by September 1st.

A little business activity and effort manifested by the merchants of your city will easily and readily draw all the trade of the county to Baltimore, and secure to it the use and benefit of our large crops of produce.

These efforts have never yet been made to a degree commensurate with the importance of the trade of the county, the third in point of amount and value of wheat production in the Union.

Beside the advantages offered in the way of trade, the road traverses a section rich and varied in beauty, healthy and pleasant in every respect, offering for summer residence or for travel as fine features as could well be desired. A more intimate acquaintance with its characteristics will well repay to your citizens the trouble of its acquisition.

Railroad Iron.--Exports from Gt. Britain.

The London *Railway News* says the year has opened with inconsiderable results as regards the exports of railroad iron, only 17,944 tons having been exported in January, as compared with 30,367 tons in January, 1866, and 21,402 tons in January, 1865. The exports declined to British India, Australia, and other parts of the world; and the decline observable in the general total would have been much more marked but for rather considerable shipments made to the United States. Although the demand for railroad iron fell off last year, from Sweden, France, Spain, Brazil, Chili, and other countries, there was a large increase in the inquiry from Russia, Prussia, the United States, British North America, British India and Australia. The result was that the total exports of the year footed up to 498,595 tons, as compared with 434,300 tons in 1865, 408,215 tons in 1864, 446,440 tons in 1863, 400,765 tons in 1862, 377,565 tons in 1861, and 453,445 tons in 1860. The value of the railroad iron exported in 1866, was £4,166,419, as compared with £3,541,296 in 1865, £3,305,086 in 1864, £3,278,304 in 1863, £2,817,877 in 1862, £2,906,359 in 1861, and £3,408,759 in 1860

Orange, Alexandria and Manassas R.R. Co.

At a meeting of a majority of the stockholders of the Manassas Gap Railroad Company recently held in Alexandria, a report of the President of the road favoring a transfer of the Manassas road, charter and franchises to, and consolidation with the Orange and Alexandria Railroad, under the above title, was adopted. The terms of transfer recited by the act of the Legislature are as follows:

The transfer of the charter, franchises, property and rights, together with the stock shares belonging to the State, to Alexandria, the counties, and to individuals, of the Manassas Gap Company to the Orange and Alexandria Railroad Company, upon condition that the Orange and Alexandria Company shall assume the payment of the debts of every kind of the Manassas Company, and reconstruct the road from Manassas Junction to Harrisonburg, the work to be finished in two years; that in case of failure, the property, &c., is to revert to the stockholders of the Manassas Company; that the charges on transportation are to be pro rata upon the two roads; that two directors are to be added to the Orange and Alexandria board—one to be chosen from the valley and the other from the Piedmont Counties; that the Orange and Alexandria Company may take the name of the Orange, Alexandria and Manassas Company.

At a meeting of the stockholders of the Orange and Alexandria road it was voted that the whole matter be left to the President and Directors, with power to negotiate. The chief opposition to the transfer of the Manassas Gap was from the stockholders of the Loudoun Branch of the road, but as the city of Alexandria owns $300,000 of the stock, and the State at least two-fifths of the whole, the opposition was of no avail. There are $800,000 of bonded indebtedness on the road.

Dorchester and Delaware Railroad.

The county commissioners of Dorchester, Maryland, have decided by a vote of four to one, to issue bonds to the amount of $50,000 to aid in the completion of the Dorchester and Delaware Railroad. The Cambridge *Intelligencer*, from which we obtained the above, says: "The Commissioners, in thus yielding to the almost unanimous voice of our people, have swept away every barrier to an early completion of the road. The $50,000 from the county, together with the State appropriation and individual subscriptions, will give the company something over $250,000 with which to commence the work. As the entire length of the road is not quite thirty miles, the ground level, and no bridges to build, this amount will be almost sufficient to construct the road. Whatever may be the deficiency, we are confident that President Byrn, and his efficient and energetic associates in the management of the road, will provide a way to meet it. The work will commence immediately, and by this time next year we may expect to be able to announce the arrival of the cars at New Market, and very probably Cambridge."

☞ The work of grading the railway track between Newton and Branchville, in the county of Sussex, N. J., is being vigorously prosecuted, the contractors promising to have it completed by August next.

☞ The town of Unity, Me., has voted to subscribe $30,000 to the new preferred stock of the Belfast and Moosehead Lake Railroad. Brooks has voted $20,000 for the same purpose.

The Bankrupt Bill.

The Thirty-ninth Congress in the passage of the Bankrupt Bill did a very good thing. The bill will prove satisfactory to all classes, as a beginning in the right direction, and with a little amending by the present Congress, can be perfected. Debtors and creditors both, have asked for the passage of this bill. Its length forbids the publication of the entire act, and few would spare time to peruse it if we were to publish it; but the following synopsis of its provisions embraces the whole bill in a condensed form:

By the law passed, jurisdiction in bankruptcy is given to the several United States District Courts, with the United States Circuit Courts acting in a supervisatory capacity as Courts of Equity, and Judges of the District Court will be assisted by Registers in Bankruptcy, whose powers are limited, and provision is made for reference of disputed questions to the District Court Judges, and for appeals from the District Courts to the Circuit Courts, and from the latter, in cases where the matter in dispute shall exceed $2,000, to the United States Supreme Court.

There are two kinds of bankruptcy, voluntary and involuntary. In the former, any person residing within the United States jurisdiction, owing over $300, and finding himself insolvent, may apply by petition to the Judge of the District in which he has resided for the six months preceding the date of the petition, or for the longest period during such six months, and shall thereupon be declared a bankrupt. The creditors having been properly notified by the Court, may appoint one or more assignees of the estate of the debtor, the choice to be made by the greater part in value and in number of the creditors who have proved their debts, or in case of failure to agree, then by the District Judge. or where there are no opposing creditors, by the Register. The whole affairs of the bankrupt pass into the hands of the assignees, who have full powers granted them necessary for the collection of all debts, and the final adjustment and closing up of the estate; and where delay is likely to occur from litigation in the final distribution of the assets the Court is empowered to direct their temporary investment. The bankrupt is liable at all times to be called up for examination on oath upon matters relating to the disposal or condition of his property or business transactions, and for good cause his wife may, in like manner, be compelled to attend as a witness in the case. In the distribution of the bankrupt's estate, dividends are to be paid as agreed upon by a majority in value of the creditors, from time to time at three months' intervals, but the following claims are first to be paid in full:

First, the fees, costs and expenses of the act; Second, debts, taxes and assessments due to the U. S.; Third, State debts, taxes and assessments; Fourth, wages to any operative, clerk or house servant to an amount not exceeding $50, for labor performed within six months preceding the bankruptcy; Fifth, debts due to any persons who are or may be entitled to preference by the laws of the United States. The voluntary bankrupt is entitled to his discharge, provided no fraud is proved against him, at any time from sixty days to one year after adjudication of bankruptcy; but the proof or discovery of any fraud or concealment deprives him of the right to discharge. No person who has once received his discharge is to be entitled again to become a voluntary bankrupt, unless his estate is sufficient to pay seventy per cent. of his debts, or three-fourths of his creditors assent in writing, to his bankruptcy. Preferences and fraudulent conveyances are declared void by the act and suitable provisions are made for the voluntary bankruptcy of partnerships and corporations. The exemptions are as follows: "The necessary household and kitchen furniture, and such other articles and necessaries of such bankrupt as the assignee shall designate and set apart, having reference in the amount to the family, condition and circumstances of the bankrupt, but altogether not to exceed in value, in any case, the sum of $500, and also the wearing apparel of each bankrupt, and that of his wife and children, and the uniform, arms and equipments of any person who is or has been a soldier in militia or the service of the United States; and such other property as now is or hereafter shall be exempted from attachment or seizure or levy on execution by the laws of the United States, and such other property not included in the foregoing exceptions as is exempted from levy and sale upon execution or other process or order of Court, by the laws of the State in which the bankrupt has his domicile at the time of the commencements of the proceedings in bankruptcy to an amount not exceeding that allowed by such State exemption laws in force in the year 1864." Acts of involuntary bankruptcy under the law are classified as follows: Departure or absence from the State where debts are owed, with the intention to defraud creditors; concealment of property to avoid seizure on legal process, assignments designed to delay, defraud, or hinder creditors; arrest and detention for seven days, under execution for a debt exceeding one hundred dollars; actual imprisonment for seven days in a civil action founded on contract for $100; assignment, gift, confession of judgment, or any other act by which preference is given to any creditor, endorser, or suspending and not resuming payment for fourteen days. The petition for adjudication of bankruptcy in such cases may come from one or more creditors whose debt reach $250, but the petition must be brought within six months after the act of bankruptcy has been committed. In involuntary bankruptcy the proceedings are more stringent than in other cases. The penalty for any fraud or concealment, direct or indirect, under the act, is imprisonment, with or without hard labor, for a term not exceeding three years.

Michigan Southern and Northern Indiana Railroad.

The following statement will show the length of the different lines owned by this company, and main tracks and side tracks owned and operated by it February 28, 1867:

	Miles owned.	Miles operated.
Toledo to Chicago	....	243.73
Toledo to 22d st., Chicago *via* White Pigeon	242.06	.....
Toledo to Elkhart, *via* Air Line	133.20	133.20
Toledo to Detroit	....	64.79
Air Line Junction to Detroit and Milwaukee Junction	59.12	.....
Adrian to Monroe Junction	33.60	33.60
Adrian to Jackson	....	46.00
Lenawee Junction to Jackson	41.90	.....
Palmyra Junction to Lenawee Junction	2.50	2.50
	512.38	523.82
Side tracks owned by the company	62.01	
Total	574.39	

The tracks owned jointly with the Chicago, Rock Island and Pacific R. R. Co., are: Main track, 2.92 miles; side tracks, 1.07 miles—total, 3.36 miles. Permanent lease of main track of Detroit and Milwaukee R. R. Co., 3.21 miles.

The tracks maintained by this company are as follows: Toledo to 22d st., Chicago, 242.06; Main track north to 22d st., 1.18; Toledo to Elkhart, *via* Air Line, 133.20; Air Line Junction to Jefferson Avenue, Detroit, 61.51; Adrian to Monroe Junction, 33.60; Palmyra Junction to Jackson, 44.40—total, 515.95. Add side tracks, 62.32—making a total of 578.27 miles.

☞ The adjourned National Railway Convention will be held at the St. Nicholas Hotel, New York, on the 8th of May 1867, at 12 o'clock, noon.

Interest and Dividends.

The Cleveland and Mahoning Railroad Company have declared a dividend of four per cent., free of government tax, on the full shares of the Capital Stock of the company, (except that issued in conversion of bonds since the 1st of November last, and upon that a pro rata dividend,) payable at the office of the Treasurer, in Cleveland, on the 10th day of May.

The Chicago, Burlington and Quincy Railroad Company has declared a dividend of $5 per share (10 per cent.), free of Government tax, payable April 25th, at the National Bank of Commerce.

The West Jersey Railroad Company have declared a semi-annual dividend of four per cent. on the capital stock of the company, clear of National tax, payable at the office of the company, in Camden, on and after the 14th day of May.

The semi-annual dividend of three and one-half per cent., due May 1. 1867, on the preferred capital stock of the Toledo, Wabash and Western Railroad Company will be paid at the office of the company, No. 19 Broad Street, N. Y.

Coupon No. 3 on the Equipment Loan Notes of the Vermont Central and Vermont and Canada Railroads will be paid at the Treasurer's office, St. Albans, Vt., after the 4th of May.

☞ Satisfactory progress is being made on the extension of the Canal Railroad from Northampton to Williamsburg, and workmen will commence laying track in July. The lease of the southern end of the road from Granby to New Haven, now held by the New York and New Haven Railroad, expires in July, 1868, when the entire line will fall into the hands of the Canal company.

☞ It is now considered to be practically settled that the White Mountain Railroad will soon be extended from Littleton to Lancaster, and afterward to Northumberland, to connect with the Grand Trunk. The people of the towns along the proposed route are taking prompt measures to secure means to carry forward the work.

☞ The first engine and car passed over the Picton (Nova Scotia) Railway, from Richmond to New Glasgow, on the 8th ult. Connection by railway between Halifax and Pictou Harbor will be made on the 31st of May—distance 115 miles.

W. W. Dibblee, Member New York Stock Exchange.

F. A. Howard, Late of U. S. Treasury, Washington.

DIBBLEE & HOWARD, BANKERS and BROKERS,

WILL REMOVE ON OR ABOUT 4TH MAY,

From No. 30, to No. 10 Wall St.

Government Bonds of all kinds, State and City Bonds, Railroad and other Stocks and Bonds, Gold and Silver bought and sold on commission. Interest Coupons and Dividends collected.

IRON BRIDGES.

THE undersigned is prepared to Manufacture and Build in any part of the United States, at reasonable terms, Fink's Patent Iron Bridges, Plate and Lattice Bridges, Plate Girders for Fireproof Buildings, Iron Roofs, Bolts, etc. For plans and particulars apply to

C. J. SCHULTZ,
Cor. of Wayne St. & Duquesne Way,
PITTSBURGH, PA.

WE OFFER FOR SALE

ENGLISH RAILS

OF THE FOLLOWING BRANDS:

CRAWSHAY. LEVICK & CO.
GUEST & CO. RHYMNEY CO.
EBBW VALE CO. ABERDARE CO.
BAILEY, BROS. & CO.

Weighing 45, 50, 52, 56, 57, & 60 lbs. per lineal yard, Erie patterns, in port and to arrive, for cash, or a satisfactory credit.

If desired, parcels of Rails can be rolled to any required pattern, and shipped direct from England to any port in this country, at prices f. o. b., or ex-ship on arrival.

M. K. JESUP & COMP'Y,
12 Pine Street, N. Y.

NOTICE TO CONTRACTORS.

SEALED PROPOSALS WILL BE RECEIVED at the Engineer's Office in the city of Albany, until Monday, the 20th day of May next, for the Grading, Masonry, Bridging and Fencing of Sections 41, 42, 44, 45, 46, 47, 48, 49 and 50 of the Albany and Susquehanna Railroad, being the balance of work not under contract, extending from near Harpersville to Binghamton, a distance of about 20 miles.

The line will be ready for examination after the 10th ultimo, and profiles and plans, with specifications, may be examined at the Engineer's office in Albany after that date.

Proposals should be enclosed in an envelope and endorsed "Proposals," and directed to the undersigned, at Albany.

The proposals received in accordance with this notice will be submitted to the Executive Committee, who reserve the right to reject any or all proposals received, as they may deem for the interest of the Company.

C. W. WENTZ, Chief Engineer.

Dated Engineer's Office, Albany, April 23d, 1867.

SCHOOL OF MINES,
COLUMBIA COLLEGE,
East 49th Street, NEW YORK.

FACULTY:

F. A. P. BARNARD, S. T. D., LL. D., President.
T. EGLESTON, Jr., E. M., Mineralogy and Metallurgy.
FRANCIS L. VINTON, E. M., Mining Engineer.
C. F. CHANDLER, Ph. D., Analytical and Applied Chemistry.
JOHN TORREY, M. D., LL. D., Botany.
CHARLES A. JOY, Ph. D., General Chemistry.
WILLIAM G. PECK, LL. D., Mining Surveying.
JOHN H. VAN AMRINGE, A. M., Mathematics.
OGDEN N. ROOD, A. M., Mechanics and Physics.
JOHN S. NEWBERRY, M. D., Geology.

The plan of this School embraces a three-years' course for the degree of ENGINEER OF MINES, or BACHELOR OF PHILOSOPHY.

For admission, candidates for a degree must pass an examination in Arithmetic, Algebra, Geometry and Plain Trigonometry. Persons not candidates for degrees are admitted without examination, and may pursue any or all of the subjects taught. The next session begins October 7th, 1867. The examination for admission will be held on October 3d. For further information, and for catalogues, apply to

DR. C. F. CHANDLER,
Dean of the Faculty.

RICHARD B. OSBORNE,
CIVIL ENGINEER,
No. 219 South 4th St., Philadelphia,

Where Plans and Estimates of Work will be promptly attended to.

Barometrical reconnoissance for Railway lines, Location and Construction of Railroads, and all duties required on Public Works in any State of the Union performed with fidelity.

COAL CUTTING MACHINERY.

THE COLLIERY PROPRIETORS OF SOUTH LANCASHIRE AND CHESTER, being anxious to encourage the development of **Coal Cutting by Machinery**, have determined to offer **THREE PRIZES**, namely, £500, £300, and £100, for the 1st, 2nd, 3rd **Best Machine** respectively, which in the opinion of the Committee appointed for that purpose, shall be most suitable to the requirements of the trade, and the Inventor of which shall comply with the regulations laid down by the Committee.

A copy of the regulations, and further particulars, will be furnished on application to the undersigned.

All Competitors must furnish the Machines intended for Trial, in Lancashire, not later than the 1st November, 1867

MASKELL WM. PEACE,
Wigan, Law Clerk to the Association.
11th February, 1867. 4t11

PLASTIC SLATE ROOFING
JOINT STOCK COMPANY.
OFFICE 157 (Room 19) BROADWAY,
NEW YORK.
W. C. POTTER, Vice Pres't.
J. M. ALLEN, Sec. and Treas. **LICENSES GRANTED.**

PLASTIC SLATE
FOR
Roofing & Other Purposes.

The process of reconstructing Slate Stone from a disintegrated state was
PATENTED FEBRUARY 21st, 1865.
It is a combination of
Pulverized Slate and Viscous Matter,
(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.

As a Roofing Material it Stands Unrivalled.

A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.

Frost does not Crack nor Heat Dissolve it.

The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and

Perfectly Fire-Proof.

It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

OFFICE ERIE RAILWAY COMPANY,
No. 187 West St., NEW YORK, April 1, 1867.

NOTICE IS HEREBY GIVEN of the intention of this Company to extend its First Mortgage Bonds, due July 1, 1867, for Thirty Years, at Seven per cent. per annum. These Bonds are a First Mortgage of $3,000,000 on the entire property of the Company, and the power to extend them is given by a statute of the State of New York, which provides that the Company may extend any or all its Mortgage Bonds, in the order of their respective priorities.

Proposals will be received up to the 15th of May next, at the General Office of the Company in the City of New York, for extending any portion of the issue, and parties, whether present holders or others, bidding the highest premium therefor will be entitled to extend said Bonds, *pro rata*, on the amount of their bid, as the Bonds are presented by the holders.

On and after the 1st of July the Company will be prepared to extend, on the above terms, all such Bonds as the holders thereof may present for that purpose, at the office of the Company in the City of New York, and new sheets of Coupons for 30 years, with an indorsement thereon of a mutual agreement of such extension, will be issued and attached, with interest payable semi-annually as heretofore.

Persons whose bids may be accepted will have the option of extending Bonds in London, Frankfort, or Germany, on due notice to the Company, in manner to be hereafter determined, of the numbers of the Bonds to be extended in each place.

5t15 ROBERT H. BERDELL, President.

FOR SALE
3 LOCOMOTIVES,
4-81-2 GAUGE,

All thoroughly REBUILT by one of the best makers in the country, and ready for immediate use.

1—Cylinders 14x20, Link Motion, 4-56 in. Drivers connected, Copper Flues, Weight about 24 tons; 8 wheeled Tender, 1800 gallons.

This Engine has always worked admirably; Steams freely with dry or green wood, works and wears perfectly smooth; Well springed and brassed all around. Proportions every way suited to power. A good and stylish model, all in excellent order.

2—Cylinders 15x20, Link Motion, 4-54 in. Drivers connected, Copper Flues, weight about 23 tons, 8 wheeled tender, 1,800 gallons.

Is a smart smooth working Engine, suitable for any work; has a good record throughout.

3—Cylinders 16x20 Hook Motion, 4-66 in. Drivers connected, Copper Flues, weight about 24 tons; Tender, 8 wheeled.

Every way perfectly sound, well brassed and springed up. All in fine working condition.

These Engines will be sold VERY CHEAP to close a transaction, and are GREAT BARGAINS to any company wanting this sized Engine.

KASSON & CO.,
62 Broadway, New York.

Thistle Mill Waste,

A new and Superior Article of WOOLEN Waste, combining the following

ADVANTAGES,

1st. It is 20 per cent. lighter than ordinary waste.
2d. It will absorb 25 per cent. more oil.
3d. Has greater elasticity and will wear longer.
4th. It is less liable to ignite.
5th. And has a value as old waste.

The use of Wool as an ANTI FRICTION material is too well known to require discussion.

This waste is manufactured expressly for use in packing Locomotive and Car Journal Boxes, and will be sold as low as the best Cotton Waste.

The old waste taken in exchange at a price—including weight of oil, dirt, &c.—which will reduce first cost over one half.

Small Sample Bales furnished FREE for trial.

KASSON & CO.,
15tf **62 Broadway, New York.**

AMERICAN
STEEL RAILS.

The undersigned are now ready to Contract for the delivery of rails made of **Bessemer** or **Pneumatic Steel, wholly American, and of the best quality.**

PENNSYLVANIA STEEL CO.,
424 Walnut Street,
Philadelphia.
CAMBRIA IRON CO.,
400 Chestnut Street,
Philadelphia.

ASTONISHING!

PAINTS for Cars, Bridges, Roofs and Houses, at ONE-THIRD the cost of lead; 100 lbs. will paint as much as 250 lbs. of lead, and wear better. Extract from a testimonial received from the U. S. Mint, "have used the PECORA CO.'S BROWN PAINT where it is subject to the fumes of ACID and STEAM, and find it SUPERIOR to all others in protecting wood and metal." For joints it is superior to red lead. The floors and joints of bridges should all be painted with it as they are laid.

PECORA PAINT CO.,
150 N. 4th St., Philadelphia.

STEAM BOILERS.
The Harrison Boiler
HAS NO SUPERIOR AS A STEAM GENERATOR.

It is a Great Economizer in Fuel and is Absolutely Safe from Destructive Explosion.

It gives less trouble and occupies less space than ordinary boilers, and it is its own super-heater. It is easily enlarged to any requisite power, and has no limit of power to which it is adaptable, always maintaining its unit of strength.

New York, Saturday, May 11, 1867.

Freight Railways.

A few years only have elapsed since the railway was brought into public use. The great variety of improvements that have been made in both the track and rolling stock are mere evidences of progress, but afford no evidence that we have achieved the ultimate success of which either are capable; nor is it likely that we shall soon reach perfection in what appertains to this wonderful machine. Like all other things its improvements will probably keep pace with the necessities that require of it more work, and the greater the amount required, the more it will be made capable of performing. When it is asserted that "the capacity of the railway is limited," it merely means that its power to perform is limited by the present plan of management. There is probably no inherent deficiency in the powers of the railway to perform all that may be required of it under any conceivable circumstances.

Something like a year since a new plan for a freight road was brought to the attention of the public, and in relation to which, our JOURNAL, as well as many of our cotemporaries, took part in the discussion. A lecture was also delivered by Mr. Sherwood, author of the plan, before the Association for the Advancement of Science and Art at the Cooper Institute, and, so far as observed at the time, the plan commanded the approval of all to whose attention it was brought. The substantive features of the plan were—a double track road bed and stationary appurtenances to be owned by a joint stock company, but to be open to free competition in transportation like a turnpike, with moderate and uniform speed for all trains, of whatsoever description, passing over the road. It was maintained that a road of this character would possess a freight capacity of at least ten fold over the double track as now operated, and that freights could be cheapened more than one-half. Since that time bills have been introduced into Congress proposing to establish long freight routes on this plan, running from the interior through different States to the seaboard, and which, in their construction and equipment would involve a cost of several hundred millions of dollars. The question having thus become a practical one, passing from theory to proposed action, it involves, of course, the necessity of immediate and strict scrutiny into the whole subject, its details and bearings.

We think there is little doubt of the power of such a road to carry the supposed amount of freight. In arriving at this conclusion it is proper to refer to the last year's exhibit of some of our most effective thoroughfares. The New York Central during the last year carried 3,714,734 passengers, and 1,602,197 tons of freight.

The Pennsylvania Railroad and branches carried 2,673,568 passengers, and 3,452,718 tons of freight.

The Canals of New York carried 5,775,220 tons of freight.

The Philadelphia and Reading road carried 1,444,101 passengers, and 5,574,907 tons of freight, including the weight of passengers reduced to tons.

The Reading Road, although attended with unequal rates of speed for travel and transportation, by which more than four-fifths of its tonnage power is probably neutralized, affords an indication of what a railway is capable of accomplishing if graduated strictly on the freight principle. Mr. Sherwood estimates that a road, opened to free competition and graduated on the freight principle under accurate system, can easily be made to carry sixteen millions tons of freight yearly each way at a speed of eight miles per hour. We think the calculation approximately correct.

There is another provision in the bills before Congress which requires that the roads shall be capitalized on cash and built for cash, and no share of stock to be issued unless there be paid into the Treasury of the company one hundred dollars in gold, or its equivalent, therefor; and no bonds or mortgages on the road or franchise to be allowed. This cuts off all chances for watered stock, or dividends on fiction. The public will not be very likely to object to this, while the strikers and jobbers about Congress, if any, will have a poor show for fictitious shares to be divided out for services in passing the bills. The example in the British Parliament will hardly be followed, wherein it was alleged a few years since that four hundred and eighty thousand pounds were absorbed in parliamentary expenses in nine years on a single Railway. There are other provisions of a novel character betokening much foresight in guarding the bills in order to avoid imposition on the public, but to which we have not space for allusion at present.

It is next to impossible to estimate the increased tonnage that would follow cheapened transportation. There would probably be five or six tons of freight that would naturally pass on railways where one ton now passes, providing freights could be reduced to the point anticipated under the new plan. In such case a new era in developing our resources would commence. Were the facilities for distribution afforded it is probable that the article of fuel alone, in the course of a few years, would more than treble the present tonnage on all our railways. The carrying of agricultural produce, in the number of tons, would soon become a secondary item, if not already so. There are many other points of an economic character embraced in these congressional bills that recommend themselves to the public. We shall have more to say on the details of the plan on which these proposed enterprises are predicated.

Western Maryland Railroad.

A meeting of the President and Directors of this road was held at Hagerstown, Md., on the 1st inst. There were present the Mayor and Comptroller of the city of Baltimore, the commissioners of Washington county, contractors of the road, etc. Resolutions were passed adopting the line east of the mountain known as the Mechanicstown line. This line is entirely within the State, and has a maximum grade to the mile of ninety-five feet on the east side of the mountain, and of seventy-seven feet to the mile on the west side of the mountain. The resolutions also embrace a change of former contract for the construction of the road, in that the tunnel twenty-six hundred feet is abandoned, and the construction of a tunnel of eight hundred feet at a point on the mountain west of Monteray adopted. In consideration of this change, an abatement of $150,000, has been agreed upon from the original contract, reducing it to $1,147,000. The length of the adopted is represented to be about the same as the Gitt line. The County Commissioners have passed an order to issue the bonds of the county to the amount of the stock subscription of the county, as they shall be called for by the President and Directors of the road, for its construction within the limits of the county. The line adopted runs through Mechanicstown, crossing South Mountain by way of Monteray Summit, and down the west slope of Mount Misery, passing near Smithsburg, and entering Hagerstown by what is termed the Northern route, which strikes the Franklin Railroad at the Engine House, and runs parallel with it into the city.

The Commissioners of Washington county have agreed to endorse three hundred thousand dollars of the second mortgage bonds of the company, and have subscribed one hundred and fifty thousand dollars of stock, for which bonds of the county will be issued. The Commissioners resolved to comply promptly with these provisions, and the contractors were ordered to commence work immediately at Hagerstown, and push the work vigorously forward; in addition to this, about sixty thousand dollars have been subscribed by individuals. The grading of the road is nearly complete to the Monocacy, and the company are confident of finishing the road to Hagerstown within eighteen months.

Perkiomen Railroad.

The *U. S. R. R. and Mining Register* says that this road has been put under contract for a considerable distance to a responsible contractor, who will forthwith begin at a point on the Philadelphia and Reading Railroad, at Pauling's bridge, about 25 miles from Philadelphia. The work allotted includes a bridge across the Schuylkill River, and identifies the new road with the expanding working plan of the Philadelphia and Reading Railroad Company, which, as majority owner of the East Pennsylvania Railroad, can operate the latter in conjunction with the Perkiomen cut-off, from Allentown to the lower end of the Schuylkill valley, and from the Lehigh iron and coal regions to, into and throughout Philadelphia, over entrances terminating at Richmond, at Willow street, Washington street and Broad street. The Perkiomen road will greatly benefit Allentown, which is already the manufacturing centre of the Lehigh valley, and which is destined to take rank with Harrisburg and Reading, as an inland city.

Toledo, Peoria and Warsaw Railway.

The earnings of this road for the years ending December 31, 1865 and 1866, have been as follows:

	1865.	1866.
From passengers	$195,336 40	$174,131 68
" freight	307,979 39	319,235 32
" mails	9,850 08	9,850 08
" express	5,876 98	5,633 20
" military	11,161 64	402 63
" rent of road	39,320 00	25,840 00
" " cars	7,906 17	9,527 83
" miscellaneous	2,901 94	17,042 36
	$580,332 60	$561,663 10
Expenses, viz:		
Maintaining real estate and roadway	$109,397 96	$130,032 73
Maintaining machinery	65,021 17	95,423 60
Conducting transp	126,603 38	135,785 20
	$301,022 51	$361,241 53
Earnings less expenses	$279,310 09	$200,421 57
From which deduct—		
Interest on bonds	$111,195 00	
Government taxes	10,846 32	
State and local taxes	7,935 33	
Insurance, interest, etc	9,673 26	
		139,649 91
Balance		$60,771 66
Add balance from previous year		151,314 38
Total, as in General Balance Sheet		$212,086 04

This balance is represented mainly by construction accounts of Western Division, materials in shops, cash, and claims against the Post Office Department. The report says:

The debts assumed by this company, by the terms of consolidation with the Mississippi and Wabash Railway Co., amounting to some $280,000, have been fully discharged from proceeds of the sale of six miles of abandoned road between Elvaston and Carthage, to the Toledo, Wabash and Western Railway Co., and by the issue of $135,000 of Western Division first mortgage bonds, as authorized by the Articles of Consolidation.

The first and only mortgage bonds issued by the Mississippi and Wabash Co., to R. M. Henning, Trustee, have been satisfied, and the mortgage duly cancelled of record; and the right of way between Warsaw and Canton, in Fulton Co., 29 miles from Peoria has been secured and paid for.

The six miles of road between Elvaston and Carthage was abandoned by the Board of Directors, as the Chief Engineer considered the grades and location on that portion of the old route, north of Carthage, most objectionable; and a relocation of the road was made from Elvaston, through a fine prairie country, to a point six miles north of Carthage, where it intersects the old line, and shortens the distance two miles.

By the sale of this six miles of road to the Toledo, Wabash and Western Railway Co., we satisfied the judgment against the Mississippi and Wabash Co., in favor of Messrs. Baily Brothers & Co., for over $100,000, and took up $30,000 of the bonded indebtedness of that company, which we had assumed. We also cancelled the contract made between the Mississippi and Wabash Railroad Co., and the Illinois and Southern Iowa Railroad Co., allowing the latter company to use the road from Carthage to Warsaw and Keokuk; and have made a new contract with the Toledo, Wabash and Western Railway Co., giving them in further consideration of the purchase of the six miles of road as above mentioned, the right to build an independent track upon our right of way from Elvaston to our landing on the Mississippi River; they agreeing to pay us from the first of February last for the use of our track, from Elvaston to the bank of the Mississippi River, at the rate of $5,000 per annum, until they shall complete their own line; and also agreeing to keep our line in repair. When their track is finished to the river, we shall propose to erect joint depot buildings, of a sufficient capacity to meet the requirements of the large and increasing business derived from the Des Moines Valley Railroad.

The report of the Treasurer will show that we have increased our common stock, by issuing 2,320 shares of the stock of the consolidated company, in exchange for a like number of shares of the Mississippi and Wabash Railroad Co., agreeable to the conditions of the Articles of Consolidation. The settlement with the creditors of the Mississippi and Wabash Railroad Co. will appear in our next report, together with a full statement of bonds issued to take up the outstanding bonds and over due coupons of that company, together with a full statement of bonds and stock, which shall have been issued to the contractors on that division, in payment for their work.

The 135 bonds, issued in exchange for those of the Mississippi and Wabash Railroad Co., do not bear interest until after the first of August next, and hence no interest warrants will mature until after our next yearly report.

The contractors of the work between Elvaston and Bushnell, have as yet made no demand upon us for the bonds and stock due them on their contract. They have nearly finished the grading, bridging and tieing, and will commence laying the iron as soon as it arrives at Warsaw, to which point it has been shipped direct from England.

They promise to complete the whole work by the first of September next, and we hope to run our trains direct from Warsaw to Bushnell by the first of October, to connect with the Chicago, Burlington and Quincy Railroad at that point, which will give us a large and profitable Chicago business, until we can complete our line *via* Peoria.

The contractors of the division between Bushnell and Peoria, will go on with their work as soon as the respective rights of the Peoria and Hannibal Railroad Co., and the Peoria, Pekin and Jacksonville Railroad Co., to the right of way, and improvements made by these companies, on the line between Canton and Peoria, are legally adjudicated. These rights should be legally defined for our own protection, before we enter into a contract with either company. It would be a great saving to our company to use the old grade of the Peoria and Hannibal road, and run over the Peoria, Pekin and Jacksonville road from Peoria, to a point opposite Pekin, a distance of 8 miles; but we cannot wait much longer for the termination of the suit between them, and if not settled soon, must make a new survey and locate our line on the most feasible route to Canton.

Every effort will be made by the contractors, to complete the work between Bushnell and Peoria, by the close of navigation on Lake Michigan, so that we can open a through line from the Mississippi River to Philadelphia and New York for winter business, *via* the new line now building between Logansport and Union, in Indiana. This connection will be completed by the first of September next, as all the grading is finished, and the iron is being rapidly laid; and more than 20 miles between Union and Marion, is now in running order. The directors of the corporation assure us that the whole line will be completely finished so that the route can be opened for through business by the time mentioned above. The parties engaged in the enterprise control the Toledo, Logansport and Burlington Railroad, and are largely interested in the Columbus and Indianapolis Railroad, Steubenville and Indiana, and Pan Handle roads, connecting with the Pennsylvania Central road, at Pittsburg; and we are credibly informed, that it is their intention to merge and consolidate all these roads into one; preliminary steps have already been inaugurated to this end.

It will connect with our road at the State line in Illinois, and will give us a continuous route to Philadelphia and New York, over the roads of but

two corporations, and which represent a capital of upwards of fifty millions of dollars.

Our facilities, by this valuable Eastern connection, will be unsurpassed by any other Western Railroad Co., and will enable us to compete successfully with any other line of road to the Atlantic Ocean.

The new line must and will control the great cattle trade of Illinois, Indiana and Ohio, by reason of its great facilities for transportation, and because of the cheapness of food in the midlands, compared with the prices of grain and food near the great markets on the lakes; and the time is not far distant when this new railroad line will control the general business of the great Northwest, by a connection with the Illinois Central road, upon our line at Gilman and El Paso.

Southern Iowa and Missouri will also avail themselves of the "Midland Route," as soon as the great railroad bridges are completed at Quincy and Keokuk.

These bridges will open a connection with the Des Moines Valley, and the Alexandria and Bloomfield, and the Iowa and Missouri State Line Railroads, and give us a western terminus on the Missouri River.

The local business upon our line is improving constantly. The counties west of the Illinois River, on the line of our Western Division, are the best settled in the State, and in the highest state of cultivation; there being but two pieces of unoccupied land on the entire line.

The business, upon the completion of this line, will increase our local traffic immensely, and bring us a heavy through business from Missouri and Iowa, by means of our connection with the St. Louis Packet Co., at Warsaw, and the Des Moines Valley Railroad Co., at Keokuk, and which must insure great profit to us.

We shall during the year be enabled, with our improved financial condition, to purchase all the necessary rolling stock that will be wanted for the increased business, growing out of our new and important connection.

We cannot pay dividends until the completion of the entire road, and until we bring up our rolling stock to the requirements of its business. As soon as this is done, we shall look for such an increase of business, as will insure regular dividends on all the preferred shares of the company, and leave a handsome surplus to the common stock.

Additional depot grounds, buildings and side tracks will be required at the State Line, and at several other points on the line of the road. It is estimated that the expenditure for increasing the capacity of the line, to meet the requirements of its prospective traffic, will reach $250,000; but the outlay can be easily made without detriment to our finances.

The operating expenses, including Federal and State taxes, insurance, etc., amounted in 1866, to $389,696 44—making the net earnings, $171,966 66. In 1865, the expenses were $330,143 22, and the net earnings, $250,189 38. The proportion of operating expenses to earnings, in 1866, including the above charges, is 69.38 per cent.; exclusive of these charges, 65.05 per cent. The gross earnings per mile in 1866, were $5,060 02; in 1865, they were $5,228 22—showing a decrease of 3.22 per cent. Of the total traffic of the road in 1866, 74.80 per cent. was local, and 25.20 per cent. through. The passenger traffic was 60.50 per cent. local, and 39.50 per cent. through. The freight traffic was 82.60 per cent. local, and 17.40 per cent. through.

There have been used during the past year in repairs of track 97 tons of new iron, 308 tons of re-rolled iron, 1,971 bars of repaired iron, 2,013 new chairs 39,600 lbs. spike, 24,786 cross ties, and 2,201 fish plates and bolts. 1,639 feet of trestle work was replaced by pile bridging.

The earnings of the road from Warsaw to Elvaston, 12 miles, during the past year, were $19,472; and the operating expenses and repairs, $16,131 79—leaving net earnings, $3,340 21. From Elvaston to Bushnell, 45 miles, the work of construction was proceeding favorably. The road bed will be entirely graded by the 1st of June; several of the pile bridges are completed, and the timber for the remaining structures delivered. The road from Warsaw to Bushnell, 57 miles, will be completed and ready for business in September next. On the Middle Division, Bushnell to Peoria, 52 miles, the grading is more than half done, and it is thought the whole road can be completed and in operation during the year.

The company have 17 locomotives, 2 of which are on the Western Division. The cars are divided as follows: 7 passenger, 2 mail and express, 2 baggage, 2 baggage and smoking, 5 conductors', 199 box, 85 coal and platform, 12 stock, and 2 construction cars. One passenger, 1 baggage and 10 platform cars are in use on the Western Division.

There has been expended during the year in construction, and the purchase of new equipment, the sum of $59,827 37, increasing the cost of the Eastern Division by that amount. There has been expended in engineering and payments for settlement of right of way on the Western Division, to the close of 1866, the sum of $16,405 71.

The number of miles run by locomotives with passenger trains was 126,133; with freight trains, 116,609; with construction trains, 14,982; switching trains, 30,800—total, 288,524. The mileage of cars was as follows: passenger, 216,052; baggage, 135,922; freight, 1,511,414—total, 1,863,388.

The number of passengers carried was 109,870, of which 27,327 were foreign, and 82,543 local. Total mileage of passengers, 3,680,758.

GENERAL BALANCE, December 31, 1866.

Railway, equipment, &c.		$4,947,951 46

Vice President.—WILLIAM H. CRUGER.

Secretary and Treasurer.—THEODORE HIGBIE.

Superintendent.—H. F. CLARK.

Virginia Central Railroad.

It is announced that the Virginia Central Railroad will be completed to Covington by the 1st of July. This is a step of ten miles further in the line of the great Virginia route to the Ohio, and will leave only twenty miles of staging to the celebrated White Sulphur Springs. In connection with this subject, the Richmond *Dispatch* says it appears probable that a vigorous effort will soon be made to push forward the road from Covington to the Ohio. An expenditure of five millions will accomplish this object. The heaviest grade coming east to Covington is 29½ feet to the mile—the average grade 13 feet per mile. In this respect the Virginia route is unequalled by any from the West to the seaboard. The stockholders of the Central Railroad will meet in Richmond on the 22d inst., to consider the propriety of issuing $3,000,000 of preferred stock for the purpose of prosecuting the Covington road to the Ohio, and at the same time and place the commission of Virginia and West Virginia, who have the disposal of the Covington and Ohio Railroad in their hands, will meet to confer with the company, and co-operate, if they agree.

Railroad from Baltimore to Drum Point.

At the late session of the Maryland Legislature resolutions were passed authorizing a survey and estimate of the cost of constructing and equipping a railroad from Baltimore, through Anne Arundel County, to Drum Point, in Calvert County, or to some point in Calvert near the mouth of the Patuxent River. Three commissioners have been appointed under the act by the Governor, who are to report to the General Assembly as soon as practicable, giving not only the estimate of cost, but the reasons that may exist for the construction of such a road, and its advantages to the State. Drum Point is at the mouth of the Patuxent, where it enters the Chesapeake, and is admitted to possess one of the finest harbors on the bay, and is never closed by ice. A meeting of the Commissioners was to have been held in Baltimore on the 6th inst., with the view of receiving suggestions from parties disposed to give information on the subject.

Orange, Alexandria and Manassas Railroad.

Mr. E. C. Marshall, late President of the Manassas Gap Railroad Company, and Dr. Samuel A. Kauffman have been elected provisional directors of the consolidated Orange, Alexandria and Manassas Railroad Company, to act in conjunction with the directors of the Orange and Alexandria Railroad in the management of the new company.

The directors of the Orange and Alexandria Railroad Company have been authorized to mortgage the property of the company to the amount of two millions of dollars, and to issue one million of additional stock, as provided for by an act of Assembly.

☞ The ceremony of breaking ground on the Muscatine and Anamosa Railroad was performed on the afternoon of the 22d ult., at Muscatine, in the presence of a large number of citizens. This will be another link connecting Northern and Central Iowa.

☞ The town of Middletown, Delaware Co., is to be bonded in aid of the Rondout and Oswego Railroad, the requisite number of names having been obtained.

Grand Trunk Railway of Canada.

REPORT OF THE DIRECTORS FOR THE HALF YEAR ENDING DECEMBER 31, 1866.

The gross receipts upon the whole undertaking, including the Buffalo and Champlain, have been	£719,370
Deduct ordinary working expenses (being 57.49 per cent)	413,608
Leaving a balance of	£305,762
Deduct proportion of renewals of the permanent way and works debited to revenue	72,392
Leaving an available net balance of	£233,370

This amount, to which has to be added the balance from last half-year—viz., 200*l.*, in all 233,571*l.* is thus disposed of:

Postal and military revenue for half-year due to the holders of postal and military bonds		£20,722
Discount on American currency	£61,828	
Interest, &c., paid on lands	1,660	
Interest on mortgage to Bank of Upper Canada	4,423	
Interest on loans, bankers' balances, promissory notes, European exchanges, &c	2,829	
	£70,742	
Less interest on bonds in hand	9,212	
	£61,529	
Interest on British American Land Company's debentures	616	
Interest on Montreal Seminary Debentures	616	
Inter'st on Island Pond Debentures	2,700	
Half-yearly instalment on Portland sinking fund	2,311	
		67,773
To Atlantic and St. Lawrence lease (in full)		32,785
Detroit line lease (in full)		11,250
Equipment bond interest		10,779
Montreal and Champlain Railway Company's proportion	11.859	
Buffalo and Lake Huron	19,830	
		31,579
		£174,890
Leaving a balance of		£58,680

—which will provide for a cash dividend on the first preference bonds, and leave a balance of 325*l.* to be carried forward to next account.

This dividend will be payable on and after Monday, 22d April, and certificates for the arrears of interest to be capitalized on the 2d preference bonds and on the 3d and 4th preference stocks will, under the terms of the act of 1862, be subsequently issued.

The increase in the aggregate receipts for the half-year as compared with the same period in 1865, is 4,590*l.*, the total revenue being the largest yet received in any one half-year.

The decrease of net revenue is caused by an increase in loss on currency, an increase in legal charges, the debit of a sum due under award to the Brantford Car Company, and a larger outlay in the locomotive department for new engines and cars to maintain the existing stock in an efficient state. The two last items, together about 16,000*l.*, account for the increased working expenses. Again, in appropriating the net revenue, 5,359*l.* have been paid to the postal and military bondholders in excess of the sum due to them in the corresponding half of 1865. This has arisen from increased receipts for the conveyance of troops and stores arising out of the Fenian raid.

The receipts from passenger traffic, mails, &c., show an increase over the corresponding period of 1865 of 5,165*l.*, or 1.67 per cent.; but the merchadise receipts show a falling of 420*l.*, or about 0.10 per cent. This diminution of revenue in the freight traffic is entirely in live stock, and is in consequence of the United States tariff laws which came into operation on the repeal of the Reciprocity Treaty. The live stock receipts in the corresponding half of 1865 were 36,011*l.*, whilst those for 1866 were only 16,333*l.* The ordinary goods traffic, therefore, shows an increase.

The average receipt on passengers per head was 7s. 2d. against 7. 10d. in 1865, and the average receipt per ton was 15s. 11d. as compared with 15s. 5d. in 1865.

The following statement shows the per-centage of working expenses, exclusive of renewals, from June 1861, to December, 1866:

	June half-year.		Dec. half-year.	
1866	63.29	per cent.	57.49	per cent.
1865	64.57	"	55.35	"
1864	59.62	"	59.68	"
1863	63.59	"	57.11	"
1862	77.23	"	59.68	"
1861	87.32	"	68.64	"

The amount of loss on the American currency for the half-year is very heavy, being the largest, with one exception, yet sustained. The total loss since June 1862 now amounts to 290,384*l.*; the loss for the past half-year being 61,828*l.* The bond and stockholders will not fail to perceive that the enormous loss entailed by this wholly extraneous cause has altered the entire aspect of the recent finances of the company. The price of gold fluctuated during the six months ended December 1866 between 154¼ in July and 131⅛ in December. It will be observed that the traffic of the second half of the year, which contains the "fall traffic," includes a much larger proportion of the receipts in American currency than the first half. The continued inflation of the prices of labor and materials in the United States, consequent upon this artificial state of the currency, still leads moreover to an excessive cost in many departments.

The amount expended out of revenue in renewals of permanent way, from 1862 to 1866 inclusive, has been no less than 621,543*l.*, and of the extremely large expenditure of the past half-year—viz., 97,391*l.*, the board have charged 25,000*l.* to capital account.

The debit for stock of stores in hand has been reduced from 245,419*l.*. the amount in December 1865, to 202,357*l.* at 31st December last.

The Reciprocity Treaty with the United States ended in March 1866. The full results of its repeal have, however been more apparent in the past half-year, and while the local traffic has kept up in a very satisfactory manner, the interchange of traffic between Canada and the United States has suffered. Much of the traffic of Canada which used to pass into the United States, is now turned to the maritime provinces, and this diversion will largely increase, now that confederation makes all the provinces one country. In the process of transition, a less profit on the work done has, however, been earned; the traffic obtained having, for the time, been of a less valuable character. So vast a change must necessarily bring temporary loss and disturbance, which time only can remedy and repay.

All accounts with the Government of Canada, and with her Majesty's Government, are now settled and disposed of.

Parliament having passed the measure confederating into one united country the heretofore separated provinces of Canada, Nova Scotia, and New Brunswick, an early measure of the new Government will be the construction of the Intercolonial. The act, which has received the Royal assent, contains the following clause:—"Inasmuch as the provinces of Canada, Nova Scotia, and New Brunswick have joined in a declaration that the construction of the Intercolonial is essential to the consolidation of the union of British North America, and to the assent thereto of Nova Scotia and New Brunswick, and have consequently agreed that provisions should be made for its immediate construction by the Government of Canada; therefore, in order to give effect to that agreement, it shall be the duty of the Government and Parliament of Canada to provide for the commencement, within six months after the union, of a railway connecting the river St. Lawrence with the city of Halifax in Nova Scotia, and for the construction thereof, without intermission, and the completion thereof with all practicable speed."

Looking to the heavy loss which has, during the last five years, arisen from the condition of the American currency—to the pressure of the excessive outlay for renewals of the permanent way, to the impossibility of the railway earning even the amount of revenue now become obtainable, without an increasing quantity of rolling stock, and to the realization of the expectations, so long formed, of the construction of the Intercolonial, the board consider that the time has arrived for maturing a plan under which the progress of the traffic and the resources of the undertaking—now destined to become an integral portion of a great continental highway—shall be fully kept pace with. They will be prepared at the meeting to lay their recommendations before the bond and stockholders for discussion. Any further legislation required will give an opportunity for obtaining power in reference to the general capital account, and if thought fit, as to the conversion of the postal and military bonds also.

The board refer the bond and stock-holders to the annexed report from Mr. Brydges, the managing director, and call attention to his explanations, based upon actual knowledge and experiment, in regard to the additional traffic to be obtained. Mr. Brydges is fully justified in laying stress on the fact that, in five years, 1861–6, the traffic has increased 47½ per cent., or from 17,700*l.* to 26,092*l.* per week. Such a rate of increase is almost without example. The board requested Mr. Brydges to come to England, foreseeing that the carrying out of confederation would necessarily involve the consideration of the questions now under discussion, and also because friendly interviews have recently taken place between deputations from the boards of the Grand Trunk and Great Western of Canada, and propositions for a more cordial and complete interchange of traffic have been discussed. It is hoped that these discussions may lead to some practical issue.

Lost Bonds and Notes.

The Secretary of the Treasury has issued the following notice with reference to lost coupon bonds and Treasury notes, which the department will in future pay to the bearer, regardless of all notices concerning lost or stolen bonds:

In consequence of the increasing trouble, wholly without a practical benefit, arising from notices which are constantly received at the department respecting the loss of coupon bonds which are payable to bearer, and of Treasury notes issued and remaining in blank at the time of loss, it becomes necessary to give this public notice that the Government cannot protect, and will not undertake to protect, the owners of such bonds and notes against the consequence of their own fault or misfortune. Hereafter all bonds, notes and coupons payable to bearer, and Treasury notes issued and remaining in blank, will be paid to the party presenting them, in pursuance of the regulations of the department, in the course of regular business, and no attention will be paid to caveats which may be filed for the purpose of preventing such payment.

Waverly Company.

From the report of the Treasurer of this company presented at the annual meeting of the stockholders in Boston on the 6th inst., it appears that the total receipts of the year ending May 1, 1867, including balance on hand at the beginning of the year, has been $2,445 01; expenditures, $1,610 56; balance on hand, $834 45. The following were chosen the officers of the company for the ensuing year: Directors—F. F. Raymond, R. E. Demmon, Gustavus Farley, Jacob Hittinger, Robert Farley, L. Vila, Jr., D. L. Demmon—Treasurer and Clerk—D. L. Demmon. At a subsequent meeting of the Directors, F. F. Raymond was chosen President.

American Railroad Journal.

Saturday, May 11, 1867.

Stock Exchange and Money Market.

The week has been a very easy one for the leading street houses, as far as regarded the supply and price of money. Capital has been flowing into this centre from all tributaries, and both at bank and through private channels, there has been more than usually rapid accumulation, especially in the form of funds, available on call, on unexceptionable securities. The large dealers in the public funds have been supplied to the full measure of their requirements at 4, and, in some instances, as low as 3@3½ per cent. To the Stock Exchange firms, the rates have ranged from 4 to 6 per cent., most of the negotiations having been on the basis of 5 per cent. As lenders could not place all, or nearly all their balances, advantageously, on even these modified conditions, quite a spirited investment business has been transacted in the various interest bearing obligations of the Government, at advancing prices, augmented, in good degree, by the reluctance of capitalists to freely accommodate general business people, in view of the two or three important mercantile failures of the week, and the pretty general distrust in commercial paper engendered by them. Strictly prime short-date paper has been in some request at 6@7 per cent. per annum, but the call for even this has been less animated than we had occasion to notice in our last; and for less select grades, there has been scarcely any currency. The city banks have gained strength rapidly, since our last, as indicated by their last weekly exhibit, which showed an increase of $8,054,731 in the deposit line, $2,667,056 in the legal tender, and $2,497,873 in the specie reserve, with a decrease in their circulation of $29,538, offset by an increase of $3,140,177 in the loan item. The specie reserve of the banks is now $9,902,177, against $10,914,997 same time last year. The city bank deposits are now $195,729,072, against $210,373,303 week ending May 5, 1866. The legal tender reserve amounts to $70,587,407, against $81,204,447 same time last year. The circulation now stands at $33,571,747, against $25,415,677 same time last year. The loans are now $250,877,558, against $258,974,134 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $93,310,019 a day, against a daily average of $74,414,070 the preceding week, and $74,635,729 the week ending with April 13th. The current week's exchanges average about $83,000,000 a day.

The main changes in the Philadelphia Bank footings, last week, were as follows: Increase of loans, $1,163,308; increase of legal tender reserve, $458,657; increase of deposits, $1,339,184; increase of specie, $3,236; and increase of circulation, $1,674. This, like the statement of the New York city banks, gives evidence of the increasing abundance of money at the leading financial and commercial centres.

No National Bank notes were issued last week, leaving the total issue to 1,664 banks thus far, as given in our last, $302,558,456, against $282,555,440 at the close of the last fiscal year, June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $3,607,983, leaving, with the existing 1,647 banks, an actual circulation at this date, of $298,950,474. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,607,450; and for the public deposits, $38,860,950—making a total of $379,468,400. The Treasury Department, last week, redeemed and destroyed $283,400 of worn and mutilated fractional currency, and issued $297,364 worth of new. On Monday of the current week, national bank currency to the amount of $123,900 was issued.

The U. S. Sub-Treasury receipts, week ending with May 4, were $28,401,654, including $2,190,166 from customs duties; payments, $37,933,021; balance at the close of the week, $110,334,049, against $119,865,417, at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $19,733,043, and payments, $17,541,755; on Tuesday, receipts, $3,631,346; payments, $2,242,393. The balance at the close of business on Tuesday stood at $113,914,369, against $115,170,035 a week previous. The cash

balance in the hands of the United States Assistant Treasurer at Boston, at the close of last week, was $8,605,389 89, against $8,859,141 21 at the close of the previous week, showing a decrease of $253,751 32. The coin on hand was $5,664,973 01, against $7,925,665 12—a decrease of $2,260,692 11. About two millions of gold interest were paid during the week.

Government revenues were on a more liberal scale, last week, and the promise is of a steady improvement in this important interest. The excises, last week, yielded $5,890,371, against $2,608,206, the preceding week; customs at the port of New York, $2,190,166, and at the outports, about $730,000 (in coin) more, making the grand total income for the week equal about $10,306,000 in currency, against disbursements of $4,896,362 on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $235,000,000.

The Gold movement has been a more determined and confident one for the *bull* interest, favored as this interest has been by the renewal of war rumors from Europe, (many of them doubtless sheer fabrications,) and by the reports of failures of extensive operators in cotton, for a rise, and in gold for lower prices. The extremes of the week have been 135@138¾, and the latest dealings on Wednesday were at 137¾@137⅞, on a less firm, and not particularly active market. The liberal disbursements of coin interest from the U. S. Sub-Treasury, about nine millions for the week, have tended to keep the speculation in check, by making what is called "cash gold" quite abundant for immediate delivery, on speculative contracts. The total imports of specie from Europe, and other foreign ports since Jan. 1, 1867, have been $729,602. The customs demand for Gold last week, averaged $365,027 a day; thus far, this week, it has been equal to $364,480 a day, or equal to a weekly aggregate of $2,086,880. The arrivals of specie from Europe, Havana and other foreign ports, during the past week were $54,854, and from California, $206,214. The total customs revenue of the Government, in coin, at this port since July 1, 1866, has been $106,493,216, against $114,730,460 same time in the preceding fiscal year. The total receipts of California gold at this port since July 1, 1866, have been $34,667,781, against $24,588,336 same time last year, showing an increase this year, of $10,079,445. The exports of specie from this port, last week, were only $713,657. The total outflow of specie from the port, thus far in the current fiscal year has been $26,155,551, against $19,224,139 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $8,862,000, making the total coin interest disbursements through the Government office, since July 1, 1866, $45,585,392, against $39,275,861 for the same time in the preceding fiscal year.

Government securities have been in unusually good investment demand and much firmer prices, partly from the causes explained in our money paragraph, and partly in consequence of the last and decidedly favorable exhibit of the public indebtedness, a comparative statement of which we give elsewhere in our paper.

The coin held by the Treasury on the 1st inst., amounted to $114,250,444, and the outstanding gold certificates of deposit to $15,400,440, leaving $98,850,004 the property of the Government. The semi-annual interest on the Five-twenty loan, which fell due on the 1st inst., has to be deducted from this aggregate, and as the latter amounts to between twenty-four and twenty-five millions the coin in the actual ownership of the Treasury at that date was nearly seventy-four millions. U. S. sixes of 1867 closed here on Wednesday at 135½; U. S. sixes of 1868, at 132½; U. S. sixes of 1881, 111⅜@111⅝; U. S. Five-twenties of 1862, ex-May coupon, 107⅞@108; U. S. Five-twenties of 1865 at 106⅛@106¼; U. S. Five-twenties of 1865, consolidated, 107¾@107⅞; U. S. Ten-forties at 99¾@99⅞, ex-coupon, and U. S. Seven-thirties at 105¾@106⅜. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

June, 1864	119	May, 1865	113½
July, 1864	118½	August, 1865	112½
August, 1864	118	September, 1865	111¾
October, 1864	117	October, 1865	111½
December, 1864	116		

Foreign exchanges have been quite stiffly held, as a rule, though the business of the week, has not been extensive. Bankers' 60 day bills on London closed tamely on Wednesday at 109⅝@109¾, and on Paris to 5.18¾@5.12½; sight bills on London to 110⅜@110½; and on Paris to 5.13¾@5.10. The offerings of produce bills have been more liberal, this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $4,198,819, making the total value of exports since July 1, 1866, $153,526,617, against $194,280,678 same time in the preceding fiscal year.

The railway and miscellaneous stock dealings of the week were of less magnitude, and while at the opening, prices favored sellers, the transactions since Monday have been of a decidedly *bearish* temper and drift, leading to a reaction in values, despite the unusual ease in money. At the close of Wednesday, the market seemed somewhat steadier, though without special vigor.

The general markets have been quite active for breadstuffs at firmer prices, but quiet and depressed for most other articles. Cotton has been unfavorably influenced by later and discouraging market reports from Liverpool. Middling grades of cotton left off here on Wednesday tamely at 26½@28 cents per lb. as extremes. The stock of cotton now here is estimated at about 120,000 bales. The receipts at the port this week, have averaged nearly 1,450 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 539,500 bales, against exports of 364,269 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 1,671,000 bales against 1,816,101 bales same time last year; exports, 1,228,000 bales, against 1,317,695 bales same time last year; estimated stock at latest dates, 385,000 bales, against 888,968 bales same time last year. There has been a very moderate call for foreign merchandise, and much heaviness has been reported, particularly in the dry goods interest. The total imports of foreign dry goods, last week, were $1,292,697, and the total amount marketed $1,425,424. The value of foreign merchandise imported last week, was $3,000,270—making the grand total specie value of last week's imports of dry goods and merchandise, $4,292,967, and since July 1, 1866, $221,210,737, against $252,919,950 same time in the preceding fiscal year. The ocean freight market has been fairly active but less firm, with 609 vessels of all classes in port. For Liverpool we quote flour at 1s. 10½@2s. per bbl.; grain at 2¾@3d. per bushel; cotton at $\frac{5}{32}$@$\frac{3}{16}$d. per lb.; and heavy goods at 10s.@20s. per ton, all by sailing vessel.

Some purchases of wheat have been made here for the Oswego and Rochester markets, which are represented as being bare of desirable stock; and inland freight room has been engaged for three or four canal boat loads, for those points. This is a very novel and suggestive incident of the grain trade of the port.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	April 24.	April 30.	May 8.
Consols	90¾	91¼	91¼
U. S. 5-20's of 1862	68	71¼	71¼
U.S. 5-20's of 1865	66¾	69½	69¾
Erie	36½	40½	41
Ill. Central	73	75	75½

The New York exports, exclusive of specie, for the week ending May 7, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$3,219,011	$4,198,819
Prev. reported	84,183,526	67,721,403
Since January 1	$87,402,537	$71,920,222

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$1,088,264	$1,292,697
Gen. merchandise	2,798,296	3,000,270
Total for the week	$3,886,560	$4,292,967
Previously reported	106,969,192	85,984,738
Since January 1	$110,855,752	$90,277,705

The commerce of New York from July 1st to date compares as follows:

	1865-'66.	1866-'67.
Imports merchandise	$252,919,950	$221,210,737
Exports produce	194,280,673	153,526,617
Exports specie	19,224,139	26,155,551

The balance in the Sub-Treasury on Wednesday was $116,210,986 01.

Iron Sleepers.

The Great Central of Belgium and the Centre Railway Companies have decided on making a trial of iron sleepers. With this object the Great Central of Belgium has ordered 10,000 iron sleepers, on the Vautherin system, which will be employed in the course of this season; the Centre Company has ordered 5,000, which are in course of manufacture. These contracts have been concluded at 7s. per sleeper—terms which include accessory fastenings.

The Public Debt.

The following is a comparative statement of the Public Debt of the United States April 1 and May 1, 1867:

	May 1, 1867.	April 1, 1867.
DEBT BEARING COIN INTEREST.		
Five per cent. bonds	$198,431,350.00	$198,091,350.00
Six per cent. bonds of 1867 and 1868	15,379,641.80	15,482,641.80
Six per cent. bonds of 1881	283,746,200.00	283,745,600.00
Six per cent. Five-twenty bonds	1,031,146,150.00	969,562,000.00
Navy pension fund	12,500,000.00	12,500,000.00
Total	$1,541,203,341.80	$1,499,381,591.80
DEBT BEARING CURRENCY INTEREST.		
Six per cent. bonds	$12,922,000.00	$12,922,000.00
Three-year compound interest notes	134,774,510.00	139,028,630.00
Three-year seven-thirty notes	549,419,200.00	582,330,150.00
Total	$697,115,710.00	$734,280,780.00
Matured debt not presented for payment	11,932,540·32	12,285,658.32
DEBT BEARING NO INTEREST.		
United States notes	$374 247,687.00	$375,417,249.00
Fractional currency	28,975,379.46	29,217,494.96
Gold certificates of deposit	15,400.440.00	12,590,600.00
Total	$418,623,506 46	$417,225,343.96
Total debt	$2,668,875,098 58	$2 663,713,374.18
AMOUNT IN THE TREASURY.		
Coin	$114,250,444 09	$105,956,477.22
Currency	33,838,558.24	34.328,826.52
Total	$148,089,002.33	$140,283,303.74
Amount of debt less cash in the Treasury	$2,520,786,096 25	$2,523,428,070.44

By comparing this with the statement of April 1st, it is shown that the debt bearing coin interest has increased $41,821,750; the debt bearing currency interest has decreased $37,165,070; the matured debt not presented for payment has decreased $893,118, and the debt bearing no interest has increased $1,368,162 50, making the increase to the total debt during the month $5,161,724. The amount of coin in the Treasury during the same period has increased $8,292,966.87, and the amount of currency has decreased $490,268 28, leaving the amount of debt less cash in the Treasury on May 1st $2,641,974 19 less than on April 1st.

☞ The contract for the Stone Work of the Bridge across the Ohio River at Louisville, Ky., has been given to Nash, Flannery & Co., of Nashville, Tenn., who have already commenced quarrying at a place on the Lebanon Branch of the Louisville and Nashville Railroad. The stone work consists of two abutments; each 80 feet high, and 13 piers, each from 120 to 140 feet high. The contract price is $400,000. The engineer promises that the bridge shall be ready for use by January 1, 1870.

☞ We understand that the Newark and New York Railroad Company have closed a contract with the Moseley Iron Bridge and Roof Co., of this city, for two draw bridges for their road, one of one hundred and twenty-five and the other of two hundred and five feet span, the former across the Hackensack, and the latter across the Passaic River. These bridges are to be completed in August and October next.

☞ Two or three boat loads of railroad iron have been unloaded opposite Oil City for the Allegheny Valley Railroad Company. The work on this road is being pushed rapidly forward, and will be completed in a few months.

Railroad Earnings.--Weekly.

The earnings of the Grand Trunk Railway of Canada for the week ending April 20th, 1867, were $126,776 00
Corresponding week of previous year. 125,327 00

Increase $1,449 00

The earnings of the Marietta and Cincinnati Railroad the 4th week in April, 1867.. $30,094 00
Corresponding week previous year.... 21,406 00

Increase $8,688 00

The earnings of the Western Union Railroad for the week ending April 30, 1867. .. $13,633 72
Corresponding week previous year.... 14,699 22

Decrease $1,065 50

The earnings of the Detroit and Milwaukee Railroad for the week ending May 2d, 1867, were $38,920 00
Corresponding week of 1866..... 23,462 00

Increase..... $15,458 00

The earnings of the Chicago and Rock Island Railroad for the 4th week in April, 1867, were $54,801 00
Corresponding week of previous year.. 64,307 00

Decrease $9,506 00

The earnings of the Chicago and Northwestern Railroad for 4th week in April, 1867.. $226,872 00
Corresponding week previous year .. 190,260 00

Increase $36,612 00

The earnings of the Michigan Southern and Northern Indiana Road for the 4th week in April 1867, were $120,344 00
Corresponding week of 1866 ..... 113,540 00

Increase $6,804 00

Journal of Railroad Law.

THE FENCE LAWS OF INDIANA—NEGLIGENCE IN CROSSING HIGHWAY.

The case of Bartlett *vs.* The Dubuque and Sioux City Railroad Company was a case lately decided in the Supreme Court of Indiana, and will be found interesting to our readers. The case holds that there is nothing in sections 3 and 4 of Chap. 169, Laws of 1862 of that State requiring railroad companies to make cattle guards at *private* crossings. The failure to do so might, under some circumstances, be evidence of negligence or want of due care in so constructing their roads as to exclude stock; but it can in no case create the liability contemplated in these sections.

The case also decides that the fact that the bars at a private crossing were left down by the landowner, and not by the employees of the company, does not discharge the latter from liability from injuries resulting therefrom, if it have not used due care to keep them closed.

Plaintiff sought to recover for two mules killed by the rolling stock of defendant, at a point where the road was fenced on both sides, and where it crosses the lands of one Collins. It seems that in the evening they were placed in plaintiff's, the next morning were gone, and on the same day were found near the track, one killed, and the other so injured as to be entirely worthless. At each end of the Collins enclosure there were "cattle guards," and between these bars for a private crossing for the use of Collins; those on one side being put up by the company and the others by him. At this crossing there were no "cattle guards." The testimony tended to show that these bars were down at the time of the injury, that the mules, when injured, were walking from the "cattle guards" on the west; that the train was running in the same direction; that the track is straight, and can be seen for about two miles west from the place where the accident occurred.

Based upon this state of facts certain instructions were given at the request of the plaintiff; others, asked by defendant, refused. Verdict and judgment for plaintiff, and defendant appeals.

WRIGHT, J.—Plaintiff insists that, under the statute the company is required to build "cattle guards" at farm crossings, Ch. 169, 9th, General Assembly.

Defendant denies this, and maintains that as the road was fenced, and bars put up at the farm crossings, it is not responsible for injuries to stock straying upon the track at such crossing, when the bars were left down by the land owner or other person than the servants or employees of said company.

I. The act of April 8 1862, chapter 169, section 6, only makes it incumbent on the company to make proper "cattle guards" on the road where it "enters or leaves improved or fenced land," and to construct good, sufficient and safe crossings "where the road crosses any *public* highway." The next section makes the company liable for all injuries sustained by reason of a neglect or refusal to comply with the provisions of the preceding ones. There is certainly nothing in these sections requiring the company to make cattle guards at a *private* crossing. And in the absence of such requirement the company is not bound to make the same. Of course the company might erect these guards at private as well as public crossings, and the failure to do so might, under some circumstances be evidence of negligence or want of due care in the duty of so constructing the road as to exclude stock from the track. But the *right* to do so is very different from the *duty*, and especially when the latter is based upon the language of the statute. We hold, therefore, that the failure by the company to erect cattle guards at a private way does not make it liable as contemplated by sections above quoted. Those sections contemplate the right to recover by proof of the injury, and the neglect or refusal to make the cattle guards or crossings. There is nothing said, however, about a *private* way, and there is no warrant for extending the language beyond its plain and obvious meaning. The New York Act (Laws 1850, 233 344,) is different in its language from ours. And therefore what is said in the case of Brown *vs.* New York and Erie Railroad Company, 18 Barb. 594, upon the subject, might be conceded (and see Corwin *vs.* same, 18 N. Y. 42,) without in the least conflicting with the views above expressed. It only remains to inquire whether the fact that the bars were left down by the landowner or other person than the employees of the company would, as a matter of law, relieve the latter from liability. This question is considered in Russell *vs.* Hawley, *infra*, and consonant therewith, we hold that the company cannot thus shift the responsibility. The obligation as to third persons is primarily on the company. Cases may arise where such third persons would be liable and the company not. It is the duty, however, not only of the company to put up the fence, but to see that it is kept in repair. If farm crossings are made, and bars leading thereto, care must be used that these bars are kept up. That they were left down by the proprietor would not absolve the company from the duty of putting them up. Care and diligence are required at its hands. If the requisite amount of care is used, and injuries result by the act of the proprietor in leaving down the bars, or in leaving open a gate, the company might escape liability. Without such care it would be liable, as the defendant's position denies the liability, if the bars were left down by others, whatever the carelessness or want of attention on the part of the company, it is not sustainable, and all instructions based upon that view were correctly refused.

The case of the Great Western Railroad Company *vs.* Helme, 29 Ill. 198 is very briefly reported, and yet it is there held that in order to excuse the company, it must be without fault in relation to leaving down or open the bars or gate at the farm crossing. In such cases the company is held to more than the least care, and as a consequence is liable for loss than gross negligence. If the road is fenced and so kept, or if it should be down or open without fault on the part of the company, then as stock on the track would be there without right or as trespassers, the company would only be liable for gross negligence. The doctrine as laid down in Alger *vs.* Mississippi and Missouri Railroad Company, 10 Iowa, 268, is, that when the road is properly fenced the company is liable for gross negligence. But to apply this rule in measuring the company's liability, the road must not only be fenced but kept so. And if not so kept because of the company's want of care or negligence, it would be liable for less than gross negligence.

The case of the Indianapolis, Cleveland and Pittsburgh Company *vs.* Shirmer 17 Ind. 295, differs from this in the very essential fact that the stock belonging to the tenant of the land owner passed on to the track by reason of his own negligence to maintain bars erected by the owner for his own convenience, and used by the tenant with the consent of the company.

The case of the Terre Haute and Wabash Railroad Company *vs.* Fowler, 22 Ind., 316, does not conflict with the views above expressed, for the fence was thrown down by third persons without the authority or knowledge of the company. The company exercised reasonable care and diligence, and the cattle strayed upon the track before the company had notice of the injury to the fence.

The only remaining case cited by appellants counsel, is the Indianapolis and Cincinnati Railroad Company *vs.* Adkins, 23 Ind. 340. This case is unquestionably current, so far as it gives the rule for stock belonging to the owner of the land. Its correctness so far as it attempts to lay down a general rule touching the property of third persons, may admit of more doubt. (See prior cases in that court, particularly New Albany and Salem Railroad Company *vs.* Maiden, 12 Id. 10. Same *vs.* Pace, 13 Id. 411.)

But however this may be, several considerations seem to distinguish the case from this. In the first place, the statute did not require the company to grant or construct a private way over the road or through its fence. In the next place, the plaintiff's stock was *trespassing* when it passed on

to the land through which the road was constructed. And, finally, the owner knew that the bars were down; that they were erected as a private way for the accomodation of the land owner, and that his stock was liable to pass to and upon the track.

Affirmed.

Morris Canal and Banking Co.

We have the report of this company for the year ending February 28, 1867. From this we learn that the canal was opened for business on the 29th of March, and closed on the 12th of December, making a navigable season of 222 working days. A serious interruption occurred in the month of July at plane nine east, by the breaking of the water wheel, which entirely suspended navigation at that place for seven days, and by the accumulation of boats made the navigation slow for several days longer. In the month of October, a large reservoir, constructed for the Paterson water works on the high lands above the canal, near Paterson, gave way suddenly, emptying itself into the canal and causing a break which suspended navigation four days. Notwithstanding these interruptions, the business done upon the canal has been large, fully realizing the expectation expressed in the last report.

The income of the company from tolls and other sources during the year was		$616,350 36
And the expenses were:		
Repairs of canal & works	$235,305 55	
Operating canal	70,259 45	
Salaries, law and other expenses	$37,286 91	
Less gain in interest	10,033 22	
	27,253 69	
Transportation expenses.	7,561 50	
		340,380 19
Balance—profits of the business		$275,970 17
Balance at credit, Feb. 28, 1866		117,351 97
		$393,322 14
Dividends on preferred stock		$117,500 00
" consolidated stock		82,000 00
Interest on bonds		55,334 72
United States tax		5,898 59
Discount on boat loan		22,869 02
Boat loan bonds bought by Trustees and cancelled		11,000 00
Depreciation of boat stock		1,526 82
Bad debts		278 69
Balance, February 28, 1867		96,914 30
		$393,322 14

It will be seen by the table of "trade and tonnage" that the total amount carried east and west was 889,220 tons, and it was equivalent to 54,559,798 tons carried one mile, which is about 15 per cent. more than the tonnage of the previous year.

The earnings of the company from all sources have been $616,350 36; the current expenses were $340,380 19, leaving as net earnings $275,970 17, which added to the balance at the credit of profit and loss, at the beginning of the year, makes $393,322 14. Dividends amounting to 10 per cent. upon the preferred stock, and 8 per cent. upon the consolidated stock, and the interest upon the company's bonds have been paid. Boat loan bonds amounting to $11,000 have been purchased and cancelled, which, with the other items charged to profit and loss, make in all $296,407 84, leaving $96,914 30 at the credit of that account at the close of the fiscal year. It will be seen that while the gross earnings are more than in any former year the difference is much less than the difference in tonnage; this arises from a reduction in the rates of toll made necessary by reductions in the rates of competing coal carrying companies.

The current expenses have been large, exceeding those of the previous year by the sum of $67,515 62; of which $9,000 is attributable to the substitution of Bessemer steel rails, instead of iron rails for renewals on the planes; also, about $19,000 to rebuilding and widening two aqueducts; one over Peckman River near Little Falls, and the other over Hurd-brook at Dover; also, about $11,000 to the erection of houses for the use of locktenders, brakemen, and ferrymen; the remainder must be put partly to the continued high price of labor and materials, and partly to the increase of trade upon the canal. It is believed that the greater endurance of the steel rails will much more than compensate for the difference in first cost, the houses were necessary for the proper accommodation of the men near to their work, and will tend to insure at those places, the services of such men as are needed for the efficient operation of the canal.

There has been sold during the last year, $7,000 of the second mortgage bonds, at par; leaving $32,000 of that class of bonds unsold at this date.

Construction Account.

The amount expended on construction account during the year has been:

For extensions and improvements at Jersey City	$70,306 81
Increase of "Boat Account"	62,347 47
Extension of tracks and shutes at Port Delaware	15,083 70
General improvement account including land damages	11,338 56
Total	$159,076 54

Boat Loan and Boat Account.

The total amount of bonds sold at the end of the last fiscal year is $232,087 50, for which the company received $183,876 36.

There have also been received during the last year "boat rents" to the amount of $53,134 99; $11,000 of boat loan bonds have been purchased by the Trustees and cancelled in accordance with the requirements of the deed of trust and credited to "boat account," reducing, by that sum, the amount invested in boats; there has also been credited to boat account, $1,526 82, losses on boats worn out during the year; also, $1,662 72, for losses of former years on boats, and not before credited; leaving $213,146 89 now at debit of "boat account."

All the boats have been duly conveyed to the Trustees, and by them leased to the company, on the conditions required by the action of the Board, creating the "boat loan," which conditions have been duly observed by the company.

Coal and Ore Tonnage.

It will be seen by the table of "Coal Tonnage" that the shipments to Port Delaware have increased from 74,502 tons in 1865, to 112,790 tons the last year, or about 52 per cent.; also, that the shipments at Port Washington increased from 124,204 tons to 141,034 tons, a difference of about 13 per cent., also, that the amount received at Port Delaware by canal diminished from 217,933 tons to 205,351 tons, a difference of 6 per cent.

The extension of tracks and schutes at Port Delaware, commenced in 1865, has been completed, and will give a capacity for shipments at that point greater than at any former period.

The ore trade has been unusually active during all the season, amounting to 290,165 tons, against 174,838 tons the previous year.

The Morris and Essex Railroad was completed so far as to commence carrying coal and ore in the early part of last year. This road will now become a strong competitor for the way trade hitherto transported on the canal, particularly that of coal and iron ore, dividing this trade with the canal, and very likely compelling the work to be done at rates less remunerative than heretofore.

The severe weather during the past winter, and the backwardness of spring, have delayed the opening of the canal about one week. The usual repairs have been made and the canal is in excellent order throughout. The great depression in the coal market indicates that carrying companies may be compelled to do their work at rates less than those of last year, in which event the tonnage must be correspondingly increased in order to secure an equal amount of revenue. In anticipation of this state of things, the company has largely increased their boating capacity during the last two years, and the prospect for a large tonnage appears at this time favorable.

General Statement.

Cost of canal and appurtenances		$3,269,756 13
Assets:		
Cash	$64,151 96	
Bills receivable, individual accounts, etc	61,661 85	
Materials	21,055 11	
		146,868 92
		$3,416,625 05
Capital stock:		
Consolidated		$1,025,000 00
Preferred		1,175,000 00
Mortgage bonds		768,250 00
Boat loan bonds		232,087 50
Liabilities:		
Individual accounts, etc.	$28,514 97	
Bills payable	82,000 00	
Dividends and coupons unclaimed	8,858 28	
	119,373 25	
Profit and loss—surplus		96,914 30
		$3,416,625 05

President and Engineer.—William H. Talcott.

Secretary.—John Rodgers.

Baltimore and Ohio Railroad.

This company are now running six daily passenger trains between the east and west, making close connection with trains from either termini. We learn that the double track, which has been in course of construction for many months past, is now practically completed between Baltimore and Cumberland, a distance of nearly two hundred miles, while the work beyond that point is continued steadily. With that portion now in use, the operations of the company, especially with regard to freights, are being greatly facilitated, and afford superior advantage to shippers.

Camden and Amboy Railroad.

At the annual meeting of the stockholders of this company held at Bordertown, N. J., on the 27th ult., the following named gentlemen were elected directors for the ensuing year: Edwin A. Stevens, Cambridge Livingston, Joseph P. Bradley, Benjamin Fish, Ashbel Welch, John L. McKnight, Sam'l Welsh.

At a subsequent meeting of the Board of Directors, William H. Gatzmer was elected President, Richard Stockton, Treasurer, and Samuel J. Bayard, Secretary.

☞ We learn from the Montour *American* that much of the stock of the Danville, Hazleton and Wilkesbarre Railroad has already been subscribed, and five dollars on each share has been paid. The company will be organized in a few days, and the work proceed at once. The road will be made on the south or east side of the river from Sunbury to Danville, Hazleton and Wilkesbarre.

☞ The St. Louis and Illinois Bridge Company have commenced boring through the sediment in the stream to ascertain the depth of the rock below the river, preparatory to the commencement of the piers.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of April, were:

ENTERED FOR CONSUMPTION.

	1866.	1867.
Manufactures of wool	$1,329,350	$626,505

The imports of foreign dry goods at New York for ten months from July 1st, were:

Year.	Value.
1860–1	$79,615,140
1861–2	31,676,135
1862–3	55,449,103
1863–4	72,352,127
1864–5	40,498,403
1865–6	122,981,478
1866–7	93,725,514

Great Western Railway of Canada.

REPORT OF THE DIRECTORS FOR THE HALF YEAR ENDING JANUARY 31, 1867.

The receipts on capital account during the half year amounted to £73,702 3s. 9d., and the total receipts to Jan. 31, 1867, to £5,242,383 12s. 2d. The aggregate expenditure to the same period amounted to £5,341,252 15s. 1d.; leaving a balance to the debit of capital account of £98,869 2s. 11d. The outlay on capital account during the half year has been £137,688 19s. 8d. This expenditure includes outlay on the Petrolia Branch Railway of five miles in length; extension of siding accommodation; proportion of cost of rebuilding in stone and iron the new bridge in course of construction across the Twenty-mile Creek at Jordan; sundry additions to stations and platforms; extension of mechanical buildings; a new puddling furnace for the rolling mill; outlay for third rail and car ferry boat accounts; and for slip dock and landing wharf at Windsor. The receipts and expenditure on revenue account were as follows:

Gross receipts		£331,513
Working expenses, which now include renewals		166,632
		£164,881
From which there has to be deducted—		
Interest on Government loan	£17,498	
Interest on bonds, &c	32,772	
Loss on conversion of American funds	48,229	
Amount charged on account of Detroit fire claims	4,110	
Loss on working Erie & Niagara Railroad	643	
Judgment and costs in suit of Suspension Bridge Company	1,596	
		104,848
Profit on half year's operations		60,033
Add surplus from last half year		2,649
Available for dividend		£62,682

From this amount the Directors recommend a dividend at the rate of 3½ per cent. per annum, free of income tax, which will absorb £61,553 8s. 5d., and leave a sum of £1,128 13s. 1d. to be carried to the credit of the current half year. The loss on the conversion of American funds for the half year was £48,228 11s. 5d., as compared with £73,316 17s. 11d. for the corresponding half year of 1866. The conversions of the company have been made at an average rate of 142, while the average price of gold during the half year was 142⅞. The following table exhibits the receipts and expenses for the last five corresponding half years:—

	Receipts.				Expenses.	
Half year.	Pass., mails, and sundries.	Freight and live stock.	Rents.	Total.	Including renewals.	Per centage of gross rcpts.
Jan.	£	£	£	£	£	£
1863.	122,627	186,099	579	309,305	172,568	55.79
1864.	129,684	171,329	621	801,634	171,336	56.80
1865.	154,125	157,874	730	312,730	168,577	53.91
1866.	205,131	181,171	837	387,039	170,003	43.93
1867.	168,986	161,254	1,273	331,513	166,632	50.26

The gross receipts for the half year amount to £331,513 7s. 3d., against £387,039 6s. 1d., showing a decrease of £55,525 18s. 10d., but as compared with previous corresponding half years they exhibit a steady increase. The decrease during the past half year has arisen in all branches of traffic, except local and through freight, which shows an increase of £7,708 2s. 6d. The falling off in the live stock business from local stations to the United States amounted to £8,784 18s. 9d., while the decrease in the through live stock business is £18,295 18s. 5d. But it must be borne in mind that the traffic in live stock was unusually stimulated last year owing to large purchases having been made prior to the United States duty of 20 per cent. coming into operation. The decrease in the through passenger traffic, as compared with the corresponding half year, has been general on all through lines, and has chiefly arisen from the depressed state of travel caused by the close of the American war. This half year there are several special charges against revenue, which amount in the aggregate to £6,349 7s. 1d. These arise from a proportion of the loss resulting from the fire at Detroit station in April, 1866; deficiency in working the Erie and Niagara Railway during its partial opening, and for the settlement of a long pending dispute with the Suspension Bridge Company. The Directors are happy to announce the completion of the narrow gage track between Suspension Bridge and Windsor, and of the Iron Ferry boat for the transport of cars across the Detroit River, which came into successful operation on the first day of the present year. Notwithstanding the difficulties attendant upon the commencement of through working over such an extended railway system as that between Chicago, New York and Boston, the results thus far have been most satisfactory, and have fully realised the expectations of the Directors, expressed in their last report. The requirements of the oil district of Enniskillen have had the attention of the Directors, and a short line of five miles from Wyoming to Petrolia, constructed by independent parties, has been taken over by this company for the cost of construction amounting to £10,038 10s. 2d. The line was partially opened for traffic on the 17th of December, and on the 1st of January came into full operation. It was announced in the last report that progress had been made towards an arrangement with the Commercial Bank, in compliance with the authority given by the proprietors at their meeting on the 4th April, 1866; the main principle being that all claims against this company have been withdrawn, the Detroit and Milwaukee Railroad Company agreeing to set aside a moderate annual sinking fund to redeem the claim of the bank, and in the meantime to issue its bonds in satisfaction of this and other claims; and to a limited extent these bonds will participate in the surplus earnings of the Detroit and Milwaukee road *pari passu* with the original loan made by the Great Western, and accrued interest thereon. The arrangement has the sanction of the legal advisers of the company. The gross earnings of the Detroit and Milwaukee Railroad for the year ending December 31st, 1866, were £340,935 2s. 4d., and the working expenses amounted to £210,442 16s. 11d., leaving a net revenue of £130,492 5s. 5d. Of this surplus, the sum of £78,752 17s. 1d., was absorbed in the payment of interest on all descriptions of prior bonds of the company. The Directors look hopefully to the future, believing that with the establishment of the narrow gage track, the permanent welfare and advantage of the Great Western of Canada will be realized.

Rails in France.

The quantity of rails received by the various French railway Companies in 1866 was as follows: Paris, Lyons, and Mediterranean, 35,300 tons; Northern, 34,055 tons; Eastern, 15,029 tons; Southern, 18,291 tons; Western, 8,887 tons; Orleans, 8,494 tons; Charentes, 8,080 tons; Mont Cenis, 2,290 tons; Medoc, 400 tons; and Girdle of Paris, 149 tons; total, 125,975 tons. This total nearly represents the entire consumption of rails in France in 1866. The consumption has been gradually decreasing since 1862, when it attained a total of 247,883 tons.

A Hungarian Railway.

A new line of railroad from Pesth to Hatvan, 40 miles long, was opened in March. It passes through the new Crown estate of Godollo, and will be continued to Miskolcz. This line will eventually form a portion of the great northern railroad connecting Hungary, through the Carpathian Mountains, with Galicia and Russia.

Boston Water Power Co.

The annual meeting of this company was held in Boston on the 29th ult. From the report of the treasurer we learn that the receipts from the sale of lands during the year amounted to $564,929; from other sources $144,762; cash and notes receivable on hand $70,268; amounting in all to $779,959; expenditures, $750,213; leaving a balance on hand of cash and bills receivable, $29,746. The business of the company has been as follows: Land sold, 794,545 feet, amounting to $565,429. The debt of the company is $141,000, deducting cash on hand and notes securable, $29,746, is $111,254. The property now owned by the company amounts to 1,590,212 feet of made land, and about 10,000,000 feet of flats, the Mill Dam foundry, the Boston Iron Company and the Boston Hemp Company. During the past year a dividend of $6 per share has been paid, making $20 per share since the property passed into their hands.

During the past year a settlement has been made with the City of Boston for the large drain built by the city for the use of the company, by the payment of $50,000, the amount agreed upon when the contract was made in 1864. The drainage is now complete and perfect throughout the entire property.

There had been a great increase in the value of land between Columbus avenue and Tremont street, land selling last year for 70 and 80 cents a foot having been resold at $1 10 to $1 15 per foot. The directors have not thought it best to press the sale of made land until that which has been sold should have been built upon. The directors state that more building is going on now upon the company's land than ever before.

While there is less demand for costly houses such as are built upon the lands of the State on Commonwealth avenue, Bacon and other streets, there is an increased demand for houses of moderate cost. The land between Chester and Dartmouth streets is increasing in value, being held at higher figures than was obtained for land on Berkley, St. James and other streets. The report of the Directors was considered very satisfactory.

The meeting then proceeded to the election of a Secretary and Treasurer, and G. W. T. Braman was chosen. A board of Directors was also balloted for, and Nathan Matthews, Thomas Upham, Charles A. Lombard, Wm. H. Reynolds, H. T. Arnold, J. F. Cole and J. A. Gardner were chosen. At a subsequent meeting of the directors, Nathan Matthews was elected President.

Great Western (Canada) Railway.

The following is a comparative statement of the receipts and expenditures of this company for the past five years:

	July.	January.	Annual.
1862-'3....	£246,238	£309,304	£555,542
1863-'4....	298,067	301,634	594,701
1864-'5....	314,939	312,729	637,668
1865-'6....	284,565	387,039	671,604
1866-'7....	343,162	331,513	674,675

The working expenditure, including renewals, for the same period has been as under:

	July.	January.	Annual.
1862-'3....	£129,051	£309,304	£438,355
1863-'4....	136,270	301,634	437,904
1864-'5....	140,188	312,729	452,917
1865-'6....	182,486	387,039	519,525
1866-'7....	150,406	331,513	481,919

The total receipts for these five years have amounted to 3,134,190*l.*, while the expenditure, including renewals, reached to 2,380,620*l.* The net revenue for the five years is 803,570*l.*, indicating an average of 160,714*l.* per annum.

East Boston Co.

The report of the directors, presented at the annual meeting of the stockholders in Boston on the 6th inst., states that the sales of the lands of the company during the past year were not so large in extent as in former years, but that the price obtained were higher, showing that the company was in a prosperous condition. The number of sales up to the present time had been 4,392, and if negotiations for the sale of other lands are successful this amount will be more than doubled. There have been thirty-five wooden and six brick houses erected during the past year, besides various improvements in the gas works, and the iron and brass foundries, and also in the Eastern Railroad freight depot. The city had also constructed a sewer in the third section. The report was considered satisfactory by the stockholders.

The report of the Treasurer shows that the receipts of the year from various sources have been $48,550 72; expenditures, $46,400 42, leaving a balance of $2,150 30 in the hands of the Treasurer. The total assets of the corporation amount to $1,235,506 26. A ballot for Directors was then had and the following gentlemen were elected: C. A. Browne, H. P. Cushing, J. S. Farlow, T. B. Hall, G. N. Macy, J. Noble, S. Peirce, J. Peirce and M. D. Ross. At a meeting of the Directors, held subsequently, T. B. Hall was re-elected President, and A. R. Turner, Secretary and Treasurer.

New Haven and Derby Railroad.

At a meeting of the directors of this company held on the 27th ult., the following officers were elected: Henry A. Dawson, president; Morris Tyler, vice-president; Francis E. Harrison, secretary; Charles Atwater, treasurer. It was resolved to enter at once upon a preliminary survey of the road, and an instalment of the capital stock, payable on the 13th of May was ordered to be called on, for the purpose of pressing on the early construction of the road.

Albany and Susquehanna Railroad.

The road is completed to Sidney, 105 miles, and is graded nearly ready for the rails to Nineveh, 120 miles. Nineveh will be the point of intersection with the Pennsylvania and Delaware Canal Company's road, leading to the coal regions, a distance of 55 miles. The tunnel is five miles beyond Nineveh. So it will be seen there is but 20 miles of grading to be done between Albany and Binghamton.

☞ It is said the Wallkill Valley Railroad enterprise will succeed. The town of Montgomery, Orange County, will finish the first ten miles this season, by completing the road to the Erie at Goshen. Welden will this summer bring the road four miles farther north. Shawangunk, Gardiner and New Paltz will commence this summer the movement to continue the road to Rosendale.

☞ A bill has been filed by the South Carolina Railroad Company to enjoin the construction of the Columbia and Augusta Railroad. The injunction is asked on the grounds that the Columbia and Augusta road is being constructed in violation of the exclusive privileges granted by the charter of the South Carolina Railroad.

Interest and Dividends.

The Pennsylvania Railroad Company have declared a semi-annual dividend of three per cent. payable in cash, free of tax, on the 30th instant. Also an extra dividend of five per cent., based upon the profits earned prior to January 1, 1867, clear of national and state taxes, payable in stock, on and after May 30, at its par value of fifty dollars per share, the shares for stock dividend to be dated May 1, 1867. Scrip certificates will be issued for fractional parts of shares. Said scrip will not be entitled to any interest or dividend, but will be convertible into stock when presented in sums of fifty dollars.

The Manchester and Lawrence Railroad Company have declared a dividend of 3 per cent., payable May 1, in Manchester, N. H.

The Northern Central Railway Company has declared a quarterly dividend of 2 per cent., clear of National and State taxes, payable in Baltimore on the 23d instant.

The Flint and Holly Railroad Company has declared a semi-annual dividend of 5 per cent., payable in New Bedford May 7.

☞ Judge Miller of the United States District Court at Milwaukee, has granted an injunction against the Directors of the Milwaukee and Prairie du Chien Railroad, prohibiting the consolidation of the Milwaukee and St. Paul Road with the Milwaukee and Prairie du Chien, or the paying of any dividends, or any money on account of stock issued by the President and Board of Directors.

☞ The board of directors of the Alexandria Canal has given consent to the Berme Bank Railroad charter. This consent was required by the bill before it could take effect.

WARREN'S ELEMENTARY GEOMETRICAL DRAWING.

A MANUAL OF ELEMENTARY DRAWING, including three Dimensions, designed for use in High Schools, Academies, Engineering Schools, &c., and for the Self-instruction of Inventors, Artizans, &c., in Five Divisions.

Division 1.—Elementary Projections. Division 2.—Details of Construction in Masonry, Wood and Metal. Division 3.—Rudimentary Exercises in Shades and Shadows. Division 4.—Geometrical Drawing and Cabinet Projections. Division 5.—Elementary Structural Drawing by Prof. S. E. Warren, C. E., of Rensselaer Polytechnic Institute. 1 vol. 12mo.; third edition enlarged, with 17 folding plates and wood engravings. $1 50.

This day published and for sale by

JOHN WILEY & SON,
No. 535 Broadway, New York.

Recently published by the same author:

WE OFFER FOR SALE
ENGLISH RAILS
OF THE FOLLOWING BRANDS:

CRAWSHAY. **LEVICK & CO.**
GUEST & CO. **RHYMNEY CO.**
EBBW VALE CO. **ABERDARE CO.**
BAILEY, BROS. & CO.

Weighing 45, 50, 52, 56, 57, & 60 lbs. per lineal yard, Erie patterns, in port and to arrive, for cash, or a satisfactory credit.

If desired, parcels of Rails can be rolled to any required pattern, and shipped direct from England to any port in this country, at prices f. o. b., or ex-ship on arrival.

M. K. JESUP & COMP'Y,
12 Pine Street, N. Y.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO.,
NEW YORK, May 3, 1867.

THE ANNUAL MEETING OF THE SHAREholders of the Illinois Central Railroad Company, for the Election of Directors, and the transaction of other business, will be held at the office of the Company, in the City of Chicago, on Wednesday, the 29th day of May, 1867, at 3 o'clock p. m.

The Transfer Books of the Company will be closed at the close of business on the 14th instant, and re-opened on the 1st day of June next.

3t19 L. A. CATLIN, Secretary.

NOTICE TO CONTRACTORS.

SEALED PROPOSALS WILL BE RECEIVED at the Engineer's Office in the city of Albany, until Monday, the 20th day of May next, for the Grading, Masonry, Bridging and Fencing of Sections 41, 42, 44, 45, 46, 47, 48, 49 and 50 of the Albany and Susquehanna Railroad, being the balance of work not under contract, extending from near Harpersville to Binghamton, a distance of about 20 miles.

The line will be ready for examination after the 10th ultimo, and profiles and plans, with specifications, may be examined at the Engineer's office in Albany after that date.

Proposals should be enclosed in an envelope and endorsed "Proposals," and directed to the undersigned, at Albany.

The proposals received in accordance with this notice will be submitted to the Executive Committee, who reserve the right to reject any or all proposals received, as they may deem for the interest of the Company.

C. W. WENTZ, Chief Engineer.

Dated Engineer's Office, Albany, April 23d, 1867.

SCHOOL OF MINES,
COLUMBIA COLLEGE,
East 49th Street, NEW YORK.

FACULTY:

F. A. P. BARNARD, S. T. D., LL. D., President.
T. EGLESTON, Jr., E. M., Mineralogy and Metallurgy.
FRANCIS L. VINTON, E. M., Mining Engineer.
C. F. CHANDLER, Ph. D., Analytical and Applied Chemistry.
JOHN TORREY, M. D., LL. D., Botany.
CHARLES A. JOY, Ph. D., General Chemistry.
WILLIAM G. PECK, LL. D., Mining Surveying.
JOHN H. VAN AMRINGE, A. M., Mathematics.
OGDEN N. ROOD, A. M., Mechanics and Physics.
JOHN S. NEWBERRY, M. D., Geology.

The plan of this School embraces a three-years' course for the degree of ENGINEER OF MINES, or BACHELOR OF PHILOSOPHY.

For admission, candidates for a degree must pass an examination in Arithmetic, Algebra, Geometry and Plain Trigonometry. Persons not candidates for degrees are admitted without examination, and may pursue any or all of the subjects taught. The next session begins October 7th, 1867. The examination for admission will be held on October 3d. For further information, and for catalogues, apply to

DR. C. F. CHANDLER,
Dean of the Faculty.

PLASTIC SLATE ROOFING
JOINT STOCK COMPANY.
OFFICE 157 (Room 19) BROADWAY,
NEW YORK.

W. C. POTTER, Vice Pres't.
J. M. ALLEN, Sec. and Treas. **LICENSES GRANTED.**

PLASTIC SLATE
FOR
Roofing & Other Purposes.

The process of reconstructing Slate Stone from a disintegrated state was
PATENTED FEBRUARY 21ST, 1865.
It is a combination of
Pulverized Slate and Viscous Matter,
(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.

As a Roofing Material it Stands Unrivalled.

A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.

Frost does not Crack nor Heat Dissolve it.

The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and

Perfectly Fire-Proof,

It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

THE
Sterling Iron and Railway Co.,

No. 26 Broad St., New York.

OFFICE ERIE RAILWAY COMPANY,
No. 187 West St., NEW YORK, April 1, 1867.

NOTICE IS HEREBY GIVEN of the intention of this Company to extend its First Mortgage Bonds, due July 1, 1867, for Thirty Years, at Seven per cent. per annum. These Bonds are a First Mortgage of $3,000,000 on the entire property of the Company, and the power to extend them is given by a statute of the State of New York, which provides that the Company may extend any or all its Mortgage Bonds, in the order of their respective priorities.

Proposals will be received up to the 15th of May next, at the General Office of the Company in the City of New York, for extending any portion of the issue, and parties, whether present holders or others bidding the highest premium therefor will be entitled to extend said Bonds *pro rata*, on the amount of their bid, as the Bonds are presented by the holders.

On and after the 1st of July the Company will be prepared to extend, on the above terms, all such Bonds as the holders thereof may present for that purpose, at the office of the Company in the City of New York, and new sheets of Coupons for 30 years, with an indorsement thereon of a mutual agreement of such extension, will be issued and attached, with interest payable semi-annually as heretofore.

Persons whose bids may be accepted will have the option of extending Bonds in London, Frankfort, or Germany, on due notice to the Company, in manner to be hereafter determined, of the numbers of the Bonds to be extended in each place.

5t15 ROBERT H. BERDELL, President.

FOR SALE
3 LOCOMOTIVES,
4-8 1-2 GAUGE,

All thoroughly REBUILT by one of the best makers in the country, and ready for immediate use.

1—Cylinders 14x20, Link Motion, 4-56 in. Drivers connected, Copper Flues, Weight about 24 tons; 8 wheeled Tender, 1800 gallons.

This Engine has always worked admirably; Steams freely with dry or green wood, works and wears perfectly smooth; Well springed and brassed all around. Proportions every way suited to power. A good and stylish model, all in excellent order.

2—Cylinders 15x20, Link Motion, 4-54 in. Drivers connected, Copper Flues, weight about 23 tons, 8 wheeled Tender, 1,800 gallons.

Is a smart smooth working Engine, suitable for any work; has a good record throughout.

3—Cylinders 16x20 Hook Motion, 4-68 in. Drivers connected, Copper Flues, weight about 24 tons; Tender, 8 wheeled.

Every way perfectly sound, well brassed and springed up. All in fine working condition.

These Engines will be sold VERY CHEAP to close a transaction, and are GREAT BARGAINS to any company wanting this sized Engine.

KASSON & CO.,
62 Broadway, New York.

Thistle Mill Waste,

A new and Superior Article of WOOLEN Waste, combining the following

ADVANTAGES,

1st. It is 30 per cent. lighter than ordinary waste.
2d. It will absorb 25 per cent. more oil.
3d. Has greater elasticity and will wear longer.
4th. It is less liable to ignite.
5th. And has a value as old waste.

The use of Wool as an ANTI FRICTION material is too well known to require discussion.

This waste is manufactured expressly for use in packing Locomotive and Car Journal Boxes, and will be sold as low as the best Cotton Waste.

The old waste taken in exchange at a price—including weight of oil, dirt, &c.—which will reduce first cost over one half.

Small Sample Bales furnished FREE for trial.

KASSON & CO.,
15tf **62 Broadway, New York.**

DIBBLEE & HOWARD,
BANKERS and BROKERS,

WILL REMOVE ON OR ABOUT 4TH MAY,

From No. 30, to No. 10 Wall St.

Government Bonds of all kinds, State and City Bonds, Railroad and other Stocks and Bonds, Gold and Silver bought and sold on commission. Interest Coupons and Dividends collected.

ASTONISHING!

PAINTS for Cars, Bridges, Roofs and Houses at ONE-THIRD the cost of lead; 100 lbs. will paint as much as 250 lbs. of lead, and wear better. Extract from a testimonial received from the U. S. Mint, "have used the PECORA CO.'S BROWN PAINT where it is subject to the fumes of ACID and STEAM, and find it SUPERIOR to all others in protecting wood and metal." For joints it is superior to red lead. The floors and joints of bridges should all be painted with it as they are laid.

PECORA PAINT CO.,
150 N. 4th St., Philadelphia.

Progress of Railways.—The St. Louis, Iron Mountains and Southern Railway.

The bill for an injunction brought by the Attorney General of Missouri, against the Commissioners of sale, and the purchasers of the St. Louis and Iron Mountain Railroad, came to a hearing before the St. Louis Circuit Court on the 4th inst., and the injunction was refused.

This road was projected some ten or fifteen years ago, and intended to develop the wonderful metalliferous wealth of Missouri, lying in veins of galena and mountains of iron some 80 or 90 miles south of St. Louis. Individuals subscribed over two millions, and the State advanced over three and a half millions. A first class road was built and equipped, and it was in fine order and doing a good business when the Rebels under Gen. Price made a raid upon it and destroyed most of the bridges and other structures, so far crippling the company that their cash means were exhausted in making the necessary repairs, and therefore were unable to pay the interest due the State. It was therefore sold, with three other roads, under foreclosure of the State's lien, and bought in by the State for near five millions last fall. Under further authority of law State Commissioners received sealed proposals for it, and sold it early in January of this year to Mackay & Co., who were in fact the lowest bidders; Hon. Thomas Allen, Gen. Fremont and others bidding several hundred thousand higher. The sale, however, was effected and the deed made, but the successful bidders immediately sold out to Hon. Thomas Allen, who was the next highest bidder, and the possession was given to him. The Attorney General of the State was disposed to call in question the act of the Governor and his Commissioners, and applied for the injunction which the Court has refused. Mr. Allen, therefore, is confirmed in his possession. The road is in fine order, thoroughly ballasted with broken stone, all its bridges new, and has all the work its 15 locomotives and over 200 cars can do in transporting passengers, iron ore, pig iron, lead, barytes, lumber, cord wood and agricultural produce, giving employment to 350 hands. It has one of the best appointed machine shops in the country, capable of turning out any sort of rolling stock from a hand car to a locomotive—some 30 station houses, 27 bridges, a fine hotel, and a telegraph line. The road is 87 miles long and cost $5,797,000. It has a land grant of about 200,000 acres. Connected with this sale was the Cairo and Fulton Railroad, which starts from the mouth of the Ohio and runs west, being completed 30 miles. The U. S. military authorities took possession of this road and run it for a year during the war, and took off for use further south several miles of track and some rolling stock, since which time nothing has been done with it, until the State sold it in January last. This road has a land grant of over 400,000 acres, and the original company expended on it over $800,000, of which the State advanced $650,000. These two roads were sold for $900,000 payable in State indebtedness, and re-purchased by Mr. Allen for $1,275,000.

It is designed, we understand, to consolidate the two into one, and to extend and terminate the line at Belmont, opposite Columbus, Ky., which is the terminus of the Mobile and Ohio Railroad, thus giving St. Louis, at all seasons, a direct railway connection with the railway system of the entire south. The connection at present is made by crossing the Mississippi at St. Louis, and going 61 miles east by the Ohio and Mississippi road, thence by the Illinois Central south 118 miles to Cairo, and thence by boat 20 miles to Columbus, occupying some twelve hours, and often much more. In consequence of the ice embargo in Winter at St. Louis, and for a hundred miles below, millions of trade are diverted to Louisville and Cincinnati and other points. It has therefore been deemed a matter of great moment to St. Louis to get a direct connection with the southern system of railways, which the proposed extension and consolidation will furnish. The distance from St. Louis to New Orleans by river is 1,200 miles, but by the proposed railway connection it will be reduced to about 700 miles to New Orleans and Mobile. Connections will be made at Union City with the Nashville and Chattanooga road; at Humbolt with the Louisville and Memphis road; and at Grand Junction and Corinth with the Memphis and Charleston road, and their numerous ramifications, and at Cairo with the vast and various tributaries of trade that swell the commerce of the Ohio River.

The extent of road necessary to be built to make the required connection is about 110 miles, a part of which is graded, and of which some 25 miles of track are already on hand. The country through which it will run, from Pilot Knob to Belmont, is heavily timbered with yellow pine, oak, cypress, maple and black walnut, and the earth stocked with inexhaustible supplies of rich iron ores, lead, Kaolin and other minerals, marble and granite. These ores will be taken, as now, but in increased quantities, up the Ohio River as far as Pittsburg to meet the coals of that region, and must also suppiy the vast demands of the great northwest, and these freights, together with the passenger transit between the north and the south of the Mississippi Valley, most make the general traffic of this road large, useful and profitable.

The present terminus of this road, at Pilot Knob, 87 miles from St. Louis, is among the most remarkable iron deposits in the world, there being no less than six mountains or hills of iron, each several hundred feet high, say 800 feet above St. Louis, and each containing millions of tons of ore

above the surface or land of the surrounding country, and within a circuit of ten miles. *

Freight Railways.

In the last number of the JOURNAL we noticed the new plan for an improved freight railway, having reference in particular to the plan embraced in the bill of Senator Harlan of Iowa, and which bill is now, as we understand, before the Senate Committee on the Pacific Railroad. This bill proposes to establish, by Congressional Legislation, a freight thoroughfare from the Mississippi River to the Atlantic sea-ports, having its Eastern *termini* at New York, Boston and Philadelphia, also connecting with the commerce of Lake Ontario by a road on the same plan from Oswego to the common junction at Syracuse. Upon the supposition that this railroad will possess a four fold freight power as compared with the Erie Canal, and that it will successfully compete with the canal in cheapness of transport, what effect is it to have upon the railways now constructed and in operation?

At first sight the impression might be entertained that it would prove injurious. If, however, the plan is an improvement on the present method of management, there is no more danger to any existing interest than there would be from the introduction of an improved locomotive. It would be the privilege of any, or all of our roads, to change their management, if, by so doing, they could make it to their interest, all the improved methods of management being just as well adapted to existing railways as to those of future construction. It might compel competing lines, such as the New York Central, the Erie, Pennsylvania, and Baltimore and Ohio Roads to utilize their thoroughfares and give a manifold greater amount of public accommodation at a much reduced price per ton for transportation, and by consequent increase of business a better profit to the company. Were this to become the case with all our existing roads there would be very few popular tears shed over the result.

As a general thing, the effect of the common trunk thoroughfares would be to benefit the local roads. Take for example the Rome and Watertown Road in this State. When freights shall have passed as far as Rome on their way to the sea-board, the trains would have nothing to do but to keep on with their freights to the place of destination. Their road would be merely lengthened out some two hundred and fifty to three hundred miles, to which would be added the advantage of uninterrupted communication with the cities of the sea-board, as also, in case the company choose, with the cities of the west. As the case now stands, the Rome and Watertown Road is a mere feeder of the New York Central, and as such is subjected to disabilities which it is not possible to overcome. Were it permitted to multiply its rolling stock, and compete by means of its rightful privilege to go directly to the cities of the sea-board, not less than fifty per cent., perhaps, would be added to the value of its stock. The same principle and the same result would apply to other roads in New York, and nearly all the local roads in Ohio, Michigan, Indiana, Illinois, Wisconsin, Iowa and Minnesota, as also of all other States where they could be brought in connection with the common trunk thoroughfares. The local roads would at once cease to be mere feeders, and would be placed on an equal footing, thereby enabling the most insignificant local roads connected with the main trunks to sustain themselves by equalized advantages. The power of injurious monopoly on the part of the Railways near the sea-board as against those of the interior would be entirely done away. The effect of the common trunk thoroughfares proposed by the Congressional bills would be to multiply the roads of the interior and to point them all in the right direction for the public accommodation. How many we may need twenty-three years hence, when our population shall have gone up to seventy millions, we will not now discuss.

Seaboard and Roanoke Railroad.

The following is a comparative statement of the earnings of this road during the fiscal years ending February 28, 1861 and 1867:

	1860–'61.	1866–'67.
From passengers.....	$93,446 58	$156,252 12
" freight	151,662 86	211,674 25
" U. S. mails.....	8,000 00	3,010 39
" express.....	.....	19,195 27
" government trans.	.....	1,445 40
	$253,199 44	$391,577 43

The expenses of 1866–'67 were:

Repairs of road and bridges	$49,029 52	
Repairs of engines and cars.	20,616 32	
Train expenses	28,209 70	
Depot expenses.....	31,420 64	
Officers' salaries and office expenses.....	17,092 35	
Taxes, insurance, damages, etc.....	14,683 20	
		161,051 73
Earnings less current expenses.....		$230,525 70
Cash on hand March 1, 1866.....		2,377 29
Rent of Welden Bridge		5,250 02
Debts due—sundries in open account.		45,279 17
		$283,432 16
Purchase of real estate.....		$20,000 00
Reconstruction and repair.....		84,093 92
Two new locomotives, and two first class passenger cars		43,757 03
Steam tug and barge.....		14 076 46
Bills payable—paid this sum		52,893 42
Increase of material and supplies on hand.....		8,550 79
Discount, interest and exchange.....		4,770 81
Debts due the company—bills receivable		5,406 65
Sundries in open account.....		44,723 08
Cash on hand, March 1, 1867		5,160 00
		$283,432 16

The gross earnings of the company during the past year, including rent of Welden Bridge, have been $396,827 43; and the expenditures $239,683 73—divided as follows: for reconstruction, $78,460 52; for transportation, $161,223 21.

Trains passed over the Roanoke River Bridge for the first time on the 3d of April, 1866, and from that time the road entered upon a career of prosperity, highly gratifying to its managers. This bridge was built under the supervision of the company's master of road. It consists of thoroughly braced queenposts on trestles, where it lies over the island, and of six spans of Howe's truss, over the two streams that form the Roanoke River at Welden. It is 1,760 feet in length, and stands at an elevation of 44 feet above low water mark. The spans of truss are 162 feet, and the truss has a depth of 18 feet.

The road has been thoroughly ditched and drained; 39,718 cross-ties have been placed in the track; and in addition to the iron purchased when the road was relaid, $6,682 90 has been expended in the exchange of old rails for new. Most of the bridges were rebuilt prior to the completion of the Roanoke Bridge, and consequently have required but few repairs during the year.

The wharf property of the company, a portion of which was purchased from the City of Norfolk, and a portion leased for 20 years of the City of Portsmouth, has a frontage of 480 feet. The old wharves of the company have been rebuilt; and the depots which have been erected are more commodious than those in use in 1861.

The shops, which had received less injury than any other of the company's property, have received all necessary repairs; and additions have been made to the machinery to the extent of $5,500 besides the purchase of many tools of less magnitude.

Two new engines have been purchased at a cost of $34,000. Six have been thoroughly repaired. One has been almost entirely rebuilt. A tank switching engine has also been purchased, at a cost of about $13,000.

In addition to the purchase of two first class passenger coaches, at a cost of $10,500, the company have built one mail and smoking, 20 box and 26 flat cars, besides making extensive repairs to the old equipment.

A steam tug and freight barge has also been purchased at a cost of $14,000.

The company have agreed with the Wilmington and Welden Railroad Company to provide, by September, as their quota, 35 cars to be used on joint account for the benefit of trade between Portsmouth and Wilmington.

Should the claims of the company against the United States Government, for the use of their road and damage to their property, be settled, they will be enabled to place the road and equipment in a condition to meet, at once, all the requirements of traffic, and at the same time to pay a handsome dividend.

Much of the interest due by the company upon their bonds and guaranteed stock was unpaid on the fifteenth of September, 1865. Since then no interest has been paid until recently, as the company deemed it a duty to their bondholders, as well as to themselves, first to place their road and its equipment in a condition in which to earn money, with which to meet their liabilities. In February the company addressed a circular to each bondholder, in which they stated the condition to which their property had been reduced by war, and offering to pay, respectively, on the first days of April, May and June, one year's interest in cash, provided their bondholders would agree to receive the balance due them in negotiable notes, of equal amounts, payable in one and two years. These circulars met with the most gratifying reception, proving that the company's credit was in no manner impaired, and that the holders of their bonds appreciated the condition of the road, and the efforts made by its managers to redeem its obligations.

The company are gratified to find that they will be able to do more than comply with the strict provisions of their circular, and already they have provided for cash payments of all interest due on their first mortgage bonds.

The company have promptly met all their notes,

given on account of reconstruction, as they became due. Their bills payable have been reduced by the amount of $52,893 42.

The equipment of the road consists of 12 locomotives, 5 passenger cars, 1 passenger and baggage, 2 mail and smoking, 3 baggage, 58 house, 49 platform, 11 gravel and 20 hand cars. Miles run by locomotives, 168,037. Cost of repairs, $16,236 07; do., per mile run, 9.66 cents. Number of passengers carried, 40,067. Tons of freight, 55,097.

The following statement will show the financial condition of the company February 28, 1867:

Capital stock		$643,200 00
Preferred stock		225,000 00
First mortgage bonds payable	1880..	210,000 00
Third " "	1870..	71,000 00
Registered conv. " "	1865..	300 00
" " "	1873..	128,593 50
Interest on bonds, and dividends on common and guaranteed stock, including amount due March 1, 1867, remaining unpaid		107,721 51
Bills payable		103,171 87
Sundries in open account		1,372 40
Total receipts from transportation, etc.	$2,907,401 37	
Less expenses, interest, dividends, etc	2,364,813 39	
		542,587 98
		$2,032,947 26
Cost of road and property as per statement in 1862		$1,491,395 83

President and Gen'l Sup't.—JOHN M. ROBINSON.

Directors.—Moncure Robinson, W. Lyttleton Savage, Nalbro Frazier, George R. Vickers, Richard Walke, David A. Barnes.

Treasurer.—RICHARD WALKE.

Auditor.—JOHN T. HILL.

Vermont Central Railroad.

Among the recent expenses of this company may be mentioned the following: the Branch into Burlington, $450,000; the extension of the road to the Canada line $350,000; the purchase of the Stanstead, Shefford and Chambly road in Canada $364,000. To meet these and other expenses, it is proposed, first, to issue $250,000 additional stock of the Vermont and Canada road, making the total $2,500,000; second, to issue $300,000 additional Vermont Central and Vermont and Canada 8 per cent. ten year bonds (called "equipment loan"); third, to issue $500,000 twenty year 7 per cent. bonds, to be secured by a pledge or hypothecation of the stock and mortgage bonds of the Stanstead, Shefford and Chambly Railroad, and of all the net earnings of said road. These would carry up the total bonds and stock, representing these combined roads, to $8,500,000, on which the annual interest would be $630,000.

New Jersey Railroads—First Joint Report of the Associated Companies.

To the Stockholders of the Delaware and Raritan Canal, and Camden and Amboy Railroad and Transportation Companies, and the New Jersey Railroad and Transportation Company:

By an Act of the Legislature of New Jersey, passed February 15th, 1831, the two companies first above named were, with the assent of the holders of seven-eighths of the stock of each, united in effect into one company, and were thenceforward commonly known as the "Joint Companies." By an agreement, dated April 22d, 1836, between the "Joint Companies" and the Philadelphia and Trenton Railroad Company, the net profits of these companies were to be divided share and share alike. By an agreement between the "Joint Companies" and the New Jersey Railroad and Transportation Company, dated January 28th, 1867, confirmed by an Act of the Legislature of New Jersey, approved February 27th, 1867, and by the assent of the holders of two-thirds of the stock of each of the companies interested, the New Jersey Railroad and Transportation Company was united to the "Joint Companies" in substantially the same manner as the original "Joint Companies" were with each other. The four companies are thus united in interest as if they were consolidated into one company.

These four companies have a canal and two lines of railway—each connecting the cities of New York and Philadelphia, and all forming one single, though complex system. The most available of the two railway lines—that from Kensington to Jersey City—was constructed in three distinct sections, owned separately by the three railroad companies above mentioned. These three separately owned fragments of one railway, were of comparatively little value unless their owners could agree to *work* them as one railway. So long as the parties owning these fragments were not one in interest, this harmonious working was always uncertain in duration and imperfect while it lasted. Neither party could be expected to make sacrifices for the benefit of the rest; neither would make large investments to accommodate a through traffic which might some day be diverted by its associates: mutual jealousies might induce them to cripple each other's energies. Some of the parties being interested in only one of three routes, and the remaining parties having a greater interest in the other two, each directed the traffic it could control over that route which yielded most profit to itself; often gaining a small advantage to itself by a great disadvantage to the other companies. Hereafter the traffic will go by the route yielding most profit to the common treasury of the now associated companies. Hence the propriety, or rather necessity, of consolidating interests. The union of interests, now accomplished, adds very largely to the aggregate value of the property of the companies, and secures to the public an amount of accommodation not otherwise possible.

The affairs of the three companies incorporated by the State of New Jersey, are conducted by one joint board of directors, twenty-seven in number, consisting of the directors of each of the three companies. In addition to the officers appointed under the several acts of incoporation, a General President and Vice President of the associated companies, and a Secretary of the joint board, have been appointed. These three officers, the Presidents of the three constituent companies, and five other directors, constitute the Executive Committee; under whose direction all executive functions, except those referred by the joint board to special committees, are performed by the proper officers and agents. All the proceedings of the Executive Committee are laid before the whole joint board at least as often as once in every three months.

It is proposed to submit to the stockholders of all the companies some general statements and remarks, leaving the President of each company to explain matters belonging specially to his own company. In the exhibits, hereunto annexed, the affairs of the four companies that are one in interest, are presented as if they were one in form.

The condensed balance sheet shows that the aggregate outstanding full paid stock of the four companies, not including the stock of any company held by itself, or any of its partners, was, on the 1st day of January, 1867, in round numbers, thirteen millions of dollars. The part paid stock or "scrip" of the old "Joint Companies" was nearly two millions of dollars, on which nearly half a million was paid. Add to this, one and a quarter millions, to be issued under the agreement by the New Jersey Railroad and Transportation Company, and the whole stock then issued, not including any held by either of the companies, will be very nearly sixteen and a quarter millions, on which nearly two and a half millions were payable.

The aggregate undivided earnings of all the companies were, on the first of January, a little over two and a quarter millions, of which just half a million of dollars will be credited to the New Jersey Railroad stockholders on the stock to be distributed among them, as just mentioned, and nearly two-thirds of a million more was used in paying the January dividends.

The aggregate debt of all the companies, in round numbers, was about eleven and a quarter millions; so that, including undivided earnings and payments on scrip, the total liabilities are very nearly twenty-seven millions.

It will be seen from the statement, that the foregoing amount is invested, in round numbers, as follows:—The Delaware and Raritan Canal and its real estate and equipments, four and a third millions; the New Jersey Railroad and its equipments, including real estate and ferries, five and two-thirds millions; the Camden and Amboy Railroad, branches, real estate and equipments, including upwards of twenty steamboats, ten millions; the Philadelphia and Trenton Railroad, including real estate, one and two-thirds millions; and the investment in auxiliary companies, including real estate in their name, and advances to them four and a half millions.

The associated companies own directly, besides their interest in auxiliary works, sixty-five miles of canal—forty-three main line and twenty-two feeder; one hundred and four miles of double track railroad, and sixty-one miles of single track railroad; making two hundred and sixty-nine miles of main track, and about fifty-five miles of terminal tracks and sidings.

These works, as before mentioned, form three avenues of traffic between New York and Philadelphia: one *via* canal, all water; one *via* Camden and Amboy, a little over sixty miles of rail and thirty miles of water; and one *via* Trenton and Jersey City, all rail, except the ferry across the Hudson.

The canal is navigated by vessels carrying upwards of two hundred tons, and is especially calculated for coal and heavy goods: the route *via* Camden and Amboy for ordinary merchandise; the route *via* Trenton and Jersey City for passengers and the more valuable kinds of merchandise. The last named route is all double track.

The floating stock of the companies consists of thirty one available steamboats, of which twelve are ferry boats; (several of which are supposed to be the best ferry boats in the world:) four are passenger boats; three are freight boats; and twelve (eight large and four small) are used for steam towing; also, two large freight barges; about fifty schooners and coal barges, and about sixty Mauch Chunk coal boats.

The rolling stock of the companies consists of one hundred and ten available locomotives, besides several worn out, not counted; one hundred and eighty available passenger and forty baggage and mail cars, and about nine hundred eight-wheeled freight cars, besides "crates," dump cars,

&c. The Belvidere Delaware Railroad Company, whose stock is all owned by the "Joint Companies," have nearly five hundred eight-wheeled coal cars.

The companies have machine shops at Jersey City, Hoboken, Amboy and Bordentown, at which most of their machinery is now built and repaired.

For the accommodation of their employees at Amboy, Bordentown and other points, they have upwards of a hundred and fifty dwelling houses.

They have three piers or landings in the city of New York, for the different branches of their business; and extensive fronts on the Hudson in Jersey City, and on the Delaware at Camden and Philadelphia, and property at Kensington, Amboy, Trenton and other points, ready to accommodate their increasing business. The present value of the real estate held by the companies, directly or indirectly, outside the right of way, but necessary for their use, may be estimated at four millions.

The current receipts of the four companies, in 1866, were nearly eight and a half millions. The current expenditures, not including interest, a little over six millions. Of the expenditures, nearly six hundred thousand dollars were for taxes to the State and General Governments, and six hundred thousand were for steam-towing, on which there was no profit. The aggregate net profit of the four companies, after paying seven hundred thousand dollars interest, amounted to one and two-thirds millions—equal to twelve and four-tenths per cent. on all their stock, in other hands than their own, including the instalment paid on scrip stock.

The traffic through the canal, in 1866, was nearly three millions of tons; that on the railroads was eight hundred and twenty-five thousand tons, and four and a half millions of passengers; of whom two-thirds of a million were carried over the whole route—the majority of them, however, only short distances.

As the canal debouches at each end into a tidal river, at a distance from the terminus of the route, the companies (in order to insure dispatch rather than for direct profit) themselves furnish steam-towing facilities between the termini of the canal and the termini of the route. This accounts for the large number of steamboats owned by the companies. The amount received and expended for this service is, as before stated, over half a million a year.

The instalments payable after the first of January, 1867, on the stock issued last year by the "Joint Companies," amount to nearly a million and a half of dollars. Of this seven hundred thousand dollars are appropriated to the increase of the coal equipment on the railroads. The object is to give business to the Belvidere Delaware Railroad, the general business of which is competed for by shorter lines, and which is owned almost entirely by our companies, and, also, to provide for those who ship coal through the company's canal in summer, a winter outlet by rail. Without this, they would be driven to competing routes in winter, where they would be accommodated only on condition of staying there the year round. The instalments payable on the stock to be distributed by the New Jersey Railroad and Transportation Company, amounting to seven hundred and fifty thousand dollars, are to be expended in improving their road.

The property transported over the Camden and Amboy route, crosses the Delaware in the cars to and from the wharves in Philadelphia, on car floats, or floating sections of railway. A large part of it is transhipped at Amboy to and from large decked barges; upon which, as upon floating wharves, the carts at New York drive to receive and deliver their loads without landing on the pier.

It will, doubtless, be expedient to float the cars carrying goods on the Jersey City route, across the Hudson, in the same manner as they have been floated across the Delaware for some years past.

The cost of draying merchandise in New York, from the wharf on which it is landed, to the storehouses in the city, and afterwards bringing it back again to some other wharf for shipment, is estimated at two dollars per ton. It is under consideration whether or not to build storehouses at Jersey City and at Amboy, where property can be stored without this expense of drayage, and from which it can be shipped to other points without ferriage, or ferried over to the city when wanted. The customer will thus be enabled to pay to the companies full remuneration for storage, and effect a considerable saving besides.

The investment in auxiliary roads—a statement of which is appended—answers the double purpose of bringing business to the main lines, and of supplying the neighboring districts with roads, worked in harmony instead of competition with those lines. The companies have a controlling interest in upwards of two hundred miles of such roads—equal to the entire ownership of one hundred and fifty miles, or free of debt over a hundred miles. The most important of these are the Belvidere Delaware Road, extending from Trenton, sixty-seven miles, up the valley of the Delaware, and the West Jersey Road, from Camden south, and its branches, which practically extend the road from Amboy, *via* Camden, to Cape May. The Belvidere Delaware and West Jersey Roads form part of a continuous line, extending from Cape May, one hundred and eighty miles, to Belvidere, and crossing the main lines of our work, so as to form an X.

A railroad twenty-five miles long, between Pemberton and Hightstown, is now being constructed by the people of that wealthy and important district, at a cost of four hundred thousand dollars. Our companies are to operate this road, and pay interest on its cost, which, of course, is not included in the appended statement.

Another class of auxiliary companies, is that owning ferry property on the Hudson and Delaware rivers. The control of them was necessary to supply the last links in the routes from city to city, and to provide more abundant terminal facilities.

Pursuant to an agreement made in February, 1863, between our companies and the Pennsylvania Railroad Company, the latter has nearly completed a road called the "Connecting Railway," seven miles in length, from Frankford, on the Philadelphia and Trenton Railroad, three miles from the Kensington terminus, to West Philadelphia; thus giving the most direct connection possible between our works and the Pennsylvania, and the Philadelphia, Wilmington and Baltimore Railroads. The Connecting Railway is to be leased to the Philadelphia and Trenton Railroad Company, at six per cent. on its cost. From the nature and location of the work, crossing the river Schuylkill one hundred and twenty feet above its bed, and crossing over four railroads, and over or under many streets in the city of Philadelphia; from the magnitude and permanent character of the structures—all being of masonry or iron; from the high price of the land over which the road passes, and the high price of labor and materials at the time the work was done, the cost will be very great in proportion to the length—probably upwards of two millions of dollars. This road might have been built in a less permanent manner and at less cost, but the repairs and renewal that would soon be required would make it more expensive in the end, and would require from us an outlay of capital which is now furnished by other parties.

The rent of the Connecting Railway will be more than saved immediately, in the decreased cost of doing the present southern and western business. But the new connection with the Pennsylvania Railroad, avoiding transfers of passengers through the streets of Philadelphia, and transhipment of goods, ought to give us a very large increase of western business. The route from New York to the West, by way of Philadelphia and the Pennsylvania Railroad, is shorter than by either of the northern routes, to all points south and west of Cleveland. To Chicago it is more than forty miles shorter; to Cincinnati more than a hundred miles shorter. The number of passengers between New York and the West is estimated at half a million annually; of these we may hope to get at least one-third, or upwards of one hundred and sixty thousand. In 1866 we did get twenty thousand. The freight between New York and the West, by rail, is estimated at a million and a half of tons annually. We may expect to get half a million of it, which is three times as much as we get now. We may also expect that the improved connection will increase our southern freight, much of which has heretofore gone by sea.

The most effective argument made before Congress, in favor of another railway between New York and Washington, was the fact that the present route was divided among so many different interests and separate managements, and that the line was interrupted at Philadelphia. The recent consolidation of interests and the new connection at Philadelphia, will leave no room for such arguments hereafter. By the completion of the Connecting Railway, and the recent completion of the bridge over the Susquehanna, (the latter costing two and a quarter millions of dollars) the steam communication will soon be continuous by rail from the Hudson river to Baltimore; and the enlightened policy of those who control the road beyond Philadelphia insures, under the circumstances, (with only two instead of half a dozen parties) harmonious working. It is hoped that the parties owning the rest of the line to Washington, will soon make connections as perfect through or around Baltimore. It is hardly necessary to say that this route is nearer an air-line between New York and Washington than any other that is practicable.

As business revives and prosperity returns in the South, southern passenger travel will increase, and the importance of the new connection become greater and greater.

The necessities of the lines leading to Philadelphia from the South and West, and the demands of the public were such, that if we had not given them the best possible connection with our works, and thus a good outlet to New York, another outlet would have been made by other parties, and would have competed for our whole business.

As our companies own the three direct avenues of traffic which connect the two great cities of this continent, and which form portions of the best routes from the commercial centre to the South and West—as by the variety of their works they are enabled to do each kind of business that offers in the most advantageous manner—it is clearly their policy fully to prepare for the increasing traffic; and so to perfect their works and the arrangements upon them, that the public can reasonably ask for nothing more, and that they may depend upon the superiority of their facilities alone for protection against competition.

By order of the Joint Board of Directors.

ASHBEL WELCH,
April, 1867. *General President.*

The traffic on the works of the Associated Companies, in 1866, was as follows:

DELAWARE AND RARITAN CANAL.

"Superior" Tonnage, (higher qualities mdse.)	368,013
"Inferior" Tonnage, coal	2,282,203
Other	207,028
Total Tonnage of Canal	2,857,244

RAILROADS.

Passengers through between New York and Philadelphia	689,110
Passengers other, between Camden and Amboy and Phila. and Trenton R. R's.	887,862
Passengers other, on New Jersey R. R.	2,998,452
Total passengers carried	4,575,424
Through tonnage between New York and Philadelphia	382,288
All other freight	492,657
Total tonnage	842,895
Amount of specie	$56,693,772 49.

The current Receipts and Payments of the Associated Companies, in 1866, compiled from the separate reports, not including dividends or interest paid, were as follows:

	Receipts.	Payments.	Net.
Delaware and Raritan Canal Co.	$1,294,156 69	$360,513 83	$933,642 86
Camden and Am. R. R. & Tr. Co.	4,312,895 00	3,801,732 45	511,162 55

American Railroad Journal.

Saturday, May 18, 1867.

Stock Exchange and Money Market.

The Money Market has been remarkably uniform, since our last, in its more prominent features of an excessive supply, moderate call for accommodation, and steady rates. Call loans have been available in very liberal amounts, to the dealers in the public funds, at 4 per cent., and to the leading Stock Exchange firms, at 5@6 per cent. per annum. An effort was made on Wednesday, by the *bear* operators of the Gold and Stock Boards, to disturb confidence, by an alarming use of the reported suspension and embarrassments of some of the New Orleans banks doing business under the National act. It was alleged that these troubles involved some of the largest National Banks of our own city, and one of these—the Central National Bank, of Broadway—was not only specifically mentioned as having been adversely affected through its New Orleans connections, by the difficulties in financial circles there, but likewise by a serious defalcation on the part of one of its own officers. On inquiry, we learned that the bank is not in any form involved by the troubles at New Orleans; that the "defalcation of one of its own officers," was discovered four weeks ago, on an examination of the books of the third teller, who is the defaulter; that the defalcation is not a serious one at all; that the bondsmen of the defaulter will protect the bank from loss; and that an official investigation of the condition of the institution, which was made at the request of its vigilant President, resulted most creditably for the management. Notwithstanding the sinister rumors of a disturbing tendency, the market for money closed easily on Wednesday, without any alteration in prices. Strictly prime short date commercial paper has not been very plenty, and has been in fair request at from 6@7 per cent. per annum. The city banks last week gained $5,057,413 in their specie hoard, and $4,613,760 in their deposit line, while losing $2,590,768 of their legal tender reserve, and augmenting their loans, $2,805,271. Their circulation was increased $24,122. The legal tender notes were absorbed by the U. S. Sub-Treasury. The specie reserve of the banks is now $14,959,590, against $13,970,402 same time last year. The city bank deposits are now $200,342,832, against $217,552,853 week ending May 12, 1866. The legal tender reserve amounts to $67,996,639, against $85,049,559 same time last year. The circulation now stands at $33,595,869, against $24,693,259 same time last year. The loans are now $253,682,829, against $257,621,317 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $87,386,628 a day, against a daily average of $93,310,019 the preceding week, and $74,414,070 the week ending with April 20th. The current week's exchanges average $84,242,857 a day.

The main changes in the Philadelphia Bank footings, last week, were as follows: Increase of loans, $420,181; increase of legal tender reserve, $91,361; increase of deposits, $598,115; increase of specie, $20,709; and decrease of circulation, $11,642. This, like the statement of the New York city banks, gives further evidence of the increasing abundance of money at the leading financial and commercial centres.

National Bank notes to the amount of $22,600 were issued last week, making the total issue to 1,671 banks thus far, as given in our last, $302,717,056, against $282,555,440 at the close of the last fiscal year, June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $3,753,122, leaving, with the existing 1,647 banks, (having an aggregate capital of $422,913,861,) an actual circulation at this date, of $298,963,934. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,641,450; and for the public deposits, $38,902,950—making a total of $379,544,400. The Treasury Department, last week, redeemed and destroyed $447,860 of worn and mutilated fractional currency, and issued $166,585 worth of new.

The U. S. Sub-Treasury receipts, week ending with May 11, were $40,177,571, including $2,116,949 from customs duties; payments, $28,272,343; balance at the close of the week, $122,289,278,

against $110,334,049, at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $2,516,038, and payments, $3,119,120; on Tuesday, receipts, $4,256,370; payments, $2,778,405. The balance at the close of business on Tuesday stood at $123,114,161, against $113,914,369 a week previous.

Government revenues were moderate, last week. The excises, last week, yielded only $2,573,429, against $5,890,371, the preceding week; customs at the port of New York, $2,116,949, and at the outports, about $700,000 (in coin) more, making the grand total income for the week equal about $6,446,804 in currency, against disbursements of $2,233,236 on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $237,000,000.

Gold has been less firm, since our last. The speculative demand has been less animated, despite the increasing exports of specie to Europe. The customs inquiry has been quite moderate. The price receded from 138¼ at the opening to 135¼ on Monday, rallying again to 137¼ by about noon of Wednesday, under the dexterous manipulation of the New Orleans bank reports. It closed at 136⅞@137, on a tame and yielding market. A heavy shipment of specie was made to Europe last Saturday—the first large export of the season. On Wednesday, the *Persia*, for Liverpool, carried out $1,343,508, and the *Union*, on Thursday, it was said, would take a further sum of about half a million dollars. Considerable shipments were also anticipated this Saturday. Against this, we have to place the receipt of 500,000 francs by the *Java*, from Europe. The total imports of specie from Europe, and other foreign ports since Jan. 1, 1867, have been $892,614. The customs demand for Gold last week, averaged $352,825 a day; thus far, this week, it has been equal to $398,750 a day, or equal to a weekly aggregate of $2,392,500. The arrivals of specie from Europe, Havana and other foreign ports, during the past week were $163,012, and from California, $419,667. The total customs revenue of the Government, in coin, at this port since July 1, 1866, has been $108,650,216, against $117,147,859 same time in the preceding fiscal year. The total receipts of California gold at this port since July 1, 1866, have been $35,087,448, against $25,661,156 same time last year, showing an increase this year, of $9,426,292. The exports of specie from this port, last week, were only $1,777,562. The total outflow of specie from the port, thus far in the current fiscal year has been $27,933,113, against $20,288,635 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $2,661,000, making the total coin interest disbursements through the Government office, since July 1, 1866, $48,196,392, against $41,923,861 for the same time in the preceding fiscal year. The specie exports from San Francisco, from Jan. 1, to April 8, reached $10,751,071, against $10,487,429 same time last year, showing an increase, in 1867, of $263,642.

The total amount of gold certificates issued and redeemed by the U. S. Sub-Treasury here, together with the balance unredeemed on the 4th of May, is thus stated:

	Issued.	Redeemed.	Outstanding.
20s ...	$382,160	$203,200	$124,960
100s ...	5,288,900	3,703,800	1,585,100
500s ...	1,113,500	504,000	609,500
1,000s ...	25,694,000	21,660,000	4,034,000
5,000s ...	158,790,000	139,245,000	19,545,000
10,000s ...	5,000,000	5,000,000	.....
Total	$196,214,560	$170,316,000	$25,898,560

Government derived a revenue of $2,245,910 from customs duties, through the port of San Francisco, from Jan. 1, to April 10, 1867.

An improved demand prevails for foreign exchange, and the leading drawers quote rates a trifle higher. The supply of commercial bills is less extensive. Bankers' 60 day bills on London closed on Wednesday at 109¾@109⅞, and on Paris to 5.18¾@5.12½; sight bills on London to 110⅜@110½; and on Paris to 5.15@5.10. The offerings of produce bills have been comparatively moderate, this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $5,235,734, making the total value of exports since July 1, 1866, $156,762,351, against $198,019,645 same time in the preceding fiscal year.

Government securities have been in good demand for home investment, as well as for export, since our last, at a further improvement in prices. The new 5-20s of 1865 have been quite early bought by home purchasers. The country banks have been investing freely in them. The original 5-20s of 1862, and the earlier issued of the 5-20s of 1865, have been more sought after by foreign dealers, chiefly on speculative account, and as the available supply has been comparatively limited, prices have been steadily gaining in strength. Sixes of 1881, Seven Thirties, and Compound Interest Notes have been in fair, though relatively less urgent request. U. S. sixes of 1867 closed here on Wednesday at 134½; U. S. sixes of 1868, at 132½; U. S. sixes of 1881, 111¼@111¾; U. S. Five-twenties of 1862, ex-May coupon, 109⅛@109¼; U. S. Five-twenties of 1865 at 105⅝@106¾; U. S. Five-twenties of 1865, consolidated, 107⅞@108; U. S. Ten-forties at 99⅝@99¾, ex-coupon, and U. S. Seven-thirties at 105¾@106⅜. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

June, 1864	119⅛	May, 1865	114¼
July, 1864	118⅜	August, 1865	113¼
August, 1864	118⅛	September, 1865	112¾
October, 1864	117⅛	October, 1865	112¼
December, 1864	116⅛		

The railway and miscellaneous stock dealings of the week have been rather moderate in amount, and at variable prices, though the extreme changes have not been very important. The main call for share property has been from the street operators. There has been no demand of moment from "the outside public." The closing transactions on Wednesday were light, indicating a dull, and rather weak market.

The transactions in produce have been less extensive, since our last. Breadstuffs have been less freely dealt in, though prices have declined, especially for corn and oats. Corn rallied a little toward the close, on a revival of the speculative inquiry, chiefly on Western account. Cotton has been in more demand and has improved. Middling grades of cotton left off here on Wednesday buoyantly at 28½@30 cents per lb. as extremes. The stock of cotton now here is estimated at about 172,000 bales. The receipts at the port this week, have averaged nearly 2,200 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 550,500 bales, against exports of 371,672 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 1,691,000 bales against 1,837,166 bales same time last year; exports, 1,252,137 bales, against 1,348,971 bales same time last year; estimated stock at latest dates, 365,000 bales, against 383,347 bales same time last year. At the auction sale of Pittston Coal, on Wednesday, 30,500 tons were disposed of at from $4.10@$5.05 per ton of 2,240 lbs., delivered at Newburgh, indicating a slight reduction in prices. Foreign merchandise has been in less demand and depressed in price. This has been particularly true of dry goods, which have been more freely offered at drooping rates. The total imports of foreign dry goods, last week, were $1,231,921, and the total amount marketed $1,321,111. The value of foreign merchandise imported last week, was $3,800,756—making the grand total specie value of last week's imports of dry goods and merchandise, $5,032,677, and since July 1, 1866, $226,363,414, against $257,707,071 same time in the preceding fiscal year. The ocean freight market has been moderately active and rather firmer, with 563 vessels of all classes in port. For Liverpool we quote flour at 1s. 3d.@1s. 6d. per bbl.; grain at 2¾@3¼d. per bushel; cotton at $\frac{5}{32}$@$\frac{3}{16}$d. per lb.; and heavy goods at 10s.@20s. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	April 30.	May 8.	May 15.
Consols	91¼	91¼	92¼
U. S. 5-20's of 1862	71¼	71¼	72¾
U. S. 5-20's of 1865	69½	69¾	70¾
Erie	40½	41	42
Ill. Central	75	75½	76¼

The New York exports, exclusive of specie, for the week ending May 14, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$3,738,972	$3,235,734
Prev. reported	87,402,537	71,920,222
Since January 1	$91,141,509	$75,155,956

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$1,508,753	$1,351,921
Gen. merchandise	3,258,368	3,800,756
Total for the week	$4,767,121	$5,152,677
Previously reported	110,855,752	90,277,705
Since January 1	$115,622,873	$95,430,382

The commerce of New York from July 1st to date compares as follows:

	1865–'66.	1866–'67.
Imports merchandise.	$257,707,071	$226,363,414
Exports produce.	198,019,645	156,762,351
Exports specie	20,288,635	27,933,113

The balance in the Sub-Treasury on Wednesday was $122,318,235 82.

National Railroad Convention.

This convention, in which nearly all the principal railroad companies in the country were represented, assembled at the St. Nicholas Hotel, in this city, on the 8th inst. J. Edgar Thomson, Esq., President of the Pennsylvania Railroad Company occupied the chair, and S. L. Fremont and B. D. Hasell, acted as secretaries. The chairman, in opening the proceedings, briefly adverted to the objects of the convention. It was intended to establish, in connection with the immense capital invested in railways, an interchange of views as to their construction and general management for the commercial and financial benefit of the country. A report was read by the chairman of the Committee on Mail Service, which was accepted, with a recommendation to the different railways to furnish the committee with opinions and suggestive modes of combination on the subject. A resolution was offered for the formation of a Railway Bureau, and it was resolved that the report of the committee on that subject be recommended, with instructions to define a plan of organization for the formation of a railway association. A resolution was then proposed to the effect that a general and uniform system of charge for transportation be adopted on all railroads in the United States as should be deemed reasonable and equitable by the Legislature. The proposition was referred to a special committee. On motion, it was resolved that an equitable measure of remuneration should be made to railroad companies for the transportation of mail matter based on the rates now paid for other matter and by express companies by mail trains. The President intimated that from recent communications there was reason to believe that the Post Office authorities would adjust this matter. It was further resolved to take steps to prevent the use of private agencies for the sale of tickets on commission. After the transaction of some routine business, the convention adjourned to meet at Altoona, Penna., on the 18th of July next.

☞ By reference to the Advertisement of G. C. Gantley, General Agent, 229 Broadway, it will be seen that the all-rail great southern mail route is now open for the transportation of passengers and freight to Richmond, Nashville, Memphis, Mobile and New Orleans, and all intermediate points, *via* Washington, Lynchburg, Knoxville, Chattanooga, etc. Through tickets issued, and baggage checked through from New York.

☞ The Erie City Passenger Railway Co., will receive proposals, until the 1st of June, for the construction of 2 miles and 3,906 feet of the main line of their road, including rails, stringers, crossties, etc. A full description of the route of the road will be found in their advertisement in another column. A copy of the Act of Incorporation can be seen at this office.

Railroad Earnings.—Weekly.

The earnings of the Grand Trunk Railway of Canada for the week ending April 27th, 1867, were $122,894 00
Corresponding week of previous year. 129,969 00

Decrease $7,075 00

The earnings of the Marietta and Cincinnati Railroad the 1st week in May, 1867... $18,380 00
Corresponding week previous year.... 18,475 00

Decrease $95 00

The earnings of the Western Union Railroad for the week ending May 7, 1867. ..... $12,536 07
Corresponding week previous year.... 14,938 31

Decrease $2,402 24

The earnings of the Detroit and Milwaukee Railroad for the week ending May 9th, 1867, were $37,280 00
Corresponding week of 1866..... 35,320 00

Increase..... $1,960 00

The earnings of the Chicago and Rock Island Railroad for the 1st week in May, 1867, were..... $64,570 00
Corresponding week of previous year.. 77,357 00

Decrease $12,787 00

The earnings of the Chicago and Northwestern Railroad for 1st week in May, 1867... $180,286 00
Corresponding week previous year .. 164,117 00

Increase..... $16,169 00

The earnings of the Michigan Southern and Northern Indiana Road for the 1st week in May, 1867, were..... $81,021 00
Corresponding week of 1866 ..... 88,895 00

Decrease $7,874 00

The earnings of the Chicago and Alton Railroad for the first week in May, 1867, were $76,241 00
Corresponding period previous year.. 66,773 00

Increase..... $9,468 00

The earnings of the Michigan Central Railroad for the 1st week in May, 1867, were . $82,672 81
Corresponding week of previous year.. 78,542 45

Increase..... $4,130 36

The receipts on the Atlantic and Great Western Railway for the first week in May, six days, ending 7th, amount to $103,828, against $96,054 in the corresponding week of last year, showing an increase of $7,774.

Marginal Freight Railroad.

The bill authorizing the construction of the Marginal Freight Railroad in Boston, which has been before the Legislature of Massachusetts nearly the entire session, has passed to be engrossed. The proposed road will make a common connection between the various freight stations located in the outskirts of the city, and approach its water front from two opposite directions, North and South. It will necessarily have to traverse streets, such as Broad, India and Commercial, which are great business thoroughfares and encumbered with considerable moving merchandise. But this difficulty will be mostly obviated by running the trains by night; and whenever day trains are indispensable, horse power will be substituted for steam. Branch tracks will be laid down to the piers most available for heavy tonnage, so that the cars may be switched off and brought into close juxtaposition with vessels being laden or unladen. The *Commercial Bulletin*, from which the above is condensed, says:

This road will not only greatly facilitate the handling of merchandise, in bulk, intended for either inward or outward transportation, but it will effect a vast saving of expense and trouble both to shipping merchants and railroads. The former will make a great gain by it on the score of time and cost of trucking; while the latter will not, as at present, be deprived of the use of their rolling stock, by being obliged to permit the use of their cars for storage purposes. It will, on the whole, be a great acquisition to the commercial facilities of Boston, and if judiciously managed, as we have every reason to believe that it will be, must so lessen the cost of handling Western freight in transitu, as to attract to this port, and its commission merchants, a large additional volume of Western and interior trade.

The Argentine Railways.

The Secretary of the British legation at Buenos Ayres has reported in great detail as to the condition of affairs in the Argentine Republic with reference to British interests, and the foreign office have printed the same for general use. He enters with minuteness into the condition of the railway system as it at present exists in that country, and the prospects of its extension. He states that the system is at present in its infancy, the first line having been opened in 1857, but since 1862, 300 miles of rail have been opened and 124 miles in addition were to be opened about the present time. The nature of the country presents few difficulties for engineering works, being almost a level plain for 900 miles to the very foot of the Andes. The average rate of fare is 3d. first class, 1½d. second class, and 4d. per ton for freight per mile; accidents appear to be almost unknown, but the average speed is only sixteen miles an hour. The three lines owned by English companies have a Government guarantee of 7 per cent.; the cost of the lines has ranged from £6,500 to £10,000 per mile. The British minister adds the following observations as to future railways:

"It is, indeed, to be hoped that the Government of Buenos Ayres will not lose sight of the paramount importance of encouraging railway enterprises, and of removing all obstacles in the way of their being properly carried out; should it act in a contrary spirit it cannot expect that foreign capital will be embarked in undertakings of such great utility to this country, and indeed the actual lines of railway that have been guaranteed by law can only be considered in the light of experiments made; the question of any extension to them being mainly dependent on the manner in which the Government may meet the engagements it has contracted in connection with them. The works on the Central Argentine Railway were temporarily suspended in consequence of the provincial Governments of Santa Fe and Cordoba having failed to fulfil its obligations by ceding the land it had bound itself to give up. This difficulty, however, has happily met with an adjustment, and the works are being continued. The only railway that has been constructed in this country by the Government, namely, the Western line, is put up to sale for a sum of £700,000. There are four lines of railway in contemplation, but it is probable that many years will elapse before they are constructed. The following is an enumeration of them:

"The Eastern Argentine Railway, in the provinces of part the River Uruguay, which is effectually closed at Salto Grande to the passage of ships by some rapid falls. A concession for this railway, which is to extend over a distance of 200 miles, has been made to an English company, with a guarantee of 9 per cent. on £13,000 per mile, but has not been proceeded with. Should this line ever be completed the vast riches of the Southern provinces of the empire of the Brazils will find an outlet on the River Plate.

"The Nogoya Railway is destined to connect the interior of the province of Entre Rios with the banks of the River Parana. This railway was surveyed in 1864 by order of the Government. Its length is to be sixty-four miles, but no steps have been taken towards its construction.

"The Lujan and Salto Railway, in the province of Buenos Ayres. This line would be a branch of the Western Railway, and when completed, might lead to a further extension to Rosario, thus connecting that important river port with the capital of Buenos Ayres.

"The railway from Fraylo Muerto to Mendoza. This line will not be carried out until the Central Argentine Railway to Cordoba is completed. No line of railway in the whole of the Argentine Republic is likely to confer such benefits both in a mercantile as well as in a political point of view, as is the Central Argentine Railway. It will pass through the richest lands of this country, and by connecting the outlying interior provinces with that of Buenos Ayres, will conduce to give greater force to the general National Government whose present seat is in the capital of Buenos Ayres. Moreover, an extension of the Central Argentine Railway would reach the Andine province, and be the means of developing the vast wealth of the mining districts. This railway, too, may be destined at some future day to force a passage through the rugged walls of the Andes, and by descending to the plains of Chili link the waters of the Atlantic to those of the Pacific."

The New Railroad Constructor.

The following description of this machine is from the San Francisco *Bulletin*. Since its publication, the machine has been tested in the presence of a large concourse of the first citizens of San Francisco—bankers, merchants and machine men of all classes were present—and after trial it was pronounced a complete success. The machine levels the track, lays the ties, deposits the rails, and fastens them to their places. It is estimated that with a complement of twenty men it will do as much work per day as two hundred men without the aid of the constructor. It is the invention of W. D. Roberston, Esq., of Star City, Humbolt County, Nevada:

An apparatus which, by a combination of movements, will level the loose surface of the soil, place the ties at uniform distances, follow any curve and accommodate itself to ordinary gradients, deposit the rails with the chairs attached and nail them securely in their places, is too complex for detailed description in the columns of a newspaper; but we will give our readers such an account of it as will enable them to form some idea of its appearance. The frame of the machine is 60 feet long, 8 feet high and 12 feet in width, and with its trusses, struts and tie rods, has the appearance of the skeleton of a wooded bridge placed on a low railroad truck. The frame, however, is only supported over the truck wheels one-third of its length; the forward part of the frame, which is two-thirds of the whole, overhangs the ground on which the track is to be laid. To preserve the balance of the apparatus, the heavy stringers, which give strength to the machine, taper gradually to the front, so that without the engine and boiler, or any load of ties, rails or other ballast, there is no possibility of its tipping forward. When completed, it will have a ten-horse power engine between the two supporting trucks, and with 20 or 30 rails laid lengthways and a ton or two of ties stored tranversely at the extreme rear, the suspended portion, when the concern is in motion, will be as firm and solid as if supported on wheels the entire distance. As the machine travels forward it will move on rails of its own laying. In front of the machine is a plough, which levels the ground for the permanent way,

The ties are brought from the back over the machine and above the heads of the workmen by two endless chains, and are laid on the ground in front exactly in the position required. On each side of the motive power, on the rear of the platform, are the stacks of rails, which are picked up singly by clamps connected with a hoisting apparatus, raised to a sufficient height, and while in suspension are run forward by means of overhead cars and tracks till they hang over the spot they are destined to occupy. The chairs are slipped over the rail ends as they travel, and at a signal by the foreman the rails are lowered by machinery to their places. The chairs have then only to be nailed firmly to the woodwork, the spikes driven home, and the work is complete and the machine moves on over the road it has just constructed. Fresh ties can be constantly supplied by the track behind without stopping the work. When the grade rises or descends, the front of the machine can be elevated or depressed by a system of rods and screws to a nicety. The constructor will, if necessary, turn itself on a radius of 200 feet. The position of the managing engineer is on a platform built above the heavy framing of the machine, where, housed as comfortably as the pilot of a river steamer, he can overlook all the machinery in the work, direct and control, and survey the ground ahead and view the finished line behind. The machine requires 20 men to keep it in operation; and it is said, that if worked with three shifts of hands, day and night, it will do six times as much work as three times the number of men can without its aid. It will revolutionize the system of railroad constructing, laying a track from six to twelve miles per day.

Grimshaw's Patent Improved Compressed-Air Hammers.

Messrs. Thomas Prosser & Son, No. 15 Gold street, N. Y., are agents for the sale of Krupp's Patent Cast Steel Railway Tires, Cast Steel Rails, Wheels, Axles, Springs, etc., etc. Also Grimshaw's Patent Improved Compressed-Air Hammers, which they consider an important invention, as will all who are familiar with the inconvenience arising from the use of steam direct in the Nasmith and other steam hammers, arising from the rapid condensation of steam in long pipes as well as in the cylinder of the hammer itself when working intermittingly. These machines are under perfect control, and will give any kind of blow required, from a *live* sharp *pick-up*, heavy or light, to a mere squeeze or dead pressure blow to crush ores, &c.

The operating compressed air is produced in the same, or in a separate machine, and is worked automatically or by hand with varying intensity, according to the nature of the work and the *instant* will of the operator. The exhaust air both blows the scale off the work and sprays it with water, if required, and during the intervals, when not required for other work, the air-pump or compressor is available as a fire-blowing machine, giving a very powerful blast.

Both steam and water power are available as motors, and from one compressed air or blowing machine any number of Stamp Hammers or similar machines may be driven to great advantage, without belts, pulleys or shafting, and a machine may be removed from one place to another by merely disconnecting the compressed-air pipe.

There is no danger of knocking out the ends of the cylinder, or bending the piston rod by striking water, as is the case with the Steam Hammer, unless there is a continuous blowing through, kept up at great cost, and in continual fear.

Compressed-air machines are always intact, ready to stop or start at any moment without any waste of power, labor or oil to keep shafting, pulleys and belts running when not wanted, neither is there any escape of vapor to tarnish bright work, nor of condensed steam to spoil that which is being planished.

The steam engine and blower combined are of the most simple construction, and well calculated for economical operations, for all the advantages of applying compressed-air, instead of, or with steam, are not yet told or even known. Steam is subject to condensation from compression and expansion alike, but air is not thus affected, and therefore, *unlike steam*, it admits of the full benefit derivable from the principle of expansive working being attained. The compression of air develops heat and additional pressure, which is available in work before it is expanded, to relieve the back pressure when it leaves the machine quite cool, thus proving, that the heat developed, has been fully utilized in the machine *which* produced, or rather which used it. And finally, the compressed-air machines may be worked at any distance from the compressor, as there is no condensation, which is so fatal to the economical use of the Steam Hammer under such circumstances.

Erie Railway—Krupp's Cast Steel Tires—The Miller Improvement.

OFFICE SUPERINTENDENT MOTIVE POWER AND MACHINERY, NEW YORK, Dec. 31, 1866.

H. RIDDLE, ESQ., GEN'L SUP'T:

Dear Sir:—In submitting the cost for repairs of engines, cars, &c., for the year ending December 31st, 1866, it is extremely gratifying to me to be able to exhibit such a marked reduction over the year 1865, more especially as our locomotive mileage for 1866 exceeds that of the previous year 270,111 miles. The actual decrease per mile run for repairs of locomotives, being nearly 30 per cent.

This reduction is not due to a less *quantity* of work performed, as on December 31st, 1865, with a total of 360 locomotives upon the road, 94 were under repairs, while on December 31st, 1866, with a total of 371 locomotives, but 74 were under repairs. Neither is the reduction due to the *quality* of work performed, as it is a fact patent to all, that the general condition of our locomotive equipment is very considerably improved. We have applied during the year, 304 Krupp cast steel tires, and I cannot allow this opportunity to pass without expressing myself satisfied at the result of the adoption of steel tires upon our whole equipment; in fact, one of the great causes of the reduction in our expenses lies in the increased efficiency of our locomotives furnished with steel tires. Were it not for these, our heavy six-wheel connected freight engines would be inefficient, from the rapid depreciation of iron tire. You will notice that the cost for repairs of passenger and baggage cars show an increase of nearly $25,000. A portion of this increase is due to the fact that several coaches have been constructed and charged to repairs, replacing others which were destroyed or unfit for use. The general condition of our passenger equipment has been much improved and we have more than made good the depreciation. The application of Miller's car platforms, couplers and buffers, is an improvement in the right direction, and has already, in several instances, averted serious damage and perhaps loss of life.

From the present excellent condition of our equipment in the machinery department, we can confidently expect to be able to still further improve its condition and show a constant yearly depreciation in the cost of maintenance. The decrease in the cost of repairs has been largely effected by the improved condition of the track and road bed, and I think the actual and marked appreciation in the value of the property of the company, in every department, should be a source of congratulation.

The decrease in the cost of running, i. e., cost of engineers, firemen, wipers, &c., and cost for oil and waste is also very gratifying, amounting to $94,571 72, even with increased locomotive mileage.

This reduction is mainly due to a more perfect organization in this particular branch of the machinery department, and is a result, which under the circumstances is very satisfactory to me. Hoping my anticipations for the future may prove to be well founded. I am, truly yours,

H. G. BROOKS, *Sup't M. P. & M.*

Bessamer Steel.

A large number of iron manufacturers and scientific men met on the 9th inst., at the Steel Works of Messrs. Winslow & Griswold, Troy, N. Y., to witness the conversion of Iron into Steel, by the Bessamer process. The exhibition was deeply interesting and highly satisfactory. This discovery is justly ranked as one of the most important of the age, and it has fallen into the right hands to secure its full development. Messrs. Winslow & Griswold have the capital and the energy requisite, and Mr. Bessamer could have found no better representatives in this country.

The works at Troy have been in operation, on a small scale, for about a year. The new works, just completed, are very extensive, and are capable of turning out from *fifty to seventy tons of steel per day!* To reach this capacity, the proprietors have expended nearly half a million of dollars. But they are sure of a prompt and an abundant return.

There is but one other similar establishment in this country; but Messrs. W. & G., and their associates, have sold rights to several other companies, who are putting up works at various points.

The establishment at Troy is perfect. Some of the machinery used—particularly the hydraulic cranes and hoisters—is novel and wonderful; and everything requisite to save labor and to facilitate business indicates the highest genius, stimulated and brought into practical requisition by the most liberal expenditure of capital.—*Albany Evening Journal.*

Cleveland Railroad Convention.

A convention, composed of leading railroad officials was held at Cleveland, O., on the 9th inst., at which most of the principal railroad and steamboat lines were represented. The object of the convention was to secure, if possible, a restoration of former freight rates and the maintenance of amicable relations with regard to competing business. Among the questions discussed were those relative to paying commissions to fast freight lines for the purpose of influencing freight shipments, and the abolishment of the pass system in the case of drovers, or the abolishment of all free passes given on account of freight received. These questions went into the hands of committees. The convention adjourned, to meet in Chicago on the 10th.

Southern Maryland Railroad.

The commissioners appointed under the act of the last General Assembly of Maryland, to obtain the survey of a route for a railroad from Baltimore city to Drum Point, at the mouth of the Patuxent, met in Baltimore on the 7th inst., and appointed Colonel George W. Hughes, of Anne Arundel County, Chief Engineer, to locate the route of the road. The act of the Legislature appropriates $5,000 for the purposes of the survey, and requires a report of the same to be made to the Governor or the next Legislature.

Monongahela Valley Railroad.

A meeting of the corporators of this road was held in Pittsburg on the 10th inst. It was decided to accept the charter granted at the last session of the Legislature, and to open books for subscription to the capital stock of the company, at the Monongahela House in Pittsburg, on the 6th of June, to continue open for three days. It was resolved to hold a general meeting of the corporators and all persons interested in the construction of a railroad along the Monohgahela River, at Elizabeth, on the 30th of May.

Commerce of New York.

The foreign imports at New York for the month of April are officially stated as follows:

	1866.	1867.
Entered for consumpt'n.	$13,366,488	$10,800,747
Entered for warehous'ng	10,159,657	13,327,839
Free goods	1,152,683	1,232,997
Specie and bullion	161,817	271,710
Total entered at port	$24,840,605	$25,633,293
Withdrawn fr. warehouse	8,640,260	8,838,610

The foreign imports at New York for four months from January 1st, were:

	1866.	1867.
Entered for consumpt'n.	$64,513,488	$46,586,489

☞ The survey for a route for the Baltimore and Potomac Railroad is progressing rapidly.

The Taxes on Iron Castings.

In reply to a letter inquiring if castings made for reapers, mowers, thrashers, separators, wheat drills and cultivators are exempt from taxation under that clause of the act of March 2, 1867, which exempts castings made for machinery, &c., the Commissioner of Internal Revenue stated that under the law as amended by the acts of July 13, 1866, and March 2, 1867, the following classes of castings are exempt from taxation:

1. Castings made for particular articles, machines or structures, all of which are enumerated, as for instance, castings for locks, safes, looms, spinning machines, steam engines, hot air and hot water furnaces, sewing machines, cars and scales, and castings for iron bridges.

2. Castings of a particular kind or for particular use, as malleable iron castings, unfinished; and castings for hollow ware.

3. Castings made for articles which are not enumerated, but which articles are liable to tax in a finished state.

4. Castings made for machinery.

All castings which are not exempt under one of the above heads are liable to the specific tax of $3 per ton.

These are the following, to wit:

1. Castings used for buildings or permanent structures, except castings for iron bridges.

2. Castings which are complete articles in themselves, and not made component or constituent parts of other articles, &c.

3. Castings which are intended for and used as component or constituent parts of other articles, except such as are used in the manufacture of shafting or gearing machinery; and of cars, scales, articles, machines, instruments, or engines, on which a tax is assessed and paid in a finished state.

The agricultural implements or machines enumerated in your letter are all exempt from taxation in a finished state; the castings, therefore, used in their construction come under the third class enumerated above of *taxable castings*, and not under either of the exceptional or exempted classes.

Interest and Dividends.

The Housatonic Railroad Company have declared a net dividend of four dollars per share on the preferred capital stock, payable on the 25th inst., at the Treasurer's office in Bridgeport, Conn.

The Pacific Mail Steamship Company have declared a dividend of three per cent. out of the earnings of the quarter ending April 30, payable June 1.

The Northern (N. H.) Railroad Company have declared a dividend of $4.00 per share, payable June 1.

New Railway from Sunbury to the Lehigh and Wyoming Coal Fields.

The engineers are now on this new line from Sunbury to the Lehigh and Wyoming coal fields. The proposed road runs nearly parallel with the Lackawanna and Bloomsburg Railroad, but on the opposite side of the Susquehanna River.

This project appears to be for the benefit of the Northern Central and the coal fields, but in opposition to the present lines from the Wyoming coal region to Baltimore and New York, particularly the Delaware, Lackawanna and Western Railroad. Much of the stock has been subscribed, and five dollars on each share paid in. We presume the road will be commenced at once, and completed in reasonable time.—*Miner's Journal.*

☞ Books of subscription to the Capital Stock of the National Trust Company of the city of New York, will be opened at the Ninth National Bank, 333 Broadway, on the 22d inst. The amount required is $1,000,000.

Paris Exposition.—Locomotive "America."

The Locomotive *America*, contributed by the "Grant Locomotive Works, of Paterson, N. J.," to the Paris Exposition, has it is said, been awarded the gold medal. The Paris correspondent of the Boston *Journal*, in a letter to that paper dated April 23d, says:

The jury on locomotives came to a decision yesterday on the merits of the different machines. The competition is great. England has a large number. France has at least a dozen. Austria and Russia have three or four each. The Austrian and French members of the jury took exception to the "America" because it was so light in some of its parts, and also to the amount of polish to the iron work, which they thought was more for show than utility. They claimed that the lightness of some of the machinery was a sacrifice of strength to beauty. But fortunately the English member of the jury is well informed on locomotive engines, and he explained that the railroads in America are of an entirely different construction from European roads; that the country is new, and the roads cheaply built, and the ties are subject to displacement from frost; that to ride over rough roads there must be elasticity in the machinery; that American engineers had difficulties to contend with wholly unknown to Europeans; that, taking all things into consideration, the American locomotive was superior to any other in the Exhibition. His arguments were so convincing that the other jurors gave way and *awarded the gold medal to the "America."* This is a great triumph, and it has been achieved through the intelligence and honesty of the English juror. Unfortunately I have not his name, but he is thoroughly conversant with American railways and American engineering, and though his own country is one of the largest competitors, he has been strenuous for justice and has succeeded in obtaining it for the United States.

The proprietors of the locomotive deserves great credit for their spirit in sending this specimen of American mechanism, at a large outlay of money, not expecting any return from sales in Europe; for though America can make superior machines, she cannot compete in price with the locomotive builders of England and France.

Danville, Hazleton and Wilkesbarre R. R.

This road will commence at Sunbury, about 56 miles north of Harrisburg, where it will connect with the Northern Central Railway, and run thence to Wilkesbarre, *via* Hazleton, thus opening a new outlet for the coal of the Luzerne region. The road will take the east bank of the North Branch, from Hazleton, following the course of the river to Catawissa where it will follow the Catawissa Creek in the direction of Hazleton, from which place a railroad to Wilkesbarre has been projected for some time. The charter is represented as being extremely liberal giving great advantages and facilities to those who are about to engage in the enterprise. Much of the stock has already been subscribed, and five dollars on each share has been paid. A corps of engineers, under the direction of F. C. Arms, Esq., of Hazleton, have already commenced the survey of the route from that point. The *Gazette* says there is no doubt that the work on the road will be pushed vigorously, for there is not only great energy connected with the enterprise, but capitalists of large means have connected themselves with it. When completed, it will assist, with the Northern Central, Philadelphia and Erie, Shamokin Valley and Middle Creek Railroads, in making Sunbury one of the most prominent railroad centres in the State.

Vicksburg and Meridian Railroad Co.

At the annual meeting of the stockholders of the Vicksburg and Meridian (formerly Southern) Railroad Company, held at Vicksburg, Miss., on the 6th inst., the following Board of Directors was elected for the ensuing year, viz: Morris Emanuel, Thos. Rigby, A. B. Reading, Wm. Crutcher, Shepherd Brown, Peter Anderson, Thos. M. Smedes, J. R. McDowell, Thos. S. Dabney, D. W. Flowerree and Wm. E. Morris.

The act passed at the last session of the Legislature—authorizing the change of the name of the road to the "Vicksburg and Meridian Railroad," granting to it all the rights, privileges and powers which were granted to and belonged to the 'Southern Railroad," and made subject and liable to all contracts, debts, obligations and demands of any kind to or for which the Southern Railroad Company was subject and liable—was accepted, and the company now have the new and more appropriate and expressive name.

The Stockholders accepted two other acts passed at the last session of the Legislature, one to authorize non-resident stockholders to appoint whom they please as proxies to vote their stock, removing the former prohibitions. The other was, to convene meetings of the stockholders on a notice of thirty days, instead of sixty days as required by the charter.

At a meeting of the new Board, after the adjournment of the stockholders' meeting, the following officers were elected for the ensuing year, viz: Morris Emanuel, President; Thos. Rigby, Vice-President; and N. G. Bryson, Secretary and Treasurer.

Little Rock and Fort Smith Railroad.

A meeting of the directors of this road was held in Van Buren, Ark., on the 24th ult. The *Press* of that city says: "It was decided to order the location of the road from Little Rock to Lewisburg, a distance of about fifty miles. As soon as the survey of this part of the road is completed, agents will proceed to New York for the purpose of contracting for the construction of twenty or fifty miles of the road, and negotiating for the necessary means. The projected consolidation with the Memphis and Little Rock road, has in all probability received its quietus by the late sale of that road to the Memphis and El Paso Company, an interest in direct antagonism to ours, or the Thirty-fifth Parallel Route."

Resolutions were adopted to comply with the late act of Congress renewing the land grant, and accepting the late act of the General Assembly amending the charter of the company.

Frederick and Pennsylvania Line R. R.

Books for subscription to the stock of this company will be opened on the 20th inst., at Frederick, Walkersville, Woodsboro', Middleburg and Taneytown, Md. The capital is to be $1,000,000, in shares of $50. As soon as 1,000 shares are subscribed, an organization will be effected. We learn that the Board of Commissioners have employed Mr. Jos. S. Gitt, of New Oxford, late engineer of the Western Maryland Railroad, to survey and prepare a profile and estimate of the cost of the road from Frederick to the State line, in the direction of Littlestown. No doubt is entertained that a line very direct and of easy grades, will be found. The Piney Creek, which heads near Littlestown, the Monocacy, and Israel's Creek, offer a valley route almost the entire distance. Much interest is felt in the work, and it is hoped that early success will attend it. Frederick is about 3 miles from the main line of the Baltimore and Ohio Railroad, with which it is connected by a branch. The road will be about 30 miles in length, and when built will make a connection with the Littlestown Railroad, and through that road, and the Hanover Branch, with the Northern Central Railway at Hanover Junction, 39 miles south of Harrisburg. The opening of this route will give the people of Frederick and Carroll Counties access to the anthracite and lumber regions of Pennsylvania, and also open a new outlet for the Cumberland coal, which will stimulate manufacturing enterprizes in both York and Adams Counties. The survey of the route has already commenced.

Important to Travelers and Shippers.

TWO THROUGH TRAINS DAILY.

The All Rail Great Southern Mail ROUTE

IS NOW OPEN FOR THE TRANSPORTATION OF PASSENGERS AND FREIGHT TO

New Orleans, Mobile, Memphis, Nashville, Richmond.

AND ALL INTERMEDIATE POINTS, VIA

Washington, Lynchburg, Knoxville, Chattanooga, &c.

☞ THIS ROUTE ISSUES TICKETS & CHECKS BAGGAGE THROUGH FROM NEW YORK.

Passengers leave New York at Jersey City Ferry, foot of Courtlandt street, at 8 A. M. and 7 P. M.

ERIE CITY PASSENGER RAILWAY.

CONTRACTORS TAKE NOTICE.

PROPOSALS WILL BE RECEIVED UNTIL 1st June next, for the construction of the Main Line of the ERIE CITY PASSENGER RAILWAY, located in the City of Erie, Pa., and commencing at the corner of Second and Holland Streets, extending Westerly on Second St., a distance of 1,100 feet to State Street, and thence Southerly on State, Turnpike, and Peach Streets, a distance of 6.130 feet to Buffalo Street. That portion of the route located on State, Turnpike and Peach Streets is paved with stone. The part on Second Street is unpaved. The above being designed to be a double track railway, is equal to 14,460 lineal feet or 2.738 miles.

It is intended in the course of another year to build some four miles of branches.

Parties making proposals will please state the style and weight of rail; size of stringers; kind of timber; size of cross-ties, and distance apart; together with the manner of construction generally.

References will be required from contractors, and the Company reserve the right to reject any bids as they may deem for their interests.

Proposals should be enclosed in an envelope, marked "Proposals," and directed to

EDWARD J. COWELL,
Secretary of the Erie City Pass. R. W. Co.,
2t20 Erie, Pa.

NEW YORK.

W. C. POTTER, Vice Pres't.
J. M. ALLEN, Sec. and Treas. **LICENSES GRANTED.**

PLASTIC SLATE
FOR
Roofing & Other Purposes.

The process of reconstructing Slate Stone from a disintegrated state was
PATENTED FEBRUARY 21ST, 1865.
It is a combination of
Pulverized Slate and Viscous Matter,
(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.

As a Roofing Material it Stands Unrivalled.

A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.

Frost does not Crack nor Heat Dissolve it.

The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and

Perfectly Fire-Proof,

It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

SCHOOL OF MINES,
COLUMBIA COLLEGE,
East 49th Street, NEW YORK.

FACULTY:

F. A. P. BARNARD, S. T. D., LL. D., President.
T. EGLESTON, Jr., E. M., Mineralogy and Metallurgy.
FRANCIS L. VINTON, E. M., Mining Engineer.
C. F. CHANDLER, Ph. D., Analytical and Applied Chemistry.
JOHN TORREY, M. D., LL. D., Botany.
CHARLES A. JOY, Ph. D., General Chemistry.
WILLIAM G. PECK, LL. D., Mining Surveying.
JOHN H. VAN AMRINGE, A. M., Mathematics.
OGDEN N. ROOD, A. M., Mechanics and Physics.
JOHN S. NEWBERRY, M. D., Geology.

The plan of this School embraces a three-years' course for the degree of ENGINEER OF MINES, or BACHELOR OF PHILOSOPHY.

For admission, candidates for a degree must pass an examination in Arithmetic, Algebra, Geometry and Plain Trigonometry. Persons not candidates for degrees are admitted without examination, and may pursue any or all of the subjects taught. The next session begins October 7th, 1867. The examination for admission will be held on October 3d. For further information, and for catalogues, apply to

DR. C. F. CHANDLER,
Dean of the Faculty.

FOR SALE
3 LOCOMOTIVES,
4-81-2 GAUGE,

All thoroughly REBUILT by one of the best makers in the country, and ready for immediate use.

1—Cylinders 14x22, Link Motion, 4-56 in. Drivers connected, Copper Flues, Weight about 24 tons; 8 wheeled Tender, 1800 gallons.

This Engine has always worked admirably; Steams freely with dry or green wood, works and wears perfectly smooth; Well springed and brassed all around. Proportions every way suited to power. A good and stylish model, all in excellent order.

2—Cylinders 15x20, Link Motion, 4-56 in. Drivers connected, Copper Flues, weight about 23 tons, 8 wheeled Tender, 1,800 gallons.

Is a smart smooth working Engine, suitable for any work; has a good record throughout.

3—Cylinders 15x20 Hook Motion, 4-66 in. Drivers connected, Copper Flues, weight about 24 tons; Tender, 8 wheeled.

Every way perfectly sound, well brassed and springed up. All in fine working condition.

These Engines will be sold VERY CHEAP to close a transaction, and are GREAT BARGAINS to any company wanting this sized Engine.

KASSON & CO.,
62 Broadway, New York.

Thistle Mill Waste,

A new and Superior Article of WOOLEN Waste, combining the following

ADVANTAGES,

1st. It is 30 per cent. lighter than ordinary waste.
2d. It will absorb 25 per cent. more oil.
3d. Has greater elasticity and will wear longer.
4th. It is less liable to ignite.
5th. And has a value as old waste.

The use of Wool as an ANTI FRICTION material is too well known to require discussion.

This waste is manufactured expressly for use in packing Locomotive and Car Journal Boxes, and will be sold as low as the best Cotton Waste.

The old waste taken in exchange at a price—including weight of oil, dirt, &c.—which will reduce first cost over one-half.

Small Sample Bales furnished FREE for trial.

KASSON & CO.,
15tf **62 Broadway, New York.**

New York, Saturday, May 25, 1867.

Railroads of Maine.

In 1860 the aggregate cost of 472 miles of railroad lying wholly within this State was $16,576,385. In 1866 the mileage had increased to 509, costing $8,498,822, or an average of $36,315 per mile. To these it would be fair to add the Portland and Montreal line, from the New Hampshire State line to Island Pond, a distance of 71 miles, built entirely by the capital of Maine, and costing an additional sum of $3,606,023—making the aggregate length 580 miles, and the aggregate cost, $12,104,845. The following is a list of new enterprises now in progress:

European and North American (Bangor to St. John	194
Piscataquis (Bangor to Dover)	36
Winterport (Bangor to Winterport)	13
Belfast and Moosehead (Belfast to Newport)	35
Newport and Dexter	15
Somerset (Waterville to Solon)	28
Knox and Lincoln (Bath to Rockland)	45
Maine Central Extension (Danville to Portland)	28
Portland and Rochester (Saco River to N. H. Line)	28
Portland and Ogdensburg (Buxton to State Line)	36

Work is now in rapid progress on the line of the Eurepean and North American Railway. The work of laying rails will commence about the first of June, and be completed to Milford by the 4th of July, 15 miles, and extended 40 miles further the present year, reaching the tannery village at Winn 55 miles from Bangor in all, this year.

The Piscataquis road branches off from the European and North American Railway at Milford, reaching the slate quarries at Brownville, a distance of 30 miles, to which road, as a branch of the European and North American Railway, the city of Bangor has authority to loan its credit for $500,000; and the work will commence as soon as the subscriptions are filled up to $400,000. Bangor has already voted to loan its credit for $1,000,000 to the European and North American Railway and this aid, with the $400,000 already expended on the line, will enable the enterprising contractors, Messrs. Pierce and Blaisdell, to complete the first 55 miles of road. These contractors build the entire line from Bangor to St. John. A large force is now at work on the St. John end of the line, and it is believed that the line may be carried through within three years, in case the expected aid is obtained from Congress by the payment of the claims of Maine and Massachusetts against the General Government, for which a bill was unanimously reported by the Senate Committee on Foreign Relations, at the recent session of the Fortieth Congress. Maine, in addition, has appropriated a valuable public domain to aid the construction of this road beyond Winn, subject to a debt due Massachusetts of $150,000.

Large expenditures have been made in the construction of this line the past winter. Front street in Bangor is excavated to a width of 90 feet through solid rock, extending from the Maine Central depot to the Kenduskeag river, across which a bridge of 500 feet is to be thrown, the piers of which are already in place. All the rock work is done from Bangor to Oldtown, and the piers across the Stillwater river at Orono, of over 1,000 feet in width, are in place, as also the piers across the Penobscot at Oldtown. The wood work for these bridges is already prepared and will be put in position at an early day.

The length of this line in Maine is 110 miles, and in New Brunswick 84 miles. The most expensive sections are at each terminus. The 15 miles from St. John, westward, cost three times the average of the residue of the work. The Government of New Brunswick donate $10,000 per mile as the work progresses, to be paid in gold. The cost of iron in New Brunswick is about $40 per ton, or one-half its cost in the United States.

Surveys are in progress on the line of the Winterport Railroad. The line from Newport to Dexter is leased to the Maine Central Road, and the capital is provided for its construction. The cities and towns on the line from Belfast to Newport are authorized to subscribe 20 per cent. of their valuation, to the stock of the Belfast and Moosehead Lake Co. The city of Belfast and several towns have already voted in favor. Work is to commence on this line as soon as the amount of $900,000 is provided.

The Somerset Road is to be built by the people on its route, and a subscription of $400,000 is already assured, and several towns have already filled their quota. From the Kennebec river to Rockland, a contest on the question of route delays progress on the Knox and Lincoln Road. The city of Bath has subscribed $123,000 to its stock, and voted a loan of its credit for $600,000 to the Knox and Lincoln Road, on condition that it shall take the Bath route. The cities and towns beyond seek to strike the Kennebec as high up as Richmond. Surveys of the different routes are now in progress.

The question of extending the Maine Central Line into Portland, from Danville Junction, depends for the present upon the action of the Grand Trunk Line; but the strong local support of the rich towns in Cumberland county, lying west of the Grand Trunk Road, insures this extension before many years, if not at once.

From Portland, west, two new lines are in contemplation; one, reaching the State line at Fryeburg, up the Saco valley, to extend thence across New Hampshire to a connection with the Vermont system of roads, reaching east from Montpelier. Portland has just voted $700,000 to aid this line, called the Portland and Ogdensburg road. This sum, with the aid to be guaranteed by the towns on the route, will insure this line to Conway, forming the shortest line to the White Mountains. The extension of the Portland and Rochester road,

now in operation from Portland to the Saco river, a further distance of fourteen miles to Alfred, the shire town of York county, is already assured by the $250,000 voted by the city of Portland. A further sum of $450,000 has been voted by Portland, to extend it to the State line, as soon as the means are provided to extend it further, to Franklin, N. H., where it will connect with the Northern road of New Hampshire and thereby complete the connection with Ogdensburg.

At White River Junction the Northern road will connect with a new line to be constructed at Woodstock and thence to Rutland, forming a connection with Whitehall, at the head of Lake Champlain, and the New York system of roads. It is but two hundred miles from Lake Champlain to Portland, by this route.

Maine and New Hampshire allow cities and towns to make corporate subscriptions to the stock of railroads, to the amount of five per cent. of their valuation, and this will enable the friends of these different enterprises to complete the system of railways herein stated. It is confidently expected that the State of Maine, if these roads are carried out by individual and municipal credit and capital, will extend its aid to the great line to the Aroostook and upper St. John, the finest agricultural portion of the State, at present but partially settled. The State at the last session of the Legislature exempted the stock of some of the new lines from taxation for a term of ten years.

New Suspension Bridge at Niagara.

A meeting of the stockholders was held at the village of Niagara Falls on the 2d inst., and an organization effected by the election of the following Board of Directors: John T. Bush, Alexander B. Williams, Hollis White, Delos De Wolf and Vivus W. Smith. The Board subsequently organized by choosing John T. Bush, President; Hollis White, Vice-President; Delos De Wolf, Treasurer; Vivus W. Smith, Secretary. It is said that the preliminaries are so far completed that the building of this bridge may now be regarded as certain. In fact, we learn that work has already been begun in getting the timber necessary for the temporary towers. The bridge will have its landing on the American side near the Gas Works; on the Canadian side a short distance below the Clifton House. It is contemplated to have the Bridge erected this summer.

Norfolk and Great Western Railroad.

A meeting of the Board of Trade of Norfolk, Virginia, was held on the 18th inst., for the purpose of hearing an address from Col. B. M. Jones, of Danville, Va., who visited the city with the view of urging upon the citizens their co-operation in building the Norfolk and Great Western Railroad, the charter for which was obtained at the last session of the Virginia Legislature. Col. Jones was introduced, and at considerable length set forth the advantages of such a road in a very able and satisfactory manner, after which the following resolutions were unanimously adopted:

Resolved, That the project for building a railroad from Norfolk to Bristol via Danville, Va., which has been explained so satisfactorily to the Board of Trade by Col. Jones, is one which meets our hearty approval, and if carried out would conduce largely to the commerce of the city.

Resolved, That we commend the subject to our citizens, and urge them, through the Commissioners duly appointed by the Legislature, to carry out the object of the charter.

Erie Railway.

The earnings of this road for the years ending December 31, 1865 and 1866, (including the Buffalo Division,) have been as follows:

	1865.	1866.
From freight	$11,926,540 14	$11,261,641 58
" passengers	4,401,354 36	3,148,290 08
" mails	101,352 04	129,465 93
" other sources	32,981 36	57,025 50
	$16,462,227 90	$14,596,413 09
Expenses, viz:		
Office and station expenses	$1,328,473 41	$1,396,794 04
Cost of running	3,508,694 27	3,437,041 08
General expenses	305,803 00	393,273 54
Repairs of engines and cars	2,929,018 22	2,475,597 60
Repairs of track and roadway	2,811,878 20	2,483,074 30
Repairs of struct'res	541,187 23	483,859 88
Incidental expenses	27,200 69	34,753 88
Miscellaneous	302,140 22	246,745 72
	$11,754,395 33	$10,853,140 04
Net earnings	$4,707,832 57	$3,743,273 05
Disbursed in 1866 as follows:		
Interest on mort. debt	$1,631,073 07	
Rents of railroads	567,212 00	
Rents of Long Dock property	165,690 00	
Internal revenue taxes	300,814 60	
Taxes on real estate	246,335 07	
Interest	95,180 84	
Hire of cars	31,331 11	
Liquidation damage to Pennsylvania Coal Company	98,005 50	
		3,135,642 19
Surplus		$607,630 86
Add surplus from previous year		1,515,350 21
		$2,122,981 07
Dividend of 4 per cent. on common stock as of January 1, 1866	$629,663 80	
Dividend of 7 per cent. on preferred stock as of January 1, 1867	567,304 85	
Proportion of loss in operating the Buffalo Division to December 31, 1865, charged to Northern Central Railway Company, and credited again on abrogation of contract	265,131 86	
		1,462,100 51
To credit of income account, January 1, 1867		$660,880 56

Compared with 1865, the gross earnings of 1866, show a decrease of $1,865,814 81, with a decrease in expenses of $901,255 29—making the decrease in net earnings, $964,559 52.

The freight and passenger earnings for the past two years compare as follows:

Freight earnings:	1865.	1866.
Through East	$4,342,038 30	$4,176,428 03
" West	2,695,069 69	2,462,299 94
Way East	3,331,025 21	2,928,579 43
" West	1,558,406 94	1,694,334 18
Total freight	$11,926,540 14	$11,261,641 58
Passenger earnings:	1865.	1866.
Through East	$510,905 25	$323,143 64
" West	886,696 29	592,117 51
Way East	1,422,245 64	1,072,214 61
" West	1,581,507 18	1,160,814 32
Total passenger	$4,401,354 36	$3,248,190 08

—showing a decrease in freight earnings of $664,898 56, or 5.6 per cent.; and in passenger earnings of $1,253,064 28, or 28.5 per cent.

The tons of freight moved and passengers carried during the same two years compare as follows:

	1865.	1866.
Through East	584,742	513,921
" West	255,612	260,270
Way East	1,470,723	1,396,627
" West	715,389	700,687
Total tons	3,026,466	2,871,505
Passengers:	1865.	1866.
Through East	50,932	37,935
" West	108,222	79,683
Way East	1,136,348	1,086,376
" West	1,169,391	1,010,918
Total number	2,464,893	2,214,912

—showing a decrease in tonnage of 154,961, and in passengers of 249,981.

This decrease in both freight and passenger traffic is attributable to the stoppage of military transportation, consequent on the closing of the rebellion, and to the general stagnation of business resulting therefrom. The latter cause can only be temporary in its action. The vast numbers who have for several years been drawn from the fields and workshops have returned to their former avocations, and now, as *producers*, will add to the general wealth of the country, to the restoration of prosperity, and to the activity of business which this road with others must share.

It is gratifying to be able to state that the reduction in working expenses of the road has not been made at the expense of the condition of the road or the efficiency of its equipment.

The introduction of steel rails is effecting a great saving over the ordinary iron rails in general use, and a limited supply for this road will be procured during the coming year.

The total amount expended for construction during the year 1866, was $1,634,853 65; of this $76,530 46 was for grading; $231,382 70 for sidings and switches, and 3d rail on Northern Division, between Elmira and Jefferson; $573,161 01 for new locomotives and cars; $64,968 17 for Long Dock Improvements, &c.; $81,918 57 for new machinery in shops; $83,573 41 for land (Buffalo Property); $19,715 for Buffalo, Bradford and Pittsburg Railroad Improvements; $61,085 06 for discount on sterling bonds; and $442,519 17 for the construction of hotel, freight and engine houses, depots, etc., on the line of the road.

The following is a comparative statement of the capital stock and funded debt of the company, December 31—

	1865.	1866.
Common stock	$16,570,100	$16,574,300
Preferred "	8,535,700	8,536,910
Total capital stock	$25,105,800	$25,111,210
First mortgage bonds	$3,000,000	$3,000,000
Second " "	4,000,000	4,000,000
Third " "	6,000,000	6,000,000
Fourth " "	4,441,000	4,441,000
Fifth " "	926,500	926,500
Buffalo Branch "	186,400	186,400
Sterling "	3,816,582	3,875,520
Real estate "	500	500
Total funded debt	$22,370,982	$22,429,920
Total stock & funded d'bt.	$47,476,782	$47,541,130

This shows an increase in the common capital stock during the year of $4,200, accounted for by the exchange of 42 shares of the New York and

Erie Railroad for common stock, as per act of Legislature, April 11, 1866; and an increase in preferred stock of $1,210, by the conversion of a convertible bond of 1875, into 12 1/10 shares of preferred stock. The funded debt also shows an increase of $58,937 81, produced by the closing up and averaging of the sterling bonds.

The $3,000,000 first mortgage bonds of the company mature and become payable on the 1st of July next. Proposals have already been invited for their extension for a period of thirty years at seven per cent. per annum—authority being given to the company, by a statute of the State of New York to extend any and all of its bonds in the order of their respective priorities. The bonds being a first mortgage on the entire property of the company, must be regarded as a very desirable investment, and the company will undoubtedly be able to negotiate for their extension on advantageous terms. In conclusion the President, in his report, says:

From the foregoing statements and exhibits it will be seen that the road was never in a better condition to transact with economy and despatch the business that may be offered to it, and although the net results of the past year have fallen short of the expectations of the board, yet that result is mainly attributable to certain causes which will be inoperative in the future—prominent among these may be named the fact of a suspension of the transportation of coal for the Pennsylvania Coal Company for a period of three months and a half, resulting not only in the loss of the profits due to that business, but also involving this company in a penalty of upwards of ninety-eight thousand dollars, as the liquidated damages for non-compliance with the contract between the two companies. This contract has been modified and arranged to the mutual satisfaction of both parties—the amount to be transported yearly in the future will be much greater than heretofore, with no fears of further interruption to the business. The ruinous competition between competing lines during the first six months of the year has also seriously lessened the aggregate profits of the year; it is a source of satisfaction however to add that for several months past, these lines have been acting harmoniously together, with a determination to maintain compensating rates, which we have good reasons to hope will be continued, and which expectations, if realized, will assure profitable returns for the future. The heavy Government and local taxes have been a serious drain on the revenues of the company, but by amendments of the internal revenue laws, a material reduction has been made to railroad companies on the tax of manufactured articles, whilst the tax on freight receipts has been entirely removed—the latter item alone, effecting an annual saving to this company of two hundred and fifty or three hundred thousand dollars. The dilapidated condition of the Buffalo Branch and its equipment at the time they came into the possession of this company, was such as to involve serious outlays in bringing them into suitable efficiency. Within the last three years upwards of one million of dollars have been expended upon them for extraordinary repairs, which have been charged to ordinary operating expenses. They are now in as good condition as the main line with its rolling stock and will hereafter be operated at moderate expense. The reduction in the prices of many articles of supplies which enter largely into use in the operations of the road, particularly fuel, will tend materially in the future to lessen expenses.

Many other reasons might be assigned to justify the hope that the depressing influences against which the road has had to struggle are passing away and that a bright future awaits it. This brief review of its condition and capacity, affords the best of evidence of its ability for the economical and satisfactory transaction of freight business, whilst the inducements offered to the traveling community by its splendid and luxurious equipment, cannot fail to secure a fair share of the business offering and leads the company to confidently expect to be able at the close of the coming year to present to the stockholders a report which will be, in all respects, satisfactory.

The whole number of miles of road operated by the company, is 784, being 23 miles less than the previous year. This difference is caused by the addition of the Buffalo, Bradford and Pittsburg Branch, 25½ miles long, and by the relinquishment to the Northern Central Railroad Company of the Canandaigua Branch, 48½ miles long.

The equipment of the road consists of 371 locomotive engines and tenders; 180 passenger cars, 454 emigrant, baggage and caboose cars; 3,023 box freight, cattle, milk and oil cars; 1,332 flat freight cars; 991 coal cars; and 25 wood cars. Miles run by engines, 7,109,139. Cost of renewals and repairs, $1,057,309 26. Cost per mile run, 14.87 cents.

Baltimore and Potomac Railroad.

A letter from Oden Bowie, Esq., President of the Baltimore and Potomac Railroad Co., dated at Fair View, Collingwood Post Office, Prince George County, Md., states that the surveying parties are busily engaged and will soon have the work ready for grading. The charter for this road was obtained at the session of 1853, nearly fifteen years ago, and work was about to be commenced at the breaking out of the war. An assignment of the original contract has recently been made to parties much interested in the success of the road, and with abundant capital to build it, and who are to be "entitled to the same rights, and subject to the same obligations, penalties and forfeitures as were conferred or imposed upon the original contractors, by the terms of said contract." Mr. Bowie denies most emphatically that there has been any sale of the franchise of the road; nor do we believe there will be any impediment in the progress of its construction.

Milwaukee and Port Washington Railroad.

The directors of this company held a meeting in Milwaukee on the 11th inst., and resolved to proceed with the construction of the road at once. The *Wisconsin* says "it is proposed to start from the old La Crosse depot, and run out four miles to the line of the old Milwaukee and Lake Superior Railroad, and follow up the survey to the point of destination. The line is graded from this city to Mequon, in Ozaukee county. It is intended to complete the road to Cedarburg, twenty-six miles from this city, by December next, thus opening up a fine country hitherto not reached by our railroads."

Illinois Central Railroad.

The statement of this Company for the month ending April 30, 1867, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	12,040.39 for	$119,803 65
Acres Int. Fund Lands sold	472.62 for	7,138 05
Acres Free Lands sold	3,024.91 for	39,496 43
Total sales during month of April, 1867	15,537.92 for	$166,438 13
To which add Town Lot Sales		4,155 00
Total of all	15,537.92 for	$170,593 13
Cash collected in April		$156,634 64

TRAFFIC DEPARTMENT.

Receipts from Freight		$239,221 00
do. Passengers		140 786 20
do. Mails		6,358 33
do. Rent of Road		4,000 00
do. Other Sources		30,000 00
Total Receipts in April, 1867		$420,365 53
Total Receipts in April, 1866		$406,772 66

☞ The railroad from Camden, N. J., to Mount Holly, is nearly completed. This road by connections through to Hightstown, will give another line from Philadelphia to New York. The road runs through parts of Camden, Burlington, Monmouth, Ocean and Mercer Counties. It is in the control of the "Joint Companies."

☞ At a meeting of the incorporators of the Worcester Railroad, recently held in Snow Hill, Worcester County, Md., E. K. Wilson, Esq., was elected president of the board, and Mr. L. S. Johnson secretary. The books for subscription to the stock of the road are now open.

Great Western and Grand Trunk of Canada Railways.

Share and bondholders in these two important Canadian Railways will be glad to learn that a mutual understanding has been established between the parties by which both are likely to be greatly benefited. The sound principle which the chairman of the Great Western of Canada has uniformly advocated—namely, the charging of equal rates and fares between competitive places reached by the two companies both in Canada and in the United States—has prevailed. It has now been adopted by both parties, there being also some provision for division of the local traffic commanded solely by the two companies. This is just such an arrangement as should have been made in the first instance; but better late than never.

It must be confessed that the Great Western has resolutely and successfully maintained its position; indeed we may say has actually prospered under extraordinary circumstances, it having had to contend against the competition of the Grand Trunk at absurdly low rates while suffering immense losses by the depreciation of American currency. The Great Western, nevertheless, has been able regularly to pay its bond interest, and during the last three and a half years an average dividend of 4½ per cent. Happily the losses by the conversion of American currency are not now so serious, and we trust this agreement between the companies may enable both to obtain better rates. The rolling stock and permanent way of the Great Western are now in excellent condition, it being admitted to be the best constructed as well as best conducted line on the American continent.—*London Railway Times.*

The Bessamer Steel Works.

Our unscientific readers may not be aware that what we call cast iron, wrought iron and steel, differ from each other only in the proportion in which one element, carbon, is combined with pure metallic iron. Cast iron contains about four per cent. of carbon. Wrought iron is cast iron deprived of nearly all of the carbon; and steel is the same wrought iron recharged with from the half of one per cent., up to about one per cent. of carbon.

The ordinary process of the manufacture of wrought iron is called puddling, by means of which the common pigs of cast iron are deprived of their carbon by a long and laborious operation, during which the metal, in a liquid state, technically called "boiling," is subjected to a blast of hot air from a charcoal furnace, which carries off the combined carbon and leaves the metal malleable and ductile and what we call wrought or malleable iron.

The conversion of this iron into steel is a still more tedious process, and occupies from ten to fourteen days, and the product is then "blister steel." This is again melted in small pots or crucibles of about twenty pounds each, and when poured out, is cast steel.

Some ten years since, a scientific gentleman, Mr. Henry Bessamer, of London, read a paper before the British association for the advancement of science, in which he announced the discovery of an entirely new system of operations for the manufacture of malleable iron and steel, by which the crude cast iron was converted by one simple process, directly as it comes from the blast furnace, into wrought iron or steel of any desired degree of hardness, in less than twenty minutes, and that by this process he produced a more intense heat than was known in the arts, without either furnace or fuel.

It may be known to our readers that the heat necessary to separate the iron from the rocks with which it is combined in the ore, is about 3,000 degrees of Fahrenheit, and that to melt malleable iron so as to combine carbon with it and produce steel requires a heat more than twice as great as to melt cast iron.

The announcement of Mr. Bessamer that he would produce this intense heat without a furnace or any fuel, seemed to his audience, comprising the most learned and practical men of England, a paradox, and many a smile of incredulity passed over the faces of the audience, while he was reading and discussing his paper.

A few of the gentlemen present, however, saw at once the philosophy of the process. Among these were William Fairbaine, John Brown and the Messrs. Cammill, of Sheffield. These gentlemen have now in operation works capable of producing one hundred thousand tons of pneumatic metal or Bessamer steel per annum, and works of a similar character are in operation elsewhere in England, Scotland, and all over the Continent of Europe.

Three of our most enterprising and intelligent iron makers, Messrs. Winslow, Griswold and Morrell, (the two former our neighbors) soon appreciated the vast importance of this invention, and purchased the American patent, and after several years of trial, have now erected at South Troy works of the largest dimensions, so as to produce from 12,000 to 25,000 tons of steel per annum.

These works were inaugurated on Thursday last, in the presence of a large number of the largest iron masters and scientific men in America; and it was our good fortune to be present and witness the conversion of fifteen tons of common cast iron into steel, samples of which were, in our presence, worked into cold chisels and other cutting tools, and the metal was pronounced by these experienced judges as equal to the best Sheffield or American cast steel made by the old process.

From what we have previously stated of the old process of the conversion of cast iron into malleable iron and steel, it will be seen that the first operation is to deprive the crude metal of its four or five per cent. of carbon—and to accomplish this result, the molten metal, raised to a white heat, must be brought in contact with oxygen, with which the carbon will combine and produce combustion, and the rapidity and intensity of this combustion will be proportioned to the amount of the surfaces of the carbon brought into contact with oxygen.

The atmosphere around us contains the oxygen, but it is very much lighter than iron, and by the former process, can therefore only be brought into contract with the surface of the molten metal; and this operation is necessarily very slow.

The new process consists in the condensation of the atmosphere by air pumps or blowing engines of great power, by means of which the air is forced into the molten iron at the bottom of the vessel under a pressure greater than the weight of the iron, (from fifteen to twenty pounds per square inch,) and passing up through it in great quantity, is instantly brought in contract with all of the carbon in the iron, and combining with it, produces a rapid combustion and a heat of greater intensity than any before known in iron furnaces.

The ores of iron contain impurities, some of which combine with the pure iron, and weaken and injure it. The pneumatic process renders the whole mass so fluid as to separate the iron from these impurities, and they are either evaporated by the intense heat, or are separated and float as slag over the insensely liquid surface of the heavier metal (the pure iron) and the residue is what is almost unknown in commerce, a perfectly pure metallic iron.

The property of welding and working soundly under the hammer in iron and steel is given by the addition of a small quantity of manganese; and, as before stated, steel is made from malleable iron by the addition of a small quantity of carbon.

In the pneumatic process, these qualities are given to the purified molten iron by pouring into the mass a small quantity of molten Ferro-manganese, Franklinite or Speigh iron—all of which contain about four per cent. of carbon and about the same quantity of manganese, combined with iron. This alloy instantly permeates the whole mass of the pure molten iron, and it is at once steel.

It is evident that the carbonization of the iron may be regulated to any degree of hardness that is desired, by proportioning the amount of the carbonized alloy, so that all grades from the softest iron, up to the hardest tool cutting steel, may be produced at the will of the manufacturer.

The machinery, by means of which the pneumatic process is carried on, consists of an ordinary cupola furnace for melting the cast iron pigs, a smaller one for melting the Speigle alloy, a boiling pot lined with fire clay or other refractory material, a large air blowing engine, a ladle on the arm of a cram and iron moulds to receive the converted metal.

The works of Messrs. Winslow, Griswold and Morrell are provided with this machinery of the newest and most substantial character, by means of which less than a dozen men are employed to convert forty tons of crude iron per day into steel.

A gentleman (Mr. McAlpine) who has just returned from England, where he spent a week with Mr. Bessamer examining the great works at Creive and Sehffield, stated to the company that the works of Messrs. Winslow & Co. were superior in their arrangements, conveniences and facility of operating, to those of the London and North Western, or John Brown or Cammill's great works, and that Messrs. W. & Co. had anticipated some improvements which Mr. Bessamer told him he intended to introduce in his new works at Blackwall, London, now being built.

After this long and perhaps tedious dissertation, we will give our readers a description of what we saw on Thursday last.

Three castings or conversions were made on that day, one at 11 A. M., and another about 2 P. M., and a third at 4½ P. M.

On arriving at the works at 10 A. M., we found the iron cupola charged with its burden of crude pig iron and fuel, and the process of melting commenced. Near by was the little furnace where the "speigle iron" (looking-glass iron—Ferro-Manganese, from Germany,) was also being melted.

Around a circular curb, in a pit four feet deep, were placed a series of Pyramidical Iron moulds, nine inches square at the bottom, do. at the top, and four feet high. A huge boiling pot which, when one-third full, would hold five tons of molten metal. This pot or converter, was hung on trunions, which enabled it to sweep an entire vertical circle. The bottom and sides were lined with a refractory mortar, and through the bottom were placed tuyeres or air pipes fifty or more in number and half an inch in diameter.

The blowing engine communicated its blast through a large pipe to a hollow space in the trunions of the converter, and by passages to the tuyeres.

Iron troughs lined with fire clay led from the speigle furnace to the converter, and hydraulic hoist and ladle, brought the melted cast iron to the huge mouth of the converter.

Another hydraulic crane, with its long horizontally projecting arm, sustained the ladle or "soup turreen," as some of the bystanders called it.

The converter discharged its contents of molten steel into this ladle and the huge crane swung it around over the moulds, and then a valve in the bottom was opened and the metal flowed into them, which cooled it sufficiently to be taken out immediately.

The ingots of pure steel thus made are like all cast steel honey combed and porous, and must be hammered while yet hot into masses of the required shape.

Messrs. Winslow, Griswold & Morrell are now erecting some huge hammers of five tons weight and six or eight feet fall, by means of which the largest masses of steel may be hammered into any form.

An idea of the magnitude of these works may be formed when it is stated that they can furnish at one operation a shaft of steel or wrought iron equal to that recently put into the Great Eastern steamship, which measured thirty inches in diameter and weighed twenty tons—and this shaft made of soft Bessamer steel would be twice as strong as of wrought iron made in the ordinary way.

During the process of the mid-day conversion on the 9th instant, we made the following notes:

At 1h. 41m. P. M. Finished pouring the melted crude cast iron into the converter, and the blast turned on. A rapid boiling of the metal is heard going on within the vessel, the molten metal is dashed from side to side violently shaking the vessel, a bright yellow flame issues from its mouth and passes up the chimney. The sparks are the large yellow corruscations which indicate highly carbonized iron.

At 1h. 45m. The flame increases in intensity, and it and the sparks begin to whiten in color.

At 1h. 48m. The flame has lengthened and increased in brightness. It is yet very yellow, and gives out a brilliant light, equal in intensity, it is said, to the combined light of all the gaslights burning at night in New York. The sun is shining bright and clear out of doors, casting the strong shadows due to a mid-day sun; but the flame from the converter overpowers the light of the sun's rays, and the shadows of the observers are thrown upon the walls as distinctly as those of a bright harvest moon.

At 1h. 51m. The flame is more and more bright and whitening visibly; but few sparks are emitted, and those are silvery white, smaller and more suddenly extinguished, showing them to be of pure malleable iron. Occasionally appear the bright steely sparks, which float upward, such as we see on the bursting of a rocket at night. These are the result of the decarbonizing process, not yet complete.

At 1h. 59m. The flame is now diminishing, and has become silvery white and most beautifully luminous, and a stir is noticed among the workmen, which shows that the process is reaching its culmination. A minute later, and the flame dies almost out; the blast is shut off, and the huge tortoise-shaped converter is turned horizontally upon its massive trunnions, and its gaping mouth is placed at the end of the iron trough leading from the speigle furnace; and, from our elevated stand, we look directly into the huge paunch of this insatiable monster, which is now drinking up its molten dose of ferro-manganise.

At 2h. 1m. The molten mass of steel is now being poured into the moveable ladle.

At 2h. 3m. The ladle, now over the mould, is discharging its silvery bright steel into the moulds. Now it boils up and overflows the mould. Some clay mould is thrown into the mass and it quietly settles down.

At 2h. 10m. The whole five tons is poured out. The workmen are removing the moulds, and the bright red hot ingots of steel are hoisted upon iron trucks and conveyed outside of the building, from whence they will be conveyed to the great steam hammers, and after being reheated will be forged into railway axles and shafts, and a thousand and one other articles, which are now made from imperfectly and unhomogeneous malleable iron.

The operation is now complete, and we have witnessed, in the space of twenty minutes, the purification and conversion of five tons of crude cast iron into steel equal to and fit for any of the purposes for which cast steel has heretofore been made, requiring a fortnight in the operation.

Alongside of these steel works at Troy are the Wrought Iron Works of Messrs. Corning & Winslow, where 700 men are daily employed to convert 70 tons of cast iron into malleable iron, and half as many more men would be required to convert this into steel.

Here 50 men, all told, can convert daily 100 tons of crude metal into steel.

What revolutions will this wonderful process bring about in the manufacture of the various iron metals here and in all the world.

The number of men now employed will produce three times the amount of a superior metal at one-third of the present cost.

Its cheapness will induce an enormous consumption, equal to the increased product, and with the labor saving machinery and the skill and energy of our great iron workers, we shall become not only independent of all foreign workshops, but with our superior ores distributed all over our country, and our immense and inexhaustible beds of coal, we shall almost immediately enter into successful competition with the metal makers of Europe in every market of the world.

It is said that Mr. Bessamer derives a daily revenue of £1,000 sterling from his license for the manufacture of metal by his process; and Mr. McAlpine stated that Mr. B. remarked to him a few weeks ago that it was perhaps unfortunate for the world that he was not now in the same condition that he was fifteen years ago, for said he, "The discoverer of a process to desulphurize and dephosphorize the poorer irons made in England, will have a larger revenue for his discovery than I now receive."

We cannot close this account without repeating what Mr. Fairbaine says in regard to it:—

"Cast iron has a tensile strength of 1,800 pounds per square inch and a value of £3 per ton. Deprived of its carbon, it becomes malleable iron, with a tensile strength of 56,000 pounds, and a value of £8 per ton; and this iron recharged with one per cent. of carbon, becomes steel with a tensile strength of 130,000 pounds, and a value of £50 per ton."

Mr. McAlpine stated to the meeting that six weeks ago he saw steel made at the great works of Sheffield by the same process as that which we had just witnessed; that he, at Mr. Bessamer's request, made the tests of the extent of the carbonization of the steel ingots; that he saw these ingots hammered into piles under their five ton steam hammers and then reheated and rolled into rails, some of which were shipped to India and some to the United States; that he tested the strength and toughness of these same rails, as follows:

A piece of American formed steel rail, weighing 69 pounds to the yard, 4 feet long, placed on supports 3 feet 6 inches apart, sustained as follows:

Load.	Deflection.	Permanent Set.
15 tons.	0.14 inches.	Nil.
20 tons.	0.57 inches.	0.40 inches.

A similar piece of rail was laid on supports three feet apart and struck in the middle by a hammer of one ton weight, which fell fifteen feet, and bent the rail 5¼ inches, and narrowed the upper flange 3-16 of an inch, and expanded the lower one ⅜ of an inch, without producing any cracks or flaws.

A similar experiment was made on a double headed India rail of sixty-eight pounds to the yard, with the following result: A blow, with a clear fall of 20 feet, bent the rail five inches. It was then reversed and a similar blow given, which brought it back but with a twist; a third blow was then given with the ton hammer, falling 30 feet, which twisted and bent it in a remarkable shape. Mr. M. then exhibited a photograph of it to the company.

There was not the slightest indication of a crack or flaw in any part of the rail after it had been subjected to this severe usage.

We, who have been accustomed to regard steel "as brittle as glass," will hereafter feel more comfortable when riding at a speed of sixty miles an hour over an American or English steel rail, when we know that it has been made of the quality which these tests show.

Mr. McAlpine also stated that he examined a Bessamer steel rail which was laid down at the Camden Station, London, of the London and Northwestern Railway, in May, 1862, over which had passed an average of 8,082 trucks, and 415 engines every day for five years. This traffic had worn out the faces of twenty-three iron rails, and the steel rail would outlast a dozen more.

Also, of steel rails laid down at Victoria and Black Friars Stations, showing a similar comparison with the contiguous iron rails.

At Crewe, Mr. Ramsbottom was making locomotive tires, axles and other work of the Bessamer steel, and this article was superseding the Lowmoor iron for railroad purposes.

We close this article by a notice of a fine banquet which Mr. Griswold gave to his visitors, at which were present, besides the great Iron Masters, representatives from the Western press.

Toasts and speeches concluded the entertainment, and the guests retired delighted with their day's observations.—*Albany Evening Journal, May 13.*

Hudson River Railroad.

The Hudson River Railroad Company have recently doubled their original capital of $7,000,000, and allowed in payment of the new scrip 46 per cent. in addition to the April cash dividend of 4 per cent., by way of returning to the old stockholders all the accumulated surplus profits and increased value of the property since the opening of the road in 1851. The other 50 per cent. of the new capital they add to the station property in St. John's Park, and the improvement of the whole line of 146 miles to Albany, and the entire cost, when these outlays are completed, will be represented by $14,000,000 of capital, and $5,550,000 outstanding funded fund.

Massawippi Valley Railway.

The Stanstead (Ca.) *Journal* says that the people north are manifesting a strong interest in the construction of this road. A meeting was to have been held at Massawippi village, on the 15th inst., to determine the amount which Hatley ought to subscribe and whether it should be done by individual or Municipal subscription. Also on the 16th inst., at Lennoxville, to consider the expediency of a subscription on behalf of the Municipality to the amount of $25,000.

☞ The railroad from Bennington to Chatham Four Corners, which was chartered at the recent extra session of the Vermont Legislature, is not being proceeded with in consequence of the backwardness of the towns along the proposed line to take stock in the enterprise; and as Bennington is likely to have its old railroad connection with Troy, *via* the Troy and Boston Railroad restored, it is doubtful if the new road is constructed at all.

☞ We learn that arrangements have been concluded between the Virginia and Tennessee and Orange and Alexandria Railroads, for the extension of the latter road to the depot of the former in Lynchburg. This will necessitate the erection of a bridge over the Blackwater, and the laying of a third rail to suit the gauge of the Orange cars. The work is to be commenced at once and completed at the earliest moment. The estimated cost of the connection is about $15,000.

☞ The credit of St. Johnsbury has been pledged for $125,000 to aid the Montpelier end of the proposed Montpelier and Portland railroad, and for $75,000 to aid the Portland end. The Messrs. Fairbanks, of St. Johnsbury, have taken $150,000 in the stock, which, with the other private subscriptions, make the total for the town $400,000.

☞ At the annual meeting of the Kent County R. R. Co., at Chestertown, Md., on the 20th inst., the old board of directors were re-elected, with George Vickers, Esq., as President. R. Hynson, Esq., is Secretary and Treasurer. It is stated that the permanent location of the route will be at once effected.

☞ At the annual meeting of the stockholders of the Cincinnati, Hamilton and Dayton Railroad Co., at Cincinnati, on the 14th inst., the contract with the Dayton and Eastern and the Sandusky, Dayton and Cincinnati Railroad Co.'s was adopted by a large majority.

Saturday, May 25, 1867.

Stock Exchange and Money Market.

There has been rather more call for Money, since our last, especially on the part of speculative borrowers, and call loan rates have been quoted up a point, or to 5@6 per cent. to the dealers in the public funds, and 6@7 per cent. to the Stock Exchange firms. This temporary pinch in the market was mainly due to the Treasury negotiations, springing from the free sale of the new issue of the Five-Twenty bonds of 1865, and the consequent absorption of currency by the local Government office, the cash reserve of which ran up to $128,697,997 last week, showing a gain of over six million dollars, in this item. Since Monday, the Sub-Treasury has been disbursing pretty liberally, thus reducing its cash balances, and restoring to the market, considerable funds. These are again seeking temporary employment and giving responsible borrowers any existing advantage. Call loan rates have settled down to 5 per cent. as the rule to the Government houses, and 6 per cent. to the leading Stock firms, with a less urgent call for accommodation at these modified figures. With the returning ease in the open market, discount applications meet with greater favor, and prime short date commercial paper finds ready purchasers at bank and through channels at 6@7 per cent. per annum. Some demand likewise exists for good to fair names at from 7½ @9 per cent. per annum. Other paper is pretty generally discountenanced. Some effort was made to influence the Money Market adversely, on receipt of the report of the failure at Liverpool, of the extensive Cotton firm of Messrs. Fraser, Trenholm & Co., notorious as the agents of the late so-called Confederate Government; but the effort met with no success whatsoever, as the increasing abundance of capital at this centre more than offsett the croakings of the professional panic-makers of the street. The last city bank statement indicated the changes wrought by the Treasury operations. As compared with the preceding returns it showed at increase of $4,279,015 in loans and discounts, $607,662 in specie $36,432 in circulation, and $1,094,022 in net deposits, with a decrease of $4,168,138 in legal tender. The specie reserve of the banks is now $15,567,252, against $13,935,465 same time last year. The city bank deposits are now $201,436,851, against $217,477,729 week ending May 19, 1866. The legal tender reserve amounts to $63,828,501, against $85,710,107 same time last year. The circulation now stands at $33,632,301, against $25,189,864 same time last year. The loans are now $257,961,874, against $255,690,463 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $83,945,965 a day, against a daily average of $87,386,628 the preceding week, and $93,310,019 the week ending with April 27th. The current week's exchanges average $65,184,376 a day.

The main changes in the Philadelphia Bank footings, last week, were as follows: Increase of loans, $351,932; decrease of legal tender reserve, $517,428; increase of deposits, $58,664; decrease of specie, $3,784; and increase of circulation, $4,878.

National Bank notes to the amount of $117,250 were issued last week, making the total issue to 1,671 banks thus far, as given in our last, $302,834,306, against $282,555,440 at the close of the last fiscal year, June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $3,877,832, leaving, with the existing 1,647 banks, (having an aggregate capital of $422,913,861,) an actual circulation at this date, of $298,956,474. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,641,450; and for the public deposits, $38,902,950—making a total of $379,544,400. The Treasury Department, last week, redeemed and destroyed $325,500 of worn and mutilated fractional currency, and issued $142,600 worth of new.

The U. S. Sub-Treasury receipts, week ending with May 18, were $22,966,533, including $2,068,648 from customs duties; payments, $16,507,815; balance at the close of the week, $128,697,997, against $122,239,278, at the close of the preceding week. The business of the Office during the first

two days of the current week, was as follows: Receipts on Monday, $2,580,657, and payments, $2,531,444; on Tuesday, receipts, $2,207,456; payments, $3,172,023. The balance at the close of business on Tuesday stood at $127,782,542, against $123,114,161 a week previous.

The cash balance in the hands of the Assistant Treasurer at Boston at the close of business, May 18, was $7,735,604 56, showing an increase for the week of $476,479 35. The coin has increased $54,285 78. Balance coin on hand, $4,999,210 19. Receipts of Customs for the week, $291,000. Coin interest paid $155,271.

Government revenues have been on a moderate scale, since our last. The customs have exceeded the excises, in their yield to the National Treasury, both being taken on a currency basis. The excises, last week, yielded $2,595,869, against $2,573,429, the preceding week; customs at the port of New York, $2,068,648, and at the outports, about $650,000 (in coin) more, making the grand total income for the week equal about $6,334,010 in currency, against disbursements of $1,243,000 on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $240,000,000.

The Gold Market moved sluggishly during the early part of the week, the speculative demand having been very moderate, despite the stiffening in foreign exchange, and the increased exports of specie to Europe. The extremes up to about noon on Tuesday were 136⅝@137⅝. The closing price on Monday was 137¼, and the rate about noon on Tuesday was 137. On the report of the failure of Fraser, Trenholm & Co. having been made public, the speculation revived rather sharply and the price was run up to 137⅞ on Tuesday afternoon, and to 138⅝ early on Wednesday. The latest dealings on Wednesday were at 138¾@138⅞, on a very firm, though not specially active market. The specie exports, hence, last week, were quiet heavy. On Wednesday of the current week, the *Palmyra* took out, in addition, $440,000 in treasure. The imports of specie, last week, were moderate, nearly $133,000. The total imports of specie from Europe, and other foreign ports since Jan. 1, 1867, have been $1,025,521. The customs demand for Gold last week averaged $344,775 a day; thus far, this week, it has been equal to $316,696 a day, or equal to a weekly aggregate of $1,900,176. The arrivals of specie from Europe, Havana and other foreign ports, during the past week were $132,907, and from California, none. The total customs revenue of the Government, in coin, at this port since July 1, 1866, has been $110,817,216, against $119,690,712 same time in the preceding fiscal year. The total receipts of California gold at this port since July 1, 1866, have been $35,087,448, against $25,661,156 same time last year, showing an increase this year, of $9,426,292. The exports of specie from this port, last week, were $3,832,635. The total outflow of specie from the port, thus far in the current fiscal year has been $31,765,748, against $29,051,930 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $2,432,000, making the total coin interest disbursements through the Government office, since July 1, 1866, $50,628,392, against $43,625,861 for the same time in the preceding fiscal year. The specie exports from San Francisco, from Jan. 1, to April 8, reached $10,751,071, against $10,487,429 same time last year, showing an increase, in 1867, of $263,642.

The total amount of gold certificates issued and redeemed by the U. S. Sub-Treasury here, together with the balance unredeemed on the 11th of May, is thus stated:

	Issued.	Redeemed.	Outstanding.
20s ...	$333,900	$206,600	$127,300
100s ...	5,321,000	3,758,400	1,562,600
500s ...	1,164,500	541,000	623,500
1,000s ...	26,065,000	21,859,000	4,206,000
5,000s ...	159,675,000	140,130,000	19,545,000
10,000s ...	5,000,000	5,000,000	.....
Total	$197,559,400	$171,495,000	$26,064,400

An improved demand was reported for foreign exchange early in the week at firmer rates; but the later transactions were on a restricted scale, and at an easier range of prices. Bankers' 60 day bills on London closed on Wednesday at 109⅝@109⅞, and on Paris to 5.18¾@5.12½; sight bills on London to 110⅜@110½; and on Paris to 5.12½@5.10. The offerings of produce bills have been rather light, this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,982,664, making the total value of exports since July 1, 1866, $160,745,015, against $201,137,139 same time in the preceding fiscal year.

Quite a brisk investment business has been transacted in the public funds, since our last, and there has been a steady appreciation of nearly all the interest bearing obligations of the Government. The home public have been buying quite freely the later issues of the Five-twenties and Seven-thirties, as also the Compound Interest Notes, most of which have improved in price. A foreign call of increasing urgency has been experienced for the older issues of the coin bearing bonds, particularly for the Five-twenties of 1862, and of 1865, and these, too, have advanced considerably. Some speculation has been indulged in the latter class of the public funds, helping to stiffen prices. U. S. sixes of 1867 closed here on Wednesday at 134½; U. S. sixes of 1868, at 133; U. S. sixes of 1881, 111¾@111⅞; U. S. Five-twenties of 1862, ex-May coupon, 109¾@109⅞; U. S. Five-twenties of 1865 at 106⅝@106⅞; U. S. Five-twenties of 1865, consolidated, 108@108⅛; U. S. Ten-forties at 99⅝@99⅞, ex-coupon, and U. S. Seven-thirties at 105⅝@106¼. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

June, 1864 ..... 119⅛	May, 1865 ..... 114¼
July, 1864 ..... 118⅝	August, 1865 .... 113¼
August, 1864 .... 118⅛	September, 1865.. 113
October, 1864 .... 117⅛	October, 1865 .... 112¾
December, 1864 .. 116⅛	

Railway and miscellaneous stocks have been quite depressed, since our last, and the tendency of the market has been almost uniformly to lower figures. The latest dealings were on a very limited scale; and indicative of weakness in the speculation, despite the growing ease in money.

Domestic produce has been in much less request, since our last, though prices have favored buyers, decidedly in most instances. Middling grades of cotton left off here on Wednesday quite heavily at 27@28½ cents per lb. as extremes. The stock of cotton now here is estimated at about 105,000 bales. The receipts at the port this week, have averaged nearly 1,000 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 553,500 bales, against exports of 381,395 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 1,710,000 bales against 1,857,686 bales same time last year; exports, 1,298,000 bales, against 1,380,066 bales same time last year; estimated stock at latest dates, 342,500 bales, against 363,208 bales same time last year. In the line of foreign merchandise, we can note only a fair business in groceries, with a very light trade in most other articles. The dry goods interest has been particularly flat, and productive only of loss to sellers. The total imports of foreign dry goods, last week, were $915,820, and the total amount marketed $1,004,119. The value of foreign merchandise imported last week, was $3,017,495—making the grand total specie value of last week's imports of dry goods and merchandise, $3,933,315, and since July 1, 1866, $230,926,729, against $263,837,453 same time in the preceding fiscal year. The ocean freight market has been very dull and heavy, since our last, with 556 vessels of all classes in port. For Liverpool we quote flour at 1s.@1s. 3d. per bbl.; grain at 2½d.@3d. per bushel; cotton at ⅛@$\frac{3}{16}$d. per lb.; and heavy goods at 10s.@17s. 6d. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	May 8.	May 15.	May 22.
Consols	91¼	92¼	93
U. S. 5-20's of 1862	71¼	72¾	72½
U. S. 5-20's of 1865	69¾	70¾	70½
Erie	41	42	42¼
Ill. Central	75½	76¼	76¾

The New York exports, exclusive of specie, for the week ending May 21, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$3,117,494	$3,982,634
Prev. reported	91,141,509	75,155,956
Since January 1	$94,259,003	$79,138,620

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$1,892,218	$915,820
Gen. merchandise	4,238,164	3,017,495
Total for the week	$6,130,382	$3,933,315
Previously reported	115,622,873	95,430,382
Since January 1	$121,753,255	$99,363,697

The commerce of New York from July 1st to date compares as follows:

	1865–'66.	1866–'67.
Imports merchandise.	$263,837,453	$230,296,729
Exports produce.	201,137,139	160,745,015
Exports specie	29,051,930	31,765,748

The balance in the Sub-Treasury on Wednesday was $130,467,727 65.

☞ Hon. John P. King has been re-elected President of the Georgia Railroad Co., and E. W. Cole, Esq., General Superintendent.

Oregon Central Railroad.

The following is an extract from a letter from J. Gaston, Esq., Secretary of the Oregon Central Railroad Co. It is dated Salem, Oregon, April 18, 1867, and says: "The land grant of the Oregon Central Railroad Company amounts to 12,800 acres per mile, and if the land was on the Atlantic slope, would be estimated at $5 per acre. It embraces some of the finest agricultural lands on this coast, and the *best* timber lands on the continent. Our State aid amounts to $10,000 per mile in gold bearing bonds, for the first 100 miles—$1,000,000. I will commence canvassing this week, and I think I can raise cash and land subscriptions to the amount of $1,000,000 more. The road will be commenced at once, and we hope to finish it to the head of the Great Willamette Valley, from Steamship Landing on the Columbia, 150 miles, within three years."

Dexter and Newport Railroad.

The directors of the Dexter and Newport Railroad Co. will receive proposals until the 3d of June, for the construction of about 15 miles of railroad, extending from Newport to Dexter. Newport is on the line of the Maine Central Railroad, 27 miles from Bangor, and Dexter lies about 16 miles to the north of it. Both places are in Penobscot County, Maine. Proposals will be received for the entire work, or for the grading, bridging, etc., in sections of one mile each. Plans, etc., can be seen at the office of Col. A. W. Wildes, Engineer, in Dexter. Proposals should be addressed to Charles Shaw, Esq., President.

Erie Railway.

The Erie Railway Company have accepted all bids made under the Circular of April 1, for the extension of the first mortgage bonds at the office of the company in New York, at a premium of one per cent., and all bids above that premium are also accepted, and the bonds will be extended at the same rate of one per cent. premium.

The company are now ready to attach coupon sheets to and extend the bonds of those holders whose bids are accepted as above specified, on their presentation at the office of the company in the City of New York and payment of the premium of $10 on each bond. The same terms are accorded to other holders who have bid a less premium than one per cent., or have failed to make proposals, on notice to the company, to be given in writing on or before the 15th of June next.

All other holders will be paid the principal of their bonds at maturity, after which interest will cease.

☞ The Erie City passenger Railway Co., will receive proposals, until the 1st of June, for the construction of 2 miles and 3,906 feet of the main line of their road, including rails, stringers, cross-ties, etc. A full description of the route of the road will be found in their advertisement in another column. A copy of the Act of Incorporation can be seen at the office of this paper.

☞ At a meeting of the stockholders of the Cairo and Fulton Railroad Company, at Little Rock, Ark., on the 13th inst., a board of directors was elected, with M. Brayman, Esq., as president. The route of this road runs through some of the richest sections of the State, and it is hoped that measures will shortly be adopted which will ensure the commencement of work upon it an early day.

Railroad Earnings.---Weekly.

The earnings of the Marietta and Cincinnati Railroad the 2d week in May, 1867....$20,423 00
Corresponding week previous year.... 21,578 00

Decrease $1,155 00

The earnings of the Western Union Railroad for the week ending May 14, 1867. ...$11,746 88
Corresponding week previous year.... 18,693 36

Decrease $6,946 48

The earnings of the Detroit and Milwaukee Railroad for the week ending May 16th, 1867, were $33,384 00
Corresponding week of 1866.... 34,477 00

Decrease $1,093 00

The earnings of the Chicago and Rock Island Railroad for the 2d week in May, 1867, were $60,863 00
Corresponding week of previous year.. 65,925 00

Decrease $5,062 00

The earnings of the Chicago and Northwestern Railroad for 2d week in May, 1867....$198,558 00
Corresponding week previous year .. 164,955 00

Increase $33,603 00

The earnings of the Michigan Southern and Northern Indiana Road for the 2d week in May, 1867, were $83,928 00
Corresponding week of 1866 .... 94,831 00

Decrease $10,903 00

The earnings of the Chicago and Alton Railroad for the second week in May, 1867, were $90,353 00
Corresponding period previous year.. 79,836 00

Increase.... $10,517 00

The earnings of the Michigan Central Railroad for the 2d week in May, 1867, were .. $73,976 17
Corresponding week of previous year.. 72,164 62

Increase.... $1,811 55

The earnings of the Atlantic and Great Western Railroad for the second week in May, 1867, were.... $112,873 00
Corresponding week previous year... 116,618 00

Decrease $3,745 00

Newark and New York Railroad.

The first annual meeting of the stockholders of this company was held in Newark on the 15th inst., when the old Board of Directors was re-elected for the ensuing year, and the following report of the Chief Engineer submitted:

To the President and Board of Directors of the Newark and New York Railroad Co.:

Gentlemen:—I have the honor to submit to your consideration, my report of the operations of this department, during the year about ending.

The best months of last summer were so occupied with the surveyors of the line that we could not begin work until the autumn was far advanced.

The only considerable physical obstacle in the way of reaching New York Harbor is Bergen Hill; and over this ground we ran several lines, examining every portion with great care.

The route already mentioned in my report of that survey was adopted by your board, and upon that line has proceeded the construction of the Newark and New York Railroad since October of last year. We have done work on the cut and adjoining embankments to the value of little less than one hundred thousand dollars.

Our line is perfectly straight, and the steepest grade does not exceed twenty-one feet per mile. It seems proper to state in this connection my reasons for recommending to your adoption a low grade; I make this explanation because I learn that many friends of the road think it bad economy. It will be seen, however, that even in first cost, the light grade upon our short road is no extravagance. I premise, that the Bergen Hill cut is the only point at which any saving can be made by a steep grade; here by an assent at the rate of fifty feet per mile we could save about fifty thousand dollars on the cost of excavation. This grade will be a half mile in length on each side of the Summit. But it will require engines of as much power to ascend that half mile as if the entire road were a continuous ascent of the same grade. These engines will cost, each $4,000 more than those required to ascend a grade of twenty-one feet per mile.

Again, if we have heavier engines consequent on a steep grade we must have a heavier rail. It will demand for these engines a rail weighing ten lbs. more per yard than is used with our lighter grade.

With these data we arrive at the following result:

10 locomotives at an extra cost of $4,000 each $40,000
132 tons of rails extra, at $84 per ton.... 11,220

$51,220

Thus it is seen that an increase of grade, saving us $50,000 in cost of excavation, will increase the first cost of machinery and iron $51,220; and this a constantly increasing figure, since every new engine and every new rail must be in accordance with these higher rates; while if the same amount be expended on the Bergen cut, it is laid out once for all, and results in saving on every engine and every rail, that is bought in all time, as well as in the annual working expenses.

If we were building a long line of road, so that a steeper grade would save such an amount that its interests might properly be offset against the increased cost of machinery and iron, then it would be proper to consider the expediency of increasing our gradients.

The same comparative estimate may be made of the difficulties and expense of curvature.

Under the principle of construction adopted by us, the road will be put on its feet at less money, even at first cost, than on any narrow policy which has in view the construction of a cheap road.

We shall be able to do what has not yet been accomplished in this vicinity, and what cannot be accomplished with any other road than ours. We can run trains from Broad street to the Ferry at Hudson river, in ten minutes; thus approaching, though not quite equalling, the perfectness of some of the railways out of the city of London.

We have procured nearly all the right of way, during the year, in the county of Hudson. It is a fact upon which the company may congratulate itself, that we have settled our land damages at a much less figure than we had reason to expect, taking the average experience of railroad companies.

Contracts are now let sufficient to ensure the completion of the road within the year, if the people are liberal with their stock subscriptions.

In addition to the graduation contracts, we have recently contracted for the timber trestle across the Passaic and Hackensack rivers, and for iron draw-bridges, all of which are to be done by the first of October.

It has not been possible to locate the line as yet in the city of Newark, because we have not felt at liberty to disburse our funds in that direction, seeing we require all our money for the heavy construction contracts now under way; but so much of the line as extends from the Passaic River to Ferry street, may be regarded as settled, and nearly all the right of way upon that portion has been procured and paid for.

The encouraging results of the year just passed, leads us to hope that the time now rapidly approaches when a means of communication with New York will be established by the people of Newark, that shall be worthy of our character as a great manufacturing city.

All of which is respectfully submitted.

ALFRED F. SEARS, Chief Engineer.

Journal of Railroad Law.

TITLE OF A BONA FIDE HOLDER OF STOLEN BONDS, WHO IS A BONA FIDE HOLDER.

Since the unprecedented number of "bond robberies, which have occurred within the past few years, there has been a good deal of litigation upon the question of the title of a party holding a stolen bond. The Supreme Court of the United States, in the case of Murray *vs.* Lardner, has lately decided the question. In that case Lardner was the owner of three one thousand dollar coupon bonds of the Camden and Amboy Railroad Company, *payable to bearer*. On the 23d of February, they were stolen from Lardner's safe at his residence in Philadelphia. The theft was not discovered until the 26th, and in the meantime on the 24th, four days before the loss was advertised, one Murray, a broker in New York, was applied to for a loan of $2,000 upon the three bonds. The person so applying represented himself as a physician residing in Milford, New Jersey, and gave references to some New York physicians, "was gentlemanly in appearance, well dressed, &c.," and explained what he wanted the money for. Without making further inquiries, Murray took the bonds and paid the money. The party from whom they were stolen sued Murray for them, and the jury rendered a verdict for plaintiff Larned. Defendant Murray then appealed to the Supreme Court, when the judgment below was reversed.

Mr. Justice SWAYNE delivered the opinion of the Court. The question presented by the instruction excepted to is not a new one, either in commercial jurisprudence or in this Court. The general rule of the common law is, that, except by a sale in market, overt, no one can give a better title to personal property than he has himself. The exemption from this principle of securities, transferable by delivery was established at an early period. It is founded upon principles of commercial policy, and is now as firmly fixed as the rule to which it is an exception. It was applied by Lord Holt to a bank bill in Anon, 1st Salkeld, 126. This is the earliest reported case upon the subject. He held that the action must fail, "by reason of the course of trade, which creates a property in the assignee or bearer." The leading case upon the subject, is Miller *vs.* Race, (1 Burr., 452,) decided by Lord Mansfield. The question in that case also related to a bank note. The right of the *bona fide* holder for a valuable consideration was held to be paramount against the loser. He put the decision upon the grounds of the course of business, the interests of trade, and especially that bank notes pass from hand to hand, in all respects, like coin. The same principle was applied by that distinguished Judge in Grant *vs.* Vaughan, (3 Burr, 1516,) to a merchants' draft upon his banker. He then said in "Miller *vs.* Race, 31st, Geo. II. B. R., the holder of a bank note recovered against the cashier of a bank, though the mail had been robbed of it, and payment had been stopped. It appearing that he came by it fairly and *bona fide*, and upon a valuable consideration, and there is no distinction between a bank note and such a note as this is." In Peacock *vs.* Rhodes, (2 Dong., 633,) he said,

"The law is settled that a holder coming fairly by a bill or note has nothing to do with the transaction between the original parties, unless, perhaps, in the single case, which is a hard one, but has been determined of a note for money won at play." The question has since been considered no longer an open one in the English law as to any class of securities within the category mentioned. What state of facts should be deemed inconsistent with the good faith required was not settled by the earlier cases. In Lawson *vs.* Weston, (4 Esp., 56,) Lord KENYON said, "If there was any fraud in the transaction, or if a *bona fide* consideration had not been paid for the bill by the plaintiffs, to be sure they could not recover; but to adopt the principle of the defence to the full extent stated would be at once to paralyze the circulation of all the paper in the country, and with it all its commerce. The circumstance of the bill having been lost, might have been material if they could bring knowledge of that fact home to the plaintiffs. The plaintiffs might or might not have seen the advertisement; and it would be going a great length to say that a banker was bound to make inquiry concerning every bill brought to him to discount. It would apply as well to a bill for £10 as for £10,000."

In the latter case of Gill *vs.* Cubitt (3 B. & Cress, 466,) Abbott, Chief Justice upon the trial, instructed the jury, "That there were two questions for their considerations; first, whether the plaintiff had given value for the bill, of which there could be no doubt, and secondly, whether he took it under circumstances which ought to have excited the suspicion of a prudent and careful man." The jury found for the defendant, and a rule *nisi* for a new trial was granted. The question presented was fully argued. The instruction given was unanimously approved by the Court. The rule was discharged and judgment was entered upon the verdict. This case clearly overruled the prior case of Lawson *vs.* Weston, and it controlled a large series of later cases. In Crook *vs.* Jadus, (5 B. & Adol, 909,) the action was brought by the indorsee of a bill against the drawer. It was held that it was no defence that the plaintiff took the bill under circumstances which ought to have excited the suspicion of a prudent man that it had not been fairly obtained. The defendant must show that the plaintiff was guilty of gross negligence.

In Backhouse *vs.* Harrison (5 B. & Adol. 1098) the same doctrine was affirmed, and Gill *vs.* Cubitt was earnestly assailed by one of the Judges. Patterson, Justice, said: I have no hesitation in saying that the doctrine laid down in Gill *vs.* Cubitt, and acted upon in other cases, that a party who takes a bill under circumstances which ought to have excited the suspicion of a prudent man, cannot recover, has gone too far and ought to be restricted. I can perfectly understand that a party who takes a bill fraudulently, or under such circumstances that he must know that the person offering it to him has no right to do it, will acquire no title; but I never could understand that a party who takes a bill *bona fide*, but under the circumstances mentioned in Gill *vs.* Cubitt, does not acquire a property in it. I think the fact found by the jury here that the plaintiff took the bills *bona fide*, but under the circumstances that a reasonably cautious man would not have taken them, was no defence. In Goodman *vs.* Harvey the subject again came under consideration. Lord Denman speaking for the court, held this language, "I believe we are all of opinion that gross negligence only would not be a sufficient answer where the party has given a consideration for the bill. Gross negligence may be evidence of *mala fides*, but is not the same thing. We have shaken off the last remnant of the contrary doctrine. When the bill has passed to the plaintiff without any proof of bad faith in him there is no objection to his title." A final blow was thus given to the doctrine of Gill *vs.* Cubitt. The rule established in this case has ever since obtained in the English courts, and may now be considered as fundamental in the commercial jurisprudence of that country. The burden of proof lies on the person who assails the right claimed by the party in possession. Such is the settled law of this court, and we feel no disposition to depart from it, the rule may perhaps be said to resolve itself into a question of honesty or dishonesty, for guilty knowledge and wilful ignorance alike involve the result of bad faith; they are the same in effect. Where there is no fraud there can be no question, the circumstances mentioned, and others of a kindred character, while inconclusive in themselves, are admissible in evidence, and fraud established whether by direct or circumstantial evidence is fatal to the title of the holder. The rule laid down in the class of cases of which Gill *vs.* Cubitt is the antetype is hard to comprehend and difficult to apply. One innocent holder may be more or less suspicious, under similar circumstances, at one time than at another, and the same remark applies to prudent men. One prudent man may also suspect where another would not; and the standard of the jury may be higher or lower than that of other men equally prudent in the management of their affairs. The rule established by the other line of decisions has the advantage of greater clearness and directness. A careful judge may readily so submit a case under it to the jury that they can hardly fail to reach the right conclusion. We are well aware of the importance of the principle involved in this inquiry. These securities are found in the channels of commerce everywhere and their volume is constantly increasing. They represent a large part of the wealth of the commercial world. The interest of the community at large in the subject is deep rooted and wide branching. It ramifies in every direction and its fruits enters daily into the affairs of persons in all conditions of life. While courtsshould be careful not so to shape or apply the rule as to invite aggression or give an easy triumph to fraud, they should not forget the considerations of equal importance which lie in the other direction. In Miller *vs.* Race, Lord Mansfield placed his judgment, mainly on the ground that there was no difference in principle between bank notes and money. In Grant *vs.* Vaughan he held that there was no distinction between bank notes and any other commercial paper. At that early period his far reaching sagacity saw the importance and the bearing of the subject. The instruction under consideration in the case before us is in conflict with the settled adjudication of this court.

Judgment reversed, and the case remanded for further proceedings in conformity to this opinion.

Interest and Dividends.

The Atlantic Mail Steamship Company have declared a dividend of 2½ per cent., payable at the office of the Company in New York, on the 10th of June.

The Vermont and Canada Railroad Company have declared a dividend of 4 per cent., less Government tax, payable June 1 in the stock of the company at par.

The Rockport Railroad Company have declared a semi-aunual dividend of 4 per cent.

Coupon No. 2 of the First Mortgage Bonds of the Vermont Central Railroad Company, due June 1, will be paid at No. 5 State St., Boston, from the 1st to the 10th day of June, inclusive, in the notes of the Trustees and Receivers of the Vermont Central and Vermont and Canada Railroads dated July 1, 1867, and payable twenty years from date, with interest semi-annually at the rate of seven per cent. per annum, issued by virtue of a decree of the Court of Chancery of Vermont, and secured by a pledge of the stock, bonds and earnings of the Stanstead, Shefford and Chambly Railroad.

Coupon No. 1 of the Second Mortgage Bonds of the Vermont Central Railroad will be paid at the same time and place, and in the same manner, to the holders of said bonds who comply with the decree of the Court of Chancery, authorizing said loan, by taking said notes and paying in cash therefor to the amount of five per cent. of the par value of their bonds, in addition to their coupon.

Morris and Essex Railroad.

The Morris and Essex Railroad Company have purchased several acres of land in Chatham township, adjoining the Passaic River, where, it is said, they are about to erect buildings for a large locomotive station and repair shops. They are also building a cistern, which they will fill from the Passaic by an Ericsson engine, to supply their locomotives with water. It is further said that the Chatham depot is to be removed a short distance below its present situation, and that the railroad company have extensive improvements in contemplation at various points. The double track is now completed and mostly in use between Chatham and Hoboken. The coal traffic averages about 900 tons per day, the freight traffic is very large, and the passenger continually on the increase.

☞ The National Convention of Railroad Car Masters, which was held in Springfield, Mass., on the 15th inst., was attended by representatives of all the leading railroads in the country. Several new inventions were exhibited. They adjourned to meet at Altoona, Pa., September 18th, when the National Association of Car Masters will be organized.

☞ The Loew Aerial Iron Bridge, at the intersection of Broadway and Fulton streets, this city, was thrown open to the public on the 16th inst. It is stated that the city, through the Street Commissioner, has accepted the bridge, and the contractor will receive the contract money for his work, $14,000.

☞ A dispatch from San Francisco says it is rumored that the Western Pacific Railroad Company has sold their franchise privilege to the Central Pacific, the work to be commenced immediately, and the road to be in operation from Sacramento to Stockton in ninety days.

Interest on the Alabama State Debt.

We learn from the Montgomery *Advertiser* that John Whiting, Esq., the State's financial agent, left that city on the 16th inst., for New York, for the purpose of carrying into effect the arrangement for paying the interest on the bonded debt of the State which will shortly be due in London. The interest on a portion of the London bonds is payable annually on the 1st of June, and upon another portion the interest is to be paid semi-annually, on the 1st of January and 1st of July. Governor Patton, with characteristic energy, has provided the funds necessary to pay this interest. The aggregate amount of currency required for the purpose, including the premium on exchange, is $93,286. The sterling exchange for the June interest having been forwarded to London through the agencies of the Bank of Mobile, Mr. Whiting will remit from New York the amount necessary to pay the coupons falling due the 1st of July. The interest on the New York bonds is payable semi annually on the 1st of May and 1st of November. The May interest has already been paid. The amount required for that purpose was $64,-731. Hence, the aggregate amount of interest paid at New York and London in May, June and July, is $158,005.

McGregor Western Railroad.

We learn that the work on the extension of the McGregor Western Railway to Owatonna is progressing as fast as men and money can push it. Seven hundred laborers are at work on the road. This will be news of the most cheering kind to business men in Milwaukee and to everybody in Minnesota.

It had been supposed that recent litigation would compel a suspension of this most important work; but as yet no cessation has taken place. This work of binding to us in interest and commercial intercourse the young and vigorous State of Minnesota, cannot be accomplished a moment too soon.—*Milwaukee Wisconsin.*

Montgomery and West Point Railroad.

The earnings of this road for the year ending February 28, 1867, were as follows:

From passengers		$226,127 19
" freight		214,880 07
" mails		8,000 00
		$449,007 26

The expenses were:

Maintaining road	$76,970 23	
Maintenance of rolling st'k	64,818 16	
Operating	106,253 60	
Taxes	13,563 02	
		261,605 01
Net earnings		$187,402 25
Interest on bonded debt		80,884 51
Leaving a surplus of		$106,517 74

—or a fraction over six per cent. on the capital stock.

There has been expended during the year for reconstruction and renewals so far as the same was justly chargeable to the effect of the war, and not to ordinary wear and tear, the sum of $123,-760 14; and for changing the gauge of the road, $68 850—making the total extraordinary expenditures, $192,610 14. The President, in his report, says:

The past railroad year has been a very important one in the history of the company. With a past due debt in bonds and coupons, of over $300,-000, which matured during the war, a mortgage debt of $450,000, to become due on the 1st day of July, 1866, to arrange, and a large amount of money to be raised to put the road and its outfit in a condition to work, I felt great anxiety as to the result; although, in my last report to you I was encouraged to hope the debts could be arranged and the means provided to bring up the road to an effective condition.

The following statement will place before you the financial operations of the past year:

Under resolutions of the Board of Directors, I executed and issued the income bonds of the company dated 1st January, 1866, and payable 1st July, 1876, for		$310,000 00
The mortgage bonds, dated 1st June, 1866, payable 1st July, 1881, for		750,000 00
		$1,060,000 00
Of these we have yet on hand—		
Income bonds	$10,800 00	
Mortgage bonds	110,500 00	
		121,300 00
		$938,700 00
The floating debt of the company, which is now, $288,781 78; has been increased within the year		134,424 65
The net earnings of the road over and above expenses and interest on debt, amounts to		106,517 74
We have realized from sales of old iron		12,642 23
Making a total of		$1,192,284 62
Which has been applied as follows:		
To the settlement of bonds due in 1863 and 1865		$146,000 00
To the settlement of coupons which became due during the war, and prior to 1st January, 1866		144,917 50
To the settlement of mortgage bonds due 1st July, 1866, by exchanging new bonds for old, at par		388,500 00
For the payment of extraordinary expenses, being for change of guage of road, building bridges, depots, workshops, division houses, etc.		192,610 14
For purchase of locomotives, cars, machinery, materials, &c., as shown by the increased value, as per inventory compared with the inventory of 1st March, 1866		176,423 44
For the payment of iron taken from the Alabama and Florida Railroads, of Alabama and of Florida, (during the war)		49,563 83
For purchase of 300 tons iron rails.		27,817 14
For purchase of 3000 acres of land, and erection of steam, saw, and grist mill		20,533 33
Discount on bonds sold for cash below par, and commissions for selling bonds, and for advance of money on hypothecation of bonds		22,292 83
On subscription to stock of Western Railroad Company		8 643 95
In compromise and settlement of debts contracted during the war		14,982 46
		$1,192,284 62

Upon reference to the foregoing statement, you will notice that in the arrangement and settlement of so large a portion of your outstanding debt, and in making provision for money before the bonds of the company could be disposed of at satisfactory rates, the loss by sale of bonds below par, and all the expenses and commission amount to only $22,292 83, showing that the bonds sold for cash, amounting to $259,700, have averaged 88¼ net.

Of the bonds which became due in 1863 and 1865, amounting to		$176,000 00
We have taken up, by giving new ten year income bonds in exchange		146,000 00
Leaving yet outstanding		$30,500 00
Of the mortgage bonds which became due on 1st July, 1866, amounting to		$450,000 00
We have taken up, as per report from the books, up to 1st March	$388,500	
Taken up since 1st March	7,500	
		396,000 00
Leaving outstanding		$54,000 00
It is therefore a most gratifying result, that out of a bond and coupon debt due and pressing upon the company, amounting in the aggregate to		$771,000 00
We have taken up and arranged		687,000 00
Leaving now to be arranged only		$84,000 00

The most important consideration now is, what can be done to place the finances of the company in such a condition as will enable it to pay dividends on its capital stock; and the only obstacle to this now is the floating debt, which can probably be paid off from the net income for two years. But it is a long time to defer dividends, and although it is objectionable to increase the debts of the company, I can see no other plan but to issue such an amount of bonds as will provide for it; and I advise you, therefore, to pass resolutions instructing the Board of Directors to issue such an amount as may be necessary to accomplish this object, and also to provide for a responsibility which rests upon the company as joint guarantors of the Alabama and Florida Railroad Company, of Alabama.

In the year 1857, you authorized the Directors to guarantee the bonds of the Alabama and Florida Railroad Company, jointly with the Atlanta and Lagrange Railroad Company, for the sum of three hundred thousand dollars. These bonds become due on 1st July, 1867. Such is the embarrassed condition of the Alabama and Florida Railroad Company, that it cannot provide for the payment; and to renew them by a new guarantee would release the first lien on the road now protecting the endorsements. I can therefore see only one safe course to be pursued: It is for the company to issue its bonds for such a sum as will redeem one half of the guaranteed bonds, upon condition that the Atlanta and West Point Railroad Company will agree to do the same, and tender these bonds in exchange for the guaranteed bonds due on the first day of July. I have but little doubt they will be readily accepted, and if the bonds can be so arranged and a sale of the road avoided, I think the entire debt of the Alabama and and Florida Railroad Company can be arranged, and time given for it to work out of its difficulties. In this you are very largely interested, as Stockholders in that company to the extent of 1,408 shares, which may be hereafter valuable; but which would be entirely lost if the road and property of that company should be sold.

Within the year we have paid in our subscription to the capital stock of the Western Railroad Company $8,643 95, making our full payments up to this time $23,643 95 on the subscription of $100,000. The payment of $8,643 95 has been used on the work now in progress through the city, which, when completed, will make a permanent connection of the tracks of both the Alabama and Florida Railroad and the Western Railroad with the track of your road.

The speedy completion of the Western Railroad becomes daily more and more important, and every effort is being made to hasten its construction, a contract having been made, upon very favorable terms, to complete the entire grading within one year, and if arrangements can be made for the iron, by the close of this year I hope to see some part of it in operation.

The equipment of the road consists of 21 locomotives; 4 first-class and 8 second-class passenger cars, 5 baggage, 2 mail, 2 express, 7 cab, 60 box, 22 platform, 1 stock, 3 crank, and 21 repair cars. Miles run by locomotives, 170,707. Passengers carried, 56,618. Bales of cotton transported, 25,226.

The assets and liabilities of the company, March 1, 1867, were as follows:

ASSETS.

Road account, cost of 117 miles		$2,439,419 90
Locomotives, value of 21		194,600 00

President.—CHARLES T. POLLARD.
Engineer & Superintendent.—DANIEL H. CRAM.

New Orleans, Jackson and Great Northern Railroad.

We have a letter from G. D. Bustamante, Esq., C. E., dated Kosciusko, Attala Co., Miss., May 7, 1867, in which he says: We are directly on the line of the New Orleans, Jackson and Great Northern Railroad to Aberdeen and the Tennessee River. It is expected that work will be resumed this year, and the road finished from Canton to Kosciusko next year, as the grading is mostly done between the two points. He then adds:

The extension of the road from Canton, by the way of Kosciusko and Aberdeen, has been a bone of contention ever since 1858, until now there is happily no longer any division upon the subject, and the present able Directory, composed almost exclusively of the same gentlemen who have administered the affairs of the company so satisfactorily since the surrender, are disposed to do all in their power to have the road built. But for the great difficulty with which the company meets its liabilities and carries on the work of repairing the road, it would commence the work of extension itself at once; our political status having prevented the leasing of the road on the 1st of April, and the prospects of an early reconstruction of our Southern States being now more flattering, the Board of Directors have determined to send two commissioners to the North "for the purpose of getting capitalists to come forward and build the extension through Aberdeen to Decatur, so as to have at that point direct communication with Chattanooga and Nashville." One of the Directors who is to be one of the commissioners, writes me that he has "strong hopes that the object will be accomplished." I am decidedly of the opinion that with the inducements held out by the company, with forty and a half miles of road nearly all graded between Canton and Kosciusko, and nine and a half miles almost ready for the iron between Prairie Station and Aberdeen, with the right of way nearly all obtained, with the bonus of a large subscription now due and the prospect of additional subscriptions when the building of the road will be a fixed fact, with the immense patronage which the extension road will command, and finally, with the personal representation of the whole subject by the commissioners, their mission will be successful.

The new route from Aberdeen to Decatur will be a little longer than that to Chickasaw, as originally intended; it will lose the advantage of tapping the Tennessee River at the head of uninterrupted navigation, but will connect with the Memphis and Charleston Railroad nearer Chattanooga, and with the Decatur road already built to Nashville, advantages of great importance in competing for the travel over the Great Southern Mail route. The route from Aberdeen to Decatur will pass through Marion, Lawrence and Morgan Counties, Alabama, containing a population of 24,659 whites and 11,831 negroes, in 1860, and which made 26,035 bales of cotton. It will also touch the corners of Franklin and Winston, very large counties, and which, with the adjoining counties, are full of iron and coal. These counties, as will be perceived, have a large preponderance of white inhabitants—the hope of the South—and their population has much increased since the surrender.

Should no negotiations be effected North, there is every reason to believe that in view of its own vital interests in the matter, the company will undertake to make some arrangements after a short time to build the road themselves, and they may be assisted with another million of dollars by the city of New Orleans.

☞ Arrangements are now being completed for the purpose of opening another railroad to connect the upper portion of Westchester county with Connecticut. The proposed construction is to run from Portchester, Westchester county to Ridgefield, Conn., a distance of about twenty-three miles, and will pass through Poundridge, Lewisboro' and Greenburg. The portion of the road within the limits of this State will be built under the general railroad act, and a petition for a charter granting power to construct the remainder, is now in the hands of a committee for presentation before the Connecticut Legislature. The estimated cost of the undertaking will not exceed, equipments included, more than $30,000 per mile.

☞ The Sussex Railroad extension from Newton to Branchville, N. J., will be ready for the ties and iron by the 1st of August. The means are furnished by a strictly agricultural community, from two townships in the county. The extension will be ten miles in length, and will cost $250,000, for which the present stockholders will be reimbursed to the extent of their subscriptions by the bonds or stock of the Sussex Railroad Company.

THE HARDAWAY BOLT, SPIKE & RIVET Manufacturing Co.

Manufacturers of every variety of

Railroad and Ship Spikes,

BOLTS AND RIVETS.

ERIE CITY PASSENGER RAILWAY.
CONTRACTORS TAKE NOTICE.

PROPOSALS WILL BE RECEIVED UNTIL 1st June next, for the construction of the Main Line of the ERIE CITY PASSENGER RAILWAY, located in the City of Erie, Pa., and commencing at the corner of Second and Holland Streets, extending Westerly on Second St., a distance of 1,100 feet to State Street, and thence Southerly on State, Turnpike, and Peach Streets, a distance of 6,130 feet to Buffalo Street. That portion of the route located on State, Turnpike and Peach Streets is paved with stone. The part on Second Street is unpaved. The above being designed to be a double track railway, is equal to 14,460 lineal feet or 2.738 miles.

It is intended in the course of another year to build some four miles of branches.

Parties making proposals will please state the style and weight of rail; size of stringers; kind of timber; size of cross-ties, and distance apart; together with the manner of construction generally.

References will be required from contractors, and the Company reserve the right to reject any bids as they may deem for their interests.

Proposals should be enclosed in an envelope, marked "Proposals," and directed to
EDWARD J. COWELL,
Secretary of the Erie City Pass. R. W. Co.,
2t20 Erie, Pa.

RICHARD B. OSBORNE.
CIVIL ENGINEER,
No. 219 South 4th St., Philadelphia,
Where Plans and Estimates of Work will be promptly attended to
Barometrical reconnoissance for Railway lines, Location and Construction of Railroads, and all duties required on Public Works in any State of the Union performed with fidelity.

IRON BRIDGES.

THE undersigned is prepared to Manufacture and Build in any part of the United States, at reasonable terms, Fink's Patent Iron Bridges, Plate and Lattice Bridges, Plate Girders for Fireproof Buildings, Iron Roofs, Bolts, etc. For plans and particulars apply to

PLASTIC SLATE ROOFING

JOINT STOCK COMPANY.

OFFICE 157 (Room 19) BROADWAY,

NEW YORK.

W. C. POTTER, Vice Pres't.
J. M. ALLEN, Sec. and Treas. **LICENSES GRANTED.**

PLASTIC SLATE

FOR

Roofing & Other Purposes.

The process of reconstructing Slate Stone from a disintegrated state was

PATENTED FEBRUARY 21ST, 1865.

It is a combination of

Pulverized Slate and Viscous Matter,

(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.

As a Roofing Material it Stands Unrivalled.

A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.

Frost does not Crack nor Heat Dissolve it.

The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and

Perfectly Fire-Proof,

It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

SCHOOL OF MINES,

COLUMBIA COLLEGE,
East 49th Street, NEW YORK.

FACULTY:

F. A. P. BARNARD, S. T. D., LL. D., President.
T. EGLESTON, JR., E. M., Mineralogy and Metallurgy.
FRANCIS L. VINTON, E. M., Mining Engineer.
C. F. CHANDLER, Ph. D., Analytical and Applied Chemistry.
JOHN TORREY, M. D., LL. D., Botany.
CHARLES A. JOY, Ph. D., General Chemistry.
WILLIAM G. PECK, LL. D., Mining Surveying.
JOHN H. VAN AMRINGE, A. M., Mathematics.
OGDEN N. ROOD, A. M., Mechanics and Physics.
JOHN S. NEWBERRY, M. D., Geology.

The plan of this School embraces a three-years' course for the degree of ENGINEER OF MINES, or BACHELOR OF PHILOSOPHY.

For admission, candidates for a degree must pass an examination in Arithmetic, Algebra, Geometry and Plain Trigonometry. Persons not candidates for degrees are admitted without examination, and may pursue any or all of the subjects taught. The next session begins October 7th, 1867. The examination for admission will be held on October 3d. For further information, and for catalogues, apply to

DR. C. F. CHANDLER,
Dean of the Faculty.

FOR SALE

3 LOCOMOTIVES,

4-81-2 GAUGE,

All thoroughly REBUILT by one of the best makers in the country, and ready for immediate use.

1—Cylinders 14x22, Link Motion, 4-56 in. Drivers connected, Copper Flues, Weight about 24 tons; 8 wheeled Tender, 1800 gallons.

This Engine has always worked admirably; Steams freely with dry or green wood, works and wears perfectly smooth; Well springed and brassed all around. Proportions every way suited to power. A good and stylish model, all in excellent order.

2—Cylinders 15x20, Link Motion, 4-56 in. Drivers connected, Copper Flues, weight about 23 tons, 8 wheeled tender, 1,800 gallons.

Is a smart smooth working Engine, suitable for any work; has a good record throughout.

3—Cylinders 15x20 Hook Motion, 4-56 in. Drivers connected, Copper Flues, weight about 24 tons; Tender, 8 wheeled.

Every way perfectly sound, well brassed and springed up. All in fine working condition.

These Engines will be so'd VERY CHEAP to close a transaction, and are GREAT BARGAINS to any company wanting this sized Engine.

KASSON & CO.,
62 Broadway, New York.

Thistle Mill Waste,

A new and Superior Article of WOOLEN Waste, combining the following

ADVANTAGES,

1st. It is 30 per cent. lighter than ordinary waste.
2d. It will absorb 25 per cent. more oil.
3d. Has greater elasticity and will wear longer.
4th. It is less liable to ignite.
5th. And has a value as old waste.

The use of Wool as an ANTI FRICTION material is too well known to require discussion.

This waste is manufactured expressly for use in packing Locomotive and Car Journal Boxes, and will be sold as low as the best Cotton Waste.

The old waste taken in exchange at a price—including weight of oil, dirt, &c.—which will reduce first cost over one-half.

Small Sample Bales furnished FREE for trial.

KASSON & CO.,
15tf **62 Broadway, New York.**

New York, Saturday, June 1, 1867.

Pittsburg, Ft. Wayne & Chicago Railway.

A meeting of the Stockholders of this company was held at Pittsburg on the 25th ult. for the purpose of considering the proposition of the directors to increase the capital stock 15,000 shares, a portion of the proceeds of which, or $1,200,000 is to be expended in providing additional equipment and shop machinery, in the purchase of real estate, the erection of buildings, bridges, etc., and in the construction of side track. The president presented the resolutions passed at the last meeting of the board in New York, after which the followig rsesolution was offered and adopted by a vote of 44,577—none opposing it:

Resolved, That pursuant to, and in accordance with the bondholders' resolutions of the 7th of April, 1864, and subject to all their conditions, we, in compliance with and for the purposes mentioned in the foregoing resolutions of the Directors of the 22d of April, 1867, do hereby authorize an increase of capital stock to the extent of fifteen thousand (15,000) shares, as proposed in the aforesaid resolutions of the 22d of April, 1867, and provided that no fractional share shall be issued.

The Board of Directors have therefore granted to them the power of increasing the capital stock $1,500,000, twenty per cent. of which representing the amount of bonds redeemed by the sinking funds, is to be credited to the shareholders, and the remainder, eighty per cent. is to be paid in cash within the term allowed for subscribing, which is from the 20th to 29th of June; certificates for the new stock will be issued after July 1, and will carry the dividends for the quarter ending Sept. 30. Those who appear as shareholders on the 10th of June will possess the privilege of subscribing.

Atlantic and Great Western Railway.

The receipts of this company from all sources during the ten months ending October 31, 1866, were as follows:

From freight		$3,464,103 91
" storage of do		14,811 92
" passengers		1,116,779 87
" mails		36,666 66
" express		78,162 19

" 1864	992,460 07	
" 1865	1,593,977 67	
		3,176,592 33
Balance net revenue to Oct. 31, 1866		$2,372,156 47

Represented by the following:

Cash in hands of Treasurer and Paymasters	$159,736 19
Cash in hands of Gurney, Kennard and Mozley and in Bank to pay coupons	1,314,687 45
Materials in general supply store	315,139 22
" department of M. P. & M.	397,407 90
" stationery store	28,096 15
Balance due station agents	77,554 19
Balance of capital and unsettled general accounts on the general ledger	79,535 37
Total, as above	$2,372,156 47

The following is a comparative statement of the earnings and operating expenses of the road for the *ten months* ending October 31, 1865 and 1866:

	1865.	1866.
Earnings	$4,614,727 38	$4,833,489 86
Expenses	2,804,474 38	3,522,460 23
Balance	$1,810,253 00	$1,311,029 63

The earnings, expenses, etc., for the *whole year* of 1865 and 1866, were as follows:

	1865.	1866.
Earnings	$5,825,335 18	$5,696,119 32
Expenses	3,686,033 00	4,210,881 51
Balance	$2,139,302 18	$1,485,237 81

The per centage of working expenses for the *ten* months of 1866 was 72.8; for the *year* 1866, 73.9; against 63.3 for the *whole year* of 1865. The President, in his report, says:

Since my last annual report, the by-laws of this company have been amended for the purpose of closing the fiscal year on October 31st. This change has been made to enable the Auditor to have all his accounts closed, and full and complete reports made for your annual meeting in the month of January. Owing to this change, the accompanying reports represent the business of your road for only ten months.

The gross earnings for the ten months, compared with the same months of 1865, show an increase of $218,762 48. This amount is short of our estimate made for the business of the period named.

Our passenger traffic has fallen far below our expectations, both local and through. The stagnation of business following the close of the war—the prevalence of cholera in our country—the interruption of our roads by floods unprecedented, have most seriously affected the local passenger business on most of our western roads, amounting to an average of 30 per cent., and in some cases as high as 40 per cent. By reference

to the reports of your Auditor you will find our passenger receipts have decreased $178,959 31 in 1866. Your road has lost from local causes that have not materially affected other roads. The great excitement and speculation in the oil regions during the year 1864–'5, was the source of an immense travel to and from that section. This excitement passed away early last year, and with it the large amount of travel. The opening of new lines of railroads to that region has also divided the lesser amount of travel. The local travel on other portions of your road has increased, and bids fair to continue to do so.

Our estimate for through travel was based on the expectation that the Buffalo Extension would be completed early in the past season. The importance of this connection, for both passengers and freight, must be apparent to all. As yet our through passenger business is confined mainly to one line between New York City and the west. We have no line that connects us with Buffalo, Niagara, Canada, the great and populous portion of the State of New York, and with the New England States. Nor have we any fair connection by which we can reach either Baltimore or Washington. We are confined to one great city in the east, from and to which we have had the larger share of passengers; but the travel to and from New York city is small compared to that of the country named.

Our freight earnings amount to $3,478,915 83 This shows an increase of $335,390 55 over the same months of 1865. Our tonnage shows an increase of 366,578 tons—almost 50 per cent. Had we obtained the same average price per ton (which was in 1865 $3 70 and in 1866 $2 87) our estimates would have been fully realized. The great reduction in price of freight was occasioned by the opening of new roads to the oil regions, and by the resumption of competition on the part of the Baltimore and Ohio road and the coast route, which had been previously suspended by the war of rebellion.

It should be a source of gratification to all interested in our company to find this great increase of tonnage. It proves the location a success, enabling our road to compete favorably with all the great trunk lines of this country. With only one connection in the south-west, of the same gauge, it was generally supposed your tonnage would have been much less than it has proven. The prompt manner in which freights have been carried, without delay or transhipment at any point, both by the Erie and A. & G. W. R'y, has given the line a reputation, that has secured a great increase of through freights the past year, and the volume will doubtless continue to swell.

Our transportation expenses this year amount to 72.8 per cent. of our gross earnings. Last year they were 63.3 per cent. The cause of this will readily be seen. The extra number of tons moved could not be done with the same number of trains. Men and supplies were from necessity increased, and the price both was quite as much as last year. Had there been a corresponding reduction in the cost of men and supplies with the reduction in rates of transportation, our net earnings would no doubt haven proven highly satisfactory. The present stagnation in eastern markets indicates a material decline in the expenses of living, and in the cost of both labor and supplies, the coming year.

Arrangements recently completed between the Erie, and A. & G. W., and C. H. & C., and Ohio and Mississippi Companies, by which the several roads are to be operated as one great through freight line, from New York to St. Louis, will largely increase our through traffic the ensuing year, and give still greater satisfaction to the business public. And here it may not be out of place to say that the relations now existing between the several companies owning the broad gauge roads of our country, are of the most friendly character; and there is a proper appreciation on the part of all of the great importance of unity of feeling and action.

Our local freight business bids fair for a large increase. The building of a number of furnaces—the opening of new coal fields, and the general improvement of the country, on your line, will certainly give you a largely increased traffic. It has been the policy of the company to encourage manufactures at all points on the line for the past two years; and as an instance of the good effect of such a policy, we may mention that in the city of Cleveland, in the year 1864, there were but five refineries of petroleum on our line; now they number forty-six and consumed 474,132 barrels of crude oil during the ten months ending October 31st last.

The extension of your line into Oil City, referred to in the Superintendent's report, has largely increased the oil traffic on the Franklin Branch, and it has enabled you to get your proportion of the increased shipment, which for the ten months of 1866, amounts to 609,932 barrels over 1865, and 634,655 over the year 1864.

This important branch of your business has attracted the attention of the managers of the New York Central and Pennsylvania Central roads, and they are now making large expenditures for the purpose of dividing this traffic, of which you have heretofore had so large a proportion. With our present arrangements we confidently expect to retain a full share.

The improvements on your line, contemplated at the commencement of the year, in filling trestles, putting in stone piers in place of those of wood, etc., and completing such buildings as were thought necessary to enable the road to be worked with greater economy, have had to be principally suspended. Only such expenditures as could not be avoided without great loss have been made. Orders were given early in the season for such materials as were expected to be used in the construction of the buildings, but were countermanded as soon as we were informed by your Financial Agent, in London, that means to pay for the same could not be provided for months to come. A small portion of the orders had been filled, and were paid for out of the earnings instead of the capital, as was originally intended.

The financial panic in England deprived us of not only what was required to put your main line in complete working order, but also defeated the completion of the branches to Buffalo and New Lisbon, which, when completed, must so largely increase your earnings both from passengers and freights.

The consolidated bonds and shares authorized, were, under direction of your Board, issued and forwarded to Trustees in London, appointed by your Board, a part of which were held by said Trustees for the purpose of exchanging for the State or divisional bonds. Of these divisional bonds $3 257,100 have been cancelled and returned to your Treasurer. The remainder of the bonds in the hands of your Trustees, after providing for the divisional bonds, were deemed sufficient to pay the balance due Mr. James McHenry for work done and complete the main line and branches, and were to be used for that purpose solely.

A proposition was made to our company, through the Chairman of the Board of Control in London, that Mr. James McHenry complete the main line and branches, for the remaining securities of the company, then in the hands of said Trustees. This proposition was agreed to, and a contract ordered to be drawn up by the solicitor of the company. The contract, however, has not yet been executed, nor any of the work since performed, except a small portion on the main line in the early part of last year.

The amount expended on construction has been principally paid out of the earnings, and the remainder of the net has been used in paying coupons here, and forwarded to London for a like purpose.

By reference to the report of your Superintendent it will be seen that the amount of work required to be done will consume a large part of the net earnings of the road for the ensuing year or two, unless the amount can be derived from your capital account. No report has been furnished by the Board of Control, or by your Financial Agent, that will enable us to say what can be realized for this purpose out of the remaining securities. Should you not be able to realize from this source, then your net earnings should be used to complete what is essential to be done, in order to work the road to the best advantage, and to develop fully its traffic and thereby give greater value to its securities.

The number of passengers and tons of freight carried during the ten months of 1865 and 1866, compare as follows:

	Passengers.	Freight.
1865	847,608	831,959
1866	742,077	1,198,537
Increase in freight		366,578
Decrease in passengers	105,531	

The number of passengers carried eastward in 1866, was 371,217, of which 59,974 were through, and 311,243 way; do., westward, 370,860, of which 58,249 were through, and 312,611 way. Total passengers carried, 742,077, of which 118,223 were through, and 623,854 way. Total mileage of passengers, 33,790,988. Average rate per passenger per mile, 3.29 cents.

The number of tons of freight forwarded eastward in 1866, was 499,095, of which 84,963 were through, and 414,132 way; do., westward, 699,442, of which 91,570 were through, and 607,872 way. Total number of tons carried, 1,198,537, of which 176,533 were through, and 1,022,004 way. Total number of tons carried one mile, 125,286,364. Average rate per ton per mile, 2.75 cents.

From this it will be seen that while travel eastward and westward is very nearly equal, the through is comparatively small, being only 16 per cent. of the total travel, and 19 per cent. of the way travel. In the through travel 65,784 passengers were received from other railways; the balance, 52,439 passengers, started from points on this road and passed on to other roads.

It will also be seen that on eastward bound freights, the through freight is 17 per cent. of the total, and on westward bound it is 13 per cent. On the total freight traffic the through freight is 15 per cent. of the total tonnage. Of the total tonnage forwarded 354,319 was delivered to this road through other transportation companies, the balance, 844,218 tons, being derived from the section of country immediately adjoining.

The passenger and freight earnings during the ten months of 1865 and 1866, were as follows:

	Passenger.	Freight.
1865	$1,291,476 61	$3,083,320 11
1866	1,112,517 80	8,437,897 25
Increase in freight		$354,577 14
Decrease in pass	$178,959 31	

The average rate per passenger in 1865, was $1.52; and per ton of freight, $3.70. In 1866, it was $1.50 per passenger; and $2.87 per ton of freight.

The freight traffic shows a large increase in the tonnage, while the average rate per ton is much lower. Had the same rates been received during the past, as during the previous year, the freight earnings would have been increased by about $1,000,000.

While the average rate per passenger is about constant, the travel has diminished. Had this traffic continued as large as in the previous year, the revenue would have been additionally increased by about $150,000.

Had this additional revenue been realized, the

earnings would have been sufficient to meet all payments properly chargeable to the revenue account, such as bonded debt, operating expenses, rents of leased roads, etc., as the revenue account shows a deficit of only $804,435 86, while the estimated increase, as above, would have amounted to about $1,150,000.

Had this additional amount of earnings been realized, the operating expenses would have been reduced to about 60 per cent., as the expenses would not have been increased above the present amount, the supposed increase of earnings being from increased rates, and not from any increase over the actual tonnage moved.

The following are the names of the principal roads from which passengers were received, and the number and amount from each:

	Passengers.	Amount.
Erie	31,117	$177,285 70
Pittsburg, Ft. W. & Chicago	13,378	36,331 51
Erie and Pittsburg	3,886	6,655 28
Oil Creek	3,177	19,014 15
Phila. and Erie	2,683	4,922 30
Mich. S. and Nor. Ind.	1,862	8,426 28
Ohio and Miss.	1,124	12,064 90
Pennsylvania	1,055	2,886 79
Sundry other roads	7,502	51,014 04
	65,784	$318,600 95

The following are the roads from which freight was received, and the number of tons and amount from each:

	Tons.	Amount.
Erie Railway	142,823	$822,098 21
Oil Creek	101,182	419,031 39
Cin., Ham. and Dayton	51,624	455,357 58
Reno. Oil Creek & Pithole.	9,468	53,259 91
Cleveland and Toledo	9,413	30,899 56
Erie and Pittsburg	9,278	24,432 20
Col. and Ind. Central	8,398	30,560 99
Bellefontaine	2,756	11,555 78
Pa. and Ohio Canal	2,595	5,042 65
Phila. and Erie Railway	2,354	6,790 61
Sundry other roads	14,428	68,309 07
Total	354,319	$1,927,337 95

The number of barrels of petroleum (both crude and refined,) forwarded eastward in 1866, was 730,531; westward, 492,306—total number of barrels, 1,222,837, yielding $932,490 46, or an average rate of 76 cents per barrel. The average monthly shipment in 1866, was 122,284 bbls.; in 1865 it was 65,336 bbls.—showing an average increase per month of 56,948 bbls. The average rate per barrel in 1865, was $1.08.

The classification of the freight forwarded during the ten months, were as follows:

	Pounds.	Amount.
Lumber	71,454,513	$47,313 35
Other products of the forest	22,943,967	14,628 22
Live stock	15,518,495	49,726 66
Products of animals	38,748,508	103,172 26
Flour and grain	154,075,444	302,129 02
Other vegetable food	13,547,119	33,547 95
Agricultural products	38,951,618	89,313 08
Spirits, leather and salt	15,278,164	31,720 07
Manufactured articles	218,487,828	378,174 80
Merchandise	182,197,121	541,701 98
Mineral coal	834,438,950	393,564 21
Iron and other ores	207,384,157	136,065 93
Crude petroleum	313,664,415	709,116 77
Miscellaneous	270,384,218	607,722 95
Total	2,397,074,517	$3,437,897 25
Or	1,198,537 tons.	

The equipment of the road consists of 132 broad and 18 narrow gauge locomotives; 87 passenger, 7 sleeping, 6 smoking, 1 superintendent's, 2 paymaster's 34 baggage, 9 express, 3 post office, 59 caboose, 821 box, 849 open, 1,471 coal and platform, 4 boarding, and 8 wrecking cars. Of the above, 6 passenger, 3 baggage, and 756 freight, etc., cars are of the narrow gauge. Miles run by locomotives, 2,656,764. Number of cars hauled one mile, 29,851,318. Total length of main line, 388 miles; length of branches, 119 miles—total length of line operated, 507 miles.

The general office of the company is at Meadville, Penna. The officers and directors are:

President.—S. S. L'HOMMEDIEU.

Vice President.—J. J. SHRYOCK.

Directors.—S. S. L'Hommedieu, J. J. Shryock, Hon. John Sherman, Marvin Kent, Hon. G. Church, Hon. John Dick, E. P. Brainerd, J. W. Tyler, A. F. Allen, Jacob Crall, Jacob Riblet, C. V. Culver, Charles Day, Henry Martin, G. R. Babcok, S. L'Hommedieu, Pearson Church, T. W Kennard, C. E. E. Blakesley, Wm. Thorp, John Howard.

Treasurer.—J. M. DICK.

Secretary and Auditor.—J. C. CALHOUN.

Gen'l Superintendent.—D. MCLAREN.

☞ A party, consisting of ten civil engineers, in charge of A. M. Peak, left Albany a few days since for the North Woods. They are in the employ of the State, and entrusted with the survey of the Schenectady and Ogdensburgh Railroad. This work will detain them in the Northern Wilderness until late in the Fall.

Frederick and Pennsylvania Line R. R.

Messrs. Gitt and Irwin commenced the preliminary survey of this road at Littlestown, on the 10th ult. Taneytown was reached on the 18th and Frederick on the 24th. We are informed that a line of easy grades and very direct in its course was found. Our informant states that the engineers were greatly surprised on finding such a beautiful and level country intervening between Littlestown and Frederick. The route is represented as being nearly level all the way, with the exception of a short distance between the two Pipe Creeks, consequently the earthwork or grading will be comparatively light. From Littlestown the distance is thirty miles, or three miles shorter than the public road. The line was run into the western end of Frederick. Another route will be surveyed, starting from the depot of the Branch Road east of the city to Worman's Mill, there connecting with the line already surveyed. At Woodsboro' it will diverge from this line to the left, by Double Pipe Creek, leaving Taneytown to the right, by which, it is expected, a further reduction in the distance can be made.

Covington and Ohio Railroad.

The committee appointed by the meeting of stockholders of the Virginia Central Railroad have reported adversely to the creation by the Central road of three millions of eight per cent. preferred stock for the completion of the Covington and Ohio road. The stockholders of the Virginia Central, however, at their meeting in Richmond on the 23d ult., adopted the following resolutions:

Resolved, That it is inexpedient for this company to undertake to construct the Covington and Ohio road with borrowed capital.

Resolved, That the board of directors of this company be instructed to offer to contract with the commissioners of Virginia and West Virginia to construct the Covington and Ohio Railroad on the following terms and conditions:

1st. That if the amount of money required to put the road in operation from Covington to steamboat navigation on the Kanawha River, with the necessary buildings and equipments, (not less than five millions of dollars,) be not raised within six months from the date of the contract, by subscriptions of stock which the board of directors believe are available, and they are willing to receive as cash, then and in that case this company shall be released from the contract if they desire it.

2d. This company will guarantee to those stockholders who furnish the funds to construct and equip the road to steamboat navigation on the Kanawha, and on any such additional stock thereafter subscribed, four per centum semi annually, as preferred dividend on all the stock fully paid after the road is completed to the Ohio River.

St. Paul and Chicago Railroad.

We have received a pamphlet copy of the statement of this company respecting the issue of its bonds, which are now about to be offered for sale to the amount of four million of dollars. The bonds are to bear eight per cent. per annum interest, with coupons payable quarterly, the principal and interest being guaranteed by the Farmers' Loan and Trust Company of the city of New York. The St. Paul and Chicago road will connect with the Chicago and Northwestern Railroad at Winona, the two roads running nearly upon an air line between these two points. The company has a large grant of lands from the Government, which, together with the road, are mortgaged for the security of the bonds.

New Jersey Railroad and Transp. Co.

At a meeting of the directors of this company, held in New York on the 13th of April, 1867, the following resolutions were passed:

Resolved, That in pursuance of the power granted by the third section of the "Act to validate and confirm certain agreements between the companies owning the railroad lines between New York and Philadelphia," passed by the Legislature of the State of New Jersey, Feb. 27, 1867, the capital stock of the New Jersey Railroad and Transp. Co. be divided into shares of $100 each, instead of the present division of $50 each, and for that purpose that the present certificates of stock be called in, and new certificates be issued for one-half the number of shares thereof, exclusive of any fractional parts of a share; and that the Treasurer be and he is hereby authorized to buy and to sell fractions of such consolidated shares, (at the option of the stockholder, to be expressed on or before the 15th of June next,) at the price of $70 for each half share.

Resolved, That in pursuance of the power granted by the third section of the aforesaid Act of the Legislature of the State of New Jersey, the capital stock of the New Jersey Railroad and Transp. Co. be, and the same is increased to the sum of $6,250,000, and that the new stock be apportioned on the 20th day of June next, to the stockholders, in the proportion of one share of $100 of new stock to every four shares of the stock consolidated as above, and standing in their names on that day in the books of the company, subject to the payment of 60 per cent. on the par value thereof (being $60 on every new share) to be paid as follows, viz:

Twenty dollars per share on the 1st of July next,
Twenty dollars per share on 1st October next,
Twenty dollars per share on 2d January next,

Provided that the apportionment of such new stock be made only to such stockholders as shall have consolidated their present stock (as provided in the foregoing resolution,) before the 20th June next, and that no such apportionment be made for, or on account of, any fractional part of a share.

Resolved, That the Treasurer be authorized to buy and sell fractions of the new issue of stock at the price of $16 for every fourth part of a share of such new issue of stock; and further, that the fractions of shares of such new issue of stock be not entitled to receive any dividends until the same be consolidated into full shares, and that all such fractions not consolidated into full shares as above, on or before the 30th September next, will be forfeited to the company, who will pass to the credit of the owner thereof the sum of $16 for each fourth.

Resolved, That any stockholder may postpone the payment of the first instalment (payable 1st July next,) on his shares until the 1st of August, he paying interest on such instalment at the rate of seven per cent. per annum.

Resolved, That the Treasurer give notice to the stockholders of the increase of stock above authorized, and of the call for payments thereon, and also of the division of the stock into shares of $100 each, instead of the present division of $50 each, and that the stockholders be required to surrender their present certificates on or before the 15th June next, in order that new certificates be given therefor.

☞ The Connecticut and Passumpsic Rivers Railroad Co. have subscribed $150,000 in gold to complete the Massawippi road from Lenoxville, Canada, to the present terminus of the Passumpsic road, provided an equal amount be raised on the Canada side.

☞ Work on the Pocomoke and Wicomico Railroad is being rapidly pushed forward. Two miles of the grading has already been done, and it is expected that the end of the year will find the work nearly completed.

Pittsburg, Fort Wayne and Chicago Railway.

The earnings and expenses of this road for the years ending December 31, 1863, 1864, 1865 and 1866, have been as follows:

Earnings:	1863.	1864.	1865.	1866.
From freight	$3,341,033 65	$4,148,503 00	$4,739,067 88	$4,707,582 12

The earnings and expenses for 1856 are for 5 months only, viz., from Aug. 1, to Dec. 31. The amount of capital at the close of each year since the consolidation has been as follows:

	Shares.	Bonds.	Floating.	Total.
1857	$5,258,937 66	$7,371,000 00	$1,418,922 09	$14,048,759 75
1858	5,288,950 27	8,453,000 00	889,159 88	14,631,110 15
1859	5,351,761 84	8,289,500 00	1,916,517 04	15,557,777 88
1860	5,481,869 32	9,306,485 00	1,612,754 22	16,401,108 54
1861	5,480,865 54	9,660,825 00	1,860,430 87	17,002,121 41
1862	5,709,591 61	12,935,173 00	.....	18,644,764 61
1863	6,164,531 89	12,935,173 00	.....	19,099,704 89
1864	8,181,126 00	12,657,000 00	.....	20,888,126 00
1865	9,312,442 00	12,573,500 00	.....	21,885,942 00
1866	9,940,987 95	12,568,500 00	.....	22,509,487 95

In the floating debt are included coupons past due and unpaid—1858, $9,341; 1859, $252,150; 1860, $912,677, and in 1861, $1,519,212.

Texas Indemnity Bonds.

The United States Supreme Court has taken up the case of The State of Texas *vs.* White, Chiles, Hardenbergh, Birch, Murray & Co. It came up on a motion by Brent & Merrick to enforce the collection of several hundred thousand dollars of Texas Indemnity bonds. These bonds were issued to the State of Texas by the United States on the annexation, and were payable to bearer, and transferable on delivery. Many of them were sold by the rebel authorities to White and Chiles for cards and medicines, and became current in New York. The question whether the *de facto* Government of Texas was competent to dispose of these bonds was mooted, and the decision really involves the Statehood of Texas during the rebellion. It is an exciting case, as political as well as pecuniary questions are involved. The rebel authorities who negotiated these bonds—by Governors Throckmorton and Epperson—now come into Court and say that the Government they helped to establish and keep up in Texas against the United States was a usurper; and seek to get back the means they themselves dedicated to the help of Texas, on the plea that they were usurpers.

Dorchester and Delaware Railroad.

At a meeting of the directors of this road on the 15th ult., the route from Cambridge to Federalsburg was decided upon. From thence to Bridgeville or Seaford the route had not been selected. The most desirable terminus was, however, to be determined upon at the next meeting. The route and distances are as follows: From Cambridge to Airey's, 5 miles; from thence to a point one-half mile from New Market, 7½ miles; thence by a perfectly straight line to Federalsburg, 10¾ miles; thence to Bridgeville or Seaford, about 10 miles—making in all 33¼ miles, from which is deducted the six miles the Delaware Railroad Company propose to build to the State line, leaving but 27¼ miles. For the construction of this the following subscriptions have been made:

By the State	$101,175 00
" County	50,000 00
By private persons, unconditionally	80,000 00
By conditional subscriptions	22,000 00
Total	$253,175 00

Mr. Hessey, the Engineer, is engaged making estimates, etc. Work will be commenced in a few days.

Northern Pacific Railroad.

At a meeting of the directors of this company held in Boston on the 16th ult., to fill vacancies existing in the Board, the following gentlemen were elected: Wm. B. Ogden, of Chicago, President Chicago and North-Western Railroad; J. Edgar Thomson, of Philadelphia, President of Pennsylvania Railroad; Robert H. Berdell, of New York, President of the Erie Railway; Geo. W. Cass, of Pittsburgh, President of Pittsburgh, Fort Wayne and Chicago Railroad; William G. Fargo, of Buffalo, Vice-President of New York Central Railroad, Thomas H. Canfield of Burlington, Vt., Hon. John Gregory Smith, President of Vermont Central Railroad, Hon. R. D. Rice, President of Portland and Kennebec Railroad, Hon. Onslow Stearns, President of Old Colony Railroad, and Benj. D. Cheeny, of Messrs. Wells, Fargo & Co.

American Railroad Journal.

Saturday, June 1, 1867.

Stock Exchange and Money Market.

Money has again advanced a point in price to speculative borrowers, through the influence of the reduction of the floating supply, by the absorption and accumulation of funds at the U. S. Sub-Treasury, in this city, where there is a cash balance on hand at present of $129,238,225, against $106,566,247 on the 3d of the current month of May, showing an increase of $22,671,978 in less than four weeks. In these four weeks, the legal tender reserve of the city banks has been reduced $10,024,967, or from $70,587,407 to $60,562,440. This accumulation in the Sub-Treasury, of so enormous a cash reserve, has lessened the facilities for speculative operations, and led to a gradual rise in the price of call loans, which are now quoted at six per cent. as the rule, with exceptional negotiations more numerous at seven, than any figure below six per cent. In the discount line, there has been comparatively little animation, and on the best paper rates have been quoted nominally a shade firmer, or at 6½@7½ per cent. per annum. There has been no special pressure for accommodation at the advanced rates, because of the unusual inactivity at the Stock and Gold Boards, the Produce Exchange, and in nearly every branch of business. Had there been an average call for pecuniary aid during the absorption of funds at the Sub-Treasury, which has been in progress for some weeks, a very stringent market would have been inevitable. As it is, the policy of hoarding money on Treasury account, even to prepare for the redemption of the maturing Seven-thirty and Compound Interest Notes, has been quite freely canvassed in the street, chiefly in speculative circles, whose plans and manipulations have been disturbed, or thwarted altogether, by the apprehensions resulting from the diminution of the floating supply, and the steady rise in the price of money. Aware of the prevalence of these adverse views of the financial policy of the Government, as well as of a dread of impending embarrassment to the National Treasury, because of increasing expenditures and reduced revenues, Secretary McCulloch in declining, under date of May 22, an invitation to visit Boston, extended to him, as far back as April 30, by several of the foremost residents of that city, took occasion to explain in an informal manner, his views of the financial situation, and of the immediately prospective action of the Treasury Department, as follows:

"I need not assure you, gentlemen, that it shall be my earnest purpose to continue to so administer my office as to justify the confidence you have so generously given me. You must not expect, however, that our monthly statements for the rest of the present year and the early part of the next fiscal year will be as satisfactory as they have been for many months past. The donations of bounties to soldiers, preparations for a threatening Indian war, even if the war itself should be avoided, and very liberal appropriations of a miscellaneous character will cause unusual heavy drafts to be made upon the treasury, while on the other hand the general failure of the wheat crop and the partial failure of the corn crop last year, slow progress in the restoration of the southern states to their proper relations with the federal government, the dullness of trade throughout the country—partly the result of a decrease of production, and partly of the natural reaction which always follows periods of excitement and speculation—together with reduced taxes, will very considerably effect our revenues. This combination of adverse circumstances may retard a return to specie payments, and with large issues of bonds to be made to the Pacific Railroad and its branches or divisions, will prevent for a brief season a reduction of the public debt, and may even render a temporary increase of it unavoidable; but it will not weaken my faith in our ability to move on again in the right direction at an early day. On the contrary, I believe that this check to our progress will lead to improvements in our revenue laws and to an increase of efficiency in their execution, hasten the representation in Congress of the Southern States, and secure greater economy in all branches of the public service.

"Some surprise may exist that I have not for some months past reduced the circulation of United States notes according to the authority conferred upon me by Congress, and an inference may be drawn from it that my opinion upon the subject of contraction has undergone a change. Permit me to say, therefore, that I am as much persuaded as ever of the importance of an early return to specie payments, and of a reduction of the currency, as a means of checking extravagance and speculation, and of increasing production, without which all efforts to restore permanently the specie standard will be ineffectual. What the country needs in order that specie payments may be resumed and maintained, and real prosperity secured, is an increase of industry and a restoration of our former habits of economy. As a people, among ourselves, we must earn more and spend less. In our trade with foreign nations we must sell more or buy less. Any different prescription for existing financial evils is, in my judgment, quackery. That contraction will tend to bring about this desirable condition of things I have never doubted, but I have nevertheless suspended the reduction of the circulation of United States notes, and for the following reasons, either of which would perhaps have justified my course,

and all of which have had more or less influence in determining it.

"First—The views of a majority of the members of Congress, as indicated by a number of votes last winter, were adverse to immediate contraction, and I have not felt at liberty to place myself in practical opposition to the law-making branch of the government, without whose support I must be powerless.

"Second—There have existed for some months past anxious forebodings of financial troubles, and while they continued I have been apprehensive that a contraction of the currency, the object and effect of it being misunderstood or misinterpreted, might produce a panic in the commercial cities which, extending over the country and beyond the speculative interests, would injuriously affect legitimate business and the revenue dependent upon it.

"Third—Large amounts of interest-bearing notes are to be paid or converted with the present and next fiscal year, to which it seemed prudent for me first to direct my attention, leaving the question of a curtailment of the circulating notes to be determined from month to month, by the condition of the country and of the treasury.

"Fourth—Anticipating that the failure of the crops and the other circumstances alluded to, would seriously effect business, I have considered it important that the public mind should not be diverted, by the criticisms and complaints of those who are opposed to contraction, from the real causes of trouble; that a sound policy should not be put in peril by being made the 'scapegoat' for evils resulting from different causes.

"You will not infer from what I have written that I am not hopeful in regard to our financial future. It has been my constant aim so to manage the national finances as to aid in bringing the country to a healthy financial condition, without being subjected to the severe disasters which many judicious persons have supposed a large debt and the derangement of business, and the diminution of industry occasioned by the war and a redundant currency, would render inevitable. My faith that this can be accomplished is unshaken. The causes which are now operating against us are exceptional and temporary. The prospect of a good crop of winter wheat was never better. More spring wheat has been sowed and more corn has or will be planted this season than ever before. The people are beginning to comprehend again this important truth, which seems to have been disregarded for some years past, that prosperity is the result of labor, that industry and economy are as indispensable to national as well as to individual wealth. I shall be grievously disappointed if another year does not witness a large increase of industry, of enterprise and of revenue, decided progress towards a resumption of specie payments, and a steady reduction of the public debt.

These eminently frank and conservative explanations have been quite satisfactory to the more reflective portion of the public; but they have been interpreted by the street speculators, as meaning practically renewed inflation, favorable to the *bull* operators at the Gold and Stock Exchanges. Money closed firmly on Wednesday at the figures already quoted by us. The city banks are less liberal of accommodation. Last week, they contracted their loans $1,870,069, while losing $3,266,031 of legal tender, $7,763,589 of deposits, and $1,483,585 of specie. They increased their circulation, $64,952. The specie reserve of the banks is now $14,083,667, against $19,736,929 same time last year. The city bank deposits are now $193,673,345, against $208,977,905 week ending May 26, 1866. The legal tender reserve amounts to $60,562,440, against $73,829,947 same time last year. The circulation now stands at $33,697,253, against $26,223,867 same time last year. The loans are now $256,091,805, against $257,969,593 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $71,955,437 a day, against a daily average of $83,945,965 the preceding week, and $87,386,628 the week ending with May 11th. The current week's exchanges average $79,067,422 a day.

National Bank notes to the amount of $45,150 were issued last week, making the total issue to 1,671 banks thus far, as given in our last, $303,193,706, against $282,555,440 at the close of the last fiscal year, June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $4,237,232, leaving, with the existing 1,647 banks, (having an aggregate capital of $422,913,861,) an actual circulation at this date, of $298,630,124. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,641,450; and for the public deposits, $39,052,950—making a total of $379,694,400. The Treasury Department, last week, redeemed and destroyed $320,800 of worn and mutilated fractional currency, and issued $266,089 worth of new.

The U. S. Sub-Treasury receipts, week ending with May 25, were $20,628,334, including $2,006,097 from customs duties; payments, $17,042,110; balance at the close of the week, $132,281,220, against $128,697,987, at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $1,135,609, and payments, $4,762,098; on Tuesday, receipts, $3,933,688; payments, $3,350,195. The balance at the close of business on Tuesday stood at $129,238,225, against $127,782,542 a week previous.

A moderate yield was reported at the Treasury Department, last week, from all the leading sources of revenue. The customs (currency value) again exceeded the excises. The excises, last week, yielded $2,450,467, against $2,595,869, the preceding week; customs at the port of New York $2,006,097, and at the outports, about $640,000 (in coin) more, making the grand total income for the week equal about $6,088,854 in currency, against disbursements of $1,853,253 on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $242,000,000.

The Gold speculation was devoid of spirit early in the week, and the price steadily receded to 136⅜ by Monday. Since Monday, the disposition to operate for a rise has been on the increase, and the price has rallied to 138. The most marked advance was of full one per cent. on Wednesday, or from 137 at the opening of that day, to 138 by the early afternoon, brought about chiefly through the use made by the inflationists, of the letter of Secretary McCulloch, which we have given above. This sudden rise, having no substantial basis, was not maintained to the close, and the latest quotation was 137⅝. The export demand was light. On Wednesday, the total shipments to Europe were only $130,500. The total imports of specie from Europe, and other foreign ports since Jan. 1, 1867, have been $1,056,073. The customs demand for Gold last week, averaged $334,349 a day; thus far, this week, it has been equal to $395,425 a day, or equal to a weekly aggregate of $2,372,150. The arrivals of specie from Europe, Havana and other foreign ports, during the past week were $30,552, and from California, $568,998. The total customs revenue of the Government, in coin, at this port since July 1, 1866, has been $112,882,216, against $122,040,166 same time in the preceding fiscal year. The total receipts of California gold at this port since July 1, 1866, have been $35,656,446, against $26,953,251 same time last year, showing an increase this year, of $8,709,195. The exports of specie from this port, last week, were $1,483,667. The total outflow of specie from the port, thus far in the current fiscal year has been $33,249,415, against $38,473,706 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $1,499,000, making the total coin interest disbursements through the Government office, since July 1, 1866, $52,127,392, against $44,565,961 for the same time in the preceding fiscal year. The specie exports from San Francisco, from Jan. 1, to April 27, reached $11,437,453, against $11,448,650 same time last year, showing a decrease, in 1867, of $11,207.

Foreign Exchange has advanced a fraction, on a less freely supplied and moderately active market. Bankers' 60 day bills on London closed on Wednesday at 109⅞@110, and on Paris to 5.12½@5.11¼; sight bills on London to 110⅜@110⅝; and on Paris to 5.10@5.08¾. The offerings of produce bills have been unusually light, this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $1,815,222, making the total value of exports since July 1, 1866, $162,560,237, against $203,397,994 same time in the preceding fiscal year.

Government securities have been less active, and the coin-bearing bonds have yielded a trifle, while the compound-interest notes of the 1865 issues have advanced, and the Seven-Thirty Notes have ruled firm. At the close, the market was steady, on a moderate trade. An effort was made to depress the funds by the report that the impending embarrassments would necessitate the holding of a mid-summer session of Congress. Secretary McCulloch, in a private letter, set this apprehension at rest; thus, "The report that the condition of the finances would require a special session of Congress originated, doubtless, with certain persons who want a session for purposes of their own. I have been not a little surprised that some respectable journals should seem to encourage the movement. A session is certainly not needed as far as the Treasury Department is concerned; and I have no hesitation in saying that a special session would affect injuriously the credit of the Government. We need industry more than legislation. Improvements in our revenue laws are required, and it is possible that some financial legislation will be needed; but upon neither of the subjects could Congress act advisedly before the regular session." U. S. sixes of 1867 closed here on Wednesday at 136; U. S. sixes of 1868, at 135; U. S. sixes of 1881, 111⅛@111¼; U. S. Five-twenties of 1862, 109⅜@109½; U. S. Five-twenties of 1865 at 106⅜@106½; U. S. Five-twenties of 1865, consolidated, 108@108⅛; U. S. Ten-forties at 99⅜@99½, and U. S. Seven-thirties at 105⅝@106¼. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

June, 1864	119⅛	May, 1865	115½
July, 1864	118⅝	August, 1865	114⅛
August, 1864	118⅛	September, 1865	114
October, 1864	117⅛	October, 1865	113½
December, 1864	116⅛		

The railway and miscellaneous stock market

was very dull, and inclined to heaviness, through the forepart of the week; but has since Monday been on the recovery of strength, if not buoyancy, influenced by a moderate increase of speculative orders.

General business has been very quite, since our last, and prices of most kinds of produce have favored purchasers, decidedly. The favorable crop reports, and the increasing receipts from the interior, have tended to depress prices of Breadstuffs, quite seriously. Cotton has been lightly dealt in, and middling grades left off here on Wednesday rather heavily at 26½@28 cents per lb. as extremes. The stock of cotton now here is estimated at about 98,000 bales. The receipts at the port this week, have averaged about 1,770 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 563,700 bales, against exports of 383,952 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 1,732,000 bales against 1,876,334 bales same time last year; exports, 1,324,000 bales, against 1,393,927 bales same time last year; estimated stock at latest dates, 305,000 bales, against 357,650 bales same time last year. Foreign merchandise has been lightly dealt in, and prices have been on the decline. Dry goods have been very seriously depressed. The total imports of foreign dry goods, last week, were $925,729, and the total amount marketed $1,009,516. The value of foreign merchandise imported last week, was $3,365,661—making the grand total specie value of last week's imports of dry goods and merchandise, $4,291,460, and since July 1, 1866, $234,588,219, against $268,222,837 same time in the preceding fiscal year. The ocean freight market has been unusually dull and heavy, since our last, with 594 vessels of all classes in port. For Liverpool we quote flour at 9d.@1s. per bbl.; grain at 1½d.@2½d. per bushel; cotton at $\frac{3}{32}$@$\frac{5}{32}$d. per lb.; and heavy goods at 7s. 6d.@15s. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	May 15.	May 22.	May 29.
Consols	92¼	93	94
U.S. 5-20's of 1862	72¾	72½	72½
U.S. 5-20's of 1865	70¾	70½	71
Erie	42	42¼	40
Ill. Central	76¼	76¾	76½

The New York exports, exclusive of specie, for the week ending May 28, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$2,260,855	$1,815,222
Prev. reported	84,259,003	79,138,620
Since January 1	$86,519,858	$80,953,842

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$1,007,837	$925,729
Gen. merchandise	3,377,547	3,365,761
Total for the week	$4,385,384	$4,291,490
Previously reported	121,753,255	99,368,697
Since January 1	$126,138,639	$103,655,187

The commerce of New York from July 1st to date compares as follows:

	1865–'66.	1866–'67.
Imports merchandise	$268,222,837	$234,588,219
Exports produce	203,397,994	162,569,237
Exports specie	38,473,706	33,249,415

The balance in the Sub-Treasury on Wednesday was $130,715,123 68.

Railroad Earnings.--Weekly.

The earnings of the Grand Trunk Railway of Canada for the week ending May 4th, 1867, were $112,264 00
Corresponding week of previous year. 125,780 00

Decrease $13,516 00

The earnings of the Marietta and Cincinnati Railroad the 3d week in May, 1867.... $20,682 00
Corresponding week previous year.... 21,229 00

Decrease $547 00

The earnings of the Western Union Railroad for the week ending May 21, 1867. ... $11,232 12
Corresponding week previous year.... 20,744 36

Decrease $9,512 24

The earnings of the Detroit and Milwaukee Railroad for the week ending May 23d, 1867, were $30,864 00
Corresponding week of 1866..... 33,471 00

Decrease $2,607 00

The earnings of the Chicago and Rock Island Railroad for the 3d week in May, 1867, were $63,707 00
Corresponding week of previous year.. 80,867 00

Decrease $17,160 00

The earnings of the Chicago and Northwestern Railroad for 3d week in May, 1867.... $193,522 00
Corresponding week previous year .. 179,808 00

Increase..... $13,714 00

The earnings of the Michigan Southern and Northern Indiana Road for the 3d week in May, 1867, were..... $77,325 00
Corresponding week of 1866 ..... 97,296 00

Decrease $19,971 00

The earnings of the Michigan Central Railroad for the 3d week in May, 1867, were .. $70,263 14
Corresponding week of previous year.. 73,656 98

Decrease $3,393 84

Journal of Railroad Law.

CHANGE OF OBJECT OF A CORPORATION—HOW FAR PERMISSABLE.

The case of Zabriskie *vs.* Hackensack and New York Railroad Company, just decided in the Court of Chancery of New Jersey, contains a question of great interest about which the Courts of some of the States differ. It appears that the company was chartered by the Legislature to construct a railroad from Hackensack to the Paterson Railroad at Boiling Spring. A supplementary charter was granted by the Legislature in 1861, by which the company was authorized to extend the road north to Nannet on the Erie Railroad, to increase its capital stock to any extent required, and to issue bonds for $250,000. The company built the extension, and mortgaged the whole road as extended to secure the payment of $10,000, but issued no new stock for this extension. The company afterwards located and laid out another extension to New Bridge further north, contracted for its construction, and by resolution determined to make a new mortgage of the whole road, to secure a hundred bonds of $1,000 each for the purpose of paying off the two mortgages now on the road, for relaying with new rails and ties the road first built, and for constructing the proposed extension to New Bridge.

The complainant, a stockholder, owned 324 shares out of 930 shares of the capital stock issued for $100 each, applied for an injunction restraining the company from constructing the extension to New Bridge, and from executing the mortgage, on the ground that the extension is a different enterprise from that for which his stock was taken and the money paid; and that neither the directors nor a majority of the stockholders could compel him to embark his capital in any undertaking but the one for which it was subscribed and paid.

The Chancellor decided that the company must be restrained from extending the road from its present terminus, and from spending any of the company's money in paying therefor, but he refused to enjoin the execution of a mortgage for any lawful object of either part of the road.

The opinion contains a thorough discussion of the rules of law applicable to the case, and at some length. We give the important features of the opinion.

Zabriskie, Chancellor.—After the effect of the rule established in the Dartmouth College case began to be felt in the States, it was found that by the numerous acts of incorporation freely and perhaps necessarily granted, great inconveniences resulted, and that provisions incautiously inserted, too much restricted the powers of future Legislatures; and that the laws which experience showed were necessary to govern corporations in the exercise of their powers could not be passed. And the Legislatures of many States by degrees, and successively, adopted the practice of inserting in acts granting franchises that they might alter, modify, or repeal the act. And also by general law provided that all acts of incorporation thereafter passed should be subject to such alteration and repeal.

The provision is contained in the general act of this State, passed in 1846, (Nix. Dig. 152, § 6,) that such charters should be subject to alteration, suspension and repeal, in the discretion of the Legislature. This and all similar special and general provisions were intended for the purpose specified, to give to the Legislature the clear right at their pleasure to alter or repeal the acts of incorporation. The State without this could have done it with the assent of the corporation. They could give them property; they could add to their powers or privileges. But they could not take away any power, privilege, or franchises conferred by the act, nor compel them to exercise any new power or franchise conferred.

Besides this general law of the State, the charter of the defendant contains this provision, "that the Legislature may at any time alter, modify, or repeal the same."

On general principles and the settled rules of construction, I would hold this to be the effect and only effect of the provision in the general act and in the charter of the defendants without any hesitation, were it not for a series of decisions, by most respectable Courts, which hold that this provision obviates the effect of the rule in Natusch *vs.* Swing, and Kean *vs.* Johnson, and enables a majority of the corporators in all charters subject to a like provision, to change by legislative permission, and within certain limits the object and purpose of the corporation. They hold that the contract between associate corporators that they will confine their business to life insurance, is changed by legislative permission to engage in marine insurance, or a contract to join in constructing a railroad from New York to Newark, can be changed to one from New York to Elizabeth by legislative consent. The reasoning is founded on the fact that the subscription to the stock, which is the contract, is made as in this case to a charter which authorizes a road from the Paterson road to Hackensack, and authorizes the Legislature to alter and modify the act, is a contract to join in building any road that the Legislature may by such alteration authorize the company to build. And that such authority or additional privilege may be accepted by a majority of the corporators.

This view of the case is so clear upon principle that I feel constrained to be guided by it, although the weight of the decisions in other States is against it.

In Maine the decisions of the Supreme Court are in accordance with it. In the case of The Meadow Dam Company *vs.* Gray (30 Me., 547.) the company was incorporated to build a dam across navigable waters; and under the power reserved to alter and repeal, an act was passed requiring the company to make in the dam a lock for the benefit of public navigation. This was not increasing the power or changing the enterprise of the corporation, but requiring in the work authorized an accommodation for the public omitted in the original act; what the change was is not mentioned in the report, but it is stated in Oldtown and Lincoln Railroad Company *vs.* Veasie, (39 Me., 571,) by Chief Justice Shepley, who delivered the opinion in both cases.

Now in this case the private contract between the stockholders and the corporation, or between them mutually, on subscribing for the stock, was, that their enterprise was the road from the Paterson Railroad to Hackensack, and the power reserved was not to authorize any of the parties to this private contract at their pleasure to violate it. The supplement of 1861 does not require the extension to be built; it only authorizes it at the option of the corporation. The words are, "it shall be lawful for said company to extend their railroad." And it is held in England, where the Courts, by *mandamus*, compel a company to construct the road it is incorporated to construct, that an act giving the privilege of extension is not obligatory on the company, and the *mandamus* is in such case refused. York and Midland Railway Company *vs.* The Queen, 1 E. & B., 858, in which the Exchequer Chamber reversed the decision of the Common Bench in the same case, 1 E. & B., 178.)

In New York a different rule has been established, and it is held that the power to alter will authorize the company, by consent of the Legislature, to extend its enterprise without the consent of the stockholders. The rule was first adopted to enable companies to subscribe to the stock or bonds of other enterprises that brought business to them, and then was extended to cases where they were authorized to build extensions or branches to their own works. (Northern Railroad Company *vs.* Miller, 10 Barb., 260; White *vs.* Syracuse and Utica Railroad Company, 14 Id., 560; Sch. and Sar. Railroad Company *vs.* Thatcher, 11 N. Y., 1 Kern., 102; Buffalo and New York City Railroad Company *vs.* Dudley, 14 N. Y., 5 Kern., 336.

The reasoning of the judges in these cases does not satisfy me. The Courts which decided the first cases would not have adopted the principle

which guided them, if they had been asked to apply it to a case like this, or like the later cases in New York, in 14 Barb., 570.

In the case of the Sch. and Sar. Plank-road Company *vs.* The Thatcher (11 N. Y. 109), the court put their decision on the ground that the change was unimportant and would not injure the defendant, and seem by their reasoning to admit, that if the change was as great as in the case of the Hartford and New Haven Railroad Company *vs.* Croswell, they would have decided differently. In the Buffalo and New York City Railroad Company *vs.* Dudley (14 N. Y. 355), SELDEN, J., in delivering the opinion of the court, places the decision on the ground that it was ruled in the case just quoted, "that no more addition to, or alteration of, the charter, however great, could operate to discharge a stockholder from his obligation to the corporation." And he questions the soundness of the decision in The Hartford and New Haven Railroad Company *vs.* Croswell. These decisions are not sufficiently consistent, or so based upon the principles that should govern this case, as to influence me to depart from the conclusions arrived at.

The Supreme Court of Massachusetts has followed the decisions in New York, and in the well-considered and well-argued case of Durfee *vs.* The Old Colony Railroad Company (5 Allen, 230) arrived at the conclusion that the reserved right to alter and repeal authorized a company to engage in a new enterprise without the consent of all the stockholders. The reasoning of the able counsel that combated this position is the best exposition of the law that I have found.

But the reasoning of Chief Justice Bigelow in delivering the opinion of the court does not convince me; he places the decision upon principles not acknowledged in this State, and relies upon the two cases in Maine cited above, as well as those in New York, as supporting his view. He assumes (on p. 244) that it is the object of the provision that an amendment may be made by the consent of both parties—the legislature on the one side and the corporation on the other, the former expressing its assent by a legislative act, and the latter by a vote of the majority of stockholders—and observes, "that it is nothing more than the ordinary case of a stipulation that one of the parties to a contract may vary its terms with the consent of the other contracting party." Now in this State it is settled that an alteration made by the legislature under this reserved power is valid and binding, without the consent and against the will of the corporation and all its members. The two decisions of the Court of Errors, not yet reported, upon the charters of the Morris and Essex Railroad Company and of the Jersey City and Bergen Railroad Company, settle that the legislature may against the will of the companies change the mode of taxation prescribed in their charters for one more burdensome. And the rule of the common law as to contracts adopted here, gives the power to the parties, where both assent, to alter any contract without the stipulation for that purpose, which would seem from the language of the opinion to be ordinarily inserted for it in Massachusetts. This view, that the object of the reserved power was to give the majority of the corporators the power to control the minority, with the consent of the legislature, has never been adopted in this State. The act of Massachusetts (Statutes 1831, ch. 81), to which reference is made, contains no provision as to consent of the stockholders, but it is a pure simple reservation of power like the act of New Jersey.

The decisions in the cases of Banet *vs.* Alton and Sang. Railway Company, 13 Ill., 504, The Pacific Railway *vs.* Renshaw, 18 Mo., 208, The Pacific Railroad Company *vs.* Hughes, 22 Id., 281, hold that the majority of the stockholders by authority of the legislature may make a change, provided it is not great or a radical one. They in express terms say that a change like this would not be warranted, and so far as of authority are on the side of the complainant. But the principle on which they are decided is wrong, and if it is once conceded that a majority of the corporators may, by authority from the legislature, change the object of the enterprise on small things, there is no principle of law by which they can be restrained in any a little larger, or in the character of the whole work. The same principle will lead the courts of Illinois and Missouri, as it did those in New York to allow radical changes, and must, if consistently applied allow a charter for a railroad to be used for banking or insurance business, or for a canal, theatre, brewery, or beer saloon.

The defendants must be restrained from extending the road beyond its present terminus at Passaic street, and from expending any money of the company to pay for any such extension, or from giving any mortgage for the cost of such extension. There is no foundation for an injunction against a mortgage for any lawful object of either part of the road. There is great doubt whether a mortgage on either of the two parts of the road heretofore constructed for the cost of the other, would pass the franchises of the company in such mortgage part, but it would be valid as to the property other than franchises, which the company can mortgage without any special power. And besides the bonds of the company, or its lawful contracts would entitle the holder to recover, and under the whole road and franchises could be sold.

The complainant, therefore, cannot be injured by the mortgage, whether valid or not, as to any part of the road.

Massawippi Valley Railway.

The township of Hatley has decided to pledge its credit for the sum of $25,000 in aid of the Massawippi Valley Railroad.

☞ At a recent meeting of the citizens of Albany, Schoharie and Greene Counties, in favor of the construction of a railroad from Catskill to Schoharie, to connect with the Susquehanna Railroad, held at Oak Hill, Greene County, a committee of seven was appointed to ascertain the most feasible route, and report to an adjourned meeting at an early day.

☞ The Eastern Shore (Maryland) Railroad is in future to be operated by the Philadelphia, Wilmington and Baltimore Railroad Co.; the cost of operating, maintaining and improving the road to be paid out of the receipts alone, which the Philadelphia, Wilmington and Baltimore Company are to retain until these expenses be fully met—the surplus to go to the Eastern Shore Railroad Company.

Albany and Susquehanna Railroad.

The contract for the construction of the remaining 20 miles of this road, extending from near Harpersville to Binghamton, has been let to John Wardrop of Brockville, C. W., and Timothy Hirdeen and Samuel Weed, of Binghamton. The work will be pushed forward with all despatch, and it is intended to have it completed and the road put in active use between Albany and its southern terminus at Binghamton within a year from this time. The road would, as we learn, be completed at an earlier day, if it were not for the great labor and length of time necessary to cut a tunnel upon the unfinished part.

National Trust Co.

The books for subscription to the capital stock of the National Trust Company, which were opened at the temporary office of the company 363 Broadway on the 22d of May, will remain open until the whole amount of the capital stock of one million dollars shall be subscribed. Trust Company stocks have always been considered among the safest and most profitable investments, and this charter was obtained only after the Legislature had imposed extraordinary restrictions to secure the interests of stockholders and dealers.

Western Maryland Railroad.

The engineers and contractors of this road are now at Hagerstown, Md., making preparations to commence active operations on the work. The section of the road from Hagerstown to Smithsburg and one mile beyond the latter place, a distance of ten miles, has been definitely located and the work upon it commenced. The same, we believe, is true of the section of seven miles from Monocacy to Mechanicstown.

☞ A meeting was held in Hudson, N. Y., on the 22d ult., to consider the projects of the Dutchess and Columbia and Lebanon Springs Railroads, and whether it would be advisable for the city to give aid to their construction. Many of the heaviest capitalists and business men were in attendance, and the expression of the meeting was unanimously in favor of extending aid to these important roads, such as would secure their termini at that city. Committees were appointed to take the whole subject into consideration, and to decide upon a plan of operations which shall best secure this object, and to report at a future meeting.

☞ At last account, the engineer corps of the Boston, Hartford and Erie Railroad were at Watertown, for the purpose of locating this railroad from some place on the Hartford, Providence and Fishkill Railroad, between Waterbury and Hoadley's station, to the Housatonic Railroad between Kent and Merwinsville, to the New York, Hartford and Albany Railroad near Dover, to intersect the Dutchess and Columbia Railroad, now being built in the Clove Valley, near Beakmanville.

☞ The Connecting Railroad will be opened to travel on the 3d of June. This road is the connecting link between the Philadelphia and Trenton, the Pennsylvania, and the Philadelphia, Wilmington and Baltimore Railroads. The road is being built by the Pennsylvania Railroad Co. It is to be leased to the Philadelphia and Trenton Railroad Co., at six per cent. on its cost. The length of the road is seven miles.

Erie Railway.

OFFICE GENERAL SUPERINTENDENT,
NEW YORK, December 31, 1866.

ROBERT H. BERDELL, ESQ.,
President Erie Railway Co.

DEAR SIR:—In addition to the tables prepared, and information furnished from the Auditor's Department for your annual report, I deem it proper to submit a statement, exhibiting in another form the work done and materials used in the ordinary and extraordinary repairs to road bed, track, bridges and buildings, during the year 1866.

The Erie Railway, for convenience in operating, is divided in four divisions, while the branches leading from the main line to Buffalo constitute a fifth division, each under the charge of an assistant, or division superintendent.

The Eastern Division, extending from Jersey City to Port Jervis, 87¼ miles, is double tracked the entire distance, the last completed portion of the second track (near Hohokus) having been brought into use early in March, 1866. A moderate force was employed in widening cuts and building retaining walls during the seasons, the cost of which was charged to construction of second track.

The Piermont, Newburg and Warwick branches are worked in connection with the Eastern Division, and with the exception of the Warwick Branch, owned and kept in repair by the Erie Company.

In addition to the ordinary repairs required to maintain the track and road bed in good condition, a new turn table (iron,) with substantial stone foundation, has been put in at Jersey City. A new pier, 790 by 80 feet, built at Long Dock by contract. The switch at Pen Horn has been extended six hundred feet and connected at East end with main track. Bridge abutments at Ramapo undermined by flood have been partially rebuilt. A stone foundation for tank house, and 700 feet of 4-inch iron water pipe has been laid at Greenwood. The steam heating fixtures in the Orange Hotel at Turner's, have been completed, and a large drain or sewer constructed to carry the water from the cellar and foundations of the building to the Ramapo River. A new passenger depot, 140 by 22 feet, of brick, has been erected at Goshen, and is nearly finished. A new bridge, 100 feet span (Howe's truss,) has been erected near Salisbury, in place of one destroyed by fire in 1865. An addition of more than a mile has been made to the length of side tracks, and about $6,000 expended in the repairs of sundry bridges on this division.

Of materials there have been used in repairs and construction on the Eastern Division: 126,-268 cross ties, 10,620 wrought iron joint chairs, 82½ tons railroad spikes, 4,500 tons new and re-rolled railroad iron, and 995 tons repaired iron; 39 miles, 1,580 feet of track has been relaid with new iron, and 8 miles, 4,431 feet do., with repaired iron; 19 per cent. of main track has been relaid with new iron, and 20 do., with new ties; 2,300 rods of new fence have been built, and 2,000 rods of old fence repaired—38,545 miles run by construction trains.

The Delaware Division, extending from Port Jervis to Susquehanna, a distance of 104 miles, has but 19½ miles of second track in use, 15 miles have been partly graded for second track, and authority has recently been granted to recommence the grading, and it is hoped that nothing will be allowed to interfere with the steady prosecution of this most important and essential work, until a second track shall be completed over the entire division.

The Hawley Branch Railroad, leased of the Pennsylvania Coal Company, extends from Lackawaxen to Hawley, 16 miles, and is operated in connection with this division.

During the past year the brick engine house at Port Jervis, commenced in 1865, has been completed, and this with the wood engine house built in 1855 and thoroughly repaired in 1866, affords shelter to 70 locomotives. The passenger depot at Port Jervis has been remodled and put in complete order. A new carpenter's shop and tool house erected at Narrowsburg to take the place of those burned in August. Three truss bridges on Hawley Branch, of an aggregate length of 580 feet, have been covered and painted, and one new engine stall built at Hawley.

The large amount of curvature and solidity of the road bed, taken in connection with the fact that the immense traffic of the road passes over a single track for more than four-fifths of the distance, will account for the large percentage of iron and ties used annually on this division in the repairs of track.

Of materials, the following quantity has been used in repairs of track on Delaware Division and Hawley Branch: 115,264 cross ties, 5,540 wrought iron joint chairs, 78¾ tons railroad spike, 4,470 tons of new and re-rolled iron, and 485 tons of repaired iron; 39 miles, 1,200 feet of track has been laid with new iron, and 4 miles 4,880 feet do., with repaired iron; 28½ per cent. of main track has been laid with new iron, and 27½ do., with new ties; 545 feet of new side track was laid; 125 cubic yards retaining wall built; 2,554 rods of new fence built, and 3,200 rods of old fence repaired—10,853 miles run by repair trains.

The Susquehanna Division extends from Susquehanna to Hornellsville, 139½ miles, of which 100 miles is double tracked; 5,366 feet of new side tracks have been laid during the year, mostly in extending the switches too short for the passage of trains.

A very large amount of work has been done at Susquehanna station about the new shops and depot, such as building drains, pits, foundations for machinery, plumbing, ventilating, raising and filling tracks, and cleaning up generally—foundations of piles and dry masonry for a steam hammer shop, have been put in. The station buildings at Great Bend, Binghamton, Owego, Smithboro, and Adrian have been thoroughly repaired. A new brick depot for passengers and freight is about ready for use at Barton. A water tank not needed at Elmira, has been removed to Smithboro, and erected there in place of one consumed by fire in 1865. Four new tool houses have been built, and an addition to the coal pockets at Chemung. Fourteen truss bridges, twelve of them for double track, have been renewed, making an aggregate length of 1,630 feet of new bridging. The bridge across the Chemung River, near Chemung station, has lower chords and straining rods of wrought iron, with posts and upper chords of wood, thus combining iron with timber, so as to give great strength and durability at a comparatively slight advance of cost over a wooden bridge. New piers of cement masonry have been built at Binghamton Island to take the place of the wooden trestle piers first erected. One stone pier of the bridge over the Chemung River, east of Corning, was so much damaged by the flood of 1865 as to require rebuilding. This has been done the past summer in the most substantial manner, and it is now fully protected by rip rap walls and ice breakers.

To protect the road, as well as adjacent lands, from damage by water, a large amount of work has been done in cleaning out and straightening water courses, piling and protecting with brush and stones the banks of the river, raising bridges and grade of track at crossing of stream, thus rendering structures and track safer and less liable to obstruct the flow of water. In some cases extension dykes have been raised to prevent the overflow of the river, and a considerable sum has been expended to guard against a recurrence of the floods that proved so destructive in 1865 in the valleys of the Chemung and Susquehanna Rivers.

Frequent claims have been made upon the company for damages arising from the overflow of water on farms near the Junction. To remedy this cause of complaint, a canal or ditch has been dug for two miles alongside of the railway, intended to carry the water to the Little Lake near Elmira. In making the improvements and repairs previously alluded to, there has been 800 cubic yards cement masonry laid, 590 yards dry walls, and 7,445 lineal feet of piling. 6,377 rods of new fence have been built, and 4,222 rods of old fence repaired, using 13,716 fence posts, and 412,000 feet of fence boards.

On the Susquehanna Division there have been used in repairs and construction, 134,454 cross ties, 8,758 wrought iron joint chairs, 83½ tons railroad spike, 4,675 tons new or re-rolled railroad iron, and 1,108 tons repaired iron; 41 miles, 3,-800 feet of track has been relaid with new iron, and 10 miles, 2,724 feet do., with repaired iron; 18 per cent. of main track has been laid with new iron, and 19 do., with new ties—72,832 miles run by repair trains.

The railroad known as the Chemung Branch, extending from the Junction, 4 miles west of Elmira, to Jefferson, is kept in repair by the Erie Company, but the trains are furnished and run by the Northern Central Railroad Company, except the Blosburg coal trains; 1,687 tons of railroad iron were used in laying third rail and extending switches on this branch, also—12,145 cross ties, 8,000 wrought iron chairs, 39 tons railroad spike, 470 rods new fence built, and 170 rods old fence repaired.

The brick depot at Horse Heads has been completed, and is a substantial and convenient building. The other stations on this branch are in fair condition.

The Western Division extends from Hornellsville to Dunkirk, 128 miles, all single track. During the past year 9,850 feet of additional side tracks have been laid, twelve new culverts built of substantial masonry, one large arch culvert partially rebuilt and extended twenty feet, three new truss bridges of 120 feet span and one of 100 feet span, and eight, varying from 25 to 75 feet, have been rebuilt.

The station buildings at Hornellsville Genesee, Cuba, Olean, Carrollton Cattaraugus and Forestville have been repaired and put in good condition. A new depot and tank have been erected at Perrysburg. The brick engine house and machine shops at Salamanca, commenced in 1865, have been completed and partly brought into use. New side tracks have been added, and increased facilities given for the transaction of the large business thrown upon the road at this point by the Atlantic and Great Western Railway. At Dunkirk extensive repairs and renewals have been made on the piers, warehouses, passenger depot, hotel and shops. The addition of 50 feet to the brick boiler shop has been finished and is occupied.

During the season of 1865 this disvision suffered severely from floods, particularly along Little Valley Creek. Great pains have been taken in filling and protecting banks, widening and clearing channels and increasing the capacity of bridges, and it is believed this portion of the road is now in much better condition to withstand a flood than at any former period.

Convenient coal platforms, with schutes for loading coal in tenders, together with track scale, have been constructed at Carrollton.

The following material has been used on Western Division: 95,170 cross-ties, 5,500 wrought iron railroad chairs, 70 tons railroad spike, 493 tons iron repaired, and 3,450 tons new or re-rolled iron; 260 rods new snow fence built, 3,170 rods common fence built, and 15,900 rods old fence repaired; 4 miles, 3,581 feet track relaid with repaired iron, and 30 miles 1,410 feet do. with new iron; 24 per cent of main track relaid with new iron, and 25 do., with new ties—19,424 miles run by repair trains.

The Buffalo and North Western Divisions now united under the charge of one Division Superindent, comprises the road from Buffalo to Corning, 142 miles; from Attica to Hornellsville, 60 miles; and from Avon to Rochester, 18 miles, making 220 miles of single track road; 20,729 feet of side track have been added during the year, principally in and about Buffalo, including new tracks to elevator and stock yards. A new brick freight depot has been built at Buffalo with sheds covering dock; brick engine house extended 50 feet; extensive and thorough repairs have been made on the Wadsworth House, enabling the company

to lease it at a largely increased rent; new wood sheds have been built at Attica; station platforms rebuilt at Avon and Liberty; sewer at Avon rebuilt; engine house at Corning repaired; new truss bridges have been erected at Avoca and Savona; bridges at Le Roy, Avon and Rush have been covered and painted; freight house, wood shed and water station at Warsaw built in place of those burned; $4,200 have been expended in rebuilding culverts on the North-Western Division, and about $2,000 in the repairs of highway bridges, culverts, &c., on Buffalo Division.

A heavy expense has been incurred in the renewal of timbers in the high bridge at Portage, all timbers giving evidence of decay having been removed and new timber substituted, which with the additional bolts and rods render it as substantial as when first built. $21,475 have been expended on Portage bridge the past season.

The materials used on the Buffalo and North-Western Divisions were as follows: 95,150 crossties, 9,307 wrought iron chairs, 61 tons railroad spike, 2,400 tons iron, repaired, and 2,442 tons iron new or re-rolled; 300 rods new snow fence, and 5,530 rods common fence built, and 7,550 rods do. repaired; 22 miles 1,800 feet track laid with repaired iron, and 22 miles 3,800 feet do. with new iron; 10 per cent. of track relaid with new iron, 10 do. with repaired iron, and 17 do. with ties—32,425 miles run by repair trains.

In connection with the work done on the different Divisions, the part performed by the bridge department and shop should not be lost sight of. At the company's mill located at Oswego, most of the lumber used in bridge and buildings on the entire line of the road is manufactured from the log. During the past year, 10,004,000 feet of lumber were sawed, 5,852,000 feet do. planed, 3,609,000 feet do. burnetized; 1,581,000 lath sawed; 6,800 lights of sash made, and 104 doors for depots; 35 truss bridges, of an aggregate length of 4,067 feet, or over three-quarters of a mile were framed at the Oswego bridge shop, together with a large amount of finishing work used in the construction of depots.

In the department of engine and car repairs a very marked and gratifying improvement has taken place within the past year. The engines have been kept in a highly efficient and improving condition. Important additions and improvements have been made to the passenger, freight and coal cars, the efficiency of the machinery in the various shops has been fully maintained, and yet the expenses for engines and car repairs has been reduced over $450,000 as compared with the previous year, notwithstanding there has been a material increase in the mileage of trains.

There have been added to the equipment of the road in 1866 to replace cars destroyed or worn out, charged to cost of repairs, as follows: 10 new passenger coaches; 7 baggage, 105 freight, 16 8-wheel coal, and 5 caboose cars. Charged to construction: 11 locomotives, 22 passenger coaches, and 100 8-wheel coal cars.

The present condition of the motive power and equipment of the road will, I am confident, compare favorably with any road in the country, and reflect much credit on the officers in charge of that department.

For further information in relation to the operations of the department of engine and car repairs, I would respectfully refer you to the report of the superintendent of motive power and machinery, and the tabular statement showing the number and condition of engines, both of which are herewith submitted.

The track, roadway and bridges, throughout the whole extent of your road, have very perceptibly improved during the past year, until I feel warranted in saying that the Erie Railway is in better condition and better equipped, than at any previous period during the last ten years. Trains have run with great regularity and exemption from accident, with the exception of a few casualities attending the movement of oil in bulk. No passenger has been killed or seriously injured during the year, and but one claim for damages on account of personal injury received during the year, has been made upon the company, and that was settled for the trifling amount of three hundred dollars.

The increased mileage of trains for the amount of tonnage and number of passengers carried as compared with 1865, is owing to the fact that in order to meet similar efforts of other lines competing for Western business, more of the Westward bound freight has been taken over the road on fast freight trains, and in order to obtain this increased speed we have been obliged to lighten the load by hauling a less number of cars per train; and for the accommodation of our local travel we have run two additional passenger trains on the Eastern and Buffalo Divisions.

RECAPITULATION.

MATERIALS USED ON THE ROAD AND BRANCHES.

Divison.	Number of cross ties.	Number of R. R. chairs.	Tons of R. R. spikes.	Tons of new iron.
Eastern	126,268	19,629	82½	4,500
Delaware	115,264	5,540	78¾	4,470
Susquehanna	134,454	8,758	83½	4,675
Western	95,171	5,500	70	3,450
Buffalo	77,250	6,283	43½	1,762
North-Western	17,900	3,024	18	680
Chemung Branch	12,145	8,000	39	1,687
Total	578,452	56,734	515¼	21,224

	Tons of repaired iron.	Feet of side-tr'ck laid.	Rods of new fence built.	Rods of fence rep'red.
Eastern	995	5,798	2,302	2,000
Delaware	485	543	2,554	3,216
Susquehanna	1,108	5,366	6,377	4,226
Western	493	9,850	3,429	15,900
Buffalo	1,296	17,104	5,250	6,900
North-Western	1,104	3,625	586	450
Chemung Branch	111	324	470	170
Total	5,592	42,610	20,968	32,862

Finally, in reviewing the operations of the year, I desire to commend generally, the efforts and interest displayed by the officers and employes, and only regret that the large falling off in passenger traffic, the low rate received on freight last spring, owing to competition, the suspension of the coal traffic for three months, and the high war price at which much of the material was used was purchased, all united to make the report of the year's operations much less favorable than it otherwise would have been, and prevented our earning a dividend on the Common Stock.

Very respectfully yours.

H. RIDDLE, *Gen'l Sup't.*

Boston, Concord and Montreal Railroad.

The annual meeting of the stockholders of this company was held at Plymouth, N. H., on the 27th ult. The report of the directors was presented and accepted, and a dividend of three per cent. announced. The old board were re-elected by an almost unanimous vote. The subject of the extension of the line towards Lancaster, about 20 miles, and within 10 miles of the Grand Trunk Railway, then came up, when the following resolution was offered:

Voted, That it is desirable for this corporation to aid in the extension of the White Mountain Railroad from Littleton, and that the matter be referred to the Board of Directors and full power given to them on behalf of this corporation to take such action as they may at any time think proper for that purpose.

An animated discussion was then had on the resolution, after which John E. Lyon, Esq., President of the company, made a strong statement on the general management of the Directory, and also in favor of the extension. Efforts were made to defeat the clear will of the large majority of the stock interest in passing the resolution, and one of entire confidence in the Directory, but the resolution was carried by a large vote. The extension of the road to Whitefield, to meet the wants of the immense lumber interest of that region is pretty sure to be made, as soon as complete powers for the purpose are obtained; and, further, provided other parties or interest beside the Boston, Concord and Montreal Railroad Company do their part.

NATIONAL TRUST CO.
OF THE CITY OF NEW YORK.

Notice of Opening of Books of Subscription to the Capital Stock.

At a meeting of the Trustees of the National Trust Company of the City of New York, held at the temporary office, No. 363 Broadway, on the 8th day of May, inst., the undersigned were appointed a Committee to open books for subscriptions to the Capital Stock of said Company.

Notice is hereby given, pursuant to the charter, that the books for subscription to the Capital Stock of said National Trust Company will be opened at the Ninth National Bank, No. 363 Broadway, corner of Franklin Street, in the City of New York, on the 22d day of May, 1867, and will remain open until the amount of Capital Stock of one million dollars shall be subscribed.

—o—

PLASTIC SLATE
FOR
Roofing & Other Purposes.

The process of reconstructing Slate Stone from a disintegrated state was

PATENTED FEBRUARY 21ST, 1865.

It is a combination of

Pulverized Slate and Viscous Matter.

(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.

As a Roofing Material it Stands Unrivalled.

A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.

Frost does not Crack nor Heat Dissolve it.

The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and

Perfectly Fire-Proof.

It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

FACULTY:

F. A. P. BARNARD, S. T. D., LL. D., President.
T. EGLESTON, Jr., E. M., Mineralogy and Metallurgy.
FRANCIS L. VINTON, E. M., Mining Engineer.
C. F. CHANDLER, Ph. D., Analytical and Applied Chemistry.
JOHN TORREY, M. D., LL. D., Botany.
CHARLES A. JOY, Ph. D., General Chemistry.
WILLIAM G. PECK, LL. D., Mining Surveying.
JOHN H. VAN AMRINGE, A. M., Mathematics.
OGDEN N. ROOD, A. M., Mechanics and Physics.
JOHN S. NEWBERRY, M. D., Geology.

The plan of this School embraces a three-years' course for the degree of ENGINEER OF MINES, or BACHELOR OF PHILOSOPHY.

For admission, candidates for a degree must pass an examination in Arithmetic, Algebra, Geometry and Plain Trigonometry. Persons not candidates for degrees are admitted without examination, and may pursue any or all of the subjects taught. The next session begins October 7th, 1867. The examination for admission will be held on October 3d. For further information, and for catalogues, apply to

DR. C. F. CHANDLER,
Dean of the Faculty.

FOR SALE

3 LOCOMOTIVES,
4-81-2 GAUGE,

All thoroughly REBUILT by one of the best makers in the country, and ready for immediate use.

1—Cylinders 14x22, Link Motion, 4-56 in. Drivers connected, Copper Flues, Weight about 24 tons; 8 wheeled Tender, 1800 gallons.

This Engine has always worked admirably; Steams freely with dry or green wood, works and wears perfectly smooth; Well spring'd and brassed all around. Proportions every way suited to power. A good and stylish model, all in excellent order.

2—Cylinders 15x20, Link Motion, 4-56 in. Drivers connected, Copper Flues, weight about 23 tons, 8 wheeled Tender, 1,800 gallons.

Is a smart smooth working Engine, suitable for any work; has a good record throughout.

3—Cylinders 15x20 Hook Motion, 4-66 in. Drivers connected, Copper Flues, weight about 24 tons; Tender, 8 wheeled.

Every way perfectly sound, well brassed and springed up. All in fine working condition.

These Engines will be sold VERY CHEAP to close a transaction, and are GREAT BARGAINS to any company wanting this sized Engine.

KASSON & CO.,
62 Broadway, New York.

Thistle Mill Waste,

A new and Superior Article of WOOLEN Waste, combining the following

ADVANTAGES,

1st. It is 30 per cent. lighter than ordinary waste.
2d. It will absorb 25 per cent. more oil.
3d. Has greater elasticity and will wear longer.
4th. It is less liable to ignite.
5th. And has a value as old waste.

The use of Wool as an ANTI FRICTION material is too well known to require discussion.

This waste is manufactured expressly for use in packing Locomotive and Car Journal Boxes, and will be sold as low as the best Cotton Waste.

The old waste taken in exchange at a price—including weight of oil, dirt, &c.—which will reduce first cost over one half.

Small Sample Bales furnished FREE for trial.

KASSON & CO.,
15tf **62 Broadway, New York.**

WHARTON'S SAFETY SWITCH

MAIN TRACK UNBROKEN.

Patented June 27th, 1865; August 29th, 1865; and December 5th, 1865.

The chief feature of this switch is that by its use the continuity and solidity of both rails of the main track are entirely undisturbed. The consequent great saving of wear and tear upon both the rolling stock and the rails themselves at that point, renders this invention of great importance to railroad companies as a matter of economy alone; although in addition to that it gives perfect protection to trains traversing the main track in case the Switch is by accident left wrong.

Both rails A and B, (see drawings annexed) of the main track are the same at the switch as at places where no switch exists; they are firmly spiked to the cross ties, and the track is **absolutely unbroken, level and continuous.** Therefore, the shifting rails of the main track usual at switches are dispensed with, and the battering out of the ends of the rails at the open joints necessary in such switches, together with the severe blows received by every wheel and axle passing over those open joints, are entirely avoided in this arrangement. Neither can any accident arise from the breaking of the clamp bars or switch rod, as now happens to cars moving upon the main track when any of the apparatus holding the shifting rails of the usual switches gets out of repair, for the main rails in this invention are held in place by being spiked down to the cross ties.

The switch rails D and E connected together by clamp bars *g, g, g*, and the movable guard rail C are so arranged that when the switch is not in use they can be simultaneously moved away from the main rails to the position shown in Fig. 1, where they do not in any way act upon or touch against the car wheels. When, however, it is desired to transfer cars from the main track to the siding, they are moved to the position shown in Fig. 2, in which case the guard rail C draws the wheel K gently to that side, so that all of the projecting portion of its tread shall be caused to run upon the switch rail D, which at its end is of the same height as the rail A of the main track, but which gradually inclines upward, so that as the wheel advances it is quietly raised above and becomes free from the control of the rail A of the main track, and is supported only by the switch rail D, which in a distance of about four feet has sufficient inclination to enable the flange of the wheel K to pass over and above the main rail A without touching it.

The guard rail C has also in the meantime drawn the opposite wheel L a little distance away from the other main rail B, so that its flange is insured to run inside of the point of the switch rail E, and can never touch or strike against the point itself.

The wheels are then guided on to the siding, and the whole transfer is accomplished in the most easy and gentle manner.

The point therefore is not subjected laterally to any wear; neither can it receive the full weight of cars passing on to the siding, for the wheels also bear upon the main rail B, until they have advanced so far upon the siding that the pointed rail has become of its full width and strength.

The switch rail E is provided with a guard rail F, either bolted to it, or rolled with it in one rail as desired, the duty of which is to steady and otherwise assist in guiding the car wheels. Of course the cars can come out from the siding on to the main track with equal facility.

The switch rail D after being elevated during a moderate length is gradually decreased in height until it is of the same level as the other rails.

The whole arrangement is constructed of rolled T rails, and there are no castings required.

All cars travelling upon the main track use the main track rails alone, and the switch rails are never used excepting by such cars as are taken into or out of the siding.

It will be evident that wheels of cars traversing the main track in the direction of the arrow will, in case the switch has been left wrong, continue upon their proper course, merely moving the switch rails D and E to a sufficient distance aside to allow them to pass through. This is done by the simple bending backward of the switch rod *h*, which is done with the utmost facility as the first wheel of a train passes through the switch, and without giving any check or jar to the train.

This partial bending backward of the switch rod *h* is accomplished with the greatest ease; the rod is made of iron about $1\frac{1}{8}$ inches diameter, a size which is readily bent, but which is amply stiff enough to move the switch rails backward and forward.

The lateral pressure caused by cars passing into the siding is borne by the rail E being supported against the side of the main rail B, which main rail therefore receives the lateral pressure of the car wheels and relieves the switch rod *h* from it, so that the switch rod *h* therefore need not be of any great strength, excepting for the purpose of moving the switch rails backward and forward.

The other switch rod *i* does not get bent when cars pass through the switch in case it is left wrong for the main track, for there is always room enough between the guard rail C and the main rail A for the flanges of wheels to pass through whether the switch is closed or open.

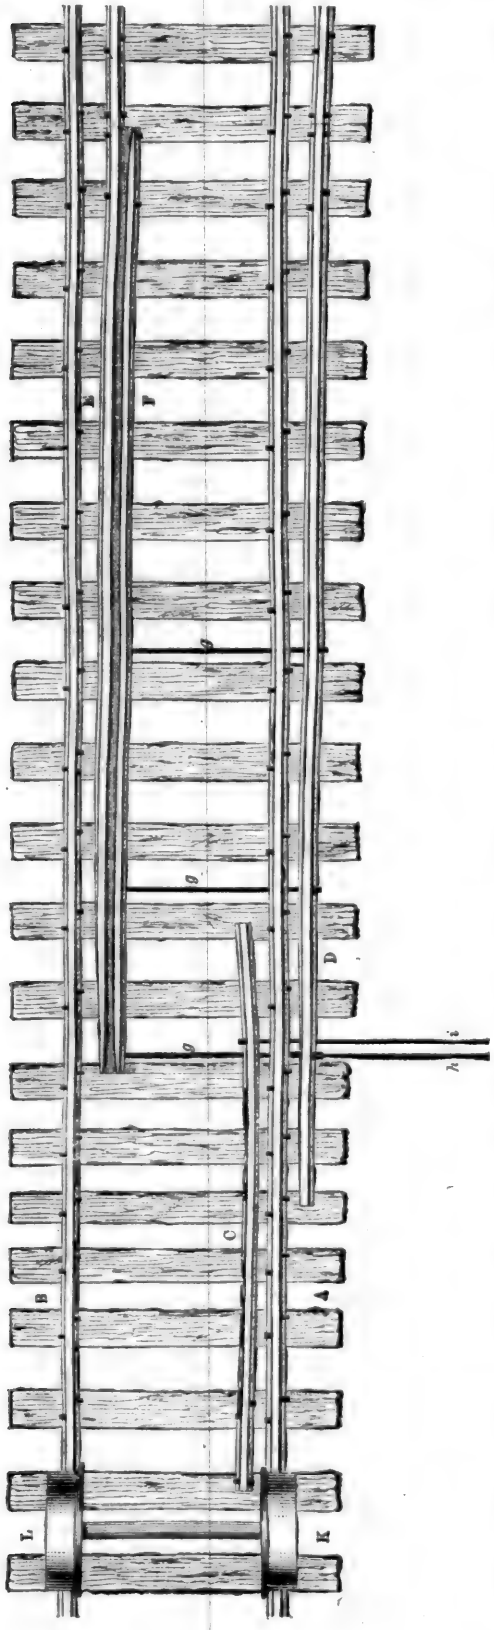
This switch, therefore, gives perfect protection to cars moving upon the main track whether the switch is fastened right or fastened wrong, or whether it is not fastened at all, but left loose, for in the latter case it will all the more easily be moved aside by

the wheels. The accidents caused by leaving an ordinary switch unfastened are if possible more disastrous to life and destructive to property than when the switch is fastened in the wrong position, since the switch rails are apt to move under the car wheels and cause some to go one track and some the other, which brings about an immediate and certain crash.

Upon railroads with single tracks where it is of course necessary to provide for the safety of trains moving in both directions, it is so arranged by means of a most simple device, that the switch rails will not remain in position to form a switch unless the switchman is actually present, and so, therefore, that the switch can never by accident be left wrong for the main track.

The inventor has preferred to have the matter thoroughly tested and adopted by a first class railroad of heavy tonnage, before offering the invention to railroad companies generally, and he can now refer with confidence to the record of actual use.

Fig. 1.



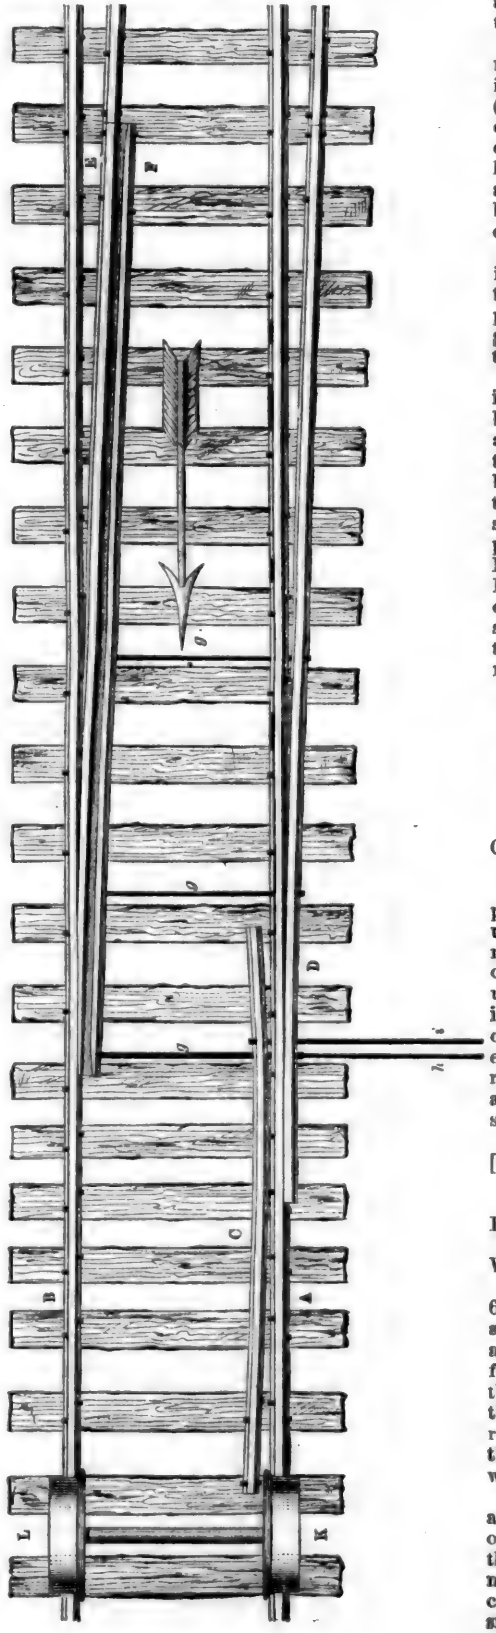


Fig. 2.

These switches are in operation on the main track of the Philadelphia and Reading Railroad, at Reading, Pennsylvania, (the down track carrying the loaded coal cars,) and after a severe trial of eighteen consecutive months by that company, they have purchased the right to use them at all places upon their railroad and its branches, and they are now putting them down upon their track generally.

By careful observation on that railroad, it is known that the main track rails in this switch last twice as long as the rails put down in ordinary switches, which soon get battered out at the ends, as do also the ends of the next adjoining rails.

This saving in rails, and the great saving in wear of the rolling stock, which is by this means provided with a level, firm, and smooth track at switches, in place of the usual movable rails and the severe blows caused by the open joints and battered ends, is a matter deserving the special attention of all railroad companies, while THE PERFECT IMMUNITY FROM ACCIDENTS CAUSED BY MISPLACED SWITCHES is a subject not only of importance in respect to property saved from destruction, but it concerns the life and limb of all travellers upon railroads.

WM. WHARTON, JR.,

TESTIMONIALS.

Philadelphia, May 6th, 1867.

Charles E. Byers, Esq.,

Chief Engineer Phila. & Reading R.R. Co.

Dear Sir:—As you have now had my patent switch for steam railroads in use upon your main track for over eighteen months, and as your company have purchased the right to use it at all places upon their tracks, I will be much obliged if you will give to me in writing your opinion of its practical operation, of its economy in wear and tear upon track and rolling stock above ordinary switches, and also of its value and advantages as a safety switch.

Yours, respectfully,
[Signed] WILLIAM WHARTON, Jr.
P. O. Box 2745.

Engineer's Office P. & R. R. R. Co.,
Pottstown, May 8th, 1867.

William Wharton, Jr.,

Dear Sir:—In answer to your letter of 6th instant, I would say that your patent switches put down some eighteen months ago upon our main track at Reading, have fully answered every purpose required of them. I recommended the purchasing of the right to use them generally upon our roads after noticing their operation during the long and severe test to which they were subjected.

I believe them cheaper in construction and more certain in operation than any other safety switch I have ever seen, and the absence of any disconnection of the main track renders the passage of the cars free from concussion and perfectly smooth. When we shall have put them

generally into service I shall be better able to testify in detail to their merits.

Yours, very respectfully,
[Signed] CHARLES E. BYERS,
Chief Engineer.

PHILADELPHIA & READING R. R. Co.,
Reading, Pa., May 22d, 1867.

WILLIAM WHARTON, JR.,

Dear Sir:—Having closely observed the operation of your Patent Railroad Safety Switches laid down in the vicinity of Reading, about one year since, I take pleasure in expressing my satisfaction with their efficiency and endurance as well as the entire absence of any perceptible jar to the rolling stock whilst passing over them in any direction.

Respectfully yours,
J. E. WOOTTEN,
Engineer Machinery P. & R. R. R.

Cleveland, Columbus and Cincinnati R. R.

The earnings and expenses of this road for the years ending December 31, 1865 and 1866, have been as follows:

Earnings:	1865.	1866.
From pasengers.....	$974,220 34	$628,280 33

Add balance from previous year		39,200 10
Surplus as in General Balance Sheet.		$81,357 74

Compared with the previous year there has been a decrease in gross earnings of $452,432 55, with a decrease in working expenses of $296,605 35. The entire expenditure shows a decrease of $337,639 46, and the net earnings a decrease of $114,793 09. The report says:

The falling off in gross earnings is attributable to several causes, the principal of which are the opening of routes by the rivers and by railroads which were closed during the war, the opening of new and competing routes by rail the failure of the wheat crops of 1865 and 1866 throughout almost the entire States of Ohio and Indiana, the diversion of the provision crops of the same States from the eastern markets to supply the deficiency in the south-western States caused by the waste and destruction of war, and the excessive competition incident to a light traffic and an excess in the facilities for transportation. It may not be improper here to express the opinion that with the return of fair average crops and business to its natural channels, will return to the company fair average net earnings as compared with previous years. It will be borne in mind, however, that since the commencement of the war the capital stock of the company has been increased twenty-five per cent., (which increase was divided among the stockholders *pro rata*,) consequently the same net earnings will produce lower rates of dividends than before such increase was made.

The new Union Passenger Depot at Cleveland, (costing some $475,000, and in which this company has one fourth interest) was so far completed as to be opened for use on the 12th day of November last. The advantages in the facilities which it affords for the rapid transmission of passengers and baggage, from and to the trains of the different companies occupying it, cannot be over estimated. Its erection was indispensable, as the old depot formerly occupied, being erected over the waters of the lake upon piles, from general decay had become unsafe for the passage into it of heavy locomotives and trains of cars loaded with passengers.

The operating expenses were 64 per cent. of the gross earnings, and the total expenses, 73 per cent. of the same—a decrease of 2.8 per cent., as compared with the previous year.

The amount and cost of materials used in track repairs during the year have been as follows:

164 tons new rails.....	$16,016 44
4,091 tons re-rolled rails.....	174,724 80
9,088 repaired rails	6,053 04
82,377 new cross-ties.....	37,063 36
12 530 lbs. joint chairs.....	7,443 52
220,706 lbs. iron joint splices.....	13,357 28
104,915 lbs. joint bolts and nuts.....	9 746 10
174,630 lbs. spike	11,230 28
Frogs and switches	8,787 30
Renewing cattle guards and culverts.	11,659 00

The cost for repairs of locomotives per mile run was 9.91 cents. Total cost for fuel per mile run by engines was 13.9 cents. The consumption was 38,468 cords of wood, and 3,400 tons of coal. The use of coal for locomotives has been discontinued, in consequence of the high price of coal, and increased cost of repairs to locomotives.

Eleven persons were killed during the year, six of whom were employees of the company and the remainder were persons walking on the track.

The equipment of the road consists of 43 locomotives, 20 first-class and 4 second-class passenger cars, 6 baggage, 3 mail, 1 mail and baggage, 468 house, 109 stock and 160 flat cars.

Miles run by locomotives with passenger trains, 351,787; with freight trains, 458,683; with fuel trains, 50,908; with repair trains, 18,823; switching trains, 175,391—total 1,055,592, against 967,820 in 1865, an increase of 87,772.

The number of passengers carried, including 837 soldiers, was 398,561, of which 331,277 were way, and 67,284 through. Number of passenger carried one mile, 22,343,052. Average rate received per mile, 2.81 cents. Tons of freight transported, 517,199; do. carried one mile, 45,153 089.

During the year, $25,000 of the bonded debt has been paid, leaving $450,000 yet due, which matures at the rate of $75,000 per year until the whole sum is paid.

The assets and liabilities of the company Dec. 31, 1866, were as follows:

ASSETS.

Road and depots.....	$4,070,000 00
Equipment.....	790,000 00
Stock in Bellefontaine Railway Co..	1,131,750 00

Secretary & Treasurer.—GEO. H. RUSSELL.

Superintendent.—E. S. FLINT.

Conveyance of Letters by Railroad Companies.

The Postmaster General has written a letter on the subject of the free conveyance of letters by railroad companies. He says that it has been the uniform policy of Congress since 1825 to prohibit the transmission of letters, except through the mails; that in order to protect the Postoffice Department from frauds, and also to promote the convenience of the business public, stamped envelopes were authorized, so that mailable matter therein contained could be carried out of the mails; that there is no authority vested in the Postmaster-General to change or modify the law, and that as railroad companies stand on the same footing as other business firms and corporations, they must be subject to the same laws; and that the only relief that can be afforded to railroad companies must come through Congress.

The Postmaster-General expresses the opinion that no law could be passed giving relief to railroad companies which would not also give the same privilege to steamboats, stage-coach and canal lines. The letter concludes by saying that by transmitting business over a mail route, "the railroads do infringe the law of the land; and that if Congress had intended to confer the franking privilege upon railroad officers a law would have been passed to that effect. There is no reason, that I am aware of, why railroads should be exempt from a postal tax, that is paid universally by other corporations.

"I am of opinion that the construction placed upon the law by the Third Assistant Postmaster-General was correct under the existing law; and that it is my duty to compel all officers and employees of rai road corporations, as well as other mail contractors, to pay upon all letters not relating to freight or cargo at the same time conveyed, the same postal tax on mailable matter as is paid by other corporations, by express companies, by merchants, traders and manufacturers."

France—Its Progress in Commerce, Finance and Public Works.

The Paris *Constitutionnel* calls attention to the marked improvement which has taken place within the last fifteen years in the general conditions of existence in France. The regularity and continuance of the improvement have in some measure tended to prevent the importance of the change from being remarked as it merited. In order to obtain a clear idea of what has occurred a considerable period of time should be regarded, and a comparison instituted on the difference between the situation then and that existing at present.

A review of that kind has been published by M. Devinck, formerly President of the Tribunal of Commerce at Paris. His work contains an inquiry into the progress of commerce and manufactures in France, and in order to make the change more intelligible, he compares the trade movement of the years 1865 and 1851. The principal points of the writer's conclusions may be summed up as follows: In 1851 the commercial and manufacturing situation of France was as follows: Imports, 1,094,000,000 francs; exports, 1,520,000,000, making a total of 2,614,000,000 francs. In 1865 the imports were 3,528,000,000, and the exports 4,087,000,000, or in all 7,615,000,000. In 1866 we find for the first eleven months only (the general balance not having been yet established) a total of about 8,500,000,000 francs, being an increase in fifteen years of nearly 200 per cent. No such augmentation was ever observed before anywhere.

In 1851 the number of French and foreign vessels which entered or left the French ports was 34,436. In 1865 the figure rose to 51,156, showing for maritime commerce alone a progress of about 50 per cent.

In 1851 the network of railway measured 3,500 kilometres (five-eighths of a mile each,) but at the end of the year 1866 it showed a length of 14,000 kilometres actually at work. The concessions form a much larger amount—more, in fact, than 21,000 kilometres. In 1851 the telegraphic service possessed 100 stations for 3,000 kilometres, and transmitted 10,000 despatches. In 1866 it was in operation for a distance of 31,500 kilometres, possessed 2,100 stations, and transmitted 2,500,000 despatches. The charge has been reduced by 70 per cent. since 1851. The number of letters carried in the earlier period was 65,000,000, whereas in 1865 it had risen to 329,000,000. The postage has been diminished on an average one-fifth, and the conveyance has become four times more rapid.

In 1851 the amount of the discounts at the Bank of France was 1,241,000,000, *whereas in* 1866 *it was* 6,574,000,000. During the same period we have seen the produce of our coal basins, where hands are wanted, increased twofold, and that of the manufactures *in cast and wrought iron tripled.*

The State has executed great works for improving the navigation of canals and rivers. By means of buying up the tolls paid to companies the tariffs have everywhere been either suppressed or lowered. In the year 1851 the indirect taxes and those on consumption produced a sum of 738,242,000f.; in 1852, 804,334,000f.; and 1866, 1,282,268,000f. At the same time that the consumption has been so prodigously developed to the great profit of the Treasury, the public savings have been most considerable. In fifteen years France has furnished capital, the amount of which may be set down at 20,000 millions, which has been either invested in loans contracted by different Governments or employed in the establishment of railways, formation of powerful companies, or in great works of public utility and in material improvements of every kind.

East Tennessee and Virginia Railroad.

The report of this company for the fiscal year ending June 30, 1866, which was presented at the Annual Convention at Jonesborough on the 29th of November last, has just been received. It embraces a period of ten months only, viz: from August 28, 1865, to June 30, 1866. During this time the earnings were:

From passengers	$171,819 68
" freight	117,272 50
" express	26,454 89
" mails	11,010 05
" miscellaneous	5,313 85
	$331,870 97

And the expenses were:

Transportation	$47,095 88	
Repairs of roadway	162,515 21	
Maintenance of cars	33,525 56	
Motive power	50,480 69	
Wood	22,165 02	
		315,782 36
Leaving		$16,088 61

From the above expenses should be deducted the sum of $144,925 expended in extraordinary repairs of road and equipment, construction of new depots, etc., and the erection of two new Howe Truss Bridges, leaving for the ordinary running expenses only $170,857 36. The earnings less operating expenses will then stand at $161,013 61.

Owing to the disturbed condition of the country there has been no official printed report of this company issued since June 30, 1862, nor is any allusion made to the transactions of the company from that date to September 1, 1863, when the road was taken possession of by the military authorities, except that the currency of the country, which the company was compelled to receive, had become so much depreciated that it was impossible to use it to much advantage. But a large amount was expended to keep the road and property belonging to it in a state of good preservation, and to prevent the same at any cost from going to destruction. A very large amount was also invested in the purchase of materials and supplies for the use of the shops and road, so that no road anywhere in the South was in as perfect order, or had a larger quantity of materials and supplies on hand than this road when it passed out of the company's hands in September, 1863. During the same period of time, the floating debt of the company was reduced $402,947 94, a dividend of 20 per cent. was declared, and the sum of $488,582 80 was invested in cotton yarns, tobacco, sheetings, etc., from which was realized, in the payment of company bonds, debts, etc., after a large amount of the same had been lost or destroyed, $100,277 11; of which there remained on hand uninvested or unappropriated $78,958 66 which was an entire loss to the company.

Attention is called to the fact that at the time of the occupation of East Tennessee by the U. S. forces in the Fall of 1863, the company voluntarily placed in the hands of the military authorities their road, machine shops, machinery, tools, etc., a large quantity of materials and railroad supplies then on hand and in the shops on the line of the road, with other property and other rolling stock, such as they could control, with the understanding that ample remuneration would be allowed and paid by the Government to the company for whatever property was used or destroyed by them, when, in their opinion, the good of the cause demanded it.

The Government held possession of the road during two years, viz: from September 1, 1863, to August 28, 1865, using the rolling stock and other property, and entirely exhausting the large quantity of materials and supplies, besides destroying the road and other property of the company whenever of the exigencies of the case demanded it. An account had been made out against the Government for the use of the road, engines and cars, and for the destruction of bridges, trestles, track, depots, etc.

After the close of the war, it having been intimated to the President, that upon a proper organization of the company, the road and its appurtenances would again be placed in the hands of the stockholders, a meeting for that purpose was convened at Knoxville on the 12th of July, 1865, and a board of directors chosen, with John R. Branner, Esq., as President, to serve until the annual meeting in November following. Power was delegated to the President to appoint such officers to assist him as he deemed necessary. Whereupon, he appointed James B. Hoxie, Superintendent, and John Keyes Treasurer, and who were subsequently elected to their respective offices.

In accordance with an order from the Secretary of War, the road and such property as could be found and identified was returned to the company on the 28th of August, 1865.

The company subsequently purchased from the Government 7 engines, over 100 box and flat cars, 3 second class passenger coaches, materials, tools etc., amounting in all to $265,655 65, supposing that this sum would be more than offset by their claim against the Government for the use of the road, destruction of property, etc. They were not a little surprised, therefore when compelled to execute to the Government a bond payable in 24 monthly instalments, with interest at the rate of 7.10 per cent. per annum, the Government retaining a lien on the road, etc., for the prompt payment of the same—and the entire debt to be liquidated at the expiration of two years from date.

Notwithstanding the dilapidated condition of the road and its surroundings at this time, together with the absence of sufficient machinery, an impaired credit and empty Treasury, the company immediately commenced operations, and in a very short time the road was repaired through to Bristol, connections were soon made by this route between the North and South, and the business of the line increased far beyond the most sanguine expectations of the company.

A statement is given showing the cost or value of the road July 1, 1863, the loss and damage sustained during the two last years of the war,

the value of the road when returned to the company in August, 1865, the expenditures in rebuilding, repairing and re-equipping the same from August 28, 1865, to July 1, 1866, and the value of the road at the date last mentioned. The footings are as follows:

Cost of road, July 1, 1863		$3,133,200 87
Damage to road and equipment from July 1, 1863, to Aug. 28, 1865	370,513 75	
Value, August 28, 1865		$2,762,687 12
Add expenditures in repairing, etc., since Aug. 28, 1865	425,926 61	
Value, July 1, 1866		$3,188,613 73

The loss and damage to road and equipment, as stated above, was $370,513 75; to which should be added losses in materials, railroad supplies, tools, depot furniture, etc., etc., $84,253 07—making the total loss and damage from July 1, 1863, to Aug. 28, 1866, $454,766 82.

It will be seen that the estimated value of the road July 1, 1866, was $55,412 86 more than it was July 1, 1863. This increased value is made up by the purchase of additional real estate, additional machinery, 3 new passenger coaches, 7 engines, and over 100 box and flat cars.

The financial condition of the company July 1, 1866, is shown in the annexed Balance Sheet. The funded debt at that date amounted to $2,175,500, to which add balance due on accrued interest on State aid—making the total amount $2,466,680.

Since July 1, 1862, $26,000 first mortgage bonds, $4,000 second mortgage bonds, and $3,500 income bonds have been retired.

The floating debt amounted on the 1st of July, 1866, to $563,714 16. This includes the rolling stock and supplies purchased of the U. S. Government, amounting to $255,036 41, and interest on the same.

The funded debt had been greatly increased during the year, but the old floating debt had been nearly extinguished. Should the claims of the company against the Government be allowed the result would be a balance in favor of the former.

Within the fiscal year 100,000 cross ties, 250 tons of new iron, 2,000 wrought iron chairs and 100 kegs of spike were used. Several bridges and trestles were built and new depots erected; so that at the close of the year the road was reported as in fine condition, and second to none in the speed of its trains or the security of its track.

The equipment of the road consists of 20 locomotives, 8 first class passenger coaches, 3 baggage cars, 2 second class cars, 154 box cars, and 26 flat cars.

The number of miles run by locomotives with passenger trains, was 72,983; with freight trains, 46,612; with other trains, 19,737—total miles run, 139,332. Average cost per mile run for repairs, 16.5 cents; do., oil, tallow, etc., 2.0 cents. For engineers and firemen 11.8—total, 30.5.

The total number of passengers carried was 53,662; of which 9,211 were through, and 24,451 local; of these 29,151 were carried east, and 24,491 west.

The total number of tons transported was 19,021. Total through tonnage east, 4,591; do., west, 6,009—total through tonnage, 10,600. Total way tonnage east, 1,794; do., west, 4,581—total way tonnage, 6,375. Total amount of express tonnage, 2,045.

CONDENSED BALANCE SHEET.

Cost of road to June 30, 1865		$3,133,200 87

		$4,224,246 80

President.—JOHN R. BRANNER.

Directors.—John R. Branner, P. Dickinson, A. G. Jackson, John Talbot, Wm. Galbraith, E. A. Sawyer, W. C. Kyle, Sam'l E. Snapp, Joseph H. Earnest, George W. Tilford, Geo. W. Nelson, Samuel B. Cunningham, Peter Reeves, Andrew Shell and John H. Fain.

Treasurer.—JOHN KEYES.

Superintendent.—JAMES B. HOXSIE.

Auditor.—JAMES G. MITCHELL.

☞ A few tons of Bessemer steel rails were laid last year at the most severe curves of the road, between Jersey City and New Brunswick, which have so well stood the test to which they were put that an order has been given for 300 tons to be laid this year through Bergen Cut; and it is probable that steel rails will be gradually laid the entire length of the road; the greater durability of these rails overcoming the objection to their increased cost.

Statistics of Colorado.

The statistics for 1866, of Colorado, show a tax valuation, exclusive of mines, of over ten and a half millions of dollars; Internal Revenue to the amount of $141,368; 251,000 acres of public lands entered for actual settlement, against 140,000 for 1865; postal receipts more than doubled in a year, and exceeding those of certain of the States; 250 new buildings, costing $476,000, in Denver City alone, and an exchange business of nearly $12,000,000 transacted by a single bank, which is not far ahead of several others. The population is estimated at 60,000.

Steel Rails.

A considerable quantity of crucible steel rails at a high price, nearly £40 per ton, were put down nearly eight years ago upon a portion of the Western Railway of France, near Auteuil. They have borne from 35 to 40 passenger trains daily, and are as yet but slightly worn. There is no necessary difference between crucible steel and Bessemer steel, although they are made by different processes, the latter being by far the cheaper. In the Bessemer process, however, the amount of carbon may be regulated so as to give any amount of hardness or toughness.—*Iron Trade Circular.*

☞ The directors of the Boston and Worcester Railroad Company have authorized an increase of the capital stock in the sum of $500,000. Stockholders may take the same at par ($100) in the proportion of one new share for every nine shares of the old now held by them, provided notice is given to the Treasurer of their election to take the same on or before the 19th inst., and shall make payment therefor on or before the first day of July, at which time the new stock will be issued. This is equivalent to a stock dividend of $4 per share.

☞ The Railroad Committee of the Connecticut Legislature have made their report rejecting the petition of the Norwich and Worcester Railroad for permission to lay a track from Norwich to New London parallel to the track of the New London Northern Railroad, and authorizing the latter company to build a double track within three years. After the expiration of that time the former company may build if the latter neglects to do so.

☞ That portion of the Racine and Mississippi Railroad lying between Freeport and Beloit was sold at auction on the 23d ult., under a judgment of the Court, and was bid in for one million dollars by Henry T. Fuller, Vice President of the Western Union Railroad Company.

☞ A large meeting was held, May 11th, at Albuquerque, New Mexico, at which it was resolved to secure a connection with the Union Pacific, Eastern Division. Surveying parties were to be selected, and commissioners appointed to publish an address, showing the resources of New Mexico.

☞ A meeting of the stockholders of the Boston and Worcester Railroad Company will be held in Boston on the 19th inst., for the purpose of considering the question of the consolidation of that company and the Western Railroad corporation.

☞ Work has begun at Bloomington, Ill., on the Jacksonville and Chicago Railroad, thirty miles of which, beginning at Bloomington, are under contract.

RAILROAD AND CANAL DIVIDEND STATEMENT.

American Railroad Journal.

Saturday, June 8, 1867.

Stock Exchange and Money Market.

Money has been less abundant in the open market, since our last, and rates on call loans have been advanced to full six per cent. to the dealers in the public funds, and seven per cent. to the Stock Exchange firms. At these rates, there has been a rather active call for accommodation, especially on Monday and Tuesday, when there were some symptoms of stringency apparent. On Wednesday, there was less pressure for aid, and more ease was reported by the leading street houses at the ruling figures. The U. S. Sub-Treasury has paid out near three millions more than it has received, since our last, but its balance is again on the increase, being $126,804,118 on Tuesday evening against $123,583,733 on Saturday. It has ceased marketing the new issue of the Five-Twenties, under orders from Washington; and the absorption of currency, by this means, has consequently ceased for the present. Washington advices report, officially, an increase, during May, of $38,827,607 on the currency reserve of the Treasury, making the total on June 1, $72,666,165, against $33,838,558 on May 1. The coin reserve is reported, also officially, down to $98,758,418, including $17,323,780 on account of private depositors, against $114,250,444 including $15,400,440 on deposit, May 1. The falling off in the aggregate coin reserve is accounted for by the disbursements of the May coin-interest on the public debt, which, through the New York office alone, amounted to $16,308,316. A million of legal tender was retired and cancelled in May, and about half a million of fractional currency was similarly disposed of. Nearly five millions of compound interest notes, and thirty-seven and a half millions of seven thirty notes were redeemed, during May. The redemption of Seven Thirty Notes, thus far, amounts to $319,000,000, leaving $511,939,525 yet to be provided for, chiefly in the form of the second and third issues, maturing in June and July of the coming year. Of the first issue, maturing in August next, or two months hence, about two-thirds of the three hundred millions have, thus far, been redeemed directly or by way of conversion. The Treasury is now measureably prepared for the prompt redemption, even in cash, of the outstanding balance of the earliest issue. It is not at all likely that it will be called upon to redeem the balance, or any considerable portion of it, in this way. Most of the holders thereof will doubtless avail themselves of the privilege of conversion into Five Twenties of the new issue of 1865, or of a special issue, to be prepared for the purpose, of the progress of which intimations are thrown out by the Washington correspondents. The discount market is quiet, but firm at 7 per cent. for the very best selections of short date commercial paper, and 7½@9 per cent. per annum for prime to good do. The last city bank statement for the week, as compared with the preceding returns, shows a decrease of $3,300,291 in loans and discounts, $2,102,613, in legal tenders, $3,287,202 in net deposits, and an increase of $533,393 in specie, and $49,786 in circulation. The specie reserve of the banks is now $14,617,060, against $21,858,093 same time last year. The city bank deposits are now $190,386,143, against $198,127,289 week ending June 2, 1866. The legal tender reserve amounts to $58,459,827, against $69,178,992 same time last year. The circulation now stands at $33,747,039, against $26,244,225 same time last year. The loans are now $252,791,514, against $259,959,022 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $73,779,264 a day, against a daily average of $71,955,437 the preceding week, and $83,386,628 the week ending with May 18th. The current week's exchanges average $89,260,537 a day.

National Bank notes to the amount of $35,750 were issued last week, making the total issue to 1,671 banks thus far, as given in our last, $302,901,106, against $282,555,440 at the close of the last fiscal year, June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $4,769,232, leaving, with the existing 1,647 banks, (having an aggregate capital of $422,913,861,) an actual circulation at this date, of $298,131,874. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,562,150; and for the public deposits, $38,719,950—making a total of $379,282,100. The Treasury Department, last week, re-

deemed and destroyed $431,800 of worn and mutilated fractional currency, and issued $344,500 worth of new.

The most marked changes in the Philadelphia bank statement of averages for the past week from that last published, is a decrease in loans of $788,862, and in deposits of $446,639. There was an increase of $140,991 in legal tenders and $1,902 in circulation. There was a loss of $34,740 of specie. The business through the banks, as shown by the amount of clearings, fell off $3,495,348. The balances were reduced $1,391,791.

The U. S. Sub-Treasury receipts, week ending with June 1, were $18,850,257, including $1,955,087 from customs duties; payments, $27,547,745; balance at the close of the week, $123,583,733, against $132,281,220, at the close of the preceding week, showing a decrease of $8,691,488. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $995,514, and payments, $809,484; on Tuesday, receipts, $3,725,183; payments, $690,872. The balance at the close of business on Tuesday stood at $126,804,118, against $129,238,225 a week previous.

Government revenues have have improved a little, since our last, and the promise is of a steady increase in the excises for some weeks to come, chiefly from income taxes. The excises, last week, yielded $3,741,682, against $2,450,467, the preceding week; customs at the port of New York $1,955,087, and at the outports, about $650,000 (in coin) more, making the grand total income for the week equal about $8,004,182 in currency, against disbursements of over three millions on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $249,000,000.

There has been an unusually even movement in gold, since our last. The price has varied but slightly, having been no higher than 137⅞, and no lower than 136⅜. The closing rate on Wednesday was 136¾. The speculative demand has been moderate, through the week, having been checked by the closeness in money. The export inquiry has been limited. Government has been a seller of gold to a very moderate amount, during the week. On Wednesday, the total shipments to Europe were only $213,000 from this port, and $211,000 from Boston. The total imports of specie from Europe, and other foreign ports since Jan. 1, 1867, have been $1,056,573. The customs demand for Gold last week, averaged $325,847 a day; thus far, this week, it has been equal to $301,571 a day, or equal to a weekly aggregate of $1,809,426. The arrivals of specie from Europe, Havana and other foreign ports, during the past week were only $500, and from California, $985,144. The total customs revenue of the Government, in coin, at this port since July 1, 1866, has been $115,897,903, against $124,243,564 same time in the preceding fiscal year. The total receipts of California gold at this port since July 1, 1866, have been $36,641,560, against $27,277,803 same time last year, showing an increase this year, of $9,343,757. The exports of specie from this port, last week, were $777,643. The total outflow of specie from the port, thus far in the current fiscal year has been $34,027,058, against $45,344,703 same time in the preceding year. Government disbursed last month through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $16,842,316, making the total coin interest disbursements through the Government office, since July 1, 1866, $53,015,310, against $45,389,896 for the same time in the preceding fiscal year. The specie exports from San Francisco, from Jan. 1, to May 9, reached $12,761,947, against $12,204,119 same time last year, showing a decrease, in 1867, of $557,828.

Foreign exchange has been in fair demand and generally firm, on a moderate supply. Bankers' 60 day bills on London closed on Wednesday at 109¾@110, and on Paris to 5.18¾@5.12½; sight bills on London to 110⅜@110⅝; and on Paris to 5.12½@5.10. The offerings of produce bills have been heavier, this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $2,437,899, making the total value of exports since July 1, 1866, $164,998,136, against $205,032,549 same time in the preceding fiscal year.

Government securities have been in good request, and generally a fraction higher in price. The debt statement for June 1, the details of which we give elsewhere, is unexpectedly favorable, showing, as it does, instead of an increase, a positive substantial net reduction of $5,170,156. In the details, we notice an increase of about $61,500,000 in the Five-twenty issues, more than offset by a reduction of the Seven-thirty loan, and an increase of the currency reserve of the Treasury Department. The other changes not alluded to in our paragraph about money, are of minor importance. The statement is very likely to exert a favorable influence on the public funds in the open market. U. S. sixes of 1867 closed buoyantly here on Wednesday at 132½; U. S. sixes of 1868, at 134⅛; U. S. sixes of 1881, 112@112⅛; U. S. Five-twenties of 1862, 109⅞@110; U. S. Five-twenties of 1865 at 106½@106¾; U. S. Five-twenties of 1865, consolidated, 108¼@108⅜; U. S. Ten-forties at 99⅝@99¾, and U. S. Seven-thirties at 105⅝@106¼. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

June, 1864	119⅜	May, 1865	115¾
July, 1864	118⅞	August, 1865	114¾
August, 1864	118⅜	September, 1865	114¼
October, 1864	117⅞	October, 1865	114
December, 1864	116⅜		

Railway and miscellaneous share property has been in rather more demand, on speculative account, since our last, opening buoyantly, but closing somewhat heavily and feverishly in consequence of the closeness in money.

General business has been inactive, through the week. Breadstuffs have declined materially, under a pressure to realize, in view of the highly favorable crop reports, and the prevalence of a very limited inquiry. Provisions have also been depressed. Cotton has improved, under more encouraging foreign advices, and the demand has been brisker; middling grades left off here on Wednesday buoyantly at 28@29½ cents per lb. as extremes. The stock of cotton now here is estimated at about 105,000 bales. The receipts at the port this week, have averaged about 3,000 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 575,000 bales, against exports of 389,329 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 1,743,000 bales against 1,890,600 bales same time last year; exports, 1,343,000 bales, against 1,413,000 bales same time last year; estimated stock at latest dates, 290,000 bales, against 342,000 bales same time last year. In foreign merchandise there has been rather more activity. Dry goods continued depressed. The total imports of foreign dry goods, last week, were $1,232,567, and the total amount marketed $1,246,230. The value of foreign merchandise imported last week, was $4,718,148—making the grand total specie value of last week's imports of dry goods and merchandise, $5,950,715, and since July 1, 1866, $240,538,934, against $275,992,160 same time in the preceding fiscal year. The ocean freight market has been more active and firmer, since our last, with 580 vessels of all classes in port. For Liverpool we quote flour at 1s.@1s. 3d. per bbl.; grain at 2d.@3d. per bushel; cotton at $\frac{5}{32}$@$\frac{3}{16}$d. per lb.; and heavy goods at 10s.@20s. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	May 22.	May 29.	June 5.
Consols	93	94	*94½
U. S. 5-20's of 1862	72½	72½	72¾
U. S. 5-20's of 1865	70½	71	71
Erie	42¼	40	40½
Ill. Central	76¾	76½	79¼

* Ex-dividend.

The New York exports, exclusive of specie, for the week ending June 4, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$1,634,555	$2,437,899
Prev. reported	96,519,858	80,953,842
Since January 1	$98,154,413	$83,391,741

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$2,278,930	$1,232,567
Gen. merchandise	5,490,393	4,718,148
Total for the week	$7,769,323	$5,950,715
Previously reported	126,138,639	103,655,187
Since January 1	$133,907,962	$109,605,902

The commerce of New York from July 1st to date compares as follows:

	1865–'66.	1866–'67.
Imports merchandise	$275,992,160	$240,538,934
Exports produce	205,032,549	164,998,136
Exports specie	45,344,703	34,027,058

The balance in the Sub-Treasury on Wednesday was $120,068,746 37.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—U. S. 5-20s, 1865, new issue, 108⅜; Rhode Island 6s, 101; Virginia 6s, ex-coupon, 47; do., new, 41; Brooklyn 6s, Water Loan, 95⅝; Michigan War Loan, 100; Georgia 6s, 74; Connecticut 6s, W. ☞ After the 1st of July next payments of interest on registered securities of the Government will be made at the following places: New York, Boston, Philadelphia, Baltimore, Cincinnati, Chicago, New Orleans, Charleston, St. Louis, San Francisco, Buffalo and Pittsburg. The last three cities have been recently selected.

☞ The annual meeting of the shareholders of the Illinois Central Railroad Company was held at Chicago on the 29th ult.; 137,104 shares were represented. R. D. Watterbruk, Cunningham Bosthwick and H. H. Hunnewell were re-elected Directors, by a unanimous vote.

☞ The Perkiomen Railroad is in process of actual construction, work having been commenced on it at its Schuylkill end.

The Public Debt.

The following is a comparative statement of the Public Debt of the United States May 1 and June 1, 1867:

	May 1, 1867.	June 1, 1867.
DEBT BEARING COIN INTEREST.		
Five per cent. bonds	$198,431,350.00	$198,431,350.00
Six per cent. bonds of 1867 and 1868	15,379,641.80	15,325,641.80
Six per cent. bonds of 1881	283,746,200.00	283,746,350.00
Six per cent. Five-twenty bonds	1,031,146,150.00	1,092,640,600 00
Navy pension fund	12,500,000 00	12,500,000.00
Total	$1,541,203,341.80	$1,602,643,941.80
DEBT BEARING CURRENCY INTEREST.		
Six per cent. bonds	$12,922,000.00	$13,722,000.00
Three-year compound interest notes	134,774,510.00	130,030,240.00
Three-year seven-thirty notes	549,419,200.00	511,939,525.00
Total	$697,115,710.00	$655,691,765.00
Matured debt not presented for payment	11,932,540·32	9,713,020.32
DEBT BEARING NO INTEREST.		
United States notes	$374,247,687.00	$373,209,737.00
Fractional currency	28,975,379.46	28,458,075.46
Gold certificates of deposit	15,400,440.00	17,323,980 00
Total	$418,623,506 46	$418,991,792 48
Total debt	$2,668,875,098 58	$2 687,040,519.58
AMOUNT IN THE TREASURY.		
Coin	$114,250,444.09	$98,758,417.61
Currency	33,838,558.24	72,666,164.98
Total	$148,089,002.33	$171,424,582 59
Amount of debt less cash in the Treasury	$2,520,786,096.25	$2,515,615,936.99

By comparing this with the statement of May 1st, it is shown that the debt bearing coin interest has increased $61,440,600; the debt bearing currency interest has decreased $41,423,945; the matured debt not presented for payment has decreased $2,219,520, and the debt bearing no interest has increased $368,286, making the increase to the total debt during the month $18,165,421. The amount of coin in the Treasury during the same period has decreased $15,492,026-48, and the amount of currency has increased $38,-827,606 74, leaving the amount of debt less cash in the Treasury on June 1st, $5,170,159 20 less than on May 1st.

Bessemer Steel.

On the 3d inst., Gov. Geary, S. M. Felton, Esq., Dr. Bigelow, and others were present at the Pennsylvania Steel Works, situated a few miles below Harrisburg, to witness the manufacture of steel by the Bessemer process, just being introduced into this country, and by which steel rail can be manufactured almost as cheaply as ordinary iron. In 30 minutes 16 steel ingots were made, each one large enough to roll into an ordinary T Rail. The process of manufacture was fully discussed in our issue of the 25th ult.

☞ The Jefferson (Texas) *Jimplecute* announces the arrival at that port on the 26th ult., of the steamer *Irene* with Hon. B. H. Epperson, President, and Mr. Daniels, Engineer of the Memphis and El Paso Railroad, and a large lot of implements and materials for the commencement of of work at that point.

☞ The receipts of the Toledo, Peoria and Warsaw Railway Company from 1st Jan. to 15th May, 1867, are $188,886 80; last year $159,849 87—gain $29,036 63.

☞ A despatch from Governor Brownlow says that the July interest on the Tennessee bonds will be promptly met.

Railroad Earnings.--Weekly.

The earnings of the Grand Trunk Railway of Canada for the week ending May 11th, 1867, were $115,928 00
Corresponding week of previous year. 113,552 00

Increase $2,376 00

The earnings of the Detroit and Milwaukee Railroad for the week ending May 30th, 1867, were $32,498 00
Corresponding week of 1866..... 33,458 00

Decrease $960 00

The earnings of the Chicago and Rock Island Railroad for the 4th week in May, 1867, were $62,769 00
Corresponding week of previous year.. 100,961 00

Decrease $38,192 00

The earnings of the Michigan Southern and Northern Indiana Road for the 4th week in May, 1867, were $116,327 00
Corresponding week of 1866 ..... 145,471 00

Decrease $29,144 00

The earnings of the Atlantic and Great Western Railroad for the third week in May, 1867, were $117,668 00
Corresponding week previous year... 117,308 00

Increase $360 00

The earnings of the Virginia and Tennessee Railroad for the third week of May, were $21,577, a decrease of $350 on the same week last year. Total for the fiscal year commencing 1st of July, $650 518, an increase of $134,517 on same time of 1866.

Journal of Railroad Law.

NEGLIGENCE IN CROSSING RAILROAD TRACK.—BLOWING WHISTLE.

The case of Mackay *vs.* N. Y. Central R. R. Co., just decided by the N. Y. Court of Appeals is another important case involving the question whether it is negligence on the part of a person to cross a railroad track, without stopping to ascertain if a train is approaching. The facts of the case may be learned from the opinion of the court by

PECKHAM, J.—As the point of defendants' freedom from negligence is not now urged, there is no occasion for its discussion. Then was the deceased guilty of negligence contributing to his death? This train was running from thirty to thirty-five miles the hour. At thirty-five miles, it ran over three rods in a second. He drove slowly and carefully up to the point where he could first see on the track to the west, and he looked and "instantly" did all he could to hold back his horses—all in vain. It should be remembered that he looked the first instant that looking could be of any benefit. We may safely say that he heard no whistle or bell, seven witnesses, at least, within three rods of him, and some much nearer, were in like condition, hearing neither bell nor whistle, viz.: Mrs. Hooper, David Harrington, Isaac Cook, Sherman, Perry, Harriet Cook, and James Harrington. It is stated in defendant's brief, that the last witness heard the bell. On looking over his testimony, it is not found there. He heard the whistle to brake just before deceased was struck—not the bell at all. There was a high wind, considerable noise from the steam sawing machine, the snow was blowing, and it was, no doubt, difficult to hear the cars in that narrow defile. It may safely be said that deceased did not hear the cars, nor any indication of their approach. Any twelve fair-minded men would so find the fact, under the evidence in this case. There is no evidence that he intended to commit suicide. The Consul for the defence does not intimate that deceased had any such intent. He was an industrious, sober man, and intended to be careful. He risked his life on his care, here, and erroneously deemed it safe.

It was urged by the defendant's counsel that deceased was guilty of negligence, that he ought to have been careful to look and listen, &c., but he failed to show in what respect deceased was careless. All authorities say he must be careful. The deceased was so here. He drove carefully, and he looked the first instant that looking would be of service. What did he omit to do. It was well observed by the learned justice who gave the opinion in this case at General Term, that no case had gone the length of holding that a person approaching a railroad-crossing was bound to stop his team and wait till he could ascertain whether a train was coming, or to leave his team and go and look up and down the track; or the law would hold him negligent. But if he had done that even. If he had tied his team and gone and looked up and down, it would not have afforded him the least protection. In less thau twenty seconds from his looking, the train would, or might have been, upon him. He could see but forty rods—the train ran that in twenty seconds—and he must have used more than that time in returning to his team and getting under way. It is said he should have left them untied. If he had, and they had moved on and been run over, the cars thrown of the track and other damage ensued, he would have been justly chargeable with negligence.

Again, I ask, what did the deceased omit to do that made him negligent. The omission is not, and I think it cannot, be stated. The deceased had as clear a legal right to travel over this road as the defendant had.

He was bound to exercise the care in doing so that people in general would exercise under like circumstances. If he exercised that care, as I think, under the circumstances, he did, and was unable to cross safely, the defendant is liable. The great difficulty of crossing had been caused by the defendant itself in erecting the building and piling up the wood so as entirely to obstruct the view, deceased is then charged with negligence in not seeing where defendant's own wrongful act had put it out of his power to see. The act was wrongful, as defendant had no right thus to fill up the road with wood.

Thus far I have said nothing as to the submission of any witness, as to the inference to draw from any fact, or as to the evidence to prove a fact, then it was, of course, a question for the jury. In my opinion, there was nothing in the conduct of deceased on which to base a charge of negligence.

At this point I turn to the opinion of the learned justice who dissented at General Term, to learn what the deceased omitted. It is there said, "it was his duty to have looked both ways upon the track before he attempted to cross." In this case it was not material for him to have looked east, as no danger came from that direction. He did look west on the track the instant he could do so, the instant he could see on the track.

He fully complied in spirit with the requirement of the learned justice. If this action, under these circumstances, cannot be maintained, then the citizens have no legal right to travel on this public road.

It is worse than idle to call that a right, which may be violated or destroyed with impunity. I am quite aware of the late tendency and course of judicial decision in this state, to assume the province of jurors in cases of negligence charged upon railroad companies, entirely at war, in my opinion, with the well settled doctrines of the common law. I would not go further in that direction. No case can yet be found that would have warranted the court to nonsuit this plaintiff. For the honor of the law, as well as from consideration of sound policy and the impartial administration of justice, I trust there never will be. Is there not some defect in the laws, or in their administration, when so many lives are sacrificed, so many human beings killed annually at these crossings; does any public necessity or public benefit require this destruction? What is the remedy? While all proper care should be demanded from the public, the protecting vigilance should be required from railroads. It is all in their power. They are authorized to cross a public road above or below its surface. Why should they not do so, and thus avoid all peril to travelers on the highway, as well as to their own passengers? They should employ competent, vigilant men on their train, who would watch and warn of danger, ring the bell properly and sound the whistle, and yet watch and see at these crossings that the track was clear. They can always effectually do so. If the track be sufficiently free from obstructions to its view, and it is the duty of the railroad to see that it is free. Let it be held, as the defense contends for in this case, that no amount of negligence of the railroad can make it liable for killing a man at a crossing, and the negligence will increase with entire certainty.

What matters it to them whether the bell is rung. If no liability follows from its omission, no matter what the damage? Reckless indifference to their duties to the outside public, in the employees of the road, is thus encouraged and sustained, and loss of life the certain consequence. They may omit to ring the bell entirely, and the railroads may, as they did here, obstruct the view for their own accommodation, so that the traveler, look all he may, cannot see the danger till too late to escape, and what protection has the public in the exercise of its conceded right to cross a public road. It is urged that deceased must have known that this train was due. There was evidence that he lived within about two and a half miles of this depot, that the time-table had been altered within a month, and he had been drawing wood to the depot only for one day.

There is no high degree of probability that a laboring man, like deceased, had any accurate information on that point, unless his business necessarily required it. If that were a material point, certainly, under the evidence, it was a question for the jury. The train was not far from its regular time, the witness thought it a little behind, but he thought not as much as fifteen minutes. Deceased might have supposed it had

passed, if he knew its regular time for passing; but, in all probability, he then had no certain knowledge of the actual time, such a man would scarcely have a watch. In my judgment, this point as to time is entitled to very little consideration. I think the court committed no error in its refusal to charge. The charge substantially accorded with most of the requests, and there was no legal propriety in calling for a repetition in other language, nor did it impose any obligation upon the court to make such repetition. Where the requests differ from the charge, I do not think the court erred in refusing to grant them. There is no reported decision in this state, that I have seen, not in harmony with the maintenance of this action. Principle and public policy also sustain it.

Judgment shall be affirmed.

Monroe and Freeport Railroad.

The field work of the survey of this line between Freeport and Monroe, Wis., has been completed. From Mr. J. T. Dodge, the engineer, we learn that his survey follows down the Valley of Little Richland Creek passing near Shueyville, Runkle's Mill and Orangeville, to a point about one and a half miles south of the latter place, thence crossing Brush Creek, passing over the prairie and through the east part of Cedarville to a point on the Illinois Central Railroad, about one-third of a mile northwest of their depot in Freeport. The distance from Monroe to Freeport depot by this line is twenty-two miles. He also surveyed a line by way of Pecatonica and Richland Valleys, leaving the Illinois Central Railroad at a point about three miles northwest of Freeport depot, and passing up on the east side of the creek by way of Scotia Mills, a point 1½ miles west of Cedarville, and the village of Buena Vista, to a point in the first line about one mile below Orangeville. The distance by the latter line from Monroe to the Illinois Central depot in Freeport is 24 miles. The Cedarville line is somewhat undulating in its grades and will require some heavy work. The Buena Vista line, although somewhat longer, is very favorable in respect to its grades and cost of construction. The map, profile and estimates, will be prepared and placed in the hands of the committee in a few days.

Milford and Woonsocket Railroad.

At a meeting of the stockholders of this company at Milford, on the 27th ult., Geo. Draper, A. C. Mayhew, C. F. Claflin, Elbridge Mann, Samuel Walker, Dr. A. C. Fay, and Earl P. Mason, were elected Directors. Geo. Draper was subsequently elected President, and C. F. Claflin, Treasurer. The Milford *Journal* says that the present prospect for the building of the road is all that can be desired by its friends. Negotiations are in progress with the Air Line Company looking to an arrangement for running the trains after the road is completed, and an early adjustment of this important matter will be the result. It has authority for stating that the running of the trains may be confidently expected some time in the coming fall or the early part of winter.

☞ The proposed railroad route along the shore of Cayuga Lake, through Tompkins and Cayuga Counties, is to be newly surveyed, arrangements being on foot for that object.

Valley (Va.) Railroad.

A meeting of the stockholders of this road was recently held at Staunton, Va. The reports of Col. Harman, President, and Mr. Randolph, Chief Engineer, were presented. Mr. Randolph, who recently surveyed the route of the road from Harrisonburg to Salem, gives the distance at 113 miles, or 116, including the sidings, etc. The cost of constructing and equipping the road is estimated at $58,000 per mile, or an aggregate for the entire line of $6,610,500. Mr. Randolph assumes, after giving a summary of the products of the Valley counties through which the road from Strasburg to Salem would pass, that the trade of the Valley alone would justify the building of the road, and that, considering its ultimate destination, it becomes a line of trade and travel of vastly more importance to Baltimore than the main stem of the Baltimore and Ohio Railroad had ever been. Col. Harman states that a corps of engineers had already been ordered by Mr. Garrett, president of the Baltimore and Ohio Railroad, to Winchester, to locate the route of the railroad from that place to Strasburg, the necessary consent to do so having been obtained. He also expresses the opinion that the Manassas road ought to be completed to Harrisonburg by next fall.

Whitehall and Plattsburgh Railroad.

At the recent meeting of the citizens of Plattsburgh, resolutions were unanimously adopted recommending that the required consent be given under the bill empowering towns to issue bonds in aid of the Whitehall and Plattsburgh Railroad to authorize Commissioners to subscribe one hundred thousand dollars, only upon condition that other towns and individuals in Clinton County subscribe to an equal amount of capital stock of said company. That the directors shall personally guarantee the expenditure of the entire amount within that county, and that the road shall be so located as to strike the Ausable river as far West as Clintonville.

The citizens of Whitehall met on the 25th and passed resolutions in opposition to bonding the town in aid of the above project, and a committee was appointed to apply to the next legislature for relief.

Mobile and Ohio Railroad.

The Chicago *Republican* says that a project of great importance to the business and travelling public, in connection with the Mobile and Ohio Railroad, is reported to be on foot. It contemplates the extension of the track of this road from Columbus, Ky., (its present terminus,) to a point opposite Cairo, on the south side of the Ohio, and a bridge over the Ohio even is talked of. It is stated that work is to be commenced at both ends simultaneously, and pushed forward as rapidly as possible. This will render railroad communication from Chicago with Memphis, New Orleans, Mobile and other southern cities, continuous, and thus remove a great source of annoyance and delay in the transportation of passengers and freight. Cairo aspires to become an important railroad centre, being about to vote on a proposition to take $100,000 stock in a railroad projected between that place and Vincennes.

☞ Preparations are being made for commencing work on the extension of the West Jersey Railroad from Bridgeton to Port Norris.

Connecting Railway.

Trains commenced running over the Connecting Railway on the 3d inst. This road is seven miles in length, commencing at Frankford, on the Philadelphia and Trenton Railroad, three miles from the Kensington Depot, and running thence to West Philadelphia, thus giving the most direct connection possible between the roads of the Associated Companies and the Philadelphia, Wilmington and Baltimore and Pennsylvania Railroads. This road was built by the Pennsylvania Railroad Company, and is to be leased to the Philadelphia and Trenton Railroad Company at six per cent. on its cost. It is thought the rent will be more than saved by the decreased cost of doing the southern and western business. The road crosses the Schuylkill, by the stone bridge above Girard Avenue, 120 feet above the bed of the river, and crosses four railroads, and over or under many streets in the city of Philadelphia.

Trade of Philadelphia.

The annual report of the Board of Trade of Philadelphia shows that the city shipped in 1866, 592,542 barrels of petroleum to foreign markets, double the amount shipped the preceding year. The entire foreign trade of the city for the year figures up as follows: Exports, $17,913,901; Imports, $13,505,605.

The iron manufacture of the city for the first six months of the year, excepting railroad iron, was worth $6,216,540, and of the State of Pennsylvania, $33,316,004. For the last six months the iron return of Pennsylvania, excepting railroad iron, was $24,961,830. Of railroad iron there was rolled and re-rolled, in Pennsylvania, 197,460 tons, being over one-third of the whole manufacture of the United States.

Allegheny Valley Railroad.

At a special meeting of the stockholders of this company, held at Pittsburg on the 31st ult., the provisions of the Act of Assembly entitled "An act to authorize the Allegheny Railroad Company to issue additional stock and bonds, and to repeal the act entitled 'an act to authorize the Allegheny Valley Railroad Company to mortgage its road and branches to complete the same, and approved the 8th day of March, A. D. 1867,' which act was approved the 11th day of April, 1867," were accepted by a stock vote of 19,464 to 1,377.

The President, William Phillips, Esq., offered resolutions looking to the early completion of the road, which, on being discussed, passed unanimously, by a *viva voce* vote.

☞ A letter from Mr. Kemp P. Battle, the Treasurer of North Carolina, states that the last General Assembly of that State made no provision for the payment of any interest whatever upon the State debt. Several measures looking to that end were introduced, but the Legislature did not deem the State sufficiently recovered from the effects of the late war to resume payment. The last coupon fundable is October, 1866.

☞ The sale of the Ohio and Mississippi Railway was confirmed on the 22d of May, by the United States District Court in Cincinnati, and on the 23d of the same month by the United States District Court in Indianapolis, and the road will now be given up forthwith by the Trustees into the company's hands.

Lehigh Valley Railroad—Its Extension to Wilkesbarre.

We give below, from the Philadelphia *Ledger*, an account of the opening, on the 29th ult., of the Wyoming Extension of this road from White Haven to Wilkesbarre, Penn., a distance of 30 miles. The distance from Phillipsburg, opposite Easton, to White Haven is 71 miles—making the whole length of main line 101 miles. To this add the branch from Penn Haven to Honeybrook, 16.61 miles, and the Lehigh and Mahanoy Branch from Black Creek Junction to Mt. Carmel, 40 miles, and the total length of main line and branches will be 157.61 miles, about 80 miles of which is double track, and there is also in use about 70 miles of sidings. The company are now building a road up the Susquehanna River Valley to the New York State line, a distance of 103 miles; and within the present year this State line extension will be opened from the Barclay Coal road at Towanda to the Erie Railway at Waverly, and also from Wilkesbarre to Tunkhannock. The road of this company will occupy a river side route the entire distance from Phillipsburg to Waverly—204 miles—except the mountain division between White Haven and Wilkesbarre, the recent completion of which has just been announced.

On the 29th ult., some two hundred or more gentlemen, most of them interested in the various railroad connections with the Lehigh Valley Railroad, met at Bethlehem, a moiety or more of the number reaching that place by express trains from New York, and the balance by the North Pennsylvania Railroad from this city, to join in an excursion over the Lehigh Valley Railroad from that point to Wilkesbarre, the occasion being the celebration of the opening of the Wyoming extension of that company's road. This company has now 101 miles of direct road, its old line of way, from Easton, on the Delaware, to White Haven, 71 miles, having been extended 30 miles more over the mountains, without the use of inclined planes, to the town of Wilkesbarre, in the beautiful and fertile valley of the Wyoming. This valley has been long known to possess the largest and most cheaply worked coal field in the world, and the attention of enterprising men has long been directed towards it in devising some means by which its mountainous enclosure could be broken for the free ingress and egress of the "iron horse." Many examinations and surveys have been made to open railroad connection southward with this valley and tide water. Several years ago an inclined plane, worked by stationary engines, was constructed, by which this Wyoming coal, to a limited amount, was lifted to the southern side of the mountain, and thence found its way to market through connecting roads and the Lehigh Navigation. About a year ago this last named company completed another road over these mountains to Wilkesbarre, forming by the use of the Lehigh Valley Railroad as far north as White Haven, and the North Pennsylvania Railroad from Bethlehem, a through line from this city to Wilkesbarre. This, however, seemed insufficient, and the Lehigh Valley, to have an entire line of railway from the Delaware at Easton to the heart of the Wyoming Valley entirely in its own control, built the connecting link across the mountains, the completion of which has just been celebrated. The Lehigh Valley Railroad, with its extended branches into all the best fields of hard coal, is becoming quite an institution, and its movements and doings of commanding importance to both producers and consumers of coal. The enterprising men, however, who have charge of its affairs, seem not to tire in pressing their work northward. They have bought the entire length of the North Branch Canal, and on its banks contemplate extending their railroad to the New York State line, about one hundred miles further on their course to the great lakes, the point to which they are driving, and say they expect at an early day to see them reached by continuous rail from Philadelphia. These are magnificent movements in cost and extent of line contemplated alone, but in overcoming the great natural impediments that stood in the way, the achievement, in any other age and by any other people than those of our country, would be wonderful. The opening of a direct line of railway from this city to the Wyoming Valley is of much importance to the general trade of Philadelphia. Our market being nearer and more easy of access than that of New York, may attract here a portion, at least, of the valley consumers of goods, if our merchants exert their usual address to command them. There will also, if the beauties of nature have not lost their charm, be greatly increased travel thitherward, to the benefit of our people in various ways, and to the profit of all connecting railroads. The line of way through the Lehigh Valley into that of the Wyoming, in magnificent scenery and mountain grandeur, is scarcely equalled in the world; and Wilkesbarre, as a place of healthful and pleasurable sojourn, presents many attractions. All the distance hence to Bethlehem, over the North Pennsylvania Railroad, is picturesquely beautiful, and the remainder of the way to the Susquehanna, in the frequent windings of the iron way through the narrow gorges of abrupt mountains of rock, and coal, and iron, mantled as they are in green, present a view of the most exciting and health-inspiring character.

The opening of the Wilkesbarre Extension is a matter of no inconsiderable importance to New York, as well as to the region through which the railroad passes, as it largely increases the facilities for the transportation of the vast supplies of coal mined in that region, and for which hitherto no adequate outlet has existed. Up to a very recent period the canal and the slack water of the Lehigh River afforded the only means of bringing the coal of that region to New York, involving the great expense of getting it over the mountains and down to the head of the canal by inclined planes. Within the present year the Lehigh Coal and Navigation Company have completed a railroad through the valley and across the mountains into the Wyoming Valley; and now the Lehigh Valley Railroad Company have extended their line to the same point. The two roads run side by side nearly the whole distance, now on one side of the river and now on the other, crossing the mountains by a series of very bold grades, in many instances reaching ninety-six feet to the mile. The difficulties in the way of the construction of these roads were very great, and the cost was immense; but engineering skill overcame the former, and so enormous is the coal carrying trade, at present as well as in prospect, that there is little doubt that both roads will be required to meet it.

Massachusetts Railroad Legislation.

The Boston *Journal*, reviewing the acts of the Legislature of Massachusetts during its last session, says:

The Legislature loaned the credit of the State to two enterprises which, in the opinion of wise men, are supposed to be rich in good fruits. It granted three millions to the Boston, Hartford and Erie Railroad, and one million to the North Adams and Williamsburg Railroad. The Governor and Council are entrusted with the responsibility of seeing that the conditions of these grants are fully complied with before the scrip is issued. The Troy and Greenfield Railroad and Hoosac Tunnel received an additional grant of six hundred thousand dollars and the contract for the work is to be given to two contractors who have recently completed the Lake Tunnel at Chicago. The bill to consolidate the Boston and Worcester Railroad and the Western Railroad is one of the most important acts of the session, and should its provisions be accepted in the proper spirit, it will be a blessing to Boston and the whole State.

New York and Westchester, and Columbia and Dutchess Counties Railroads.

Movements are on foot for the early construction of a new railroad line between this city and the City of Hudson, in Columbia County, connecting at the latter place, by ferry and the new railroad between Athens and Schenectady, with the New York Central Railroad. The projected railroad alluded to will be located about midway between the Hudson River and Harlem Railroads, and afford facilities of travel, and the transportation of farm produce and other freight, to the residents of a populous and wealthy section of country.

The New York and Westchester County Railroad Company have contracted for the construction of a railroad from the City of New York to or near Lake Mahopac, in Putnam County, starting from the Battery or South Ferry, up Whitehall street to Pearl street, through Pearl street to New Bowery, through New Bowery, across Chatham square, up the Bowery and Fourth avenue to Fourteenth street, through Fourteenth street to and through Irving place, Grammercy Park and Lexington-avenue to Fifty-ninth street, through Fifty-ninth street, (past the lower end of Central Park,) to Broadway, up Bloomingdale Road, thence along Kingsbridge road to Kingsbridge, thence along a valley to a point on Nepperhan or Saw Mill River, thence along the course of that stream to near its head, and some valley to Croton Lake at or near Pine's Bridge; and thence nearly north by the Empire Sewing Machine Company's extensive works at Bedell's Mills, or by what is termed a more feasible route around the southwestern point of Turkey Mountain, and passing Keakles or Mohansic Lake, Hallocksville, Crompond, and the northwestern corner of the town of Somers into Putnam County.

The Columbia and Dutchess Counties Railroad Company propose commencing at the City of Hudson, 116 miles north of New York, and running the line of their road first in a southeasterly direction to Pine Plains, (about twenty miles,) thence nearly due south *via* Union Vale, the Clove, Washington Four Corners, Stamford and Beekman, thence through Hausner Hollow Gap, on the eastern section of East Fishkill, in Dutchess County, to Black Pond, near the Dutchess and Putnam Counties line. The grade of the road between Hausner Hollow Gap and Black Pond, (the worst part of the route,) will be from fifty to sixty feet to the mile—about the same as exists on the Harlem Railroad, in the vicinity of Croton Falls; while some sections of the Erie Railroad exceeds one hundred feet to the mile. The Clove and Union Vale named above is a beautiful valley about ten miles in extent, contains great mineral wealth—perhaps the richest bed of iron ore in the world.

On the 25th ult., a number of influential gentlemen from Columbia and Dutchess Counties, and the upper section of Westchester County assembled at the Gregory House, Lake Mahopac, for the purpose of exchanging views and securing the co-operation of the property owners in Putnam County in the establishment of a new direct line or route from New York to Hudson *via* Lake Mahopac.

At this meeting a committee was appointed to confer with the managers of the New York and Westchester County Railroad, relative to the construction of their road, and obtain from them such information as might be of service or interest to the people of Westchester, Putnam, Dutchess and Columbia Counties. Another Committee, consisting of property owners of Putnam and Westchester Counties was appointed to confer with the managers of the Columbia and Dutchess Counties projected road, and arrange, if possible, a concerted action in the matter.

A Committee was also appointed to procure a survey of the propsed route through Putnam County, so as to report at another meeting to be held at Lake Mahopac on the 8th inst. As far as we could learn it is proposed to pass Mahopac about one-eighth of a mile east of the lake, thence almost due north to the West Branch of Croton River, then follow the course of that stream to the fountain head at Block Pond, where the road would connect with the Columbia and Dutchess Counties road.

From the statements made at the meeting by gentlemen from Columbia and Dutchess Counties, the property owners along the proposed line of road, except in the region of Hausner Hollow Gap, where the population is sparse, and the expense of working the road will be heavy, are willing to subscribe for a sufficient amount of stock to build the road through the section of country in which they reside.—*N. Y. Times.*

Interest on the Virginia State Debt.

The July half-yearly interest of two per cent. on the entire public debt of Virginia, payable in New York, is to be paid at Richmond. The *Despatch* says the object of the Board of Public Works in taking this step "is to avoid the transfer from our own banks to those of New York of the considerable sum required to pay that interest. In would be necessary to make this transfer some time in advance of the day of payment, while the paying of the interest here leaves the money in the banks, and for the benefit of the community until the day on which it is payable. At such a time as the present this will be of considerable benefit to this city, now very much in need of money and bank accommodation." It appears that Virginia Proper has provided the interest on the entire amount at the rate of four per cent. per annum, and looks to West Virginia to provide the remainder—or to assume one-third of the debt at six per cent. per annum. The following remarks are from the *Enquirer*:

"We publish this morning a synopsis of a letter from Auditor Taylor to the President of the First National Bank in this city, from which it will be seen that the Auditor believes that the arrangements for the payment of the interest on the State debt regularly and punctually are effectual. The Auditor states the public debt on the 17th of April, 1861, at $34,977,298 38, from which he deducts $11,285,718 54, that being the amount to be extinguished by the sale of the State's interest in the several railroad companies named for State bonds at par. He also deducts $2,000,000, the amount of the sinking fund which is invested in State bonds. These deductions leave the amount of the public debt, as shown by the Auditor $21,691,579 84. The act of Assembly passed at the late session provides for the payment of interest on the debt at the rate of four per cent. per annum. Upon the reduced debt at this rate the interest will amount to $867,663 16. Adding to this the sum necessary for the operation of the State Government, (Legislature, salaries, &c.,) say $500,000, and the annual liabilities amount to $1,367,663 16. The Tax Bill makes an assessment of thirty cents on the hundred dollars value of property; and it is estimated that this, with the license taxes will produce an annual revenue of over $2,000,000; from this deduct the annual liabilities, $1,367,663 16, and we have at least $632,336 84, at an annual surplus to form a sinking fund for the gradual extinguishment of the entire debt. Provided that existing laws are not changed, and provided the State's interest in the several railroads named is disposed of as now directed by law. After the State debt is reduced to $21,691,579 84 in the manner now proposed, the Commonwealth will still hold in other railroads and in the James River and Kanawha Canal, interests whose par value is $16,677,581 35, beside large and valuable interests in other public properties. It should seem, therefore, that the conclusion of the Auditor is correct, and that there is indeed nothing now to be foreseen 'to induce the supposition that the interest on the public debt of the State will not be regularly and punctually paid. The payment of the July interest on that portion of the public debt payable in Europe will certainly be punctual, as it is understood that the Treasurer has already arranged to remit sterling within a few days for that purpose. It only remains for West Virginia to come forward and arrange for two per cent. of the interest of the public debt, and one-third of the principal—or such exact part as a settlement may indicate—to place the creditors of the Old Dominion in full enjoyment of all rights.'"

Union Pacific Railroad.

The Secretary of the Interior has received a report from Brevet Brig. Gen. J. H. Simpson, U. S. A., and Messrs. Wm. M. White and Frank P. Blair, Union Pacific Railroad Commissioners, stating that they find the tenth section of forty miles of that road, commencing at the 305th and terminating at the 345th mile-post, ready for immediate service, and supplied with all the appurtenances of a first-class railroad, and therefore respectfully recommend the acceptance by the government of said section.

Windsor and Annapolis Railway.

We are informed that the work on the Windsor and Annapolis Railway is being pushed forward with vigor. The line is already graded for some distance beyond Windsor, and large gangs of men are at work for several miles towards Hantsport. One of the contractors of this railway, and two engineers, arrived at Halifax by the last mail steamer from England, and we learn that two vessels are now being loaded in Great Britain with rails for the road. There is every indication that the construction of the line will be pursued with vigor.

Douglass Manufacturing Co.,
Exclusive Manufacturers of
COOK'S PATENT
BORING IMPLEMENTS;
Also, a complete assortment of
MECHANICS' TOOLS.

Framing Chisels, Socket Firmer Chisels and Gouges, Socket Paring Chisels, Drawing Knives, Screwdrivers, Augers and Bits, Bung Borers, Boring Machines, Gimlets, Firmer Chisels and Gouges, Hollow Augers, Corkscrews, etc.

Warehouse, 70 Beekman Street, N. Y.

FOR SALE
3 LOCOMOTIVES,
4-8 1-2 GAUGE,

All thoroughly REBUILT by one of the best makers in the country, and ready for immediate use.

1—Cylinders 14x22, Link Motion, 4-56 in. Drivers connected, Copper Flues, Weight about 24 tons; 8 wheeled Tender, 1800 gallons.

This Engine has always worked admirably; Steams freely with dry or green wood, works and wears perfectly smooth; Well springed and brassed all around. Proportions every way suited to power. A good and stylish model, all in excellent order.

2—Cylinders 15x20, Link Motion, 4-56 in. Drivers connected, Copper Flues, weight about 23 tons, 8 wheeled tender, 1,800 gallons.

Is a smart smooth working Engine, suitable for any work; has a good record throughout.

3—Cylinders 15x20 Hook Motion, 4-66 in. Drivers connected, Copper Flues, weight about 24 tons; Tender, 8 wheeled.

Every way perfectly sound, well brassed and springed up. All in fine working condition.

These Engines will be sold VERY CHEAP to close a transaction, and are GREAT BARGAINS to any company wanting this sized Engine.

KASSON & CO.,
62 Broadway, New York.

THE HARDAWAY
BOLT, SPIKE & RIVET
Manufacturing Co.

Manufacturers of every variety of
Railroad and Ship Spikes,
BOLTS AND RIVETS.

This Company are exclusive owners of the **HARDAWAY PATENTS,** and the Bolts Spikes and Rivets made by their machines are pronounced **Superior** to those of any other manufacture.

Orders solicited and promptly executed at the lowest rates. **Samples** and **price-lists** sent to Railroad Companies, Manufacturers and Dealers, when desired.

FACTORY:
PATERSON, N. J.

PLASTIC SLATE ROOFING

JOINT STOCK COMPANY.

OFFICE 157 (Room 19) BROADWAY,

NEW YORK.

W. C. POTTER, Vice Pres't.
J. M. ALLEN, Sec. and Treas. LICENSES GRANTED.

PLASTIC SLATE

FOR

Roofing & Other Purposes.

The process of reconstructing Slate Stone from a disintegrated state was

PATENTED FEBRUARY 21ST, 1865.

It is a combination of

Pulverized Slate and Viscous Matter,

(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.

As a Roofing Material it Stands Unrivalled.

A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.

Frost does not Crack nor Heat Dissolve it.

The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and

Perfectly Fire-Proof,

It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

OLD RAILS FOR SALE.

THE GRAND TRUNK RAILWAY COMPANY is prepared to deliver, during the present season of navigation, from FIVE to SIX THOUSAND TONS of OLD RAILS.

Parties desirous of purchasing the whole, or any part of these Rails, can obtain full particulars upon application to the undersigned.

Parties tendering will be required to state the price which they will give, and the places at which they will take delivery.

Delivery to be made on the frontier, the purchaser paying duties

NEW YORK AND TROY

Steamboat Company,

FOR Albany and Troy, and all points north and east, EVERY EVENING, (Saturdays excepted,) at 6 o'clock, from Pier No. 44 North River, foot of Spring st.

N. B.—This is the cheapest, pleasantest and most direct route for Saratoga and Lake George, and, via railroads and steamers for Whitehall, Rutland, Burlington, North Adams, Cambridge, St. Albans, Ogdensburgh, Montreal, and all intermediate stations. Tickets sold, baggage checked, and state-rooms engaged at the principal hotels and offices on the wharf.

SCHOOL OF MINES,

COLUMBIA COLLEGE,

East 49th Street, NEW YORK.

FACULTY:

F. A. P. BARNARD, S. T. D., LL. D., President.
T. EGLESTON, JR., E. M., Mineralogy and Metallurgy.
FRANCIS L. VINTON, E. M., Mining Engineer.
C. F. CHANDLER, Ph. D., Analytical and Applied Chemistry.
JOHN TORREY, M. D., LL. D., Botany.
CHARLES A. JOY, Ph. D., General Chemistry.
WILLIAM G. PECK, LL. D., Mining Surveying.
JOHN H. VAN AMRINGE, A. M., Mathematics.
OGDEN N. ROOD, A. M., Mechanics and Physics.
JOHN S. NEWBERRY, M. D., Geology.

The plan of this School embraces a three-years' course for the degree of ENGINEER OF MINES, or BACHELOR OF PHILOSOPHY.

For admission, candidates for a degree must pass an examination in Arithmetic, Algebra, Geometry and Plain Trigonometry. Persons not candidates for degrees are admitted without examination, and may pursue any or all of the subjects taught. The next session begins October 7th, 1867. The examination for admission will be held on October 3d. For further information, and for catalogues, apply to

DR. C. F. CHANDLER,
Dean of the Faculty.

New York, Saturday, June 15, 1867.

Merchants' Union Express Co.

The annual meeting of the Executive Committee and Trustees of this company was held in Cleveland on the 7th and 8th insts. The following gentlemen were in attendance: President, Elmore P. Ross, of Auburn, N. Y.; Vice-President, W. H. Seward jr., of Auburn, N. Y.; Secretary, John N. Knapp, of Auburn, N. Y.; Treasurer, W. C. Beardsley of Auburn, N. Y. Executive Committee—E. G. Storke, C. T. Backus, John A. Green, jr., Gen. H. W. Slocum. Attorney and Trustees—T. M. Pomeroy, Auburn.

Trustees—L. C. Hopkins of Cincinnati; Barton Able, St. Louis; John How, St. Louis; John Nazro, Milwaukee; S. D. McMillan, Cleveland; A. Brinkerhoff, New York; J. Trumbull Smith, New York; W. E. Smertz, Pittsburg; Clinton Briggs, Chicago; C. B. Farewell, Chicago; M. J. Mills, Detroit.

The books, papers and business of the company were fully examined by the trustees, and a lengthy report in writing was presented by them to the Executive Committee, giving their views of the policy to be pursued. It is presumed that this will be made public.

Contrary to general expectation, the trustees were even more enthusiastic than the Executive Committee themselves, as to the past and present success of the company. They were much pleased with the figures presented showing the condition of the company.

On motion, the following resolutions were unanimously adopted:

Resolved, That the Trustees of the Merchants' Union Express Company have carefully examined the reports of the different members of the Executive Committee and the books and papers of the company, together with the general administration of its affairs by the Executive Board, and we fully indorse their administration as able, wise, and prudent, and we take great pleasure, in tendering to the Officers and Executive Committee our thanks for their vigilance and success in directing the affairs of the company.

Resolved, That we, the Trustees of the Merchants' Union Express Company, solemnly pledge our honor as business men, to the friends and stockholders of the company, that we will stand by its fortunes and relax no energies to promote its interests and success.

The Cleveland *Leader*, from which we have obtained the above, says the utmost confidence in its success is expressed in all quarters. There is no question that the thorough examination of the financial condition and business of the company has impressed the trustees most favorably. The deliberations of the two bodies have been harmonious throughout, and it is understood that their action has been decisive in the direction of infusing renewed strength and energy in the enterprise. The public will await with some anxiety the publication of the deliberations of this important meeting. The success of the enterprise is believed to be secured.

The People's Dispatch Fast Freight Line, owned and managed by the Merchants' Union Express Company, will commence business upon the 18th inst. This line will run from the Atlantic seaboard to all points West, Northwest and Southwest, reaching to St. Paul, Omaha and Memphis. Its office in New York is at Merchants' Union Express Building, corner of Broadway and Franklin street. This line will have the honor of being the first in New York to occupy the extensive depot of Commodore Vanderbilt, now in course of erection in St. John's Park.

☞ Proposals are invited by the Board of Public Works, Chicago, Ills., for the construction of a tunnel under the South Branch of the Chicago River. See Advertisement.

Chicago and Northwestern Railroad.

The annual meeting of the stockholders of this company for the election of directors for the ensuing year was held at Chicago on the 6th inst. About fifty persons were in attendance, representing 24,300 shares of stock. The President, on taking the chair, made a brief speech, giving the reasons for the course pursued by the present management. During the year 1867 seventy-seven locomotives, nineteen hundred freight cars and one hundred other cars were added to the equipments of the road at an expense of $4,500,000. Two millions of dollars have been expended in building side tracks. He was convinced that the road had been as honestly managed and with as great ability as any other road in the country. The ticket supported by the old management received 223,600 votes. Opposition 124,000. On counting the votes it was found that 100,000 of votes were on shares transferred within the last thirty days; and under the charter this could not be allowed. About 90,000 of these votes were for the opposition, and 10,000 for the regular ticket. Throwing these out, the vote stood: Regular ticket, 209,000; opposition, 34,410. After the adoption of resolutions approving the course of the present management during the past year, the meeting adjourned.

Hudson River Railroad.

The following gentlemen have been elected directors of this company for the ensuing year: C. Vanderbilt, W. H. Vanderbilt, Horace F. Clark Augustus Schell, John M. Tobin, D. Thomas Vail J. H. Banker, Oliver Charlick, Wm. A. Kissam, Joseph Harker, M. H. Sanford, Walter S. Gurnee, Samuel Barton. Upon the organization of the Board, Cornelius Vanderbilt was re-elected Preeident; Wm. H. Vanderbilt, Vice-President, and Augustus Schell, Secretary.

South Side (L. I.) Railroad.

The following gentlemen have been elected directors of this company for the ensuing year: Charles Fox, Wm. Floyd Jones, J. Boorman Johnston, Daniel T. Willets, Alex. J. Bergen, Robert O. Colt, John A. Dix, Alex. McCue, Wm. C. Rushmore, Martin Willets, Vandewater Smith, F. B. Baldwin and John Tappin. Charles Fox was re-elected President, Alex. McCue Secretary, and Wm. C. Rushmore Treasurer.

Toledo, Wabash and Western Railway.

This company is composed of the Toledo and Wabash Railway Co., the Great Western Railroad Co. of 1859, the Quincy and Toledo Railroad Co., and the Illinois and Southern Iowa Railroad Co., which organizations were merged into one, by articles of consolidation, duly ratified and confirmed July 1st, 1865.

In pursuance of this consolidation, the present company is now operating a great, direct, through line of railway, commencing at Toledo, Ohio, and terminating at Quincy, Illinois, and Keokuk, Iowa, with a branch running to Naples, Illinois, making the entire length of road operated about 520 miles.

No official report having been issued for the half year ending with December 31st, 1865, the material facts and statistics incident to that period, will be found embodied in this report.

The gross revenues of the road for the hal fiscal year ending December 31st, 1865, and the full fiscal year ending December 31st, 1866, together with the operating expenses during those two periods, are presented in the annexed statements, viz:

	Half year 1865.	Full year 1866.
From passengers	$896,962 08	$1,322,846 78
" freight	1,020,258 38	2,209,427 35
" mails	26,000 00	52,000 00
" express	49,042 10	98,345 17
" miscellaneous	40,846 59	34,766 92
Totals	$2,033,109 15	$3,717,386 22
Expenses, viz:		
Renewals of iron and superstructure	$109,017 30	$241,051 79
Maintenance of roadway and structures	338,024 86	624,066 25
Maintenance of cars, engines, etc	276,837 12	556,605 78
General transportation and other expenses	763,558 98	1,389,462 68
Totals	$1,487,438 26	$2,811,186 50
Leaving a net balance of	$545,670 89	$906,199 72

The receipts from all sources, and disposition of the same during the periods named were as follows:

Total net earnings, as above		$1,451,870 61
Sinking fund bonds (one million)		1,000,000 00
Isaac H. Knox, Treasurer on equalization account		665,726 19
Bills payable		15,500 05
Bank account—overdraft	$71,790 53	
Less due from U. S. and connecting roads, held as cash	55,586 13	
		16,204 40
Total		$3,149,301 20
And the disbursements were:		
Construction		$816,432 90
Equipment		260,721 22
Machinery and tools		26,819 88
Interest on bonds, etc		1,285,895 62
Illinois and Southern Iowa R. R		129,807 97
Discount on bonds sold, etc		201,841 28
Equalization account		700,300 27
Advanced for wood and supplies in shop		200,465 43
Toledo and Wabash Railway Co		17,016 63
Wabash Elevator stock		10,000 00
Total, as above		$3,149,301 20

It will be seen from the preceding statements, that the company, after having promptly paid the interest upon each and every class of its funded obligations, including the dividends upon its preferred stock, closes its fiscal year in a sound financial condition, and without any floating debt or outstanding liability whatever.

It being deemed for the interest of all parties concerned, that the various classes of bonded securities, issued by and bearing the titles of the several corporations now represented by this company, should be consolidated into one and the same mortgage debt, the board of directors has decided to create and issue its coupon bonds, entitled "Consolidated Mortgage Sinking Fund Convertible Bonds," of sufficient amount, and for the purpose of retiring all of the said outstanding securities. To secure the payment of the principal and interest of these bonds, it is proposed that one general mortgage shall be executed, covering the entire real and personal property of the company from Toledo to the Mississippi River, and which will constitute, in fact, the first mortgage lien upon the consolidated property of the company. For the purpose of giving these consolidated bonds a special advantage and value, the mortgage securing them will not only embrace the entire amount of property pledged for the old bonds, but a large and valuable amount heretofore entirely free and unencumbered, besides original liens upon important contracts, accessions and franchises more recently acquired.

The time and conditions for the exchange of these consolidated bonds for those outstanding, will soon be made known, and it is confidently believed that when their true value and character are fully understood, they will take a prominent position in market, and be esteemed a superior security to those of the old companies, which are predicated upon detached portions of a naturally indivisible property.

The revenues of the company have thus far been very seriously impaired, in consequence of the extraordinary disasters which have befallen the wheat crop throughout the entire extent of country traversed by our railway, and which, for a period of two successive years, have proved of so general and severe a character as to involve its almost total destruction. This important and well nigh inexhaustible staple has uniformly constituted one of the chief and most reliable elements of the traffic of our road, and even in its partial loss, we sustain a damage that, to some considerable extent, affects our whole general pecuniary prosperity. In evidence of the nature and extent of this loss, it may be stated that our freight records show that the actual falling off in the tonnage of wheat and flour, during the period under review, as compared with the same period of previous years, is equal to fully five and one-half million bushels, the earnings upon which, at the usual average rates of charges, would have been $660,000. Reference is made to this unfortunate occurrence, so out of the usual and ordinary course of events, that the shareholders may, in some degree, appreciate the character of the difficulties and adversities so unexpectedly encountered, and trace in them a satisfactory explanation of the inability of the company to declare a reasonable dividend at the close of the year.

Otherwise the increase in each and all other branches of traffic upon the road, as compared with past years, has been marked and encouraging. The coal and lumber business especially indicate a remarkable growth, and promise to become one of the most permanent and productive sources of our current revenues.

The prospects for a large and prosperous traffic for the incoming year are especially encouraging. The corn crop of the past season, acknowledged to be the largest ever harvested upon our line and of superior quality, remains still in the hands of the producers, or stored at our stations awaiting transportation. The wheat now growing is coming up uniformly thick and heavy, and gives unusual promise of an abundant harvest.

Our through and local passenger business, so considerably depressed after the close of the recent war, by the suspension of the transportation of troops and otherwise, is rapidly reviving. This branch of business is now receiving important accessions from connecting lines, especially at Fort Wayne and Lafayette, and to meet its growing demands elsewhere, a through daily train has been put on to run between Keokuk, Quincy and St. Louis.

A contract of much importance has recently been consummated between this company and the Chicago, Burlington and Quincy R.R. Co., for the joint and perpetual use and occupation of the railway between Camp Point and Quincy, and also including the tracks, depots and other accommodations of that company at Quincy. It is believed that this favorable arrangement will prove of very great advantage to our general business, in enabling us to establish a perfect and reliable connection with the Mississippi River and lines beyond, securing all necessary and convenient facilities for transacting our business at Quincy, besides extinguishing all injudicious rivalry and competition between the two lines.

Another and equally important contract has recently been entered into between this company and the Hannibal and St. Joseph R. R. Co., having for its object the establishing of permanent running connections at Quincy, and the maintenance of mutual and intimate business relations between the two companies. In pursuance of this contract, the Hannibal and St. Joseph R. R. Co. absorb the Quincy and Palmyra road, and engage to run their through passenger freight trains directly to and from Quincy, the terminus of our road. And they further covenant to grant and extend to this company, the same facilities for securing and doing all branches of transportation business upon their own road, as well as beyond it, both as to rates of charges, dispatch and otherwise, that they grant or give to the most favored connecting line. The privileges and facilities thus acquired open to us a great through line to the Missouri River and the Far West not hitherto possessed, and that should, under almost any circumstances, prove of great and incalculable advantage to every branch of the business of our road.

With a view of more fully and effectually consummating the objects and purposes contemplated by the several parties to the contracts above mentioned, the said contracting parties have effected a negotiation with the Quincy Railroad Bridge Co. for the immediate construction of an iron railway bridge across the Mississippi River, thus connecting by rail their respective depot grounds at Quincy and East Quincy. The work upon this great structure is now in progress, and it is expected that it will be ready for the passage of trains before the close of another year. Upon the completion of this bridge we shall be enabled to offer to shippers of freight the superior inducements of a direct, through line from Boston, New York and other Eastern cities, to the Missouri River, and *vice versa*, without any transfer or break of bulk, and moreover, we shall thereby avoid the serious expense and detentions hitherto incident to transfers by ferry.

With a still further purpose of promoting and strengthening our business relations with connecting and auxiliary lines, and of securing for our road a large share of the great through traffic of the country, arrangements are in progress for the building of a railway bridge across the Mississippi River, at Keokuk. The accomplishment of this important undertaking, the success of which is already quite assured, places our line without competition or rivalry in direct railway connection with the Des Moines Valley Railroad, thereby affording us easy and favorable access to the vast grain and stock business of Central and Northern Iowa, one of the most productive and prosperous regions of the West.

In successfully consummating the various and extensive business arrangements involved in these several contracts, the directors feel that they are justified in expecting a large and valuable accession to every branch of the business of our road, and a consequent financial prosperity, not heretofore experienced; being fully assured that if the company succeed to and judiciously appropriate all the facilities and benefits contemplated by

those contracts, their most sanguine expectations will be more than fully realized.

The permanent improvements made upon the line throughout the past eighteen months have been of a very general and extensive character; consequently, involving the expenditure of large sums of money. The outlays in this department, upon the Western Division, have been particularly heavy, exhausting not only the entire amount of money provided under the consolidation to equalize that division with the Eastern, but requiring advances largely in excess of the amount thus provided.

Exclusive, however, of the improvements made with this equalization fund, other and important outlays have been made for additional side tracks, buildings, depot grounds and other permanent improvements at various points upon the line, and where they were imperatively demanded by the increasing business requirements of the road. Among these are embraced the building of eight miles of new side tracks and turnouts, (nearly all upon the Western Division,) at an expense of $56,000; also, the erection of two engine houses, four passenger depots, three freight buildings, one brick planing shop, four shops for repairing iron, &c., seven water tank buildings, two turn-tables, besides constructing about thirty miles of fences, ballasting several sections of the road, grading for side tracks, and substituting masonry and other permanent structures for those originally temporary, and now gone into disuse.

The large and extensive additions made to each branch of the equipment of the road has, likewise, required correspondingly heavy outlays. The pressing necessity of greatly increasing the rolling stock of the road was duly considered by the Directors, at the period of the organization of this company, and measures were then taken to supply this urgent demand. Accordingly, 21 new first class locomotives have recently been purchased and placed upon the road, and three more are to be delivered at an early day. Six superior and elegant passenger coaches and 324 box freight and other cars have been built at our shops, and other important additions have been made to the equipment, machinery and tools of the road.

Throughout the past year the work of general renewals has probably been prosecuted with more energy, and with a greater degree of thoroughness, than at any previous time. Especial care and attention has been given to the iron and superstructure, and no efforts have been spared to accomplish the removal of everything imperfect or defective, and the substitution of that which is new, substantial and durable. In addition to the usual or ordinary labor of repairing the roadway, the expenditures of general renewals have exceeded the sum of $500,000.

The following will show some of the statistics of these improvements:

	Miles.
New iron put into the track	61
Iron taken out, repaired and replaced	70
New wrought iron chairs	44,000
New cross ties	312,000

Other and somewhat extensive renewals have been made upon the more prominent bridges of the line, irrespective of the construction of several new bridges; among these latter may be mentioned the new first class wrought iron bridge of the Bollman patent, recently erected over the Wea River, west of Lafayette, at a cost of about $50,000; also, another new truss bridge of the Howe pattern, put up upon the Western Division. The renewals of bridges comprise the rebuilding of 1,767 feet of the Howe truss bridge, and 1,285 feet of trestle or stringer bridge, besides other general repairs in the removal of old timber and the substitution of new, including also the covering of several bridges more recently rebuilt.

In consequence of the decay of the oak telegraph poles originally put up upon our road, rendering the line inefficient and unreliable, we have found it necessary to rebuild the entire line from Toledo to Danville, and with a view to economy and durability, we have substituted substantial cedar poles for those removed, and have also placed upon the line an additional galvanized wire. Under an arrangement made with the Telegraph Co., we have recently added (for our own use) another wire from Danville to the Mississippi River, and have also built a new telegraph line over the Keokuk Branch, to Keokuk and Warsaw, a distance of nearly forty miles. With these new and improved facilities, we are now enabled to move our trains with promptness and dispatch, and otherwise materially accelerate and promote all the business operations of the road.

The elevators used by our company at Toledo, with a storage capacity of 1,452,000 bushels, are now in good repair and efficient working condition, and their present management seems to secure the entire confidence and approbation of all doing business with them. Upon the completion of the track now in process of building through Elevator "No. 3," the unloading facilities will be fully equal to 250 cars daily, which in emergencies, can be increased to 400 daily, thus assuring us against delays and detentions in times of a great pressure of business.

Our repair shops upon the line, for the repairs of locomotives and cars, appear well supplied with tools and machinery, and are deemed of sufficient capacity to meet the present wants of the road, without any further material outlay. The facilities afforded at our extensive shops at Toledo are so thorough and complete, as to secure economy as well as great dispatch, in all branches of repairs of cars, and without trenching at all upon this department of operations these shops are now turning out two first class box freight cars daily.

Our business relations with all connecting roads remain very harmonious and satisfactory, affording us assurance of continued and large interchange of business.

The trains have been operated with an almost unvarying regularity throughout the year, and with remarkable exemption from accidents or casualties.

Encouraged by the recent increase of our through passenger business to make still further efforts towards improving and rendering our line attractive to that species of traffic, we have recently made a favorable arrangement for a complete equipment of our whole road with new, spacious and beautiful sleeping cars. These cars will commence running early in the Spring, and it is expected that they will contribute much towards popularizing our route with the traveling public.

Arrangements are now nearly perfected for running two well equipped lines of cars over our road, from Quincy and Keokuk to Buffalo, and also from those points directly through to New York and Boston, without transfer or breaking bulk. Upon the full organization of these lines, we shall be able to offer to shippers facilities for the safe, prompt and efficient dispatch of their business, superior to those of almost any competing line, and such as cannot but prove highly successful in securing for our road, a large if not a preponderating share of the through freight traffic of the country. It is perhaps, needless to add that this line will be owned, controlled and operated by the several railway companies composing the route, and for whose sole benefit it is organized, and will have no connection whatever with those private interest and concerns doing business under various titles of Fast Freight, Through Freight, Express, Despatch, and other lines.

In conclusion the Directors take great pleasure in assuring the shareholders that the condition of the company, at the close of the present fiscal year, financially, as well as in all its working departments, is decidedly better than at any former period in its history. With a policy looking to strict economy and prudence in the operations of the road, together with a careful and judicious employment of all available means for cultivating and encouraging its local business, as well as for securing the important benefits recently acquired under contracts with connecting roads for through business, there are ample and substantial grounds for encouragement and confidence in the future success of our company, and for believing that our investment in it will prove reasonably remunerative.

The equipment of the road consists of 102 locomotives, 47 passenger, 27 mail and baggage, 1,040 box freight, 275 stock, 200 platform, and 150 coal cars. Number of stations, 102. Number of engine houses, 11. Average weight of rail, 59 lbs. The length of road is stated as follows: In Ohio 75.5 miles; in Indiana, 116.9 miles; in Illinois, 221 miles. Length of Keokuk Branch, 41.1 miles. Length of Naples Branch, 4 miles. Length Camp Point to Quincy (leased) 22 miles. Total length of road operated, 520.6 miles.

Cairo and Fulton Railroad.

The annual meeting of the stockholders of this company was held at Little Rock, Ark., on the 6th ult., at which the following gentlemen were elected directors, viz.: To serve for one year—Noyes W. Miner, Edward Cross, sr., Henry C. Ashley, Israel M. Moore. To serve for two years—John G. Roberts, Henry C. Dye, Mason Brayman, Walter C. Whitney, James L. Witherspoon. To serve for three years—Reuben W. Coon, William W. Leverett, William H. Bailhache, George C. Watkins.

The officers for the ensuing year are, M. Brayman, President; E. Cross, sr., Vice President; W. W. Leverett, Secretary; S. H. Tucker, Treasurer; M. Brayman, H. C. Ashley, Geo. C. Watkins, Executive Committee.

The following report of the President has been furnished us for publication:

OFFICE CAIRO AND FULTON RAILROAD CO.,
Little Rock, Ark., May 6, 1867.

To the Board of Directors, Cairo and Fulton Railroad Company:

The President respectfully reports—

The charter of this company bears date January 12, 1853.

The act of congress making donation of lands for this road and its branches, bears date February 9, 1853.

The report of the chief engineer announcing the completion of the location and survey of the line of road from the Missouri line to Texas, bears date September 25, 1854.

The act of the legislature of Arkansas, transferring the donated lands to this company, bears date November 26, 1856.

The first schedules of donated lands were delivered to the undersigned at the general land office in the city of Washington, July 20, 1857, comprising 1,069,229.40 acres; and the second, on June 9, 1859, comprising 46,180,01 acres; the aggregate quantity being 1,115,409.41 acres; leaving a deficiency to be supplied of 40,430.59 acres, which deficiency has been greatly increased, by reason of enormous entries, swamp land grants, and relinquishments in favor of claimants, under various grants and pre-emption laws of the nation and state.

On November 1, 1859, the company conveyed by deed of trust to Mason Brayman, John Wilson and John Moore, all its lands and property acquired or to be acquired, to secure payment of five millions of dollars of seven per cent., twenty-five years bonds, to be issued for the construction and furnishing the railroad of the company.

At a meeting of stockholders May 6, 1861, it was "*Resolved*, That owing to the present distracted state of the country, it is useless and unnecessary to go into an election for directors for the official term ensuing; "and that, under provisions of the charter, the directors now in office shall hold over until further action of the stockholders."

On February 9, 1863, the ten years prescribed for the completion of the railroad having elapsed without such consummation, the lands unsold reverted to the general government, under provisions of the original grant.

At a meeting of the board of directors on May 18, 1866, efforts then being made to secure a renewal and enlargement of the original grant, were approved, and their President vested with proper authority to seek that end.

On the 28th of July 1866, it was approved and became a law by an act of congress, which:

1. Renews the former grant for ten years.

2. Enlarges it so as to give ten full sections to each mile of road, instead of six.

3. Gives five addditional miles in width outside the fifteen mile limit, within which odd numbered sections are appropriated sufficient to afford ten full sections to each mile.

4. Reserves all such sections absolutely from entry, pre-emption, or appropriation to any other purpose

It may here be noticed that the donated lands of the Memphis and Little Rock Railroad Company, the Little Rock and Fort Smith Railroad Company, and the Cairo and Fulton Railroad Company of Missouri, which reverted to the United States under the same act of forfeiture, are restored to them, enlarged to ten sections per mile; and this, without effort or cost on their part; but, (thus far,) wholly through the gratuitous service and expenditures of those having charge of the interests of this company. The first two companies above named having been subject to a control supposed to be hostile to the government, a reservation was made with respect to them, withholding the lands accruing to their lines until through their action the objection should be removed. The grant to this company was without such restriction, like objection having been removed by appropriate action of the company in anticipation of the passage of the act.

This act not only revives and confirms the original grant, which gave a width of fifteen miles on each side of the line, within which to find six full sections, or 3,840 acres to each mile, but adds a width of five miles outside and adjacent to each outer line, thus giving twenty miles in width on each side of the central line, from which to make up deficiencies in the original schedules and to add from sections, thus giving the sum of ten full sections, or 6,400 acres to each mile; which amounts to a donation to this company on a line of 301 miles of 1,926,400 acres of land.

The transfer by the state to this company by the act of November 26, 1856, and by the company to its trustees before named, by deed of November 1, 1859, vested the lands as well as all other property of the company, acquired or to be acquired, in the trustees. The trust having remained in full force during the intervening time, the act of congress of July 28, 1866, conforming to existing legal conditions, placed all the lands comprised in that act in the trustees, without any action of the legislature of Arkansas, or of this company. By this it is seen that the board of trustees hold the title to these lands subject only to the reservations and reversions found in the act of congress.

Arrangements now begun, will, it is hoped, be carried into immediate effect, for obtaining at the local offices, certified schedules of all the lands accruing to the company under the late enlarged grant. It is believed that the full quantity, 1,926,400 acres, will be obtained. The integrity of the grant is fully preserved by the law, which declares "that all the lands mentioned in this act, and hereby granted, are hereby reserved from entry, pre-emption or appropriation to any other purpose than that herein contemplated for the said term of ten years from the passage of this act." This withdrawal being absolute under a law of congress, all attempts to pervert any of these lands to other uses, by entries or otherwise, will be vain; and if any such entries shall be found to have been made, proper steps will be taken to set them aside; that all the lands thus granted and reserved within twenty miles of the surveyed and recorded line, on each side, may be sacredly applied to lawful uses.

This company was unfortunate with respect to its first schedule of donated lands. Efforts to procure a grant from congress began soon after the government entered upon a settled policy, as indicated by the grant to Illinois, Kentucky, Tennessee, Mississippi and Alabama, in aid of their great line from the lakes to the ocean. The route from the Missouri boundary to Texas, by way of Little Rock, was sufficiently indicated by the topography and character of the country, to be along the level middle ground between the lowlands on the east and the hill ranges of western Arkansas. Profitting by these natural indications, watching the progress of legislation in congress and here, and following the track of the surveyor, speculators and swamp land agents continued to seize upon land enuring to this grant up to the time when the completion of the survey justified their withdrawal from further entry and spoliation, in September, 1854. Thus arose the deficiency appearing in the schedules made under the first grant, suggesting that caution, as to the future, which induced congress to embody in the act of 1866, a positive reservation from the day of its date, of the lands intended for the construction of this road; and insuring, as before stated, and is anticipated, the full quantity fairly intended to be granted. In the former case, it required the filing of a plat of the surveyed line before the donated lands could be designated, but in this, the central line being of record, and the identical lands known, the act of congress made the selection, *in place*, rendering necessary only the making of certified lists, etc.

The last brief published report of this company was made May 10th, 1860. It can now only be said that the legal organization of the company, in all its departments, has survived the perils and disorders of the intervening time, though in a state of suspended animation, and with the loss of many of its books and valuable papers.

The renewal of the land grant for ten years, and its liberal enlargement may well inspire confidence that this work so indispensable yet so long delayed, can now be consummated. Immediately upon the renewal, efforts were begun and zealously continued, to secure means and make reliable arrangements for entering upon the work of construction. Propositions came from a company of contractors in New York and New Jersey, for building and equipment, to be paid for in lands and bonds of the company, the contractors raising therefrom the necessary cash means. This negotiation gave way to the consideration of a proposition coming from Gen. Fremont and his associates, who had undertaken to consolidate, perfect and build a through line to the Pacific upon a route, including as a necessary link, that portion of our road lying south of Little Rock, being to the Texas boundary one hundred and forty miles.

For the purpose of this negotiation the president visited New York and Washington, but no definite understanding was reached. A purchase of the franchise of the Memphis and Little Rock Railroad had been made, four thousand tons of rails said to have been purchased, and its completion within the year 1867 contracted for; also, the control of the road from the termination of our line through Texas to El Paso, and thence under a Mexican grant to the port of Guyamas on the Gulf of California, secured—a projected line to San Diego on the Pacific being taken in as a part of the general arrangement.

The absolute necessity of bringing in this portion of the Cairo and Fulton Railroad, may at once be seen. Without it, the continuity of the proposed national highway to the Pacific would be broken, and the expected aid of the government and the confidence of capitalists, withheld. It was deemed greatly to the interest of this company and the State of Arkansas, that this magnificent scheme should succeed. Whether we choose to further it by a sale of the franchise, so as to detach that portion of our road, and make it a part of another proprietary interest, or by mere co-operation under provisions of our charter, we were anxious to join in carrying the main purpose into effect. For it is no longer questionable that this southern Pacific line, to which our attention has been so long directed, is far preferable to all other routes across the continent. It is shorter, with easier grades, more direct, through a milder climate, and more free from deep snows than the northern lines. This company has never lost sight of a through line. The hopes of its projectors will not be realized nor its highest usefulness attained until it is made part of a completed operating line connecting the two oceans.

Governed by these considerations, no further terms were demanded in behalf of this company than such as would provide for immediate financial wants, and give assurance of the early beginning of the work of construction. We make it an indispensable condition, sure beyond doubt, that earnest and effective work be done. This secured, all other terms will be easy. Not having sufficient assurance on the point named, no conclusion was reached. Since arriving here, a form of contract has been received for approval and signature; which, not being satisfactory, has been returned for reconsideration. It is hoped that this negotiation yet in progress, will have a favorable result. The people of Arkansas may regard the measure of success yet to be achieved under the contract of the same parties for the purchase and construction of the Memphis and Little Rock Railroad, as an indication of our probable success through like arrangements.

This company has of course made no progress in the work of construction since 1860. There is, therefore, nothing to report, except that its organization is preserved, its line of survey and location as originally established, with a munificent grant of land, which will stand at a sure basis of credit, and go far towards covering its final cost.

For many years the hopes of the people in this portion of the union have been disappointed with reference to their railroads. It is not now intended to make new promises, nor to excite hopes which may again fall. We have learned patience in the school of adversity, and can consent to await the approaching time, when our resources shall rise, when emigration shall flow in to cultivate our inviting fields, and the enormous capital that seeks investment in our railroads, our mines and lands, shall come to our aid. But it may be written down as one of the certain events which are to come, that the Cairo and Fulton Railroad will be built within the ten years prescribed by congress. Recent enquiry demonstrates the encouraging fact that there is abundant capital now ready to be devoted to this purpose, and men to take the work in hand. Ours is recognized as a prominent and feasible line of communication, our resources, as ample, and the state, as a most inviting field for legitimate enterprise. Nothing is now wanting but a full restoration of public tranquility, to bring these things to pass. The men who hold the capital, and on whom we must wait for the means necessary to our work, will not yet aid us. Doubts and distrust lie in the way. Confidence, always of slow growth in pecuniary affairs, is not yet restored. The foundations of society, so recently shaken by the earthquake, do not yet rest firmly. The relations of Arkansas to the Union and her participation in its government are yet to be resumed, and her position as a sovereign state assured. The few months to come, will, it is hoped, settle all disturbing questions. When thus settled, justly and finally, when the states again stand together as equal members of one national union; and we, so recently divided, become, in fact and feeling, what we have ever been by the constitution of our country and under the law, one people, then the way to success in this, our enterprise, will be open and sure.

Respectfully,

M. Brayman, *President.*

Illinois Central Railroad.

The statement of this Company for the month ending May 31, 1867, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	11,537.01 for	$110,763 64
